United States of America

PROCEEDINGS AND DEBATES OF THE 84th CONGRESS, SECOND SESSION

SENATE

TUESDAY, JANUARY 3, 1956

The 3d day of January being the day prescribed by the Constitution of the United States for the annual meeting of Congress, the 2d session of the 84th Congress commenced this day.

The Senate assembled in its Chamber at the Capitol.

RICHARD M. NIXON, of California, Vice President of the United States, called the Senate to order at 12 o'clock meridian.

The Chaplain, Rev. Frederick Brown Harris, D. D., of the city of Washington, offered the following prayer:

O God, our strength and our hope, our shelter from the stormy blasts and our eternal home, Thou dwellest in everlasting light. Now, as the world's light fails, we seek the brightness of Thy presence which the black deeds of evil men can never dim. At the top of the first day's record, at this new session of the forum of a people's will and hope, with contrite hearts reverently would we write: "In the beginning God."

At this high altar of the Nation's life we pray that these servants of the Republic, by the will of the people lifted to high places of state, may be so strengthened by the might of their faith that, scorning expediency, they may match these dangerous days with daring deeds, as with cheerful courage they bear the weight of vast concerns, the sting of criticism, and the drudgery of unapplauded toil. May those who sit in the exalted seats of this historic Chamber speak always with due caution and humility, knowing that their words are not their own, but are heard in all the earth. In these days of destiny may the Members of this body merit the shining crown of the divine approbation: "Blessed are the peacemakers, for they shall be called the children of God."

We ask it in the dear Redeemer's name. Amen.

SENATOR JOHNSON OF TEXAS—CALL OF THE ROLL

Mr. JOHNSON of Texas. Mr. President——

The VICE PRESIDENT. Before recognizing the Senator from Texas, the Chair would like to be permitted to make a brief statement.

The Chair knows that he expresses the heartfelt sentiments of all the Members of this body and of all the American people when he says that we are most happy to see the Senator from Texas back in his accustomed seat, and we wish for him in the years ahead good health and happiness. [Applause.]

Mr. JOHNSON of Texas. Mr. President, I appreciate very much the statement the Vice President has just made about me. No one can know how glad I am again to be able to stand by this desk, in the company of my treasured friends on both sides of the aisle. I am grateful to all of them for their understanding, their patience, and the affection which they expressed during the dark days through which I have journeyed.

Mr. President, I now suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk (Emery L. Frazier) called the roll, and the following Senators answered to their names:

Aiken	Fulbright	McNamara
Allott	George	Millikin
Anderson	Goldwater	Morse
Barkley	Gore	Mundt
Barrett	Green	Murray
Beall	Hayden	Neely
Bender	Hennings	Neuberger
Bennett	Hickenlooper	O'Mahoney
Bible	Hill	Pastore
Bricker	Holland	Payne
Bridges	Hruska	Potter
Bush	Humphrey	Purtell
Butler	Ives	Robertson
Byrd	Jackson	Russell
Capehart	Jenner	Saltonstall
Carlson	Johnson, Tex.	Schoeppel
Case, N. J.	Johnston, S. C.	Scott
Case, S. Dak.	Kennedy	Smith, Maine
Chavez	Kilgore	Smith, N. J.
Clements	Knowland	Sparkman
Cotton	Kuchel	Stennis
Curtis	Langer	Symington
Daniel	Lehman	Thurmond
Dirksen	Long	Thye
Douglas	Magnuson	Watkins
Duff	Malone	Welker
Dworshak	Mansfield	Wiley
Eastland	Martin, Iowa	Williams
Ellender	Martin, Pa.	Young
Ervin	McCarthy	
Frear	McClellan	

Mr. CLEMENTS. I announce that the Senator from Tennessee [Mr. KEFAUVER], the Senators from Oklahoma [Mr. KERR and Mr. MONRONEY], and the Senator from Florida [Mr. SMATHERS] are absent on official business.

Mr. SALTONSTALL. I announce that the Senator from Vermont [Mr. FLANDERS] is absent on official business.

The VICE PRESIDENT. A quorum is present.

LIST OF SENATORS, BY STATES

Alabama.—Lister Hill and John J. Sparkman.

Arizona.—Carl Hayden and Barry M. Goldwater.

Arkansas.—John L. McClellan and J. William Fulbright.

California.—William F. Knowland and Thomas H. Kuchel.

Colorado.—Eugene D. Millikin and Gordon Allott.

Connecticut.—Prescott Bush and William A. Purtell.

Delaware.—John J. Williams and J. Allen Frear, Jr.

Florida.—Spessard L. Holland and George A. Smathers.

Georgia.—Walter F. George and Richard B. Russell.

Idaho.—Henry C. Dworshak and Herman Welker.

Illinois.—Paul H. Douglas and Everett M. Dirksen.

Indiana.—Homer E. Capehart and William E. Jenner.

Iowa.—Bourke B. Hickenlooper and Thomas E. Martin.

Kansas.—Andrew F. Schoeppel and Frank Carlson.

Kentucky.—Earle C. Clements and Alben W. Barkley.

Louisiana.—Allen J. Ellender and Russell B. Long.

Maine.—Margaret Chase Smith and Frederick G. Payne.

Maryland.—John M. Butler and J. Glenn Beall.

Massachusetts.—Leverett Saltonstall and John F. Kennedy.

Michigan.—Charles E. Potter and Patrick V. McNamara.

Minnesota.—Edward J. Thye and Hubert H. Humphrey.

Mississippi.—James O. Eastland and John C. Stennis.

Missouri.—Thomas C. Hennings, Jr., and Stuart Symington.

Montana.—James E. Murray and Mike Mansfield.

Nebraska.—Roman L. Hruska and Carl T. Curtis.

Nevada.—George W. Malone and Alan Bible.

New Hampshire.—Styles Bridges and Norris Cotton.

New Jersey.—H. Alexander Smith and Clifford P. Case.

New Mexico.—Dennis Chavez and Clinton P. Anderson.

New York.—Irving M. Ives and Herbert H. Lehman.

North Carolina.—Samuel J. Ervin, Jr., and W. Kerr Scott.

North Dakota.—William Langer and Milton R. Young.

Ohio.—John W. Bricker and George H. Bender.

Oklahoma.—Robert S. Kerr and A. S. Mike Monroney.

Oregon.—Wayne Morse and Richard L. Neuberger.

Pennsylvania.—Edward Martin and James H. Duff.

Rhode Island.—Theodore F. Green and John O. Pastore.

South Carolina.—Olin D. Johnston and Strom Thurmond.

South Dakota.—Karl E. Mundt and Francis Case.

Tennessee.—Estes Kefauver and Albert Gore.

Texas.—Lyndon B. Johnson and Price Daniel.

Utah.—Arthur V. Watkins and Wallace F. Bennett.

Vermont.—George D. Aiken and Ralph E. Flanders.

Virginia.—Harry Flood Byrd and A. Willis Robertson.

Washington.—Warren G. Magnuson and Henry M. Jackson.

West Virginia.—Harley M. Kilgore and Matthew M. Neely.

Wisconsin.—Alexander Wiley and Joseph R. McCarthy.

Wyoming.—Frank A. Barrett and Joseph C. O'Mahoney.

NOTIFICATION TO THE PRESIDENT

Mr. JOHNSON of Texas submitted the following resolution (S. Res. 150) which was read, considered by unanimous consent, and agreed to:

Resolved, That a committee consisting of two Senators be appointed by the Vice President to join such committee as may be appointed by the House of Representatives to notify the President of the United States that a quorum of each House is assembled and that the Congress is ready to receive any communication he may be pleased to make.

The VICE PRESIDENT. The Chair appoints the Senator from Texas [Mr. JOHNSON] and the Senator from California [Mr. KNOWLAND] members of the committee on the part of the Senate.

NOTIFICATION TO THE HOUSE

Mr. KNOWLAND submitted the following resolution (S. Res. 151) which was read, considered by unanimous consent, and agreed to:

Resolved, That the Secretary inform the House of Representatives that a quorum of the Senate is assembled and that the Senate is ready to proceed to business.

HOUR OF DAILY MEETING

Mr. CLEMENTS submitted the following resolution (S. Res. 152) which was read, considered by unanimous consent, and agreed to:

Resolved, That the hour of daily meeting of the Senate be 12 o'clock meridian, unless otherwise ordered.

ADJOURNMENT TO THURSDAY

Mr. JOHNSON of Texas. I move that the Senate stand in adjournment until Thursday next.

The motion was agreed to; and (at 12 o'clock and 12 minutes p. m.) the Senate adjourned until Thursday, January 5, 1956.

HOUSE OF REPRESENTATIVES

TUESDAY, JANUARY 3, 1956

This being the day fixed, pursuant to the 20th amendment to the Constitution, for the meeting of the 2d session of the 84th Congress, the Members of the House of Representatives of the 84th Congress met in their Hall, and at 12 o'clock noon were called to order by the Speaker, Hon. SAM RAYBURN, a Representative from the State of Texas.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Almighty God, in Thy loving care and wise control are the coming in and the going out of all our days and years.

May we now enter upon this 2d session of the 84th Congress with renewed faith and fortitude, ever mindful of Thy gracious providence and assured of Thy divine sovereignty.

We are not afraid of tomorrow for we have seen yesterday and we love today.

Thou art always regarding with favor those who come unto Thee with a humble spirit and a contrite heart.

We beseech Thee to bless with Thy grace and solicitude our President, our Speaker, our chosen Representatives, and all Government employees.

Grant unto them the guidance of Thy Holy Spirit and a deep and abiding sense of Thy presence as they seek to discharge faithfully their many arduous tasks and responsibilities.

May the anxious and troubled soul of our beloved country and all humanity be filled with the joy of the Prince of Peace in whose name we pray:

Our Father which art in heaven, Hallowed be Thy name. Thy kingdom come. Thy will be done in earth, as it is in heaven. Give us this day our daily bread. And forgive us our debts, as we forgive our debtors. And lead us not into temptation, but deliver us from evil: For Thine is the kingdom, and the power, and the glory, for ever.

Amen.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had adopted the following resolutions:

Senate Resolution 150

Resolved, That a committee consisting of two Senators be appointed by the Vice President to join such committee as may be appointed by the House of Representatives to notify the President of the United States that a quorum of each House is assembled and that the Congress is ready to receive any communication he may be pleased to make.

The Senator from Texas, Mr. JOHNSON, and the Senator from California, Mr. KNOWLAND, were appointed to the above committee on the part of the Senate.

Senate Resolution 151

Resolved, That the Secretary inform the House of Representatives that a quorum of the Senate is assembled and that the Senate is ready to proceed to business.

RESIGNATION AS A MEMBER OF THE HOUSE OF REPRESENTATIVES

The SPEAKER laid before the House the following communication:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., December 21, 1955.

His Excellency AVERELL HARRIMAN,
Governor of the State of New York,
The Executive Chamber, Capitol,
Albany, N. Y.

SIR: I hereby tender to you my resignation as a Member of the House of Representatives in the Congress of the United States from the 22d District of New York, effective midnight, Monday, January 2, 1956.

Respectfully yours,

SIDNEY A. FINE,
Member of Congress.

CALL OF THE HOUSE

The SPEAKER. The Clerk will call the roll to ascertain the presence of a quorum.

The Clerk called the roll, and the following Members answered to their names:

[Roll No. 1]

The SPEAKER. On this rollcall 376 Members have answered to their names. A quorum is present.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

JANUARY 3, 1956.

The honorable the SPEAKER,
House of Representatives.

SIR: A certificate of election in due form of law for the Honorable JOHN D. DINGELL as a Representative-elect to the 84th Congress from the 15th Congressional District of the State of Michigan, to fill the vacancy caused by the death of his father, the late Honorable JOHN D. DINGELL, has been received from the Secretary of State of Michigan, and is on file in this office.

Respectfully yours,
RALPH R. ROBERTS,
Clerk, United States House of Representatives.

SWEARING IN OF MEMBER

Mr. JOHN D. DINGELL appeared at the bar of the House and took the oath of office.

COMMITTEE TO NOTIFY THE PRESIDENT

Mr. McCORMACK. Mr. Speaker, I offer a privileged resolution (H. Res. 344) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That a committee of three Members be appointed by the Speaker on the part of the House of Representatives to join with a committee on the part of the Senate, to notify the President of the United States that a quorum of each House has assembled and Congress is ready to receive any communication that he may be pleased to make.

The resolution was agreed to.

The SPEAKER. The Chair appoints as members of the committee on the part of the House to join with a committee on the part of the Senate to notify the President of the United States that a quorum of each House has been assembled and that the Congress is ready to receive any communication he may be pleased to make the gentleman from Massachusetts [Mr. McCORMACK], the gentleman from South Carolina [Mr. RICHARDS], and the gentleman from Massachusetts [Mr. MARTIN].

NOTIFICATION OF SENATE

Mr. COOPER. Mr. Speaker, I offer a privileged resolution (H. Res. 345) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the Clerk of the House inform the Senate that a quorum of the House is present and that the House is ready to proceed with business.

The resolution was agreed to.

DAILY HOUR OF MEETING

Mr. SMITH of Virginia. Mr. Speaker, I offer a resolution (H. Res. 346) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That until otherwise ordered, the daily hour of meeting of the House of Representatives shall be at 12 o'clock meridian.

The resolution was agreed to.

CERTAIN APPOINTMENTS MADE BY THE SPEAKER SUBSEQUENT TO ADJOURNMENT

The SPEAKER. The Chair lays before the House the following announcement with respect to certain appointments made by the Speaker subsequent to adjournment, which the Clerk will read.

The Clerk read as follows:

The Chair desires to announce that pursuant to the order of the House of August 2, 1955, empowering him to appoint commissions, boards, and committees authorized by law or by the House, he did, on September 1, 1955, pursuant to the provisions of Public Law 742, 83d Congress, appoint as members of the National Monument Commission the following members on the part of the House: Mr. SMITH of Virginia, Mr. ASPINALL of Colorado, Mr. SMITH of Wisconsin, and Mr. WESTLAND of Washington.

And on September 1, 1955, pursuant to the provisions of section 4, Public Law 106, 84th Congress, appoint as members of the Joint Congressional Committee on Construction of a Building for a Museum of History and Technology for the Smithsonian Institution the following members on the part of the House: Mr. CANNON of Missouri, Mr. BROOKS of Louisiana, Mr. JONES of Alabama, Mr. VORYS of Ohio, and Mr. CURTIS of Massachusetts.

And on November 10, 1955, pursuant to the provisions of section 2, Public Law 304, 84th Congress, appoint as members of the Commission on Government Security the following members on the part of the House: Hon. Francis E. Walter, of Pennsylvania; Hon. William M. McCulloch, of Ohio; and the following from private life: Mr. James L. Noel, of Texas; and Hon. Edwin L. Mechem, of New Mexico.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House:

JANUARY 3, 1956.

The honorable the SPEAKER,
House of Representatives.

SIR: I have the honor to transmit herewith a sealed envelope addressed to the Speaker of the House of Representatives from the President of the United States, received in the Clerk's office on August 25, 1955, and said to contain the eighth semiannual report on the mutual security program, covering operations from January 1, 1955, to June 30, 1955.

Respectfully yours,
RALPH R. ROBERTS,
Clerk, United States House of Representatives.

EIGHTH SEMIANNUAL REPORT ON THE MUTUAL SECURITY PROGRAM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 226)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with the accompanying papers, was referred to the Committee on Foreign Affairs and ordered to be printed, with illustrations:

To the Congress of the United States:

I am transmitting herewith the eighth semiannual report on the mutual security program, covering operations from January 1, 1955 to June 30, 1955, in furtherance of the purposes of the Mutual Security Act of 1954.

During this period, there was a marked increase in the free world's economic well-being and defensive strength.

Working in partnership together, the nations of the free world have individually and collectively benefited from the mutual-security program. Their peoples are better fed and better clothed than ever before in this century, and their governments and their boundaries are better protected from external aggression or internal subversion.

In the current world situation, the dollars invested in the mutual-security program have brought greater security to the people of the United States than could the same amount of dollars used in any other manner.

DWIGHT D. EISENHOWER.
THE WHITE HOUSE, *August 24, 1955.*

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

JANUARY 3, 1956.

The honorable the SPEAKER,
House of Representatives.

SIR: I have the honor to transmit herewith a sealed envelope addressed to the Speaker of the House of Representatives from the President of the United States, received in the Clerk's office on October 21, 1955, and said to contain the 36th report to Congress on lend-lease operations covering the calendar year of 1954.

Respectfully yours,

RALPH R. ROBERTS,
Clerk, United States House of Representatives.

LEND-LEASE OPERATIONS, 1954 — MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 221)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with the accompanying papers, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

I transmit herewith the 36th report to Congress on lend-lease operations covering the calendar year of 1954.

An amount in excess of $49 million was realized as the result of collections and credits during the year.

Brazil made the final payment under the lend-lease settlement arrangement of April 15, 1948, and completed the liquidation of that Government's defense aid commitments to the United States under the lend-lease programs. Final payment also was made by Nicaragua under the lend-lease settlement arrangement of September 26, 1951. The Government of Peru signed a lend-lease settlement arrangement with the United States on November 25, 1954, providing for the liquidation of its lend-lease indebtedness.

Various other countries continued to make payments under agreed settlement terms and, as usual, large installments on their accounts were paid by France, the Netherlands, and the United Kingdom.

The report describes the developments during 1954 in the settlement negotiations with Poland and the Soviet Union.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *October 19, 1955.*

ADJOURNMENT UNTIL THURSDAY NEXT

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on Thursday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

RECESS

The SPEAKER. Without objection, the House will stand in recess until 1 o'clock p. m.

There was no objection.

Accordingly (at 12 o'clock and 38 minutes p. m.) the House stood in recess until 1 o'clock p. m.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 1 o'clock p. m.

REPORT OF COMMITTEE TO NOTIFY THE PRESIDENT

Mr. McCORMACK. Mr. Speaker, your committee on the part of the House to join a like committee on the part of the Senate to notify the President of the United States that a quorum of each House has been assembled and is ready to receive any communication that he may be pleased to make has performed that duty. The President requested that the committee state that he would communicate to the Congress a message in writing on Thursday next.

COMMUNICATION FROM ARTHUR FISHER, REGISTER OF COPYRIGHTS

The SPEAKER laid before the House the following communication, which was read and referred to the Committee on House Administration:

DECEMBER 8, 1955.

The Honorable SAM RAYBURN,
The Speaker's Room,
House of Representatives,
Washington, D. C.

DEAR MR. SPEAKER: I take pleasure in returning to you the document of assignment of copyright in the musical composition entitled "Pledge of Allegiance to the Flag" from the Honorable LOUIS C. RABAUT to the Congress of the United States.

The document has been recorded in the official records of the Copyright Office which now indicate the Congress of the United States as the copyright owner of this musical composition.

Sincerely yours,

ARTHUR FISHER,
Register of Copyrights.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. SHELLEY (at the request of Mr. ENGLE), for the balance of the month, on account of illness.

Mr. YATES (at the request of Mr. KLUCZYNSKI), for the balance of the week, on account of illness.

Mr. CEDERBERG (at the request of Mr. BENTLEY), for 2 weeks, on account of death in family.

Mr. HESS (at the request of Mr. JENKINS), on account of illness.

Mr. MACK of Washington (at the request of Mr. TOLLEFSON), for 2 weeks, on account of illness.

THE LATE JOHN DAVID DINGELL

Mr. RABAUT. Mr. Speaker, today our thoughts turn to a beloved colleague who is not with us. JOHN DAVID DINGELL was a close friend of mine who will be sorely missed in this most crucial year in a troubled world.

John was a frail man in physique, but he was a fighter at heart. Never have I known him to hesitate to stand up for what he knew to be right. Never have I known him to compromise with conscience in the interests of expediency. As a member of the Ways and Means Committee, he was a champion of the little people and strove always to see that the low-income families were properly represented on the committee. As a member of the Joint Committee on Internal Revenue Taxation, JOHN DINGELL gave valuable assistance to the Government through his vast knowledge of the Federal tax structure.

John's passing is a loss to his district, his State, and the Nation, and I extend my deepest sympathies to his wife, Grace, and his three children, John, Jr., James, and Julé.

Mr. Speaker, I yield to the distinguished chairman of the Committee on Ways and Means.

Mr. COOPER. Mr. Speaker, I could not fail to embrace this opportunity to raise my voice in brief but very sincere tribute to the life, character, and public service of my warm friend and distinguished colleague, the late Honorable JOHN D. DINGELL, of Michigan. It was my privilege to work very closely with him throughout his period of service here. We worked shoulder to shoulder throughout the years as members of the Committee on Ways and Means. When I had the honor of becoming chairman of that great committee at the beginning of this Congress he ranked next to me. Our associations were very close; always very cordial. We cherished a warm friendship that existed throughout our years of service here together. He was a man who possessed the highest attributes of Christian character and all of the sterling qualities of manhood; a man of great ability and outstanding courage, and a demonstrated devotion to public service. His heart beat in tune with the interest and the welfare of the masses of our people, and he was always zealous in the discharge of his duties as a member of our committee and as a Member of this House. It was my privilege and honor to be appointed a member of the funeral committee that attended his funeral in Detroit and there to see the vast host of warm friends whom he had served so faithfully throughout his period of service here. I join with my colleagues in extending my deepest sympathy to his bereaved widow and other members of the family. He was, indeed, a truly great American and great patriot.

Mr. RABAUT. I yield to our distinguished majority leader.

THE LATE JOHN D. DINGELL: MAN OF FAITH AND COURAGE AND SERVICE

Mr. McCORMACK. Mr. Speaker, Representative JOHN D. DINGELL, of Michigan, died last September but even now—months after—it is difficult for us to reconcile ourselves to the fact he is not with us. We are not unfamiliar here in the House of Representatives with the sudden onslaught of a bereavement it is

difficult for us to face. But for me in the case of JOHN DINGELL, the pain is the deeper because we two enjoyed a kind of partnership of the spirit. This is true not only because we were veterans together in the Halls of Congress. It is true also because there was an understanding between us, in many ways an unspoken understanding, instinctive and genuine, that may have had its roots in our respective backgrounds and that flowered for him as well as for myself in the consummation of great events in which we both played some part. These events had their impact on history.

John represented the 15th Congressional District in Detroit from 1932—through 12 continuous terms in Congress—until his passing Monday night, September 19th; a tribute surely to the esteem in which he was held by his constituents. It was an esteem which many of us shared with the people who elected and reelected him. But on the stage of dedication to the people of America, on the stage of mighty government reform in the public interest, I like to aggrandize to myself the belief that perhaps I knew him most intimately of all.

There were two major motivations in the life of JOHN D. DINGELL, of Detroit—this son of Polish immigrants emerging out of the teeming populations of a great industrial city to a position of leadership and responsibility under our system of government. What were these two driving forces in his life? One was his religious faith—in his case Catholicism—that lived in him and with him every moment of his life. It guided him, it propelled him, it edified him, and he lived by its truths and principles deep in his soul, as good citizens live by the laws and ordinances of their community. This I—his fellow Catholic—was well and proudly conscious of. I derived a sort of strength in my own beliefs from contact with him. I noted how it elevated his perspective and gave him that unique strength that in the long run gives such force and such influence to the unselfish and the sincere servants of the common weal.

The other motivating force in his life was his deliberate, his devoted, his unceasing identification of himself and all his activities with the people whom he served, the public interest generally and the American ideal. Being religious he lacked fear, fear of pioneering, fear of untrod paths in legislation, in Government reform. He lacked fear of entrenched power and entrenched privilege. And he lacked fear of change and fear of dumping into the past and the limbo of the forgotten, the deadweight of archaic but long-established forms and usages that straitjacketed progress and cried out for improvement. A divine providence seems to have created men like JOHN DINGELL—precisely like DINGELL—to meet the challenge of a changing era and master it. Because change, as even the most backward alarmists of the twenties and the thirties now agree, had to come. It had to come. But what men with JOHN DINGELL'S patriotism, his religious depth, and his fierce dedication to the American tradition made possible, was change without doing violence to our free-enterprise system, and without impairing the constitutional structure of our Government. For above his crusading dynamism for moving us out of the mire of the great depression, and above his passion for curing the ills of our time and raising the living standards of the common man, was his orthodox faith in the principles of the Founding Fathers. He was undeviating in his loyalty to the Constitution of the United States and the body of law that grew out of it. JOHN DINGELL would have fought with all his zeal and every ounce of his strength against any radicalism that attacked by so much as one jot or tittle the basic principles of our Government.

With that conservatism and that persistent forward march to improvement there worked in JOHN DINGELL'S soul the free man's loathing for absolutism, dictatorship, communism or fascism, the monolithic state and all the trappings of the Caesars on the left and the Caesars on the right. For this deep and clear-eyed thinking man from Detroit where all races were gathered together, the fantastic and fuzzy race theories of the dictators were but the application of sick ideas to serve the ends of personal power. And these ends were in themselves so sick and so askew and so unscientific and so ill-advised, that they perished in wars that are now recognized as the greatest tragedy of history. Bigotry and dictatorship, going together, hand in hand, had to be swept off the world stage by men of religion and men of faith, by free men.

Among their leaders was JOHN D. DINGELL.

These were the ideas that mattered in the life of the man I eulogize. They expressed themselves on the practical level and they materialized into legislation no responsible and knowledgeable citizen would today dream of removing from the Nation's statute books, no matter how stubbornly they fought against men like DINGELL when this legislation was in process of enactment.

Just as JOHN DINGELL was not a halfway patriot so he was not a halfway legislator. He stood steadfast with the New Deal. Nor did his enthusiasm diminish when those of little faith saw some advantage later in the opposite trend. Rather JOHN DINGELL became as much a devotee of the Fair Deal as he had been a leader in the dynamic days of the New Deal.

He believed and his faith was vindicated.

For 12 years he fought for a national health-insurance plan. He was as unrelenting in this fight as he had formerly been in his advocacy of the securities and exchange reforms, the reciprocal-trade agreements, the National Labor Relations Act, and the social-security program. His horizons encompassed and went beyond this type of legislation. He was always looking years ahead, and a leader in charting the course for a better life for his fellow men.

If the question were asked what were the greatest rewards that came to JOHN DINGELL in his lifetime, I can guess, I think, quite accurately, what his answer might have been. First, I think he would have said, it came to him in the knowledge that he had fought the good fight and never surrendered. He would have said he found his reward in the respect and the affection he read in the eyes of his constituents who again and again elected him to office. I think he would have said, in an extremely moving way, that his reward was especially immense in the esteem in which he was held by Members of this House, in their affection, in their high regard for his character as a gentleman and a colleague. And ever so poignantly and gratefully he would have said that his reward came from the country he loved so devotedly. It was here that he struggled all his life, and almost always on a rising plane of success. He came out of a parochial school where his grounding in basic education had been solid. He informed himself by reading courses in political science and economics. He had worked on a Detroit newspaper and in other fields. And his career found its fullest assertion in politics where he became our associate and our friend. Always the light that marked his path was his religion and the public interest.

They say there is no indispensable man.

Maybe not. But I dread to think what our world and what our country would be like if Almighty God did not out of His eternal regard for the least of us provide the generations with men of the faith and the stature of JOHN D. DINGELL.

To Mrs. Dingell, and her loved ones, Mrs. McCormack and I extend our profound sympathy in their bereavement.

Mr. RABAUT. Mr. Speaker, I yield to the gentleman from New Jersey [Mr. SIEMINSKI.]

Mr. SIEMINSKI. Dear John: I missed you today as the second session of the 84th Congress convened. It seemed only yesterday that your letter welcomed me to the Congress in January 1951. You and Congressman ED HART and Congressman AIME FORAND did so much in those opening days to steer me toward my Committee on Appropriations. You said I would be happy on it. So right you were.

Ofttimes we talked on the House floor. As I recall it, your view was that as we, in legislation, served the best interest of man, we strengthened the Nation and thus the world. Could anything seem simpler?

Your son sits to the right of JOHN MCCORMACK, that battler, as John does you homage. Your boy looks to the right and then to the left in quiet appreciation at those whose kind words are added to those of JOHN MCCORMACK. Your boy looks fit. He has taken your baton, dear friend. He will run the good race you have started bringing added luster to the 48 stars on that field of blue you loved and honored and cherished so much.

Mr. RABAUT. Mr. Speaker, I yield to the gentleman from Ohio [Mr. JENKINS].

Mr. JENKINS. Mr. Speaker, I am glad this fine eulogy has just been delivered by our good and able colleague, the gentleman from Massachusetts [Mr. MCCORMACK], because he has gone thoroughly and completely into the life of a very deserving individual.

JOHN DINGELL came from the ranks of what we call the common people. He knew the problems of the common people and was one of their stanch defenders. He knew what it meant to work and it was his industry and his sympathy with men who work that advanced him in his public career. He was a man with great natural ability. He could discuss intricate public problems with clarity and with conviction.

Unfortunately, ill health overtook him a number of years ago. Really, it was pitiful to see the gallant fight he put up against illness.

As a member of the Committee on Ways and Means, I had a chance to know of his efforts. I have this to say for him. We always knew where he stood and what he was seeking to do. He was thoroughly dependable, a fine American citizen. His distinguished son who is following him as a Member of this Congress has every reason to be proud of his father's work in this distinguished body.

Mr. RABAUT. Mr. Speaker, I yield to the gentleman from Michigan [Mr. MACHROWICZ].

Mr. MACHROWICZ. Mr. Speaker, the passing of our beloved friend and distinguished colleague, JOHN D. DINGELL, has brought much sorrow to all who knew him and to the millions who benefited from the many years of his fruitful and unselfish public service. If there was any characteristic which particularly stood out to mark JOHN DINGELL, I would say it was his intense desire and will to serve his country and his people well, by bringing justice to those who needed it most, the poor, the sick and the underprivileged. He loved to fight for them, to champion their cause, and to make life more bearable for them. It was for that reason that he pioneered in the struggle for social security legislation in this Congress, much of which was either sponsored by him or in which he played an important part in its enactment.

Those of us who were privileged with his close friendship know under what terrific handicaps he was working. He had always been in poor health and it was with a great effort and personal sacrifice that he was able to carry on the important duties of his office. But he had a deep sense of responsibility and a great faith in God to give him the strength and the wisdom necessary to perform his task. I know personally that whenever he was faced with a particularly difficult decision, he always turned to the Almighty God for guidance. And when he was convinced he was morally right, no power on earth was able to swerve him from the determination to stay with that decision.

To me, JOHN DINGELL'S passing was a particularly heavy blow. I had known him and enjoyed his friendship for many years, dating back even to the time before he started his service in Congress. His friendship was one of the richest experiences in my life. From the first day that I became a Member of this great body, over 5 years ago, I looked to him for help. He was more than a friend to me. He guided me through those difficult first years and gave me words of encouragement when they were needed most. I feel proud to have been able to work with him in the fulfillment of his legislative program, and to have been honored by his close friendship.

Outside of his public service, JOHN DINGELL'S greatest interest in life was his family. More than once, he told me that he would not have been able to carry on without his life's companion, his beloved and loving wife, who stood by him and worked with him loyally and tirelessly during his entire public career. He fully understood and appreciated her great sacrifice and devotion.

He was always proud of his children to whom he gave all the advantages in education which he was deprived of, at the same time giving them a fine family life in the values of which he believed so sincerely.

I wish to extend my deep condolences to his widow, Grace, and to his children, John, James, and Julee.

We shall miss the leadership and the guidance of JOHN DINGELL in Congress, but I am confident that his work will be continued in the way he would have wanted it, by his most able and deserving son, JOHN D. DINGELL. He will carry on in the tradition and the pattern of his most distinguished father, who will be long and lovingly remembered by us here in Congress and by the people whom he served so well.

Mr. RABAUT. Mr. Speaker, I yield to the distinguished gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, it was with genuine and deep-felt sorrow that I read in the press of the passing of my good and very dear friend, JOHN DINGELL. He was my friend and I was his friend. At the time of his passing, our length of service in the House of Representatives was about the same although, I believe, JOHN DINGELL came to the House of Representatives shortly before I did. Through my service here, I have become increasingly convinced that to be a Member of this great body is indeed a high privilege, and honor and a pleasure. It is an honor and a privilege because, by-and-large, the Members of this body are persons of capacity. If they are not people of capacity, they do not get here. If they are not people of capacity, they seldom stay here long. Together with capacity they must have integrity, decency, honor, intelligence, and judgment. JOHN DINGELL was one of the men who added much to the standing and the prestige of the House of Representatives. I say also it is a pleasure to serve in this body for many reasons. Probably the best reason is that friendships are made here—friendships that have no concern at all with the center aisle which divides the Republicans from the Democrats—friendships which are little concerned with differing political or economic viewpoints — friendships that transcend all such differences and which in my opinion afford the happiest occasions of our work.

In the years of his better health, JOHN DINGELL and his sons, together with my boy and myself, on occasion were together under very happy circumstances. I know how much he thought of his family, as we all think of our families.

Mr. Speaker, we shall all miss JOHN DINGELL. But, may I say to his boy who succeeds him here: Welcome.

He follows a leader, and he becomes part of a distinguished tradition in this high position in the House of Representatives which I am certain he will uphold with honor and with dignity.

Mr. RABAUT. Mr. Speaker, I yield to my distinguished colleague the gentleman from Michigan [Mr. LESINSKI].

Mr. LESINSKI. Mr. Speaker, I did not have the privilege of knowing Congressman JOHN DINGELL as long as some of my colleagues here, but in the short period that I did know him I experienced something that touched me very deeply. Congressman DINGELL was like a father not only to me but you might say to all America. He never shunned a responsibility. He was feared because with his honesty and integrity and thorough knowledge of problems, he saw through all subterfuges. The passing of JOHN DINGELL leaves a mark in the history of America that will never be forgotten. His extreme loyalty to America and his never-ceasing struggle for the rights of the common man which is typical of Americans of Polish extraction, his deep feeling for not only his family but also for those who have known him and for whom he worked—all of these qualities of JOHN DINGELL make the loss to his family and friends also America's loss. May God's loving hand bless his journey to a well-deserved rest.

His successor in these halls will be his son, JOHN D. DINGELL, JR., who will, we all know, carry on in his father's tradition and be a credit to the people of his district.

Mr. SADLAK. Mr. Speaker, will the gentleman yield?

Mr. RABAUT. I yield

Mr. SADLAK. Mr. Speaker, the untimely death of my good friend and colleague, JOHN DINGELL, came to me as a great shock. It is with a feeling of real personal loss that I pay tribute to a man who served the people loyally and unselfishly for 23 years in this legislative body.

I first became acquainted with JOHN DINGELL in 1938 when I returned to Washington, D. C., as secretary to Congressman B. J. Monkiewicz; together we made a courtesy call at Mr. DINGELL'S office and became good friends from that day on. Later as a Congressman and as a member of the Ways and Means Committee, I had many opportunities to exchange ideas and work with him on legislation. He was a man of conviction and I respected his interest in civic, patriotic, and social matters affecting the welfare of the people. His senior position on this dominant and most important Ways and Means Committee enabled him to do a great deal of good for the benefit of all the people.

Like myself, Mr. DINGELL was of Polish descent, and I have a great admiration for his devotion and pride for the people of Poland. He was extremely proud of that great race and inherited the fighting spirit of those people.

Born in Detroit, Mich., John's early career was illustrative of the possibilities of the average citizen under our form of government. Prior to his con-

gressional years, he worked for a Detroit newspaper as compositor and reporter. At one time, he was engineer for a natural-gas pipeline and later engaged in the wholesale meat business. At the creation of the 15th Congressional District of Michigan in 1932, John was elected its first Representative in Congress, a position he held until his death last fall.

His record and reputation both as a legislator, and as a man, will not be forgotten, but will stand as a symbol for others to follow. Mrs. Sadlak joins me in expressing our deepest sympathy and regrets to Mrs. Dingell and the family.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. RABAUT. I yield.

Mr. ALBERT. Mr. Speaker, JOHN DAVID DINGELL was one of the outstanding Members of this House, as all who served with him well know. He was one of the ablest men of this body. He was one of the most courageous men of this House whenever a matter of principle was involved. He was my friend. I shall miss him. This House will miss him and his country will miss him.

Mr. CHENOWETH. Mr. Speaker, will the gentleman yield?

Mr. RABAUT. I yield.

Mr. CHENOWETH. Mr. Speaker, I wish to join my colleagues in paying tribute to the memory of our departed colleague, JOHN DINGELL. I was indeed saddened when I learned of his passing. While Mr. DINGELL represented a district in Michigan, we in Colorado felt that in many ways he belonged to us. He had gone to Colorado Springs some years ago and after regaining his health had engaged in business in that city, where he made many friends, who mourn his passing.

When I came to Congress I soon became acquainted with JOHN DINGELL and we became close friends. I formed a great admiration for his ability and his knowledge of national issues. I recognized the outstanding service which he was rendering and that he was looked upon as one of the leaders in the House. We had mutual friends in Colorado and JOHN always enjoyed talking about them.

I can recall that JOHN DINGELL maintained his interest in and his love for the West. Whenever any legislation came before this House dealing with irrigation and reclamation projects in Colorado, or other matters of peculiar interest to the West, we always found a champion in JOHN DINGELL. He never lost his love and affection for the people of Colorado. I think at one time he advocated that the Capital of the United States should be moved to Colorado.

Mr. Speaker, the passing of JOHN DINGELL is a great loss, not only to the people of Michigan and his district, but to the entire Nation, and to me personally. I join with my colleagues today in welcoming his son as a Member of this body and I am sure he will follow in the footsteps of his distinguished father.

I wish to extend my sincere sympathy to Mrs. Dingell, and to the other members of the family.

Mr. RABAUT. Mr. Speaker, I yield to the gentleman from Michigan [Mr. HAYWORTH].

Mr. HAYWORTH. Mr. Speaker, immediately upon becoming a Member of this great legislative body, I felt the need for counsel and for guidance. At that time being unaware of the nature of the House I scarcely knew to whom I might appropriately turn. I did not know that the chairman of a State delegation had great responsibility to other Members from his State and also to the House, but fortunately I went first to JOHN DINGELL. I was rather surprised to find that he welcomed me so eagerly and was so anxious to help; as a matter of fact, I was almost embarrassed because of the generosity which he showed toward me; he even made the facilities of his office available to me immediately upon my arrival here in the city shortly after election, so that I had a home and a base of operations, which were most helpful. Throughout the months that followed I went to him again and again and always found a warm welcome and a generous, wholesome spirit of brotherhood.

After serving with John for several months I found that not only was he much beloved by his people in Michigan but also greatly respected and loved by the Members of this House.

It once became necessary for me to do a little research on some of the legislation with which he had been connected some 20 years ago. I found that even as a young Congressman he had made a most vigorous imprint upon the legislative activity of the House at that time.

One of the things for which we may be most grateful to him, however, is that he has given us one of his own blood and spirit to carry on the great tradition which he founded for his district in this House. In years to come I am sure we will all be proud of the contribution of his son, JOHN, as a Member of this House.

Mr. RABAUT. Mr. Speaker, before calling on the last Member to be recognized, I ask unanimous consent that all Members may have permission to extend their remarks in the RECORD on the death, qualities, and fine statesmanship of our former colleague, JOHN DINGELL.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DIGGS. Mr. Speaker, the bereavement which we feel in the loss of our distinguished colleague, JOHN D. DINGELL, SR., is shared by countless leaders and citizens of our country. I had the honor of knowing Mr. DINGELL for many years and observing the impact of his influence through distinctive service. Many people in the 13th Congressional District of Michigan, which I represent, were the beneficiaries of his able legislative stewardship. Mr. DINGELL was very helpful to me when a year ago I first came to Congress as a freshman. I derived much benefit from his counsel. His colleagues, his district, his State, and his country suffer a great loss in his absence. If there is any consolation in his passing, it is that we have high hopes that his magnanimous spirit and his love for humanity will be carried on by his distinguished son and successor, JOHN D. DINGELL, JR.

Mr. EBERHARTER. Mr. Speaker, it is with deep sorrow and a feeling of great personal loss that I rise to pay tribute to the memory of my colleague and friend JOHN DINGELL. I know that these feelings are shared by all of us here, for his courageous spirit, his patience and understanding were an inspiration to all who knew him.

Elected to Congress in 1932 from the then newly created 15th Congressional District of Michigan, he was reelected each successive term. The first 2 years he was a Member of Congress, he served on the House Civil Service Committee, the Insular Affairs Committee, and the Patents Committee, but in 1935 he gave up those assignments to become, as he said, "the first American of Polish extraction to serve on the Ways and Means Committee." He remained on that committee until his death, at which time he was the ranking Democratic member. Besides being a member of the Committee on Ways and Means, he was also a member of the Joint Committee on Internal Revenue Taxation, the Commission on Intergovernmental Relations, and the Joint Committee on Nonessential Federal Expenditures.

JOHN DINGELL was a stanch liberal and throughout his career as a Member of Congress he fought continuously for legislation benefiting the workingman. During his first 4 years of Congress, he was a strong supporter of such important measures as the Securities and Exchange and Reciprocal Trade Agreements Acts—1934, the National Labor Relations—Wagner—Act of 1935, and the original Social Security Act of 1935. In succeeding years he continued the fight to improve the laws and introduce new measures to provide for the welfare of the people.

The many improvements made in the social-security laws over the years were in large part due to the efforts of the gentleman from the 15th District of Michigan. He was the author of many of the amendments which finally found their way into public law. Substantially all of the 1950 amendments to the Social Security Act came from bills originally introduced by JOHN DINGELL.

In recent years he had become associated widely in the public mind with a measure providing for national health insurance. Actually this interest on his part dates back to 1943, when, together with Senators Robert F. Wagner, of New York, and JAMES E. MURRAY, of Montana, he introduced into the House the measure to extend social security coverage known as the Wagner-Murray-Dingell bill. Besides health insurance, this bill also would have provided for the extension of social security to some 15 million American citizens not covered by previous acts, old age and disability benefits ranging up to $120 a month, and additional unemployment benefits. This measure has been supported by Mr. DINGELL during every Congress since 1943, and has received the enthusiastic support of the A. F. of L. and CIO, but has never reached the floor for a vote.

A review of his legislative record would of necessity have to include his outstanding achievements in the area of taxation. He was a firm believer in the economic theory of taxation on the basis of ability to pay and was always the first to speak

out in opposition when it appeared that the progressive tax structure might be threatened. He was one of the most vocal antagonists of the tax-reduction bill of 1947, and voted against both versions, on the basis that it was not an equitable system of tax reduction. He was particularly opposed to the manufacturers' excise tax, believing that it was an attempt to foist upon the American consumer nothing more than a concealed sales tax in its worst form.

I had the privilege of serving for a good many years on the same committee with JOHN DINGELL, and of observing at first hand the qualities that made him such a great legislator. He always carefully studied the legislation before the committee, and never failed to express his views both in committee and on the floor of the House, and he was one of those rare individuals who possessed both the courage to carry on a never-ending fight for the ideals in which he believed, and yet also showed a willingness to compromise when it became obvious that his goals could not be attained at that particular time. He realized that it is not always possible to achieve the ideal solution to a problem immediately, that there are times when one has to accept something less—a step toward the ultimate goal one is seeking. This he was willing to accept for the moment, but he would never once forget the real aim for a substitute.

The mere fact that JOHN DINGELL was a Member of Congress for so many years is enough to set him apart as being an unusual person, of course, but there is something much more distinctive about this man than simply his tenure in office or his political ability. He was a true statesman of the highest caliber. He possessed the intelligence to grasp and understand the most technical phases of legislation, the interest, wisdom, and courage to tackle very difficult problems, and the Christian love and depth of understanding to know and feel the problems that confront human beings.

Too often human values get lost in the shuffle when we become embroiled in the tremendous task of legislating for 160 million Americans, and we may tend to look at a tax-revision bill or a social-security bill simply in terms of a lot of statistics, or of how much money it is going to mean to the Treasury. It was indeed an inspiration to me to observe a man who was always aware of his tremendous responsibility, and whose primary concern was the effect his decision might have on each individual American.

We have lost a good statesman, and we who served with him certainly feel his absence, but we can be grateful that, although he is no longer with us, his contributions and his ideals will remain forever, as a constant reminder of the potentialities of human beings so dedicated to the highest level of social, moral, and political principles.

It is most appropriate that we today pay verbal tribute to one who has given so much to humanity; but I believe the greatest tribute we can pay to JOHN DINGELL lies not in the realm of spoken praise, but in ourselves pursuing the ideals for a better world for which he so valiantly fought.

Mrs. GRIFFITHS. Mr. Speaker, words do not come easy for me in paying tribute to the life and work of the late JOHN DINGELL.

It was my privilege to have known and worked with JOHN DINGELL many years in Michigan before joining him as a Member of Congress. His friendly advice and assistance proved most valuable to me when I entered the House as a freshman Member a year ago.

His courage and steadfastness of purpose were an inspiration to all who knew him. His contribution to American life will be measured with increasing value as the years go by.

If it can be said of any man that he devoted his life to the service of his country, it can surely be said of JOHN DINGELL. His devotion to duty came from the highest precept of public office. The courage he displayed in standing for what he believed to be just stimulated others to positive action.

And may I take this opportunity to welcome his son, Congressman JOHN DINGELL, JR., to this Chamber. We who know Congressman DINGELL have confidence he will ably exemplify the spirit of his beloved father, and will, in his own right, demonstrate a capacity for good works.

Mr. ZABLOCKI. Mr. Speaker, I should like to join my colleagues in paying tribute to the memory of the late Honorable JOHN D. DINGELL, of Michigan. It was a shock to me to learn of his passing last September, when I was home in Milwaukee, and whence I went to attend his funeral in Detroit. His loss will be felt deeply by our Nation.

It was a privilege and honor for me to serve in the House with such a distinguished, hardworking, and conscientious man as the late JOHN DINGELL. For many years, he fought courageously for the interests of our people, and for legislation intended to raise the standard of living throughout the Nation. He was dedicated to high moral, social, and political principles in his spheres of action.

JOHN DINGELL will be missed by his colleagues, and by the people of Michigan whom he served so well and so long. It is our mutual consolation and hope that his son, who has been chosen to represent the people of the 15th district of Michigan, will carry on the work and the ideals of his father in these Halls of Congress.

To our late colleague's family, I extend my deepest sympathy and the prayer that the Almighty Creator may grant him peace in eternity.

Mr. CELLER. Mr. Speaker, I wish to add my voice to the many that have eulogized our distinguished late colleague JOHN DINGELL. I knew him from the time he came to Congress, and learned to have an affectionate regard for him, as I am sure he had for me.

Just as cream rises to the top of the bottle, so he, in a short time, rose and grew in his ability and effectiveness as a Member of the House. He won the admiration of all the Members for his integrity of purpose, high aims, exemplary character, and excellence in parliamentary procedure. He rendered excellent service as a ranking member of the Ways and Means Committee. His words on the floor of the House always carried conviction.

Unfortunately, in the last few years, illness pursued him. May we say that the Good Lord wished to see an end to the suffering he endured and bestowed upon him an endless sleep. Even when suffering with pain, he insisted on coming to committee meetings and to the floor of the House. He bore his pain unflinchingly and uncomplainingly. He was indeed a stoic.

JOHN DINGELL's constituents loved him and honored him, and returned him to office many times. They placed upon him this accolade of distinction for having the courage of his convictions and for his devoted service. He is now succeeded by his son who, I am sure, will walk in the paths hewn out for him by his revered father. Like father, like son. The mantle of his office now falls upon him. From what I have already seen and know about him, he will keep the memory of his father alive in this House by distinguished service, honor and integrity.

Mr. ROONEY. Mr. Speaker, I was very much saddened when I learned of the passing of our good friend, the Honorable JOHN DAVID DINGELL, of Michigan, and take this opportunity to add my voice to those who have expressed such deserving tributes to the memory of our distinguished departed colleague.

JOHN DINGELL represented the 15th Congressional District in Detroit, Mich., from 1932 until his passing on September 19, 1955. His long continuous service is indeed a splendid tribute to the esteem in which he was held by his constitutents. During all those years he stood out as a champion of the little people and on every occasion fought valiantly to protect their rights. John possessed a fine Christian character and never wavered in his devotion to duty or at any time sacrificed principle for expediency.

I am proud to say that I had the privilege of knowing John quite well and one year traveled in Europe with him and his good wife. Despite the fact that he had been ill for a number of years he always had a kind word and a gracious smile for everyone, and it was a joy and inspiration to be in his presence. He had a great gift for knowing how to make friends and above all how to retain them.

During JOHN DINGELL'S distinguished career in this body he made many substantial contributions to good government and as a member of the Ways and Means Committee rendered valuable service as an authority on our Federal tax structure. His passing is a tragic loss to his district, his State, and our country. His capable and distinguished young son who follows him as a Member of Congress has every reason to be justly proud of his father's splendid record as a public servant.

I shall always miss JOHN DINGELL. I extend my sincere sympathy to his beloved wife and children in their great bereavement.

Mr. MILLS. Mr. Speaker, I would like to join with other Members of the House in expressing a tribute to an honored and esteemed colleague, JOHN D. DINGELL, of the 15th Congressional District of Michi-

gan, who passed away on September 19, 1955.

The details of my beloved friend's distinguished career, his long record of accomplishments, have been recalled to mind by those who have preceded me this afternoon. I would like to join in the remarks of those members of the House who have so ably lauded the record that our departed colleague left as a stirring monument to his long and creative service in Congress. To their remarks I would like to add the view that the influence of JOHN DINGELL will be reflected in forward-looking social and economic legislation that may pass the Congress in the decades ahead.

I would not give this sad occasion appropriate recognition if I were not to express my great feeling of personal loss over the passing of my beloved and distinguished friend. The years of our mutual service in the House of Representatives, on the Committee on Ways and Means, and on the other groups on which we mutually served resulted in a warm personal friendship between us. During our association I learned not only to recognize his great foresight as a legislator and statesman but I also learned to esteem him as a friend and be honored by his friendship.

The people of America, his beloved family, and his colleagues in the Congress have sustained a great loss in the passing of JOHN DINGELL, of Michigan, but we have each gained an inspiring record of achievement to use as a personal goal.

Mr. RHODES of Pennsylvania. Mr. Speaker, I would like to add my voice to the beautiful hymn of tribute paid to the late JOHN DINGELL by his colleagues in the Congress.

JOHN DINGELL was an honorable and courageous man who was thoroughly dedicated to the needs and desires of the average American. In his 23 years of distinguished service in the House of Representatives he provided outstanding leadership in the fight for social security, the National Labor Relations Act, national health insurance, and other New and Fair Deal reform measures.

He carried on the fight for liberal legislation despite a lingering illness which caused him untold pain and suffering. But JOHN DINGELL never permitted his own suffering to interfere with his legislative goals. I was always proud to have him as a friend as well as a brother member of the International Typographical Union.

JOHN DINGELL was a true statesman, endowed with the ability of relating complex legislation to the needs of people which he so sympathetically understood. His high ideals and sincerity of purpose were a source of inspiration to his fellow Members who respected and admired him. He will be sorely missed in the crucial days ahead.

We welcome his son, JOHN D. DINGELL, who has been chosen to carry on the work so nobly advanced by his distinguished father. To our late colleague's wife and children I extend my deepest sympathy in their great loss.

Mr. RABAUT. And now, Mr. Speaker, it is my privilege to ask his son to take the floor, the son of a worthy sire and a son who carries his father's name, a son who succeeds to his father's place by the free will of the free people of his district in Michigan, JOHN DINGELL, JR.

Mr. DINGELL. Mr. Speaker, I am deeply touched by this tribute paid to my beloved father and the respect and affection in which he was held by all of his brother Members of the House, without regard for political creed. I shall always remember and treasure this day.

My father loved and respected the House and all its Members. If I can be half the man my father was I shall feel I was a great success.

On behalf of my dear mother, and my brother and sister, and myself, I wish to extend to the Members of the House my deep thanks and gratitude for the splendid tribute that has been paid to my father today.

Mr. RABAUT. Mr. Speaker, I offer a resolution (H. Res. 347).

The Clerk read as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. JOHN D. DINGELL, a Representative from the State of Michigan.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The resolution was agreed to.

THE LATE VERA BUCHANAN

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania [Mr. KELLEY].

Mr. KELLEY of Pennsylvania. Mr. Speaker, words are futile and useless in the face of death. I feel that what I may say today is futile when I announce to the House, this great body, the death of our former Congresswoman from Pennsylvania, VERA BUCHANAN.

She died on November 26, after lingering for 5 months in hospitals. After entering a hospital in June, she never came out of the hospital.

But I am not going to dwell on the valiant fight that Mrs. BUCHANAN put up clear to the end. We all know and realize how she struggled that she might continue her work in this great body.

Mrs. BUCHANAN was conscientious, most conscientious. She literally burned herself up as she performed her duties in this great House of Representatives. She followed in the footsteps of her husband, Frank Buchanan, who served here with distinction for a long time. The Buchanan family and my family were close, intimate friends. We find that within 5 years both have departed this life. She left behind two daughters and some grandchildren.

Mrs. BUCHANAN's vivacity, charm, and wit won for her a place in the hearts of her colleagues and her constituents at home. She was a wonderful mother and a very proud grandmother and a truly wonderful Christian.

My family joins with me in extending to her family our condolences and our sympathy. We hope that she has found the solace and the peace which we all seek in this life but which cannot be found anywhere except in heaven.

Mr. Speaker, I now yield to the gentlewoman from Missouri [Mrs. SULLIVAN].

Mrs. SULLIVAN. Mr. Speaker, I doubt if there is a single Member of this House who did not regard Representative VERA DAERR BUCHANAN as a very special friend. Gracious, kind, gentle, she won friends easily. And she captured our hearts.

As many of the Members know, Congresswoman BUCHANAN and I were virtually inseparable during sessions of Congress. We had been casual acquaintances over the years while our husbands served here. This grew into a close friendship when we were both thrust into the new roles of Members, rather than as congressional wives. We had so much in common, and found ourselves so congenial, that we dared to put our friendship to the test of sharing a Washington apartment.

We were both told frequently, by mutual friends, that it was impossible for two women Members of Congress, with all of the problems we would have to take home with us each night involving our own home districts, to live together in perfect friendship.

It was more than understanding and pleasant—it was a delightful experience—because VERA BUCHANAN was one of the most unusual persons I have known. Consideration for others—a habit of doing for others—were so characteristic of her that they made of her not only an outstanding friend, but an unusually conscientious Member of Congress.

Her death on November 26 last, following a valiant battle against cancer, removed from our midst one of those rare personalities which we see so infrequently—one who can bring warmth to any gathering, and pleasant good humor to any conversation.

Vera walked in beauty—she took beauty with her everywhere she went.

We all know how hard she worked as a Member of Congress, how diligently she pursued her efforts on behalf of her constituents. Although in acute physical pain at the time, she refused to rest last spring, or to go to the hospital for a checkup, as so many of us had urged, because of the importance to her district of certain legislation then pending before the House.

She used to tell me how much the Turtle Creek flood-control project on which she was working would mean to families in her district whose possessions periodically would be wiped out by floods. Beautifully dressed as always, she had gone down into the flooded areas the previous fall to walk in the mud and filth left in home after home by the receding waters.

When the Banking and Currency Committee, on which we both served, was considering housing legislation, VERA BUCHANAN translated the technicalities of the legislation into terms that were a whole lot more meaningful to her—and to the families of steel workers in Homestead and Duquesne and McKeesport and Pittsburgh's Southside, and elsewhere in her district. She looked at this legislation in terms of people's homes—the pleasant, happy sort of home she had provided for her husband and their twin daughters through good years and bad, through depression and through

the slim years when her husband was a schoolteacher. These are the things VERA BUCHANAN talked about to me when we discussed the problems of housing legislation and related matters.

She did not care who knew it—she was for the family which had to scrimp and struggle to get along. She had come from such herself.

Behind the vivaciousness, there was a deeply religious nature—a spiritual dedication which never wavered. Mrs. BUCHANAN was a devout Catholic; she practiced her faith without compromise. Her love of God, her true Christian spirit, shone through in everything she did. Truly she walked with God.

And she seemed to have an instinctive knack for coming up with the right answer where human problems were concerned. I was often amazed by the steel-spring sharpness of her mind—it did not seem to go with the almost childlike beauty of this remarkable young grandmother. She had a native shrewdness which more than made up for the lack of extensive formal education—and she served the public exceedingly well in her conscientious, untiring fashion.

To me, she was indeed a sister. Watching her waste away, a little each day, over the long weeks before she went home to McKeesport was an ordeal for me, and also a lesson in human strength. For Vera had the strength not only to prolong life far beyond the expectations of her doctors—she imparted strength to all of us who visited her.

Her death came on a Saturday morning almost 5 months to the day after we had half-carried her from the House floor to the physician's office, from where she had been whisked immediately to the naval hospital at Bethesda. It was a 5-month ordeal against overwhelming odds. But she was determined to get well, and anyone who watched her in that relentless battle to live could not help but believe she would make it.

On the Wednesday morning following her death, VERA BUCHANAN was buried high on a windswept hill commanding a beautiful view of the countryside she loved so well. She was laid to rest beside her husband. They share that resting place together, as they shared so much in life, and as they shared the joy of rearing their lovely twin daughters.

The day on which VERA BUCHANAN was buried was bitterly cold, and a searing wind sent wisps of snow across the cemetery. A tent provided little shelter against the wind, and none against the cold. Yet gathered there were hundreds of people who stayed through the bitter cold to pay final tribute to a friend—not to a political figure, but to a friend.

Many of us in the congressional delegation were impressed by the large number of postal workers and police and firemen in uniform who attended the church services and also the cemetery services. But the explanation was quickly given to us by one of them:

"When Mrs. BUCHANAN's husband was mayor of McKeesport," he said, "she always took a strong interest in the welfare of the city employees. We never forgot her for that. And the postal workers who are here, are here to pay honor to a friend—for they will tell you she was invariably their friend, and they appreciate that kind of friendship."

Mr. Speaker, I can only say as the McKeesport fireman had said, "She was a real friend."

Mr. KELLEY of Pennsylvania. Mr. Speaker, at this time I yield such time as she may desire to the gentlewoman from New York [Mrs. KELLY].

Mrs. KELLY of New York. Mr. Speaker, it is with a very heavy heart that we are gathered here at this time to pay tribute to our former colleagues whom God called to their eternal home while Congress was in recess.

We not only esteemed them as legislators but also as friends dear to us. The Honorable VERA BUCHANAN was one of them. As a legislator she was honest and sincere, a true and able public servant. The State of Pennsylvania lost a most outstanding Representative and her constituents suffered a severe personal loss.

I consider it a privilege to have known Vera and to have worked with her. But now I choose to pay tribute to her for the manner in which she carried out her role in life, that for which we are all created and on which we all must be judged.

VERA BUCHANAN knew the purpose of life. She recognized God as her Creator and endeavored with all her will to fulfill the purpose of her existence; a dutiful wife and mother, and a public servant. These were her obligations.

Her record in the House stands undisputed for the latter. The former roles she lived up to to the best of her ability and assumed her full responsibility therein, the fruition of which can best be portrayed by the example she showed to all wives and to mothers, by leaving with her children the knowledge of the duty of her life well performed.

She was called to her eternal home to join her husband, and for this I share her joy.

To her children I extend sympathy knowing full well their keen loss. To them I say, "Follow the example of your mother and you, too, will fulfill your purpose in life, in your destiny which is for all of us the same, to honor God, to love God, and to be happy with Him forever in the next world."

Mr. KELLEY of Pennsylvania. Mr. Speaker, at this time I yield such time as she may desire to the gentlewoman from West Virginia [Mrs. KEE].

Mrs. KEE. Mr. Speaker, this is a sad time for all of us here in the United States House of Representatives. Our colleague, VERA BUCHANAN, passed away since we last met, and we are deeply grieved.

Who was VERA BUCHANAN, Mr. Speaker? It is not enough to say that she was a Member of Congress, an adoring mother, a fond grandmother, a wonderful wife, and an intelligent human being. She was a Christian lady in a sense that seems almost old fashioned in this day and time. She was never without her sense of goodness. She always walked with God. Her faith and religious devotion were a model to everyone who came in contact with her. If ever one human being born in original sin could be said to be one of His chosen, it was she, yet she walked the earth and suffered, and knew discouragement. But her faith and her God always brought her through.

VERA BUCHANAN's death was a particular blow to me, for our public lives were formed on the same pattern. One week to the day before the death of Judge Kee, Vera's husband, who was a Democratic Member of Congress from Pennsylvania, passed on. Exactly 1 week after I was elected to fill John Kee's place in Washington, the voters in VERA's district returned her to the seat held by Mr. Buchanan. Seven days after I was sworn in as a Representative to Congress, VERA BUCHANAN officially took the oath of office as a Member of this body.

We had known each other before. For years Vera had been working with her husband, as I had been helping mine. It was only natural that our common interest should bring us together in those happier days. Death brought us closer together. Now, it has separated us for a while.

Vera's passing was not unexpected. The last several months of her life were a time of uncertainty and suffering. Every time the telephone rang, I expected it to be a doctor calling to tell me the unhappy news. But still I hoped and prayed. Now the waiting is over. On a gray day in November I boarded a morning train in Washington, headed north to Pennsylvania and a quiet cemetery in a quiet town. There I heard a priest say the last words over the body of my dear friend, and it was all done.

But for a woman like VERA BUCHANAN it is never done, Mr. Speaker. So long as a single man walks this earth who has faith in God, and honesty, truth, and Christian idealism continue as the cornerstones of our way of life, VERA BUCHANAN will live. Although her name and face may someday be forgotten, her strong flame of faith will continue to burn throughout all time.

Mr. KELLEY of Pennsylvania. Mr. Speaker, at this time I yield such time as she may desire to the gentlewoman from Massachusetts [Mrs. ROGERS].

Mrs. ROGERS of Massachusetts. Mr. Speaker, in mourning the passing of VERA BUCHANAN, I think everyone of us feels a deep sense of gratitude for a life so ably and so courageously lived.

I suppose that of all the traits and characteristics of people, perhaps the one I admire the most is courage, the courage to live a religious life, the courage to live in pain uncomplainingly. That is the trait I admired most in my dearly beloved friend, VERA BUCHANAN. I know full well the heartache that was involved in succeeding her husband in Congress as well as all the pride and thanksgiving that she felt for the privilege of taking his seat and serving in the greatest legislative body in the world. I know from my own experience that such a succession is not an easy one. I know that her humor and gaiety often hid pain and heartache, and I loved her for her courage and indomitable spirit. Such was her nobility of spirit that no task was too small nor too great for her to undertake for the people of her district and her State.

So many have spoken of her great ability. Mrs. SULLIVAN's tribute was such a wonderful one that no one can add to it. I feel that her life here with us was a sort of benediction and a tremendous inspiration. All through that life she never forgot her God, she never forgot her work, which she did so ably, she never forgot her family or her friends.

And when she met with a terribly serious automobile accident, when she must have been in agony most of the time, her wonderful spirit helped her to carry on. Among other injuries she suffered a broken leg and was told that she would never walk again. But her reply was, "I will walk again," and she did. I admired her courage, too, in her terribly serious, painful illness. I never heard her complain. Although I knew her well, I had no idea she was seriously ill—I thought she had pneumonia and was getting better—and I did not visit her because I did not want to tire her, to take her strength.

I wish I could express what is in my heart of admiration for her and my love and good wishes to her family. I think that her life was a benediction to them and that they will live their lives as she would like to have them do. I think it is a benediction to us. We will all try harder here to carry on our work in courage and with what ability we have.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the gentlewoman from Illinois [Mrs. CHURCH].

Mrs. CHURCH. Mr. Speaker, it is with a sense of deep personal loss that I rise to pay my tribute to VERA BUCHANAN. She was one of those who proved indisputably though always delicately that that there is a place in public life for a woman, maintaining all of her feminine capacity but dedicated equally with the men who serve here to the performance of her duty.

Mrs. SULLIVAN has spoken so beautifully, so tenderly of VERA BUCHANAN that it seems almost sacrilege for one to attempt to add anything to that tribute. She has said truly that VERA BUCHANAN walked with God. I would like merely to point out also that—perhaps because she did walk with God—she knew superbly how to walk with mankind, too.

She was almost the kindest person whom I have met in the Congress.

I think very few here knew that she and I had a tryst which we kept every year. She had come to Congress succeeding her husband shortly after I had come here in the same way. We both had a great deal to live up to, and we both took signal pride in trying to do so.

On the last day of our first session she looked across the aisle and said, with the rare human understanding which she had, "Why, Mrs. CHURCH, it isn't easy for you to go home, either. Let's go have dinner together first, before we start."

I have thought about that often. I have marveled at the sympathy which could look across that aisle and understand what was in another person's heart. I have wondered at the ready response to a human need which had certainly been unspoken, and I have gained strength from her year by year by keeping a similar tryst on each last day of the Congress.

Last August, when we adjourned, VERA BUCHANAN was not here. She was in the hospital. I sent her a little note and told her that the memory of her kindness continued to build into me a courage and a strength and a faith.

She loved those twin daughters of hers. I would say to them today, in expressing my understanding sympathy, that nothing can take from them that courage and that strength and that faith which was the foundation of their mother's life and which she built into everyone whose life touched hers, even if not intimately.

Mr. Speaker, we gentlewomen of the Congress are proud to have had VERA BUCHANAN on our list; and we know that no one who ever comes from our ranks will bring to her district or to the Congress or to our country more reasons for rejoicing, than she who lived so nobly, so purposefully, and with such great faith in those ideals and those realities which alone have permanence in a changing world.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the gentlewoman from Indiana [Mrs. HARDEN].

Mrs. HARDEN. Mr. Speaker, I know that all Members of the House shared my shock and deep regret at the passing of our beloved colleague, VERA BUCHANAN during the recent recess period. When I first became a Member of the House, I had the pleasure of living in the same building with her and her good husband, and we cherished their friendship. During the 5 years of VERA BUCHANAN's service in the House, I learned to know her well and to know her was to love her and to respect her. She was a valued Member of this body, and she served her district and her State and Nation with distinction.

I, and my husband joins with me, extend our very deepest and sincerest sympathy to the members of her family. May God strengthen and comfort them.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the distinguished gentleman from New York [Mr. MULTER].

Mr. MULTER. Mr. Speaker, on the occasion of this otherwise happy reunion with our colleagues at the opening of the 2d session of the 84th Congress it becomes our sad privilege to participate in eulogies to two departed colleagues, JOHN DINGELL and VERA BUCHANAN. Both of them earned our respect and our love. Both served long and well.

It was my privilege to have served in this House with the late Frank Buchanan, and to have served on the same committee with him. After our hearts were saddened by his departure from this life, we were temporarily gladdened when his place was taken by his charming wife, who succeeded him not only to the Congress but also took his place on the same committee upon which Frank had served. While Frank was with us, I knew VERA as his wife, his companion, and his constant and steady helpmate.

I learned to know VERA BUCHANAN as I had known Frank Buchanan, loyal, hard-working, intelligent, and considerate. I can think of no greater tribute to the two of them than to say that they had a keen sense of devotion to the services of the people of this country—not only of their district but of the country; they did their job intelligently and well and always with the utmost respect for viewpoints that differed from theirs. They vigorously, but pleasantly, pursued their points of view so as to bring to fruition that philosophy of life which they thought was best for this America of ours.

I join in saying "Amen" to all of the beautiful things that have been said so deservedly about our dear departed colleague. May the Lord rest her soul.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the distinguished gentleman from Oklahoma [Mr. ALBERT].

Mr. ALBERT. Mr. Speaker, I join with my colleagues in their expression of great personal loss on the death of my dear friend, VERA BUCHANAN. I had the honor and pleasure of meeting and getting to know the Buchanan family shortly after I first came to Congress.

I have known their lovely twin daughters since they were children.

I served on the Committee on Lobbying Activities with the late Honorable Frank Buchanan who was one of the finest and most conscientious Members of this House. I have been a close personal friend of Mrs. BUCHANAN for about 10 years. I have never known a lovelier, sweeter, or finer person. She was one of the most respected and delightful Members of this House. She was an able Congresswoman, a devoted wife and mother, and a wonderful friend.

To her twin daughters and their loved ones I extend my deepest personal sympathy.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. MCCORMACK] such time as he may desire.

Mr. MCCORMACK. Mr. Speaker, once more death has taken its toll from the House of Representatives, and this time we have the misfortune of losing one of our most energetic, experienced, and public spirited and most-respected Members in the person of Mrs. VERA D. BUCHANAN, of McKeesport, Pa.

Mrs. BUCHANAN was a Member of this House since mid-1951. In August of that year she was elected for the seat left vacant by the death of her husband, the late Frank Buchanan. She was reelected in 1952, and again in 1954. Thus, in a little more than 4 years, she faced the electorate 3 times and 3 times they affirmed their confidence in her. That fact in itself is sufficient testimony for her deserved popularity. But Mrs. BUCHANAN'S accomplishments and good deeds as a public servant cannot be confined to her years in this House. She was a devoted and inspiring aid to her husand while he was serving his three terms in this House. Thus she had had her apprenticeship in congressional affairs long before she became a Congresswoman. And this apprenticeship, as well as her experience in politics, served her well. In the 82d Congress she served on the Committee on Merchant Marine and Fisheries; in the 83d she served on Public Works Committee; and in the 84th

Congress she was a member of the Committee on Banking and Currency. And on all of these committees she showed her keen interest in important issues, and she always tried to understand and evaluate them in terms of public benefit. But her interests were not limited to matters falling within the purview of committees on which she served. Her humanitarian interests touched on many phases of human activity. She was vitally concerned with legislation that had to do with public health and welfare, and with social and educational legislation as well. She never failed in her advocacy of Federal aid to State and local governments where such aid was meant for education and public welfare in general.

Several weeks prior to her death I was speaking in Butler, Pa., about 35 miles outside of Pittsburgh. On my way back to Boston I went over to McKeesport Hospital where Mrs. BUCHANAN was then a patient. Her daughter had previously told me that she was unconscious most of the time, but occasionally regained consciousness. She told me this as I spoke to her from my hotel in Pittsburgh. She told me that if I went over there her mother probably could not see me because of her condition. While I was talking with her she said the doctors just told her that her mother had regained consciousness and that she and her sister were hastening to see her. While she told me that she did not think I could see our late beloved colleague, I felt it was my duty on my way back to Boston to go to the McKeesport Hospital, even if I just entered the hospital, to know that I had gone to the hospital. Fortunately, when I arrived at the hospital I saw her two daughters, and Mrs. BUCHANAN was conscious. I went in to see her, and I was with her for 15 or 20 minutes. When I left I was happy that I saw her. Those eyes of courage that we saw so often on the floor of this House were still shining forth. She sent me a message, when she pouted her lips in a little kiss as I left, a goodby salutation. It was meant for the entire membership of this House. I interpreted the pouting of her lips as she lay in the bed unable to lift herself up, to rise, as a message for me to transmit to all of my colleagues in the House from her. She knew that death was coming. Prior to my visit she had been visited by a Catholic priest who administered the last rites of the Catholic Church; there was no question, she was conscious of the fact. They told me that death was expected almost any day, yet she survived for several weeks after that, her indomitable willpower, that determination of hers that kept her fighting and fighting and living on.

And that was this sweet girl, Mrs. BUCHANAN, who served with us in this body.

Her late husband I knew well also, a very close and valued friend of mine. It is very unusual that a family has both husband and wife serving in this body, and an unusual event in the history of our country. I said to her daughters: "You and your loved ones will derive great consolation in the knowledge that your father and mother both served in the Congress of the United States, honored by the people of their great constituency. Both your parents served with honor and distinction. As the years roll by that will be a great consolation to you and it will be a matter of valuable knowledge and consolation to your children, Frank and Mrs. Buchanan's grandchildren, as they grow up."

I tell this little story of my visit to her; and as I left—that message—she could not speak except in a whisper. What she said was to me not very audible but her daughters more or less could understand. However, she pouted her lips, and that pouting of her lips as I left was message to all of us which today I give to each one of my colleagues, a message coming from that gracious lady who now is dead.

To her loved ones who are left behind I extend my deep sympathy in their bereavement. They can derive, as I said, great consolation in the knowledge that both their father and mother made their marked contribution to the progress of American history.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Speaker, I join with my colleagues to pay this word of tribute and affection as well to the memory of our truly beloved colleague, VERA BUCHANAN, from my State of Pennsylvania.

I would like to add this word of praise to those of my colleague the gentleman from Pennsylvania [Mr. KELLEY]. I knew him to be a close friend of hers and of her late husband; I knew that his wife and Vera were friendly for so long.

Mr. Speaker, as I think of her late handsome and distinguished husband, Frank, with his flowing white hair and distinguished carriage, who graced these halls for so many years, I call attention to an admonition in the Book of Revelations: "Be thou faithful unto death." We Members from Pennsylvania and our friends from other States called him by his nickname, Buck. He was known as Buck in his hometown where he served as mayor. Then Vera came to us. She could enjoy a play on words. Many of us would call Vera: "Hello, Buck; good morning, Buck." She would smile and enjoy that passage of words as only Vera could. A great sense of humor. Such a very little woman, a very charming little lady. She came here to succeed her beloved husband in his career. I can imagine Buck saying to her: "Be thou faithful unto death." Mr. Speaker, Vera was that, as you have heard from her colleagues this day.

There are many nice things that have been said today, there are many more that will be said of her service upon the committees of the House, her interest in the affairs of her State, her people, and conditions. But I think chiefly of VERA because I always felt her quiet and calm and very peaceful presence. She would sit here with her hands folded in her lap smiling and I always felt near her a deep tranquillity of peace in her soul.

I now see her reunited again with her beloved husband. Down through the avenues of time will they go hand in hand as they came to us here.

VERA BUCHANAN came of people from a coal mining town and only we who come from that kind of problem know the blood and the sweat and the tears and the privations and the sufferings of those two wonderful people who rose from a coal patch to this great place in Congress. Truly that is the American story, that is the voice of democracy.

So, Mr. Speaker, when I speak of VERA and of Buck, her man, I say to you that "they are not dead as we who are left shall die. Age shall not weary them, nor the years condemn. At the going down of the sun and in the morning we shall remember them."

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. CORBETT].

Mr. CORBETT. Mr. Speaker, on behalf of my colleague [Mr. FULTON], I ask unanimous consent that he may extend his remarks and that I may have the same privilege.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CORBETT. Mr. Speaker, both Frank and VERA BUCHANAN were friends and neighbors of mine. We traveled the same roads, we rode the same trains, we rode the same planes. We represented here an area, Pittsburgh and Allegheny County, Pa., whose problems were definitely the same. I report to her many friends here that her service to her home community was just as adequate there as it was here.

When we were called together by any of the important social, political, or economic groups of that great metropolitan area, she was faithful in her attendance and capable in her performance.

It has been a very interesting and pleasant thing that the four Members of Congress from that great county who have served here together were, without exception, able to cooperate for the mutual advantage of that county when it was not detrimental to the best interests of these United States. She and Frank before her were most enjoyable colleagues and coworkers.

On behalf of Mr. EBERHARTER, who has suffered the tragic loss of his wife during the past year and who is suffering from an illness himself, and also on behalf of Mr. FULTON, who is temporarily absent, may I say we share with you the love, the affection, and the admiration that we all had for VERA BUCHANAN and for her husband and family and that we, too, want to say "Amen" to the sincere tributes that have been paid this day.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Speaker, it is not given to us to understand the pattern of life. In the frailty of our human limitations we cannot question the nature of its weavings.

When in the evening of my life I came to the Congress, I found awaiting me with a warm handclasp and the spirit of an old and affectionate association reborn in the climate of a new association, a dear and time-tested friend,

Ralph Church. I also found new friends. Frank Buchanan served on the committee to which I was assigned. We were members of the same college fraternity, we became close and fast friends. When word reached me one dinnertime at the Congressional Hotel that Red was dead, it was Vera and Frank who waited with me, wrapping me about with sympathetic friendship and understanding until the first plane left for Chicago and the burial of a faithful dog who for 16 years had enriched with loving service the dear ones of my household. Vera and Frank always were that understanding and that tender.

I left here with the close of the 81st Congress, defeated for membership in the 82d. It was Vera and Frank who came to see me on my departure, and to say, "Barratt, you will be returned and we will be here to greet you back."

Not many months after that Frank Buchanan in the virility of his prime died and he was succeeded in the Congress by Vera. Vera, in the 84th Congress, was assigned to the Committee on Banking and Currency. Nothing could have reached deeper into her heart than to be on the committee where her beloved Frank had served before her with such distinction. Now Vera has passed on, to be reunited in the eternity of timeless love with her Frank.

Also came to say goodby to me and to cheer me with assurance of my soon return Leonor and John Sullivan, John much younger than I, strong in mind and body, a great American on the very threshold of an outstandingly distinguished service in the Congress, as sweet and tender as the breath of a summer's breeze perfumed by its passage over beds of roses. When I returned to the 83d Congress John had ascended to higher realms and in his place, carrying on his work as Vera was carrying on Frank's work, was Leonor.

I have been moved today by the tributes to the sweetness, the charm, the worth and character of VERA BUCHANAN by MARGARET CHURCH, LEONOR SULLIVAN, and the other Congresswomen of whom we are so proud and who daily furnish to this House and to the Nation an inspiring and strengthening epic of a wife's devotion to the memory of her departed mate expressed by the courage with which she carries on the work to which he was dedicated.

Mr. Speaker, I can give to the memory of VERA BUCHANAN no higher tribute, none that she if listening would value more, than just this: As a Congresswoman she was of Frank's pattern, and of the record that she made in this body he would have been most proud. She was inspired in her service among us, as are Mrs. SULLIVAN, Mrs. CHURCH, and the others who have spoken, by the restless drive and never-ceasing urge to do the job here for country, for mankind, and for God as their husbands would have wished it done.

We can never understand the pattern of life. We should not cross the will of God by questioning the nature of its weaving. VERA BUCHANAN has left us a heritage of courage.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I yield to the gentleman from Ohio [Mr. HAYS].

Mr. HAYS of Ohio. Mr. Speaker, VERA BUCHANAN was a very close personal friend of mine both here on the floor and in private life. Vocabulary is inadequate to say the things that one would like to say about her. I think it was a touching tribute to her when I was in Europe this fall that every time our committee would run across someone from home who had recently come over, about the first thing they would ask is whether or not anyone had heard from Vera. She had a heart that was so big that I often wondered how it could be contained in such a small body. She was light-hearted, yet she was courageous; she was cheerful; she could be firm. She was truly a great Christian. She played a little game right up to the last with her family because she knew that she was fatally ill and she kept it from them, or she thought she did. As far as she was concerned, she did not let her daughters know that her condition was as serious as it was. Right up to the end she kept saying that she was going to get well, knowing full well in her heart that she was not. She had a great deal of faith and a tremendous amount of courage. And as I was driving across the wind-swept hills of Pennsylvania to her funeral the immortal words of Longfellow came to my mind that sort of sums up her life. I had not thought of them for perhaps 20 years.

> Life is real, life is earnest,
> And the grave is not its goal;
> Dust thou art, to dust returnest,
> Was not spoken of the soul.

VERA BUCHANAN believed that. May her soul rest in peace.

GENERAL LEAVE TO EXTEND

Mr. KELLEY of Pennsylvania. Mr. Speaker, I ask unanimous consent that all Members who desire to do so may extend their remarks in the RECORD on the life and accomplishments of the deceased Members.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. EBERHARTER. Mr. Speaker, it is with a heavy heart that I speak today of the tragic passing of Representative VERA BUCHANAN, whose district in the Pittsburgh area adjoins mine and whose office in the House Office Building was next door to mine. The relationship was much closer than that, however, and the sense of personal loss for me is really beyond verbal expression.

When her husband, the late Frank Buchanan, came to Congress in 1946, we had already been friends for some years, but our mutual efforts in behalf of the Pittsburgh and Allegheny County area brought us much closer and also brought our families close together. Congressman Buchanan, as all who served with him will remember, was a particularly hard-working Member, conscientious, a student of government. He worked long hours, and often against great discouragements. His vivacious wife always was able to lift his spirits at the end of a hard day on the Hill, and that buoyancy was contagious—all of us could feel it and share in it.

That was the role in life which VERA BUCHANAN enjoyed and intended to pursue for the rest of her life—to help her husband to do the great things he wanted to do as a legislator, to help him by being for him a source of strength and encouragement, and to impart to him the joy which she derived from life and from her role as the wife of Frank Buchanan. His untimely death in 1951 was a shock, a tragedy, which shattered her life and destroyed a fine dream.

Drawing then upon inner strength of great magnitude, VERA BUCHANAN took what for her was an almost frightening step—she who had remained entirely in the background while her husband pursued his career in public service, ran for Congress and was elected to fill her husband's unexpired term. Every speech she made in that campaign was a personal ordeal, for she had not been trained to occupy the speaking platform with ease. Yet she went ahead with this demanding task, determined to carry on as best she could the kind of record which Frank Buchanan had been building in Congress.

As we all know, she fulfilled her responsibilities admirably. She was one of the most conscientious Members this House ever had. She had one of the very best attendance records. She cast her votes only after the utmost deliberation and care. She did not hesitate to seek advice from other Members whose opinions she valued. When she didn't know the answer to a difficult legislative problem, she sought out those who she felt had the answers, or who she believed could guide her in finding the solution for herself.

This is the side of VERA BUCHANAN which so many Members saw on the House floor or in committee. But as long-standing family friends, Mrs. Eberharter and I had many occasions to know and to marvel at the depth and meaning which VERA BUCHANAN attached to the gift of her friendship. She was kind and thoughtful at all times, and unsparing of herself in behalf of all who were her friends.

In sorrow, one learns the meaning of friendship as at no other time. VERA BUCHANAN, I can attest, was, above all, one who always met gloriously the challenge of friendship with true and sincere and genuine human kindness and consideration for others.

I can only say, Mr. Speaker, that in missing now her friendly ways and thoughtful actions, I am but one of a great legion of her friends.

To the Buchanan's lovely twin daughters, Joan—Mrs. William Cavalcante—and Jane—Mrs. John E. Thomas, Jr.—goes the sympathy of every Member of the House. Those of us who were privileged to know both parents as colleagues here in the House and who were privileged to be their friends have been fortunate, indeed, for in both Frank and VERA BUCHANAN we saw the the example of conscientious devotion to duty and unflagging effort. But most of all we were fortunate to have their friendship, a truly precious possession.

Mr. MORGAN. Mr. Speaker, it was with profound regret that I learned of the untimely passing of our dear friend and colleague, the Honorable VERA BUCHANAN, the able and distinguished Representative of the 13th District of Pennsylvania. Mrs. BUCHANAN was the widow of Representative Frank Buchanan, and she was a devoted wife and helpmate to her husband while he was in Congress. She was elected to the 82d Congress on July 24, 1951, to fill the vacancy caused by the death of her husband, and she served in the 83d and 84th Congresses. To my knowledge, this is the first instance in history where a husband and wife have both died while serving as Members of Congress.

Mrs. BUCHANAN represented a neighboring district to my own and I knew her well and admired her. She was loyal, unselfish, and was a devoted mother. Her passing is a distinct loss not only to her community, but to the House of Representatives. I want to join in extending my most sincere sympathy to her family.

Mr. SMITH of Mississippi. Mr. Speaker, those of us in the House who have been working over the years for effective flood control and for navigation improvement could always count on Congresswoman BUCHANAN to give us every possible help and her complete support. She served with distinction as a member of the Committee on Public Works. As a native of the Pittsburgh area, she had seen how devastating the floodwaters of the Allegheny, Monongahela, Youghiogheny, and other tributaries of the Ohio could be in destroying homes, businesses, and the hopes of countless families—how they spread disease and death along with property damage. Her own home city, McKeesport, was subject to frequent floods along with Pittsburgh until the great system of reservoirs was constructed in that area after the 1936 disaster. Now the Pittsburgh area is considered virtually floodproof.

One section of Mrs. BUCHANAN's district is not immune from floods, however, and the Congresswoman worked tirelessly to bring about a flood-control project for the Turtle Creek Valley, where the headquarters plant of the Westinghouse Electric & Manufacturing Co. and where many other major industrial plants are located. Floods there were a constant source of concern to Mrs. BUCHANAN and as a member of the House Committee on Public Works she continually worked for completion of a preliminary survey begun previously under a resolution introduced by her late husband, Representative Frank Buchanan.

When the results of this survey were reported to Congress early last year, Mrs. BUCHANAN then initiated steps to have funds appropriated for the comprehensive survey the engineers recommended, and she carried through on this objective with the single-minded purpose and the dedicated determination of a crusader. Despite discouragements and setbacks, she persevered until sufficient funds were made available by Congress to begin the survey under a schedule which should see its completion within 2 years.

For this, every resident and businessman in the Turtle Creek Valley owes a great deal to Congresswoman BUCHANAN. She had gone into the flooded homes and businesses in the town of Turtle Creek and the neighboring communities which were in the path of the floodwaters, and she never forgot the tragic scenes she had witnessed. As one who worked with her on this project, I can attest to the conscientious manner in which she pursued the goal of assuring an effective flood-control program for the Turtle Creek Valley to protect the residents there from similar scenes of terror and destruction in the future.

When, as, and if that project is completed, it will certainly stand as a monument to a fine woman who was a fine servant of the people whom she represented in the Congress of the United States.

Mr. FULTON. Mr. Speaker, I rise to join my colleagues and as one of the personal friends of Congresswoman VERA BUCHANAN to join in the many praises of her dedicated service while in the House.

VERA BUCHANAN represented the 30th District of Pennsylvania, which is contiguous to my own congressional district, and I have been a good friend for a long period of time of both Congressman Frank Buchanan as well as Congresswoman VERA BUCHANAN.

We in Pittsburgh and Allegheny County remember the tragic death of Congressman Frank Buchanan while serving as a Member of this body, and know with what effort and success VERA BUCHANAN worked to fill the vacancy caused by his death.

VERA BUCHANAN was interested in many issues involving the welfare of the family and the safety of the home, as well as the progress of the younger generation. One particular project on which we Congressmen from Allegheny County all worked, in cooperation with VERA BUCHANAN, was the obtaining of the appropriation for the study for flood-control purposes of the Turtle Creek Valley area, where so many homes had been ravaged and so much industry hurt in recent disastrous floods. It is to VERA BUCHANAN's credit that as a comparatively new Member she was able in such a short time to get action on this flood-control problem.

It is interesting for me to recall Congresswoman VERA BUCHANAN's strong interest and cooperation when, together with the other Congressmen from Allegheny County and our western Pennsylvania area, I helped work out with the local, county, State, and national officials, the free surplus food-distribution program, which has been giving supplementary food to almost 175,000 citizens who have been in economic distress over the past months. She stood strongly for the protection of the homes and the families in insisting that these United States agricultural surplus foods be made available for free distribution upon the certification of need by local surplus food boards, so that the children of the coming generation, even in times of unemployment in our cities, would grow strong and healthy. I remember distinctly that when the program was in danger it was Congresswoman VERA BUCHANAN who sat beside me in an all-day conference with our Allegheny County commissioners and the administrators of the surplus-food program in Allegheny County, in working out the details of administration with our Pennsylvania State officials, as well as with the United States Department of Agriculture officials, so that the program, on a report made to me only yesterday, is running smoothly in Allegheny County, giving assistance to so many needy persons.

It is also pleasant to remember Congresswoman VERA BUCHANAN's strong stand at the conferences at the United States Department of Agriculture when various pressure groups tried to limit unduly the program of surplus food distribution to the needy.

These activities of VERA BUCHANAN were more than she needed to have done to fulfill her duties as Congresswoman, but she gave to the last of her strength in trying to work out these programs and projects, which are of the heart as well as the head.

As we assemble today for our first session, many of her friends have spoken to me, and we all unanimously agree that we miss her hearty smile, warm greeting, and pleasant manner. We in this House extend our sincere sympathy to her family and good friends and hope that she will long be remembered as a sincere, friendly, and hard-working Member of this body as was her husband, Frank Buchanan, before her.

Mrs. ST. GEORGE. Mr. Speaker, I want to add my small tribute to the memory of our colleague, VERA BUCHANAN, the first woman to pass on into the Great Beyond while serving as a Member of the Congress of the United States.

VERA BUCHANAN succeeded her husband and was in every way a most worthy follower and successor. She had gentleness, with firm convictions and loyalties. She was lighthearted and gay, yet she fully appreciated the sorrows of this world and of its people. She was truly feminine, in the best sense of the term, and made her greatest contribution as a woman, a mother, and a devoted wife.

As I think of her, I keep thinking of the words: "Those whom the gods love die young." Young in heart and soul and young in the hearts of those who knew and loved her.

Mr. VANIK. Mr. Speaker, it has been my privilege to know and work with Mrs. VERA BUCHANAN during the 1st session of the 84th Congress. As a member of the Banking and Currency Committee and as a fellow passenger on frequent air trips between Washington and Pittsburgh, I came to know Mrs. BUCHANAN very well. Her clear and unaffected insight into the problems of human affairs as well as her work in this Congress was inspiring.

Her warm and friendly spirit and her patient understanding will be missed by all of her colleagues in Congress.

What more can I say except that I am among those many people who are saddened by her passing.

Mr. RHODES of Pennsylvania. Mr. Speaker, scarcely 5 years ago on a similar unhappy occasion, many of us here today took the floor to pay our respects

to the memory of Frank Buchanan, a distinguished and respected friend and colleague. Frank Buchanan's untimely passing was a profound shock and a great loss to the American people and the Nation. He was a close personal friend of mine and a courageous, conscientious legislator endowed with humility and humanitarianism.

In the course of time it was my privilege to know and respect his wife, VERA BUCHANAN, who had won election and reelection to carry on the fight for liberal principles and legislation to benefit all Americans. VERA BUCHANAN was a truly remarkable woman who nobly advanced the record of service begun by her late husband. In her 4 years of unselfish and devoted service in the House of Representatives VERA BUCHANAN won the heartfelt respect and admiration of her colleagues on both sides of the aisle. Her modesty and her warm personality were unaffected by the transition to public life. VERA BUCHANAN consistently stood for the liberal and humanitarian principles to which her late husband had devoted his life and made significant contributions of her own in the legislative struggles during her service in this Chamber.

While the serious nature of her illness had been known for some months, her premature passing was nonetheless a severe shock. We have lost a sincere, capable, and courageous Member who will be sadly missed by those of us who knew her and valued her friendship.

My deep feeling of sympathy goes out to her daughters and other relatives in their great loss.

Mr. DAGUE. Mr. Speaker, it is with a heavy heart that we come to the contemplation of the untimely passing of our respected and esteemed colleague, the Honorable VERA BUCHANAN. She was a stimulating and winsome person, and we all learned to appreciate her undoubted contribution to this body. As one who engages infrequently in debate myself, I know that a Member's greatest service to his constituents can never be gauged by his eloquency in debate on the floor, and it is with that in mind that we commend our late colleague to the consideration of all those who place value on a complete dedication to the welfare of a Member's constituents, which was her greatest attribute.

Mrs. BUCHANAN was my good and respected friend, and I shall continue to mourn her passing as the loss of one for whom I always had an abiding admiration. My family joins with me in extending to her children and grandchildren our heartfelt condolences as well as our prayerful solicitation for that strength and courage which they so sorely need in this sad hour.

Mr. ZABLOCKI. Mr. Speaker, many deserving and glowing tributes have been paid to our late colleague, VERA BUCHANAN, by Members of Congress. They clearly show the place that she has held in our hearts.

I also want to pay my humble homage to the memory of this remarkable lady who has been called to the far beyond so early in life. Her warm, friendly spirit, and her strong courage will be missed by all of her colleagues in the House of Representatives.

Mrs. BUCHANAN's unselfish and devoted service to her constituents will be greatly missed by the people of her district in Pennsylvania. Her devotion to her husband when he was a Congressman, and the manner in which she carried on after him, have been an inspiration to many of us. She made significant contributions to constructive legislation, and her humanitarian principles were constantly in evidence in her actions and speeches on this floor.

I wish to extend my sincerest sympathy to Mrs. BUCHANAN's family upon their tremendous loss. May they draw some consolation from the knowledge of the fact that we share their sorrow, and from the hope that the Almighty has called her to be among His very own.

Mr. REUSS. Mr. Speaker, sympathy and understanding, joined with a dedicated devotion to duty, were the characteristics of Mrs. VERA BUCHANAN which make her passing such a great loss to all of us in this House, as well as to the citizens whom she so ably represented.

Serving with her on the Banking and Currency Committee, as a freshman Member I benefited greatly from her conscientious example of public service. She gave freely of her warm friendship, and the compassionate qualities of her concern for the welfare of the men and women of her district were an inspiration to all of her colleagues.

The personal loss I feel at VERA BUCHANAN's death, after only 1 year of service together in this House, is a measure of—and a tribute to—the heart and soul of a great American.

Mr. ROONEY. Mr. Speaker, I know all our hearts have been saddened by the untimely passing of our dear friend and distinguished colleague, the Honorable VERA BUCHANAN, of Pennsylvania. It is with deep emotion and a feeling of great sorrow that I pay brief, but nonetheless sincere, tribute to the life and character and public service of such a noble lady.

We know the valiant fight she made during her illness and her courageous efforts to carry on with the duties to which she had dedicated herself in this body. As a member of the House Banking and Currency Committee she was a considerable influence in securing the enactment of legislative proposals beneficial to the people of her district, State, and Nation.

VERA BUCHANAN was a most sincere and conscientious legislator who capably followed the footsteps of her late husband, my good friend, Frank Buchanan, whose memory I shall always cherish.

Vera was always gracious and charming and endeared herself to her host of friends and constituents. I shall always remember with fond recollection her appearance at the third assembly district Democratic organization reception and ball, held last May in my congressional district in Brooklyn. At that time she was in New York with a group of congressional friends on a tour of the city and it was a pleasant surprise when she took the time on such a short trip to come over to Brooklyn and honor us with her presence.

I am sure that I speak not only for myself but for all the Members of this House and her legion of friends when I say that her memory will linger in our hearts forever. My prayer is that her two lovely daughters will be consoled by the fact that her life was dedicated to fulfilling her role as a conscientious mother and carrying on with the fight for liberal and democratic principles to which her late husband had devoted his life. Her daughters and their families have my deepest sympathy in their great loss.

Mr. GAVIN. Mr. Speaker, it was with great sadness we recorded the passing of our beloved friend, VERA BUCHANAN, of McKeesport, Pa.

VERA BUCHANAN joined us in the 82d Congress succeeding her late husband, Frank Buchanan, to represent one of the great industrial areas—not alone in Pennsylvania but in the United States.

She was very close to the people of her district, and she understood the people of her district, which eminently qualified her to so ably represent them. She evidenced a love of people by her good counsel, kind deeds, and useful services. She had the power of understanding and sympathizing with people regardless of whom or what their difficulties may have been. She was a very hard-working, conscientious Representative who took the problems of her people to heart, always manifesting great interest and concern for the welfare of those she represented.

The people of her district loved her and respected her ability which was evidenced by the great popularity she enjoyed.

She was very faithful in the performance of her duties and by her work in the Congress won great respect and the admiration of the membership on both sides of the aisle.

Vera had a legion of friends. In a life such as hers, perhaps the thing most to be admired was her gracious, kindly attitude and the great civic, social, and spiritual contributions she made to the area in which she lived.

It can be said of Vera that she made the best of life as she found it and rejoiced mightily when any little word or deed of hers added to the happiness of any of us. In all things she had charity; tolerance was of her nature. She respected in others the quality she possessed herself—sincerity of conviction and frankness of expression.

She was a firm believer in our American way of life and her great ambition was to hand on to posterity and the generations of tomorrow a greater and finer America than was handed to her.

She was kindly and sympathetic to all; always glad to see one; gracious to everyone; and will be long remembered for her many little acts of kindness that marked her friendship and good will toward all of us who knew her.

So today we mourn her loss. She will be greatly missed by her many friends and by the people she represented. It is with profound sadness we record her passing. We extend to her family our heartfelt sympathy.

Mr. ABERNETHY. Mr. Speaker, I join with my colleagues in expressing the sadness of this House on the passing of Representative VERA BUCHANAN. The House has lost an able and distinguished

Member, and we have lost a vivacious and winsome friend.

VERA BUCHANAN succeeded her husband, Representative Frank Buchanan, who had served long in this House with marked ability. She soon made her own place in this body and her devotion to the interests of her constituents and to the public welfare twice won her reelection.

No matter how heavy the duties became, she never lost the pleasantness and genuine sweetness of character which she brought to all her relationships. Her untimely passing is the greater sorrow to those of us who knew her for the reason that she herself was so vital, so full of the goodness of life. She truly made an art of friendship and all those here who knew her are the better for it.

In our own loss of a useful Member and friend, we extend condolences to her family to whom she gave much love and to her constituents to whom she rendered great service.

I believe it will be appropriate to quote here the lines of Henrietta Huxley:

"Be not afraid, ye waiting hearts that weep,
For God still 'giveth his beloved sleep',
And if an endless sleep He wills, so best."

Mr. SIMPSON of Pennsylvania. Mr. Speaker, all of us who knew and worked with Mrs. VERA BUCHANAN were deeply shocked at the news of her tragic and untimely passing. We counted her as both a friend and as an untiring worker for the principles in which she believed. Our hearts go out to her two lovely daughters, Joan and Jane, in their hour of bereavement.

Though we may have disagreed from time to time on various issues before this House, we respected Vera for her honesty of purpose and close attention to each detail of the complex job involved in representing the people of her district. Her conscientious and thorough-going approach to all matters was an example which each one of us would be well advised to emulate.

Those of us who represent the great Commonwealth of Pennsylvania in this House feel Mrs. BUCHANAN'S loss especially, inasmuch as she was one of our number. I was honored to be one of those selected by the Speaker to attend the memorial services for this gracious lady. It was a beautiful tribute to one who so richly earned and deserved the undying respect and admiration of her many friends and acquaintances.

Mr. MACK of Illinois. Mr. Speaker, it was with great sorrow the Members of the House heard the sad news of the untimely passing of VERA BUCHANAN.

Those of us who knew and admired VERA BUCHANAN as a friend and colleague through the years of her service in the House of Representatives join in expressions of deepest sympathy to the members of her wonderful family in their bereavement.

No one could have more ably served the 30th Congressional District of Pennsylvania than has VERA BUCHANAN. Her unselfish devotion to the things she believed in and her untiring efforts on behalf of her constituents have taken her far beyond the usual line of duty. She was gentle, gracious, and courteous at all times and made a deep and abiding impression on all who knew her.

The passing of such a capable Member of Congress leaves us all with a feeling of deep regret and sorrow. It can truly be said in consolation for the loved ones she leaves behind that she earned the esteem and gratitude of all of us, and that she was a faithful and loyal servant of not only her constituents but of our entire country.

Mr. COOPER. Mr. Speaker, I ask unanimous consent that our colleague the gentleman from Pennsylvania [Mr. EBERHARTER] may extend his remarks in two instances, conveying eulogies on our colleagues, Mr. DINGELL and Mrs. BUCHANAN.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I offer a resolution (H. Res. 348) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. VERA BUCHANAN, a Representative from the State of Pennsylvania.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The resolution was agreed to.

ADJOURNMENT

Mr. KELLEY of Pennsylvania. Mr. Speaker, I move that, as a further mark of respect to the memory of the deceased Members, the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 17 minutes p. m.), under its previous order, the House adjourned until Thursday, January 5, 1956, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS

The following executive communications were submitted subsequent to the adjournment of the 84th Congress, 1st session:

1060. A letter from the Comptroller General of the United States, transmitting a report on the audit of Inland Waterways Corporation for the fiscal year ended June 30, 1954, pursuant to title 31, United States Code, section 841 (H. Doc. No. 269); to the Committee on Government Operations and ordered to be printed, pursuant to House Resolution 340, 84th Congress.

1061. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Farm Credit Administration for the fiscal year ended June 30, 1954, pursuant to title 31, United States Code, section 53, title 31, United States Code, section 67, title 31, United States Code, section 841, and title 12, United States Code, section 1141i (H. Doc. No. 270); to the Committee on Government Operations and ordered to be printed, pursuant to House Resolution 340, 84th Congress.

1062. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated April 11, 1955, submitting a report, together with accompanying papers and an illustration on a review of reports on Tacoma Harbor, port industrial waterway, Washington, requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted on July 18, 1945 (H. Doc. No. 271); to the Committee on Public Works and ordered to be printed with one illustration, pursuant to Public Law 163, 84th Congress.

1063. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated January 25, 1955, submitting an interim report, together with accompanying papers and an illustration, on a review of reports on Sacramento River, Calif., Chico Landing to Red Bluff, requested by a resolution of the Committee on Public Works, United States Senate, adopted on June 1, 1948. It is also submitted in final response to a review of reports on Sacramento River, Calif., Chico Landing to Red Bluff, requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted on September 25, 1945, and a preliminary examination and survey of Sacramento River, Calif., in the interest of bank protection and channel improvements below Red Bluff, authorized by the Flood Control Act approved on May 17, 1950 (H. Doc. No. 272); to the Committee on Public Works and ordered to be printed with one illustration, pursuant to Public Law 163, 84th Congress.

1064. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated May 25, 1955, submitting a report, together with accompanying papers and illustrations, on a beach-erosion-control study of the city of Kenosha, Wis., prepared under the provisions of section 2 of the River and Harbor Act approved on July 3, 1930, as amended and supplemented (H. Doc. No. 273); to the Committee on Public Works and ordered to be printed with illustrations, pursuant to Public Law 163, 84th Congress.

1065. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated May 17, 1955, submitting a report, together with accompanying papers and illustrations, on a cooperative beach-erosion-control study of the shores at Perdido Pass (Alabama Point), Ala., prepared under the provisions of section 2 of the River and Harbor Act approved on July 3, 1930, as amended and supplemented (H. Doc. No. 274); to the Committee on Public Works and ordered to be printed, with illustrations, pursuant to Public Law 163, 84th Congress.

1066. A letter from the Acting Comptroller General of the United States, transmitting a report on the audit of the Tennessee Valley Authority for the fiscal year ended June 30, 1954, pursuant to the Government Corporation Control Act (31 U. S. C. 841) (H. Doc. No. 275); to the Committee on Government Operations and ordered to be printed, pursuant to House Resolution 340, 84th Congress.

1067. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Federal Savings and Loan Insurance Corporation for the fiscal year ended June 30, 1954 (H. Doc. No. 276); to the Committee on Government Operations and ordered to be printed, pursuant to House Resolution 340, 84th Congress.

1068. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Federal home loan banks for the fiscal year ended June 30, 1954, pursuant to the Government Corporation Control Act (31 U. S. C. 841) and the Federal Home Loan Bank Act (12 U. S. C. 1421) (H. Doc. No. 277); to the Committee on Government Operations and ordered to be printed, pursuant to House Resolution 340, 84th Congress.

1069. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Institute of Inter-American Affairs for the fiscal year ended June 30, 1954 (H. Doc. No. 278); to the Committee on Government Operations and or-

dered to be printed, pursuant to House Resolution 340, 84th Congress.

1070. A letter from the Comptroller General of the United States, transmitting a report on the audit of Commodity Credit Corporation for the fiscal year ended June 30, 1954, pursuant to the Government Corporation Control Act (31 U. S. C. 841) (H. Doc. No. 279); to the Committee on Government Operations and ordered to be printed, with illustrations, pursuant to House Resolution 340, 84th Congress.

[*Submitted January 3, 1956*]

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1071. A letter from the Clerk, House of Representatives, transmitting a list of reports which it is the duty of any officer or department to make to Congress (H. Doc. No. 264); to the Committee on House Administration and ordered to be printed.

1072. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Virgin Islands Corporation for the fiscal year ended June 30, 1955, pursuant to the Government Corporation Control Act (31 U. S. C. 841) (H. Doc. No. 283); to the Committee on Government Operations, and ordered to be printed.

1073. A letter from the Register of Copyrights, Library of Congress, relative to returning the document of assignment of copyright in the musical composition entitled "Pledge of Allegiance to the Flag" from the Honorable Louis C. Rabaut to the Congress of the United States; to the Committee on House Administration.

1074. A letter from the director, the American Legion, transmitting the proceedings of the 37th annual national convention of the American Legion, held in Miami, Fla., October 10, 11, 12, and 13, 1955, pursuant to Public Law 249, 77th Congress, approved September 18, 1941 (H. Doc. No. 284); to the Committee on Veterans' Affairs and ordered to be printed, with illustrations.

1075. A letter from the Governor, Farm Credit Administration, transmitting the annual report of the Farm Credit Administration (including the report of the Federal Farm Credit Board), covering the fiscal year ended June 30, 1955, in accordance with the provisions of section 3 of the Federal Farm Loan Act, as amended; paragraph 3, section 4, of the Agricultural Marketing Act, as amended; the Executive order of March 27, 1933, creating the Farm Credit Administration; and section 6 of the Farm Credit Act of 1953 (H. Doc. No. 259); to the Committee on Agriculture and ordered to be printed, with illustrations.

1076. A letter from the Acting Secretary of the Interior, transmitting a report on the Trinity River division, Central Valley project, California, pursuant to section 9 (a) of the Reclamation Project Act of 1939 (53 Stat. 1187) (H. Doc. No. 281); to the Committee on Interior and Insular Affairs and ordered to be printed, with illustrations.

1077. A letter from the Comptroller General of the United States, transmitting the report on audit of the Postal Savings System, Post Office Department, for the fiscal year ended June 30, 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Post Office Department Financial Control Act of 1950 (39 U. S. C. 794c) (H. Doc. No. 282); to the Committee on Post Office and Civil Service and ordered to be printed, with illustrations.

1078. A letter from the Acting Secretary of Agriculture, transmitting the report on cooperation of the United States with Mexico in the control and eradication of foot-and-mouth disease for the month of June 1955, pursuant to Public Law 8, 80th Congress; to the Committee on Agriculture.

1079. A letter from the Assistant Secretary of Agriculture, transmitting a report that there had been no significant developments in the foot-and-mouth program for the month of July 1955, pursuant to section 3 of Public Law 8, 80th Congress (21 U. S. C. 114d).

Also enclosing a copy of a new agreement between the United States and Mexico; to the Committee on Agriculture.

1080. A letter from the Director of Defense Mobilization, Executive Office of the President, transmitting the Statistical Supplement, Stockpile Report for the period January 1 through June 30, 1955, pursuant to section 4 of the Strategic and Critical Materials Stock Piling Act, Public Law 520, 79th Congress, and in accordance with Reorganization Plan No. 3 of 1953; to the Committee on Armed Services.

1081. A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting a report of the Air Force's semiannual report entitled "Research and Development Procurement Action Report" for the period January 1 through June 30, 1955, pursuant to section IV of Public Law 557, 82d Congress; to the Committee on Armed Services.

1082. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting a copy of a classified order relating to Lawrence Frederick Mullen to be entered where the authority contained in section 212 (d) (3) of the Immigration and Nationality Act was exercised in behalf of such alien; to the Committee on the Judiciary.

1083. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting a classified order relating to Amelia Aleksich to be entered where the authority contained in section 212 (d) (3) of the Immigration and Nationality Act was exercised in behalf of aliens; to the Committee on the Judiciary.

1084. A letter from the Secretary of Agriculture, transmitting a report on the study made of the various methods of marketing control which have been or could be made applicable to burley tobacco, pursuant to Public Law 96, 84th Congress; to the Committee on Agriculture.

1085. A letter from the Assistant Secretary of Agriculture, transmitting a report relative to the cooperative program of the United States with Mexico for the control and eradication of foot-and-mouth disease, pursuant to section 3 of Public Law 8, 80th Congress; to the Committee on Agriculture.

1086. A letter from the Secretary of the Interior (Chairman Migratory Bird Conservation Commission), transmitting the report of the Migratory Bird Conservation Commission for the fiscal year ended June 30, 1955, pursuant to section 3 of the act of Congress approved February 18, 1929 (45 Stat. 1222, U. S. C., title 16, sec. 715b); to the Committee on Agriculture.

1087. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation to the Department of Labor for unemployment compensation for Federal employees, for the fiscal year 1956, has been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1088. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation to the Department of Justice for fees and expenses of witnesses for the fiscal year 1956 has been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1089. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the administrative expense authorization of the Commodity Credit Corporation for the fiscal year 1956 has been apportioned on a basis which indicates a necessity for a supplemental estimate of administrative expense authorization, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1090. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation to the Department of Agriculture for salaries and expenses, Forest Service, for the fiscal year 1956, has been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1091. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation to the Tax Court of the United States for salaries and expenses for the fiscal year 1956 has been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1092. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the administrative expenses appropriation of the Public Housing Administration, Housing and Home Finance Agency, has been reapportioned on a basis which indicates a necessity for a supplemental estimate of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1093. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the administrative and nonadministrative expense limitations of the Federal Housing Administration, Housing and Home Finance Agency, have been reapportioned on a basis which indicates a necessity for supplemental estimates, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1094. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that certain appropriations listed have been apportioned on a basis which indicates a necessity for supplemental estimates of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1095. A letter from the Acting Director, Bureau of the Budget, Executive Office of the President, transmitting a report of the appropriations and transfers made to cover the fiscal year 1955 cost of the salary increases granted by Public Laws 68, 94, and 244 of the 84th Congress, pursuant to section 206 (c) of Public Law 123, 84th Congress; to the Committee on Appropriations.

1096. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that salaries and expenses, Office of the Administrator, Housing and Home Finance Agency, have been reapportioned on a basis which indicates a necessity for a supplemental estimate, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1097. A letter from the Acting Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation to the Department of Health, Education, and Welfare for grants to States for public assistance, for the fiscal year 1956, has been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised

Statutes, as amended; to the Committee on Appropriations.

1098. A letter from the Secretary of Defense, relative to submitting 12 reports received from the Departments of the Army, Navy, and Air Force covering 12 violations of section 3679, Revised Statutes, and Department of Defense Directive 7200.1, "Administrative Control of Appropriations Within the Department of Defense," pursuant to section 3679 (i) (2), Revised Statutes; to the Committee on Appropriations.

1099. A letter from the Deputy Administrator, Veterans' Administration, relative to reporting a violation of subsection (h) of section 3679 of the Revised Statutes, occurring at the Veterans' Administration hospital, San Francisco, Calif., pursuant to section 3679 of the Revised Statutes, as amended, subsection (i) (2); to the Committee on Appropriations.

1100. A letter from the Assistant Secretary of the Interior, transmitting a report relative to stating that an adequate soil survey and land classification of the lands to be benefited by the Kirwin unit, Kansas, was completed as part of the investigation required in the formulation of a plan for project development, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

1101. A letter from the Assistant Secretary of the Interior, transmitting a report relative to stating that an adequate soil survey and land classification of lands to be benefited by the Michaud Flats project, Idaho, was completed as part of the investigations required in the formulation of a definite plan for project development, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

1102. A letter from the Acting Secretary of the Interior, transmitting a report relative to stating that an adequate soil survey and land classification of the lands to be benefited by the Talent division, Rogue River Basin project, Oregon, was completed as part of the investigations required in the formulation of plans and estimates and in the determination of project feasibility, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

1103. A letter from the Acting Secretary of the Interior, transmitting a report relative to stating that an adequate soil survey and land classification of the lands to be benefited by the Brewster Flat unit, Foster Creek division, Chief Joseph Dam project, Washington, was completed as part of the investigations required in the formulation of a definite plan for project development, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

1104. A letter from the Assistant Secretary of the Interior, transmitting a report relative to stating that an adequate soil survey and land classification of the lands to be benefited by the Owl Creek unit, Missouri River Basin project, Wyoming, was completed as part of the investigations required in the formulation of a definite plan for project development, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

1105. A letter from the Assistant Secretary of the Interior, transmitting a report relative to stating that an adequate soil survey and land classification of the lands to be benefited by the Bridgeport Bar unit, Foster Creek division, Chief Joseph Dam project, Washington, was completed as part of the investigations required in the formulation of a definite plan for project development, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

1106. A letter from the Administrator, General Services Administration, transmitting a report relative to obligations in excess of allotments under four separate appropriations in the regional office of the General Services Administration at Chicago, Ill.; to the Committee on Appropriations.

1107. A letter from the Chairman, United States Atomic Energy Commission, transmitting, relative to reporting an overobligation of $920 that occurred in an Atomic Energy Commission allotment account on July 18, 1955, pursuant to section 3679 of the Revised Statutes; to the Committee on Appropriations.

1108. A letter from the Chairman, the Commission of Fine Arts, transmitting, relative to reporting that obligations in excess of the quarterly apportionment were incurred during the first quarter of the fiscal year 1956 under the appropriation for the Commission of Fine Arts in the amount of $1,928.66, pursuant to section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1109. A letter from the Administrator, Federal Facilities Corporation, transmitting the report of Federal Facilities Corporation on Synthetic Rubber Operations for the fiscal year ended June 30, 1955, pursuant to the Rubber Act of 1948, as amended; to the Committee on Armed Services.

1110. A letter from the Director, Office of Defense Mobilization, Executive Office of the President, transmitting the semiannual report on the stockpiling program, pursuant to section 4 of the Strategic and Critical Materials Stock Piling Act, Public Law 520, 79th Congress; to the Committee on Armed Services.

1111. A letter from the Administrator, Federal Civil Defense Administration, transmitting the quarterly report of property acquisitions for the quarter ending June 30, 1955, pursuant to subsection 201 (h) of the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

1112. A letter from the Administrator, Federal Civil Defense Administration, transmitting a report on the quarterly report of contributions for the quarter ending June 30, 1955, pursuant to subsection 201 (i) of the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

1113. A letter from the Secretary of the Army, transmitting a report of the number of officers on duty with the Department of the Army and the Army General Staff on June 30, 1955, pursuant to section 201 (c), Public Law 581, 81st Congress; to the Committee on Armed Services.

1114. A letter from the Secretary of the Navy, transmitting a draft of legislation entitled "To authorize the loan of two submarines to the Government of Brazil"; to the Committee on Armed Services.

1115. A letter from the Secretary of the Navy, transmitting a draft of legislation entitled "To provide for the disposition of moneys arising from deductions made from carriers on account of the loss of or damage to military or naval material in transit, and for other purposes"; to the Committee on Armed Services.

1116. A letter from the Deputy Secretary of Defense, transmitting a report on the payment of claims arising from the correction of military or naval records for the period January 1 through June 30, 1955, pursuant to Public Law 220, 82d Congress; to the Committee on Armed Services.

1117. A letter from the Deputy Secretary of Defense, transmitting a report relative to real and personal property of the Department of Defense as of December 31, 1954, pursuant to section 410 of the National Security Act of 1947, as amended; to the Committee on Armed Services.

1118. A letter from the Deputy Assistant Secretary of Defense, transmitting a semiannual report relative to contracts negotiated for experimental, developmental, research, or test projects, and to assist in maintenance of the industrial mobilization base, for the period January 1 through June 30, 1955, pursuant to sections 2 (c) (11) and 2 (c) (16) of Public Law 413, 80th Congress; to the Committee on Armed Services.

1119. A letter from the Acting Secretary of the Army, transmitting a draft of legislation entitled "To Amend the Warrant Officer Act of 1954"; to the Committee on Armed Services.

1120. A letter from the Secretary of the Army, transmitting a draft of legislation entitled "To authorize the Secretary of the Army to give 25 World War II paintings to the Government of New Zealand"; to the Committee on Armed Services.

1121. A letter from the Secretary of the Army, transmitting a report of the number of officers on duty with the Department of the Army and the Army General Staff as of September 30, 1955, pursuant to section 201 (c), Public Law 581, 81st Congress; to the Committee on Armed Services.

1122. A letter from the Director of Research and Development, Department of the Army, transmitting a report on Department of the Army Research and Development Contracts for the period January 1, 1955, to June 30, 1955, pursuant to section 4 of Public Law 557, 82d Congress; to the Committee on Armed Services.

1123. A letter from Chief of Legislative Liaison, Department of the Army, relative to a draft of legislation designed to amend the Officer Personnel Act of 1947 submitted by the Secretary of the Army by letter dated May 27, 1955, and subsequently introduced as H. R. 6662, 84th Congress, and requesting that no action be taken on same; to the Committee on Armed Services.

1124. A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting a report showing the number of officers assigned or detailed to permanent duty in the executive element of the Air Force at the seat of the Government as of the end of the first quarter of fiscal year 1956 (September 30, 1955), pursuant to section 201 (c) of the Air Force Organization Act of 1951 (Public Law 150, 82d Cong.); to the Committee on Armed Services.

1125. A letter from the Executive Secretary, National Advisory Committee for Aeronautics, transmitting a report relative to stating that no contracts were negotiated by the National Advisory Committee for Aeronautics for the period ending June 30, 1955, under sections 2 (c) (11) and (16) of the Armed Services Procurement Act of 1947, pursuant to Public Law 413, 80th Congress; to the Committee on Armed Services.

1126. A letter from the Administrator, Federal Civil Defense Administration, transmitting a report of property acquisitions for the Federal Civil Defense Administration during the quarter ending September 30, 1955, pursuant to subsection 201 (h) of the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

1127. A letter from the Administrator, Federal Civil Defense Administration, transmitting the quarterly report of Federal contributions for the quarter ending September 30, 1955, pursuant to subsection 201 (i) of the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

1128. A letter from the Commandant, United States Coast Guard, transmitting a report setting forth the name of each contractor with whom a contract has been negotiated under section 2 (c) (1) of the Armed Services Procurement Act of 1947, pursuant to Public Law 413, 80th Congress; to the Committee on Armed Services.

1129. A letter from the Administrative Assistant, Secretary of the Interior, transmitting a report showing the amount of money credited to the helium production fund and the amount of disbursements made therefrom during the preceding fiscal year, and the unexpended and unobligated balances on hand in such fund as of the end of such fiscal year for the fiscal year ending June 30, 1955, pursuant to section 3 (c) of the Amendatory Helium Act approved September 1, 1937 (50 Stat., 885; 50 U. S. C. sec. 164); to the Committee on Armed Services.

1130. A letter from the Administrator, General Services Administration, transmitting a report of operations of GSA on activities related to the production of abaca during fiscal year 1955, pursuant to section 7 of Public Law 683, 81st Congress; to the Committee on Armed Services.

1131. A letter from the Acting Commissioner, General Services Administration, transmitting a copy of a notice to be published in the Federal Register of a proposed disposition of approximately 2 million pounds of Chinese hog bristles now held in the national stockpile, pursuant to section 3 (e) of the Strategic and Critical Materials Stock Piling Act (60 Stat. 597; 50 U. S. C. 98b (e)); to the Committee on Armed Services.

1132. A letter from the adjutant general, Veterans of Foreign Wars of the United States, transmitting a report of the proceedings of the Veterans of Foreign Wars of the United States for the fiscal year ended August 31, 1955, including a full and complete report of receipts and disbursements, pursuant to Public Law 630, 74th Congress; to the Committee on Armed Services.

1133. A letter from the Chief of Naval Material, Department of the Navy, transmitting the sixth semiannual report of contracts in excess of $50,000 for research, development, and experimental purposes awarded by the Department of the Navy, for the period January 1, through June 30, 1955, pursuant to Public Law 557, 82d Congress; to the Committee on Armed Services.

1134. A letter from the Attorney General transmitting a report dealing with a review of the voluntary agreements and programs, pursuant to section 708 (c) of the Defense Production Act of 1950, as amended (Public Law 774, 81st Cong., as amended by Public Laws 96 and 429, 82d Cong., and Public Law 295, 84th Cong.); to the Committee on Banking and Currency.

1135. A letter from the Director of Defense Mobilization, Executive Office of the President, transmitting a report on borrowing authority for the quarter ending June 30, 1955, pursuant to section 304 (b) of the Defense Production Act as amended; to the Committee on Banking and Currency.

1136. A letter from the President, Export-Import Bank of Washington, transmitting the 20th semiannual report of the Export-Import Bank of Washington, covering the period January to June 1955, pursuant to section 9 of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking and Currency.

1137. A letter from the Administrator, Small Business Administration, transmitting the fourth semiannual report of the Small Business Administration covering operations between January 1, 1955, and June 30, 1955, pursuant to section 215 of the Small Business Act of 1953 (Public Law 163); to the Committee on Banking and Currency.

1138. A letter from the Administrator, Federal Facilities Corporation, transmitting a report of Federal Facilities Corporation on tin operations for the fiscal year ended June 30, 1955, pursuant to Public Law 125, 80th Congress; to the Committee on Banking and Currency.

1139. A letter from the Acting Comptroller of the Currency, transmitting the 92d Annual Report of the Comptroller of the Currency for the year 1954, pursuant to section 333 of the United States Revised Statutes; to the Committee on Banking and Currency.

1140. A letter from the Secretary of Commerce, transmitting the 32d Quarterly Report on Export Control, pursuant to the Export Control Act of 1949; to the Committee on Banking and Currency.

1141. A letter from the Assistant Secretary of Defense, transmitting the second monthly report on military prime contracts with business firms for work in the United States, for the period from July 1 to September 30, 1955, pursuant to section 6 of Public Law 268, 84th Congress; to the Committee on Banking and Currency.

1142. A letter from the Assistant Secretary of Defense, transmitting a report on military prime contracts with business firms for work in the United States for the period from July 1 to August 31, 1955, pursuant to section 6 of Public Law 268, 84th Congress; to the Committee on Banking and Currency.

1143. A letter from the Secretary of the Treasury, transmitting a report of the Reconstruction Finance Corporation (in liquidation) showing financial statements and remaining assets for the fiscal year ended June 30, 1955, pursuant to Public Law 163, 83d Congress; to the Committee on Banking and Currency.

1144. A letter from the Secretary of the Treasury, transmitting a quarterly report to the Congress on the progress of liquidation of the Reconstruction Finance Corporation to September 30, 1955, pursuant to Public Law 163, 83d Congress; to the Committee on Banking and Currency.

1145. A letter from the Chairman, District of Columbia Redevelopment Land Agency, transmitting the Annual Report, 1955, District of Columbia Redevelopment Land Agency, pursuant to section 15 of the District of Columbia Redevelopment Act of 1945, Public Law 592, 79th Congress; to the Committee on the District of Columbia.

1146. A letter from the President, Commission on Licensure, Healing Arts Practice Act, District of Columbia, transmitting the annual report showing the activities of the Commission for the fiscal year ending June 30, 1955, pursuant to section 47 of "An act to regulate the practice of the healing art to protect the public health in the District of Columbia," approved February 27, 1929; to the Committee on the District of Columbia.

1147. A letter from the Acting Secretary of State, transmitting the 14th semiannual report of the international educational exchange program of the Department of State for the period July 1 to December 31, 1954, pursuant to section 1008, Public Law 402, 80th Congress; to the Committee on Foreign Affairs.

1148. A letter from the Acting Director, United States Information Agency, transmitting semiannual report for the period January 1, 1955, to June 30, 1955, pursuant to section 1008, Public Law 402, 80th Congress; to the Committee on Foreign Affairs.

1149. A letter from the Chairman, Foreign Claims Settlement Commission, transmitting the second semiannual report for the period ending June 30, 1955, pursuant to section 9 of the War Claims Act of 1948 (62 Stat. 1240; 50 U. S. C. App. 2001–2016), as amended, and section 3 (c) of the International Claims Settlement Act of 1949 (64 Stat. 12; 22 U. S. C. App. 1621–1627), as amended; to the Committee on Foreign Affairs.

1150. A letter from the Attorney General, transmitting a report showing the special assistants employed during the period from January 1, 1955, to June 30, 1955, pursuant to section 202, Public Law 195, approved August 5, 1953; to the Committee on Government Operations.

1151. A letter from the Acting Secretary of the Treasury, transmitting an itemized report covering transactions during the fiscal year 1955 for account of the Pershing Hall Memorial Fund, pursuant to the act of Congress approved June 28, 1935 (49 Stat. 426, sec. 3); to the Committee on Government Operations.

1152. A letter from the Administrator, General Services Administration, transmitting a report on contracts negotiated for research and development purposes during the 6-month period ending June 30, 1955, pursuant to section 302 (c) (10), Public Law 152, 81st Congress, as amended; to the Committee on Government Operations.

1153. A letter from the Acting Secretary, Health, Education, and Welfare, transmitting a report covering personal property made available for distribution to educational and public-health institutions under section 203 (j) of the Federal Property and Administrative Services Act of 1949; and all real property disposed of to such institutions under section 203 (k) of that act, in accordance with section 5, Public Law 61, 84th Congress; to the Committee on Government Operations.

1154. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Navy industrial fund, Charleston Naval Shipyard, Bureau of Ships, Department of the Navy, for the period July 1, 1953, to October 31, 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1155. A letter from the Comptroller General of the United States, transmitting a report on Review of Insurance Operations of the Veterans' Administration, January 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1156. A letter from the Comptroller General of the United States, transmitting a report on overpayments to military personnel of the Navy disclosed in the audit of accounts of Navy Disbursing Officers, April 1955, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53, 71), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1157. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Puerto Rico Reconstruction Administration, 1955, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1158. A letter from the Comptroller General of the United States, transmitting a report on the audit of the National Bureau of Standards, Department of Commerce, for the fiscal year ended June 30, 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1159. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Bureau of Reclamation, Department of the Interior, for the fiscal year ended June 30, 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1160. A letter from the Comptroller General of the United States, transmitting a report on the audit of the National Advisory Committee for Aeronautics for the fiscal year ended June 30, 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1161. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Trust Territory of the Pacific Islands, Department of the Interior, for the fiscal years ended June 30, 1953 and 1954, pursuant to the requirements in Interior Department Appropriation Acts, fiscal years 1953 and 1954 (66 Stat. 458 and and 67 Stat. 273); to the Committee on Government Operations.

1162. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Washington National Airport for the fiscal years ended June 30, 1953 and 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1163. A letter from the Secretary, Territory of Alaska, transmitting a certified copy of the Session Laws of Alaska, 1955, Territory of Alaska, including memorials and resolutions; to the Committee on Interior and Insular Affairs.

1164. A letter from the Assistant Secretary of the Interior, transmitting a report pertaining to California Indians showing the funds used to carry out the provisions of this act and the act approved May 18, 1928 (45 Stat. 602), as amended by the act of April 29, 1930 (46 Stat. 259), the act of June 30, 1948 (62 Stat. 1166), and the act of May 24, 1950 (64 Stat. 189), pursuant to section 2 of the act of June 8, 1954, Public Law 391, 83d Congress; to the Committee on Interior and Insular Affairs.

1165. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "To amend section 27 of the Mineral Leasing Act of February 25, 1920, as amended (30 U. S. C., sec. 184), in order to promote the development of phosphate on the public domain"; to the Committee on Interior and Insular Affairs.

1166. A letter from the Acting Secretary of the Interior, transmitting a draft of proposed legislation entitled "To provide for the transfer of the care, operation, and maintenance of Indian irrigation or power project works to water users' associations or irrigation districts organized under State law, and for other purposes"; to the Committee on Interior and Insular Affairs.

1167. A letter from the Acting Secretary of the Interior, transmitting a draft of proposed legislation entitled "To authorize and direct the Secretary of the Interior to convey to David Peters, or to his heirs or assigns, title to land held by the United States in trust for him"; to the Committee on Interior and Insular Affairs.

1168. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "To amend section 1 of the act of March 4, 1915, as amended (48 U. S. C., sec 353)"; to the Committee on Interior and Insular Affairs.

1169. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with Lodges of Hawaii, Ltd., to provide certain services and facilities in the Haleakala section of Hawaii National Park during a 5-year period beginning January 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1170. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with the Everglades Park Co., Inc., to provide in the Flamingo area of the Everglades National Park, Fla., certain services and facilities for a period of 20 years commencing January 1, 1956, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1171. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession permit with the Naches Co., Inc., to provide ski tow and related services for the public at Mount Rainier National Park, during a 9 months' period beginning October 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1172. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with M. C. Gideon to provide certain services and facilities for the public at Wind Cave National Park, during a 5-year period beginning January 1, 1956, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1173. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with Fred Harvey, to provide certain services and facilities for the public at Petrified Forest National Monument, during a 5-year period beginning January 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1174. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with Dr. William N. Henry, to provide medical and hospital services for the public and employees at Grand Canyon National Park, Ariz., during a 5-year period beginning September 16, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1175. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with the Yellowstone Park Co. to provide certain public services and facilities for the public in Yellowstone National Park, Wyo., for a period of 20 years, from January 1, 1956, through December 31, 1975, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1176. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with Northern Consolidated Airlines, Inc., to provide certain services and facilities for the public at Katmai National Monument, Alaska, during a 3-year period beginning January 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1177. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession permit with Mr. and Mrs. Charles W. Roening, to provide certain services and facilities at Waumila Lodge and on Lake Mills in Olympic National Park, Wash., during a 1-year period beginning January 1, 1956, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1178. A letter from the Assistant Secretary of the Interior, transmitting one copy each of certain legislation passed by the Municipal Council of St. Thomas and St. John, the Municipal Council of St. Croix, and the Legislative Assembly of the Virgin Islands, pursuant to section 16 of the Organic Act of the Virgin Islands of the United States, approved June 22, 1936; to the Committee on Interior and Insular Affairs.

1179. A letter from the Assistant Secretary of the Interior, transmitting one copy each of certain legislation passed by the Municipal Council of St. Thomas and St. John and the Legislative Assembly of the Virgin Islands, pursuant to section 16 of the Organic Act of the Virgin Islands of the United States, approved June 22, 1936; to the Committee on Interior and Insular Affairs.

1180. A letter from the Assistant Secretary of the Interior, transmitting one copy each of certain laws enacted by the Third Guam Legislature, 1955 (first regular session), pursuant to section 19 of Public Law 630, 81st Congress, the Organic Act of Guam; to the Committee on Interior and Insular Affairs.

1181. A letter from the Assistant Secretary of the Interior, transmitting one copy each of certain laws enacted by the Third Guam Legislature, 1955 (first regular session), pursuant to section 19 of the Organic Act of Guam; to the Committee on Interior and Insular Affairs.

1182. A letter from the Chief Commissioner, Indian Claims Commission, transmitting a report that proceedings have been finally concluded with respect to *The Fort Peck Indians of The Fort Peck Reservation, Montana, petitioner, v. The United States of America, defendant* (Docket No. 183), pursuant to section 21 of the Indian Claims Commission Act of August 13, 1946 (60 Stat. 1055; 25 U. S. C. 70); to the Committee on Interior and Insular Affairs.

1183. A letter from the Chief Commissioner, Indian Claims Commission, transmitting a report that proceedings have been finally concluded with respect to the following claims:

The Pottawatomi Tribe of Indians, The Prairie Band of the Pottawatomie Tribe of Indians, et al., plaintiffs, v. The United States of America, defendant (Docket No. 15–B).

Citizen Band of Potawatomi Indians of Oklahoma, Potawatomi Nation, et al., petitioners, v. The United States of America, defendant (Docket No. 111).

pursuant to section 21 of the Indian Claims Commission Act of August 13, 1946 (60 Stat. 1055; 25 U. S. C. 70); to the Committee on Interior and Insular Affairs.

1184. A letter from the Secretary of Commerce, transmitting the annual financial report for the fiscal year 1955 on the commissary and messing facilities activities of the Civil Aeronautics Administration outside the continental United States, pursuant to Public Law 390, 81st Congress; to the Committee on Interstate and Foreign Commerce.

1185. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation entitled "A bill to authorize the Secretary of Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes"; to the Committee on Interstate and Foreign Commerce.

1186. A letter from the Acting Secretary of Commerce, transmitting the seventh interim report on causes and characteristics of thunderstorms and other atmospheric disturbances during the fiscal year of 1955, pursuant to Public Law 657, 80th Congress; to the Committee on Interstate and Foreign Commerce.

1187. A letter from the Secretary of Health, Education, and Welfare, transmitting the annual report of the United States Department of Health, Education, and Welfare for the fiscal year 1954; to the Committee on Interstate and Foreign Commerce.

1188. A letter from the Chairman, Federal Communications Commission, transmitting the 21st annual report of the Federal Communications Commission for the fiscal year ending June 30, 1955, pursuant to section 4 (k), Public Law 554; to the Committee on Interstate and Foreign Commerce.

1189. A letter from the Acting Chairman, Federal Communications Commission, transmitting a report on backlog of pending applications and hearing cases in the Federal Communications Commission as of June 30, 1955, pursuant to section 5 (e) of the Communications Act as amended July 16, 1952 by Public Law 554; to the Committee on Interstate and Foreign Commerce.

1190. A letter from the Chairman, Federal Communications Commission, transmitting a report on backlog of pending applications and hearing cases in the Federal Communications Commission as of July 31, 1955, pursuant to section 5 (e) of the Communications Act as amended July 16, 1952 by Public Law 554; to the Committee on Interstate and Foreign Commerce.

1191. A letter from the Chairman, Federal Communications Commission, transmitting a report on backlog of pending applications and hearing cases in the Federal Communications Commission as of August 31, 1955, pursuant to section 5 (e) of the Communications Act as amended July 16, 1952 by Public Law 554; to the Committee on Interstate and Foreign Commerce.

1192. A letter from the Chairman, Federal Communications Commission, transmitting a report on backlog on pending applications and hearing cases in the Federal Communications Commission as of September 30, 1955, pursuant to section 5 (e) of the Communications Act as amended July 16, 1952 by Public Law 554; to the Committee on Interstate and Foreign Commerce.

1193. A letter from the Chairman, Federal Communications Commission, transmitting a report on backlog of pending applications and hearing cases in the Federal Communications Commission as of October 31, 1955, pursuant to section 5 (e) of the Communications Act as amended July 16, 1952 by Public Law 554; to the Committee on Interstate and Foreign Commerce.

1194. A letter from the Secretary of State, transmitting the Fourth Semiannual Report of the Administrator of the Refugee Relief Act of 1953 (Public Law 203, 83d Cong., as amended by Public Law 751, 83d Cong.), pursuant to section 19 of the act; to the Committee on the Judiciary.

1195. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders and also a list giving the names of certain aliens entered in cases where the authority contained in section 212 (d) (3) of the Immigration and Nationality Act was exercised in behalf of such aliens, pursuant to the provisions of section 212 (d) (6) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1196. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders entered in cases where the authority contained in section 212 (d) (3) of the Immigration and Nationality Act was exercised in behalf of such aliens, pursuant to the provisions of section 212 (d) (6) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1197. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by certain subjects, pursuant to section 4 of the Displaced Persons Act of 1948, as amended; to the Committee on the Judiciary.

1198. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by certain subjects, pursuant to section 6 of the Refugee Relief Act of 1953; to the Committee on the Judiciary.

1199. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by certain subjects, pursuant to section 6 of the Refugee Relief Act of 1953; to the Committee on the Judiciary.

1200. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders entered in cases with a list where the authority contained in section 212 (d) (3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to the provisions of section 212 (d) (6) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1201. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders entered in cases where the authority contained in section 212 (d) (3) of the Immigration and Nationality Act was exercised in behalf of such aliens, pursuant to the provisions of section 212 (d) (6) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1202. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders entered in the cases of certain aliens who have been found admissible into the United States, pursuant to the provisions of section 212 (a) (28) (I) (ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1203. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders entered in the cases of certain aliens who have been found admissible into the United States under the provisions of section 212 (a) (28) (I) (ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1204. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders entered in the cases of certain aliens who have been found admissible into the United States, pursuant to the provisions of section 212 (a) (28) (I) (ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1205. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, relative to the case of Maria Stela Leitao, A–7297991, involving the provisions of section 6 of the Refugee Relief Act of 1953 and requesting that the report which was submitted on June 22, 1955, be considered and other information be disregarded; to the Committee on the Judiciary.

1206. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (1) of the Immigration and Nationality Act of 1952 (8 U. S. C. 1254 (a) (1)); to the Committee on the Judiciary.

1207. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (5) of the Immigration and Nationality Act of 1952 (8 U. S. C. 1254 (a) (5)); to the Committee on the Judiciary.

1208. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting relative to the case of Joseph Zambella, A–4180664, involving suspension of deportation and requesting the case be withdrawn from the Congress and returned to the jurisdiction of this Service; to the Committee on the Judiciary.

1209. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to the act of Congress approved July 1, 1948 (Public Law 863), amending subsection (c) of section 19 of the Immigration Act of February 5, 1917, as amended (8 U. S. C. 155 (c)); to the Committee on the Judiciary.

1210. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders entered in the cases of certain aliens who have been found admissible into the United States pursuant to the provisions of section 212 (a) (28) (I) (ii); to the Committee on the Judiciary.

1211. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting a list of certain cases involving the provisions of section 6 of the Refugee Relief Act of 1953 and requesting their withdrawal from the Congress and return to the jurisdiction of this Service; to the Committee on the Judiciary.

1212. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, relative to the case of Chang Chiang Huang, A–7463500, involving the provisions of section 6 of the Refugee Relief Act of 1953 and requesting that it be withdrawn from the Congress and returned to the jurisdiction of this Service; to the Committee on the Judiciary.

1213. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, relative to the case of Tien Shan Wang, A–6033416, involving the provisions of section 6 of the Refugee Relief Act of 1953 and requesting the case be withdrawn from the Congress and returned to the jurisdiction of this Service; to the Committee on the Judiciary.

1214. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, relative to the case of Lo Chao Ming, A–8065422, involving the provisions of section 6 of the Refugee Relief Act of 1953 and requesting the withdrawal of this case from the Congress and return to the jurisdiction of this Service; to the Committee on the Judiciary.

1215. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, relative to the case of Kwoh Hsien Hu, A–6712037, involving the provisions of section 6 of the Refugee Relief Act of 1953 and requesting the withdrawal of this case from the Congress and return to the jurisdiction of this Service; to the Committee on the Judiciary.

1216. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting a list of cases involving the provisions of section 6 of the Refugee Relief Act of 1953 and requesting the cases be withdrawn from the Congress and returned to the jurisdiction of this Service; to the Committee on the Judiciary.

1217. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, relative to the case of Si Chiu Lou, A–6903701, involving the provisions of section 6 of the Refugee Relief Act of 1953 and requesting the case be withdrawn from the Congress and returned to the jurisdiction of this Service; to the Committee on the Judiciary.

1218. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting a list of cases which new and additional evidence warrants their withdrawal from the action of Congress and requesting their return to the jurisdiction of the Immigration and Naturalization Service; to the Committee on the Judiciary.

1219. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting a list of Yugoslav crewmen whose admission was authorized pursuant to section 212 (d) (3) of the Immigration and Nationality Act, waiving their inadmissibility under section 212 (a) (28) of the act. This report is submitted pursuant to section 212 (d) (6) of the statute; to the Committee on the Judiciary.

1220. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, relative to a letter dated August 17, 1955, enclosing copies of orders entered in cases of certain aliens, including the name of Leon Gorodetsky (Max Kovalsky), pursuant to the provisions of section 212 (a) (28) (I) (ii) of the Immigration and Nationality Act. Copy of order dated November 1, 1955, is attached revoking our finding that this individual qualifies as a defector pursuant to section 212 (a) (28) (I) (ii) of the act; to the Committee on the Judiciary.

1221. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled, "A bill for the relief of Daniel O. Hulse, Jr."; to the Committee on the Judiciary.

1222. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill for the relief of Col. Henry M. Zeller"; to the Committee on the Judiciary.

1223. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill for the relief of C. W. O. George C. Carter"; to the Committee on the Judiciary.

1224. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled, "A bill for the relief of Arthur E. Weeden, Jr."; to the Committee on the Judiciary.

1225. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled, "A bill for the relief of Nathan A. Kahn"; to the Committee on the Judiciary.

1226. A letter from the Acting Secretary of the Army, transmitting a draft of proposed legislation entitled, "A bill for the relief of Eugene Gardner, Byron M. Barbeau, John R. Reaves, and Jackson L. Hardy"; to the Committee on the Judiciary.

1227. A letter from the administrative assistant to the Secretary of the Interior, transmitting a report of receipts and expenditures in connection with the administration of the Outer Continental Shelf Lands Act of August 7, 1953 (67 Stat. 470; 43 U. S. C. sec. 1343), for the fiscal year 1955; to the Committee on the Judiciary.

1228. A letter from the Under Secretary of the Navy, transmitting a report of recoveries collected by the United States for damage caused to naval vessels, pursuant to section 2 of the act of December 5, 1945 (34 U. S. C. 600b), for the fiscal year 1954–55; to the Committee on the Judiciary.

1229. A letter from the Under Secretary of the Navy, transmitting a report of claims for damage caused by naval vessels for the fiscal year 1954–55 which have been settled pursuant to section 8 of the act of July 3, 1944 (58 Stat. 726; 46 U. S. C. 797); to the Committee on the Judiciary.

1230. A letter from the clerk, United States Court of Claims, transmitting certified copies of the court's opinion rendered on November 8, 1955, in re *Wright H. Huntley* v. *The United States* (Congressional No. 2–53), pursuant to the provisions of sections 1492 and 2509, United States Code, and House Resolution 255, 83d Congress; to the Committee on the Judiciary.

1231. A letter from the Acting Deputy Postmaster General, transmitting a report of claims paid by the Post Office Department during the fiscal year 1955, pursuant to the Federal Tort Claims Act; to the Committee on the Judiciary.

1232. A letter from the Administrator, Federal Civil Defense Administration, transmitting a report of claims paid during the fiscal year 1955, pursuant to section 2673 of the Federal Tort Claims Act of 1946; to the Committee on the Judiciary.

1233. A letter from the Administrative Assistant to the Secretary of Agriculture, transmitting a report of all claims paid under the Federal Tort Claims Act for the fiscal year ending June 30, 1955, pursuant to the provisions of the Federal Tort Claims Act as reenacted (28 U. S. C. 2671–2680); to the Committee on the Judiciary.

1234. A letter from the Secretary of Commerce, transmitting a report of all claims paid by the Department of Commerce during fiscal year 1955 under part 2, pursuant to section 404 of the Federal Tort Claims Act (28 U. S. C. 2673); to the Committee on the Judiciary.

1235. A letter from the Acting Secretary of Commerce, transmitting a draft of proposed legislation entitled, "A bill to amend section 1114 of title 18 of United States Code relating to the protection of officers and employees of the United States"; to the Committee on the Judiciary.

1236. A letter from the Acting Secretary of the Treasury, transmitting the report of a claim paid to James Stewart & Co., Inc., in full settlement of a claim, pursuant to title 14, United States Code, section 646 (b); to the Committee on the Judiciary.

1237. A letter from the Acting Secretary of the Treasury reporting the payment of $5,000 to Curtis Cochran, Immokolee, Fla., in full settlement of his claim for personal injury, pursuant to title 14, United States Code, section 646 (b); to the Committee on the Judiciary.

1238. A letter from the Acting Secretary of the Treasury transmitting a report of claims paid during the fiscal year 1955, pursuant to section 2673 of title 28, United States Code; to the Committee on the Judiciary.

1239. A letter from the national commandant, Marine Corps League, transmitting the report of the Marine Corps League listing activities and the newly elected officers for 1956 as reported at the annual national convention in St. Louis, Mo.; to the Committee on the Judiciary.

1240. A letter from the Vice Chairman, Alexander Hamilton Bicentennial Commission, transmitting the report on the Alexander Hamilton Bicentennial Commission dated September 12, 1955, pursuant to authority granted by the House of Representatives, August 2, 1955; to the Committee on the Judiciary.

1241. A letter from the Administrator, Veterans' Administration, transmitting a report of claims paid for the fiscal year ended June 30, 1955, pursuant to section 404 of the Federal Tort Claims Act, title IV, Public Law 601, 79th Congress (28 U. S. C. 2673); to the Committee on the Judiciary.

1242. A letter from the Governor, Canal Zone Government, transmitting a report of claims paid for the period July 1, 1954, to June 30, 1955, pursuant to section 2672 of title 28, United States Code; to the Committee on the Judiciary.

1243. A letter from the Administrator, General Services Administration, transmitting a report of claims paid during the fiscal year 1955, pursuant to section 2673, title 28, United States Code; to the Committee on the Judiciary.

1244. A letter from the Acting Director, Central Intelligence Agency, transmitting a report of claims paid during the fiscal year 1955, pursuant to section 404 of the Federal Tort Claims Act of 1946 (Public Law 601, 79th Cong.); to the Committee on the Judiciary.

1245. A letter from the Chairman, United States Atomic Energy Commission, transmitting the annual report of claims paid under the Federal Tort Claims Act for the period from July 1, 1954 through June 30, 1955, pursuant to section 2673 of title 28, United States Code; to the Committee on the Judiciary.

1246. A letter from the Secretary, Department of the Air Force, transmitting a report of claims paid for the fiscal year 1955, pursuant to section 5 of the Maritime Claims Act of October 20, 1951 (65 Stat. 572; 10 U. S. C. 1861–1866); to the Committee on the Judiciary.

1247. A letter from the Secretary, Department of the Air Force, transmitting a report of claims paid for the fiscal year 1955, pursuant to section 2673 of the Federal Tort Claims Act, as amended and codified (28 U. S. C. 2671–2680); to the Committee on the Judiciary.

1248. A letter from the Secretary, Department of the Air Force, transmitting a report of claims paid for the fiscal year 1955, pursuant to section 1 (e) of the Military Personnel Claims Act of 1945, as amended (ch. 135, sec. 1, 59 Stat. 225; 31 U. S. C. 222c, 61 Stat. 501, 66 Stat. 321, Public Law 439, 82d Cong.); to the Committee on the Judiciary.

1249. A letter from the Under Secretary of the Navy, transmitting a report of claims paid for the fiscal year 1955, pursuant to section 1 (e) of Public Law 439, 82d Congress; to the Committee on the Judiciary.

1250. A letter from the Secretary of Commerce, transmitting a report of the Maritime Administration of the Department of Commerce on the activities and transactions of the Administration, from April 1, 1955, through June 30, 1955, pursuant to section 13 of the Merchant Ship Sales Act of 1946; to the Committee on Merchant Marine and Fisheries.

1251. A letter from the Secretary of State, transmitting a draft of legislation, entitled, "A bill to repeal section 12 of the act of June 26, 1884, prohibiting a charge or collection of fees by consular officers for official services to American vessels and seamen"; to the Committee on Merchant Marine and Fisheries.

1252. A letter from the Administrative Assistant to the Secretary of the Interior, transmitting a report on the Federal aid in fish restoration program for the fiscal year ending June 30, 1955, pursuant to section 11 of the act of Congress approved August 9, 1950 (64 Stat. 430, 16 U. S. C. 777); to the Committee on Merchant Marine and Fisheries.

1253. A letter from the Governor of the Canal Zone, President, Panama Canal Company, transmitting a draft of legislation, entitled "A bill to authorize and direct the Panama Canal Company to construct, maintain, and operate a bridge over the Panama Canal at Balboa, C. Z.; to the Committee on Merchant Marine and Fisheries.

1254. A letter from the Acting Postmaster General, transmitting a draft of proposed legislation entitled, "A bill to authorize the Postmaster General to impound mail in certain cases"; to the Committee on Post Office and Civil Service.

1255. A letter from the Secretary of the Army, transmitting a draft of legislation entitled "A bill to authorize the Chief of Engineers to publish information pamphlets, maps, brochures, and other material"; to the Committee on Public Works.

1256. A letter from the Secretary of the Army transmitting a letter from the Chief of Engineers, Department of the Army, dated November 1, 1955, submitting a letter, together with accompanying papers on Genesee River, Allegany County, N. Y., requested by resolutions of the Committee on Public Works, United States Senate, and the Committee on Public Works, House of Representatives, adopted August 8, 1951, and October 16, 1951, respectively; to the Committee on Public Works.

1257. A letter from the Acting Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated November 2, 1955, submitting a letter, together with accompanying papers, on Great Lakes-Atlantic tidewaters deep waterway, requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted March 7, 1928; to the Committee on Public Works.

1258. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated September 6, 1955, submitting a letter, together with accompanying papers, on the area at and in the vicinity of Bellevue, Ohio, and the surrounding area of Seneca, Erie, Huron, and Sandusky Counties, with a view to the control of floods caused by excess underground and surface waters, authorized by the Flood Control Act, adopted June 30, 1948; to the Committee on Public Works.

1259. A letter from the Acting Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated October 28, 1955, submitting a letter, together with accompanying papers, on Big Sandy Creek and Mexico Bay, N. Y., requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted October 2, 1946; to the Committee on Public Works.

1260. A letter from the Acting Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated October 26, 1955, submitting a report, together with accompanying papers, on a preliminary examination of Mohawk River, N. Y., submitted in response to the River and Harbor Act, approved March 2, 1945; to the Committee on Public Works.

1261. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated September 22, 1955, submitting a letter, together with accompanying papers, on San Diego Harbor, Calif., requested by a resolution of the Committee on Rivers and Harbors,

House of Representatives, adopted December 24, 1939; to the Committee on Public Works.

1262. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated September 19, 1955, submitting a report, together with accompanying papers, on Lake Superior shoreline from Middle Island Point south to the mouth of Carp River, Mich., submitted in response to the River and Harbor Act approved July 24, 1946; to the Committee on Public Works.

1263. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated September 22, 1955, submitting a letter, together with accompanying papers, on Little Girls Point, Mich., requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted September 10, 1946; to the Committee on Public Works.

1264. A letter from the Secretary of the Army transmitting a letter from the Chief of Engineers, Department of the Army, dated August 16, 1955, submitting a letter, together with accompanying papers, on Rangeline Lake to Oconto River, Wis., authorized by the Flood Control Act approved May 17, 1950; to the Committee on Public Works.

1265. A letter from the Secretary of the Army transmitting a letter from the Chief of Engineers, Department of the Army, dated August 26, 1955, submitting a letter, together with accompanying papers, on Herbster Harbor, Wis., requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted November 30, 1945; to the Committee on Public Works.

1266. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated September 14, 1955, submitting a letter, together with accompanying papers, on Marshy Hope Creek, Federalsburg, Md., requested by a resolution of the Committee on Flood Control, House of Representatives, adopted March 1, 1946. It is also submitted in response to a preliminary examination of Marshy Hope Creek and tributaries, Maryland, authorized by the Flood Control Act approved July 24, 1946; to the Committee on Public Works.

1267. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated October 7, 1955, submitting a letter, together with accompanying papers, on Munising Harbor, Mich., requested by a resolution of the Committee on Public Works, House of Representatives, adopted June 27, 1950; to the Committee on Public Works.

1268. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 16, 1955, submitting a letter, together with accompanying papers, on Lake Superior in Ashland, Bayfield, and Douglas Counties, Wis., authorized by the Flood Control Act approved July 24, 1946; to the Committee on Public Works.

1269. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 18, 1955, submitting a letter, together with accompanying papers, on Hudson River at the mouth of Endikill Creek, N. Y., authorized by the River and Harbor Act, approved March 2, 1945; to the Committee on Public Works.

1270. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 18, 1955, submitting a letter, together with accompanying papers, on Seabeck Harbor, Hood Canal, Wash., authorized by the River and Harbor Act, approved May 17, 1950; to the Committee on Public Works.

1271. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 19, 1955, submitting a letter, together with accompanying papers, on channel 40 feet deep, to serve as a deepwater outlet to the Gulf of Mexico from the Harbors of Mobile, Ala., and Pascagoula, Biloxi, and Gulfport, Miss., authorized by the River and Harbor Act, approved March 2, 1945; to the Committee on Public Works.

1272. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 29, 1955, submitting a letter, together with accompanying papers, on waterway from Lake Erie to the southerly end of Lake Michigan, authorized by the River and Harbor Act, approved March 2, 1945; to the Committee on Public Works.

1273. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 9, 1955, submitting a letter, together with accompanying papers, on Wisconsin River, Wis., requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted March 5, 1946. It is also submitted in response to a preliminary examination of Wisconsin River, Wis., authorized by the River and Harbor Act, approved July 24, 1946; to the Committee on Public Works.

1274. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated September 26, 1955, submitting a report, together with accompanying papers on a review of reports on Arkansas River and tributaries, with a view to determining the advisability of modifying the Conchas Dam project in any way at this time. This investigation was requested by a resolution of the Committee on Public Works, House of Representatives, adopted July 3, 1952; to the Committee on Public Works.

1275. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 23, 1955, submitting a report, together with accompanying papers on a preliminary examination of Nine Mile Drain and Carlow Ditch, Macomb County, Mich., authorized by the Flood Control Act, approved May 17, 1950; to the Committee on Public Works.

1276. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated May 17, 1955, submitting a report, together with accompanying papers on a review of reports on Niobrara River and tributaries, Nebraska, Wyoming, and South Dakota. This investigation was requested by resolutions of the Committee on Flood Control, House of Representatives, and the Committee on Commerce, United States Senate, adopted on October 8, 1945, and October 13, 1945, respectively; to the Committee on Public Works.

1277. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated July 8, 1955, submitting a report, together with accompanying papers and illustrations, on a cooperative beach erosion control study of the shore of Lake Ontario at Braddock Bay State Park, N. Y., prepared under the provisions of section 2 of the River and Harbor Act, approved on July 3, 1930, as amended and supplemented; to the Committee on Public Works.

1278. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated June 14, 1955, submitting a report, together with accompanying papers, on a review of report on Nooksack River, Wash., requested by a resolution of the Committee on Flood Control, House of Representatives, adopted January 31, 1946; to the Committee on Public Works.

1279. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated September 27, 1955, submitting a report, together with accompanying papers, on a preliminary examination and survey of Fisherman Bay, Lopez Island, Wash., authorized by the River and Harbor Act, approved June 30, 1948; to the Committee on Public Works.

1280. A letter from the Acting Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated October 17, 1955, submitting a report, together with accompanying papers, on a review of reports on Genesee River, Angelica Creek, Allegany County, N. Y., requested by a resolution of the Committee on Public Works, House of Representatives, adopted May 27, 1949; to the Committee on Public Works.

1281. A letter from the Director, the American Legion, transmitting a financial statement of the American Legion up to and including October 31, 1955, pursuant to Public Law 47, 66th Congress; to the Committee on Veterans' Affairs.

1282. A letter from the Attorney General, transmitting a report dealing with certain problems encountered in the course of a survey of the operations of the Small Business Administration, pursuant to section 207 (a) of the Small Business Act of 1953, as amended by section 5 of Public Law 268, 84th Congress; to the Committee on Banking and Currency.

1283. A letter from the Comptroller General of the United States, transmitting a report on the audit of the United States Coast Guard, an agency of the Department of the Treasury, for the year ended June 30, 1953, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1284. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill to authorize the burial in national cemeteries of the remains of certain commissioned officers of the Public Health Service"; to the Committee on Interior and Insular Affairs.

1285. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with Hamilton Stores, Inc., to provide and operate concession facilities for the public in Yellowstone National Park, Wyo., for a period of 20 years from October 1, 1954, through September 30, 1974, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1286. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders entered in the cases of certain aliens who have been found admissible into the United States, pursuant to the provisions of section 212 (a) (28) (I) (ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1287. A letter from the Assistant Secretary of Agriculture, relative to a memorandum of understanding executed by the Mexican-United States Commission for the prevention of foot-and-mouth disease, effective on October 1, relative to the financial arrangements for carrying on the work of the Commission, pursuant to Public Law 8, 80th Congress; to the Committee on Agriculture.

1288. A letter from the Assistant Secretary of Agriculture, relative to reporting that there have been no significant developments to report for the month of September 1955 relating to the cooperative program of the United States with Mexico for the control and eradication of foot-and-mouth disease, pursuant to section 3 of Public Law 8, 80th Congress; to the Committee on Agriculture.

1289. A letter from the Assistant Secretary of Agriculture, relative to reporting that there have been no significant developments to report for the month of November 1955 relating to the cooperative program of the United States with Mexico for the control and

eradication of foot-and-mouth disease, pursuant to section 3 of Public Law 8, 80th Congress; to the Committee on Agriculture.

1290. A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation entitled "A bill to amend section 314 of the Agricultural Adjustment Act of 1938, as amended"; to the Committee on Agriculture.

1291. A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation entitled "A bill to amend the act of May 29, 1884 (23 Stat. 31), as amended, and the act of March 3, 1905 (33 Stat. 1264), as amended, to eliminate the requirement of certain notices thereunder, and for other purposes"; to the Committee on Agriculture.

1292. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation to the Civil Service Commission for "Annuities under special acts," for the fiscal year 1956, has been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1293. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation, "Salaries and expenses, Railroad Retirement Board," for the fiscal year 1956, has been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation, pursuant to paragraph 2 of subsection (e) of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

1294. A letter from the Assistant Secretary of the Interior, relative to reporting that a soil survey and land classification information was obtained in sufficient detail to determine that the lands to be irrigated from Yellowtail unit, lower Bighorn division, Missouri River Basin project, Montana and Wyoming, under current plans, are susceptible to the production of agricultural crops under irrigation, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

1295. A letter from the Director, Selective Service System, transmitting the fifth report on the operations of the Selective Service System covered up to June 30, 1955, the end of the last fiscal year, pursuant to section 10 (g) of the Universal Military Training and Service Act, as amended; to the Committee on Armed Services.

1296. A letter from Assistant Secretary of the Navy (Personnel and Reserve Forces), relative to a report showing by rank and age groups, the number of officers above the rank of major in the Army or lieutenant commander in the Navy with the average monthly flight pay authorized by law to be paid to such officers during the 6-month period preceding the date of the report, pursuant to Public Law 301, 79th Congress; to the Committee on Armed Services.

1297. A letter from the Director, Legislative Liaison, Department of the Air Force, relative to a report showing by grade and age for all flying officers above the grade of major, receiving flight pay during the 6-month period March 1 to August 31, 1955, pursuant to Public Law 301, 79th Congress; to the Committee on Armed Services.

1298. A letter from the Secretary of Commerce, transmitting the 33d Quarterly Report on Export Control, pursuant to the Export Control Act of 1949; to the Committee on Banking and Currency.

1299. A letter from the Deputy Assistant Secretary of Defense (Supply and Logistics), transmitting the third monthly report on military prime contracts with business firms for work in the United States, pursuant to section 6 of Public Law 268, 84th Congress; to the Committee on Banking and Currency.

1300. A letter from the Director, Administrative Office of the United States Courts, transmitting a draft of legislation entitled "A bill to amend the first sentence of paragraph (a) of section 756 of title 11 of the District of Columbia Code, 1951 edition (paragraph (a) of sec. 5 of the act of April 1, 1942, c. 207, 56 Stat. 193), relating to the transfer of actions from the United States District Court for the District of Columbia to the Municipal Court for the District of Columbia"; to the Committee on the District of Columbia.

1301. A letter from the Secretary of the Treasury, transmitting a combined statement of receipts, expenditures, and balances of the United States Government for the fiscal year ended June 30, 1955, pursuant to section 15 of the act of July 31, 1894 (5 U. S. C. 264), and the general provisions of section 114 of the act of September 12, 1950 (31 U. S. C. 66b); to the Committee on Government Operations.

1302. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Navy Industrial Fund, United States Naval Ordnance Plant, York, Pa., Bureau of Ordnance, Department of the Navy, for the period August 1, 1951, to January 31, 1955; to the Committee on Government Operations.

1303. A letter from the Comptroller General of the United States, transmitting a report on the Navy Industrial Fund, United States Naval Ordnance Laboratory, Corona, Calif., Department of the Navy, for the period September 27, 1953, to June 30, 1955; to the Committee on Government Operations.

1304. A letter from the Comptroller General of the United States, transmitting a report on the audit of Gorgas Memorial Institute of Tropical and Preventive Medicine, Inc., for the fiscal year ended June 30, 1955, pursuant to the act of May 7, 1928 (22 U. S. C. 278a), and in the manner contemplated in the Government Corporation Control Act (31 U. S. C. 841); to the Committee on Government Operations.

1305. A letter from the Comptroller General of the United States, transmitting a report on the examination of the United States assistance program for Pakistan, an activity of the mutual security program administered by the International Cooperation Administration, an agency of the Department of State; to the Committee on Government Operations.

1306. A letter from the Comptroller General of the United States, transmitting the report on the audit of the Home Loan Bank Board for the fiscal year ended June 30, 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations and ordered to be printed.

1307. A letter from the Comptroller General of the United States, transmitting the report on the audit of the Bureau of Customs, Department of Treasury, for the period January 1, 1952, through June 30, 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1308. A letter from the Clerk, House of Representatives, transmitting a report for the period from July 1, 1954, to June 30, 1955, pursuant to the provisions of paragraphs 102, 103, 104, and 111 of the Code of Laws of the United States; to the Committee on House Administration.

1309. A letter from the Chairman, Federal Power Commission, transmitting information on licensed hydroelectric projects and on personnel of the Federal Power Commission for the fiscal year ended June 30, 1955, pursuant to section 4 (d) of the Federal Power Act, approved August 26, 1935; to the Committee on Interstate and Foreign Commerce.

1310. A letter from the Acting Secretary of the Interior, relative to the case of the *United States of America* v. *The Northern Colorado Water Conservancy District et al.*, in the United States District Court for the District of Colorado, civil No. 2782; to the Committee on Interior and Insular Affairs.

1311. A letter from the Chairman, Commission on the Application of Federal Laws to the Virgin Islands, transmitting a report of the Commission, pursuant to Public Law 517, 83d Congress; to the Committee on Interior and Insular Affairs.

1312. A letter from the clerk, United States Court of Claims, transmitting a statement of all judgments rendered by the United States Court of Claims for the year ended October 1, 1955, pursuant to the provisions of section 791 (c), title 28, United States Code; to the Committee on the Judiciary.

1313. A letter from the Acting Secretary of the Army, transmitting Resolution No. 15, entitled "Resolution to petition for the acceptance of Okinawan emigrants," passed by the Legislature of the Government of the Ryukyu Islands October 31, 1955; to the Committee on the Judiciary.

1314. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, referring to the case of Frank Thomas Cornelius, A–6740452, involving suspension of deportation, and requesting the case be withdrawn from those before the Congress and returned to the jurisdiction of this Service; to the Committee on the Judiciary.

1315. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, referring to the case of Simona Riklis, V–557100, involving suspension of deportation, and requesting the case be withdrawn from those now before the Congress and returned to the jurisdiction of this Service; to the Committee on the Judiciary.

1316. A letter from the Secretary of Commerce, transmitting a report regarding war-risk insurance and certain marine and liability insurance for the American public as of September 30, 1955, pursuant to section 1211 of Public Law 763, 81st Congress, as amended; to the Committee on Merchant Marine and Fisheries.

1317. A letter from the Secretary of Commerce, transmitting the quarterly report of the Maritime Administration of the Department of Commerce on the activities and transactions of the Administration under the Merchant Ship Sales Act of 1946, from July 1, 1955, through September 30, 1955, in accordance with section 13 of that act; to the Committee on Merchant Marine and Fisheries.

1318. A letter from the Board of Directors, Tennessee Valley Authority, transmitting the 22d annual report of activities of the TVA during the fiscal year ending June 30, 1955; to the Committee on Public Works.

1319. A letter from the Acting Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated November 22, 1955, submitting a letter, together with accompanying papers, on Galveston Bay and contiguous waters, Texas, authorized by the River and Harbor Act approved March 2, 1945; to the Committee on Public Works.

1320. A letter from the Acting Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated November 15, 1955, submitting a report, together with accompanying papers, on a preliminary examination and survey of Skykomish River, Snoqualmie River, and Snohomish River and tributaries, Washington, authorized by the Flood Control Acts approved June 22, 1936, and August 11, 1939; to the Committee on Public Works.

1321. A letter from the Chairman, Subversive Activities Control Board, transmitting the fifth annual report of the Subversive Activities Control Board, pursuant to section 12 (c) of Public Law 831, 81st Congress; to the Committee on Un-American Activities.

1322. A letter from the Postmaster General, Chairman, Board of Trustees, Postal Savings System, transmitting the report of operations of the Postal Savings System for the fiscal year ended June 30, 1955, pursuant to section 1 of the act approved June 25, 1910 (H. Doc. No. 251); to the Committee on Post Office and Civil Service and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. McCORMACK:

H. R. 7870. A bill to authorize the construction of flood-protection measures, with particular reference to areas where severe damages have recently occurred as the result of extreme rainfall accompanying hurricane storms; to the Committee on Public Works.

By Mr. SPENCE:

H. R. 7871. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

By Mr. WOLCOTT:

H. R. 7872. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

By Mr. ALBERT:

H. R. 7873. A bill to provide for the conveyance of certain lands by the United States to the city of Atoka, Okla.; to the Committee on Government Operations.

By Mr. BARTLETT:

H. R. 7874. A bill to provide transportation on Canadian vessels between ports in southeastern Alaska and between Hyder, Alaska, and other points in southeastern Alaska or the continental United States, either directly or via a foreign port, or for any part of the transportation; to the Committee on Merchant Marine and Fisheries.

By Mr. BENNETT of Florida:

H. R. 7875. A bill to amend title II of the Social Security Act to provide for the payment of child's insurance benefits to certain individuals who are over the age of 18 but who are incapable of self-support by reason of physical or mental disability; to the Committee on Ways and Means.

H. R. 7876. A bill to provide that the United States shall pay certain claims for death, personal injury, and property damage for which personnel in the Armed Forces are found to be responsible; to the Committee on the Judiciary.

By Mr. BERRY:

H. R. 7877. A bill to authorize the sale of certain tribal lands of the Rosebud Sioux Tribe to the city of White River, S. Dak.; to the Committee on Interior and Insular Affairs.

By Mr. BROWN of Georgia:

H. R. 7878. A bill to amend the Agricultural Adjustment Act of 1938 so as to increase acreage allotments for the 1956 crop of cotton; to the Committee on Agriculture.

By Mr. CANFIELD:

H. R. 7879. A bill to protect persons within the several States from mob violence and lynching; to the Committee on the Judiciary.

By Mr. CLARK:

H. R. 7880. A bill to amend and supplement the Federal Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the construction of highways, and for other purposes; to the Committee on Public Works.

By Mr. DAVIDSON:

H. R. 7881. A bill to amend certain provisions of law relating to housing so as to require builders' certifications of cost in certain cases, to provide for the construction of additional public housing, to provide that a preference shall be given to certain elderly families in the case of low-rent public housing, and for other purposes; to the Committee on Banking and Currency.

By Mr. DAVIS of Tennessee:

H. R. 7882. A bill to provide for the taxation of all cooperatives' income in the year earned, either to the cooperative or to the patron-member, to protect persons required to treat noncash patronage dividends as income for Federal income-tax purposes by providing for collecting tax at the source on such dividends and for other purposes; to the Committee on Ways and Means.

By Mr. DEANE:

H. R. 7883. A bill to provide for natural disaster insurance and reinsurance; to the Committee on Banking and Currency.

By Mr. DEMPSEY:

H. R. 7884. A bill to amend and supplement the Federal Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the construction of highways, and for other purposes; to the Committee on Public Works.

By Mr. DODD:

H. R. 7885. A bill to provide for national disaster insurance, and for other purposes; to the Committee on Banking and Currency.

By Mr. DORN of South Carolina:

H. R. 7886. A bill to amend part III of Veterans Regulation No. 1 (a) to liberalize the basis for, and increase the monthly rates of, disability pension awards; to the Committee on Veterans' Affairs.

By Mrs. FARRINGTON:

H. R. 7887. A bill to authorize the Commissioner of Public Lands to sell public lands under certain circumstances without public auction; to the Committee on Interior and Insular Affairs.

H. R. 7888. A bill to authorize the Commissioner of Public Lands to sell public lands located at Weliweli, island of Kauai, to certain claimants; to the Committee on Interior and Insular Affairs.

H. R. 7889. A bill to enable the Legislature of the Territory of Hawaii to authorize the city and county of Honolulu, a municipal corporation, to issue general obligation bonds; to the Committee on Interior and Insular Affairs.

H. R. 7890. A bill to authorize the Commissioner of Public Lands to sell public lands located at Kaneohe Bay, Oahu, to certain persons; to the Committee on Interior and Insular Affairs.

H. R. 7891. A bill to authorize and direct the exchanges and sales of public lands within or adjacent to the district of Puna, county of Hawaii, Territory of Hawaii, for the relief of persons whose lands were destroyed by volcanic activity; to the Committee on Interior and Insular Affairs.

H. R. 7892. A bill to ratify and confirm sections 5 and 6 of Act 273 of the Session Laws of Hawaii 1955 and to authorize the issuance of certain public improvement bonds by the Territory of Hawaii; to the Committee on Interior and Insular Affairs.

H. R. 7893. A bill to amend section 73 (i) of the Hawaiian Organic Act; to the Committee on Interior and Insular Affairs.

By Mr. FINO:

H. R. 7894. A bill to amend title II of the Social Security Act to prevent the payment of any benefits thereunder to individuals who have been convicted of espionage or subversive activities; to the Committee on Ways and Means.

By Mr. FLOOD:

H. R. 7895. A bill to provide Federal assistance to States to augment their efforts to prevent surface damage resulting from mine cave-ins; to the Committee on Interior and Insular Affairs.

By Mr. FLYNT:

H. R. 7896. A bill to provide for the conveyance of certain land in the city of Hogansville, Ga., to the city of Hogansville; to the Committee on Government Operations.

By Mr. FORAND:

H. R. 7897. A bill to provide for Federal disaster insurance and reinsurance; to the Committee on Banking and Currency.

By Mr. FORD:

H. R. 7898. A bill granting the consent and approval of Congress to a Great Lakes Basin compact, and for related purposes; to the Committee on Foreign Affairs.

H. R. 7899. A bill to permit certain United States Commissioners to represent claimants before the Department of the Treasury; to the Committee on the Judiciary.

By Mr. FRELINGHUYSEN:

H. R. 7900. A bill to establish a Commission on the Office of the President; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

362. By the SPEAKER: Petition of the secretary, Board of Harbor Commissioners, Territory of Hawaii, requesting further appropriations by the 84th Congress of the United States, 2d session, for the completion of plans and the construction of Kawaihae Harbor, Kawaihae, T. H.; the completion of the enlargement of Nawiliwili Harbor turning basin and the deepening of the Nawiliwili entrance channel, island of Kauai; and the construction of the second entrance channel for Honolulu Harbor, island of Oahu; to the Committee on Appropriations.

363. Also, petition of the national commander, Army and Navy Legion of Valor of the United States of America, Inc., Glendale, Calif., urging passage of legislation to provide the defense activities of the military and civil departments of administration be coordinated, and to include all holders of the Congressional Medal of Honor, the Distinguished Service Cross, and the Navy Cross; to the Committee on Armed Services.

364. Also, petition of the State secretary, State council of Kentucky, Junior Order United American Mechanics, Covington, Ky., with reference to improvement of free public schools; to the Committee on Education and Labor.

365. Also, petition of the president, American Congress of Physical Medicine and Rehabilitation, opposing S. 1951 and H. R. 5465, habilitation, Chicago, Ill., opposing S. 1951 and H. R. 5465, establishing an independent Federal agency for the handicapped; to the Committee on Education and Labor.

366. Also, petition of the treasurer, Conference of State Societies, Washington, D. C., transmitting a copy of an audit report for the fiscal year ended May 31, 1955; to the Committee on the District of Columbia.

367. Also, petition of the Secretary, Interparliamentary Union, Washington, D. C., with reference to a report covering a meeting held in Vienna, August 27 to September 2, 1954, etc.; to the Committee on Foreign Affairs.

368. Also, petition of the Minister-Counselor, Chinese Embassy, Washington, D. C., with reference to a message by three public bodies in Formosa expressing the hope that the Congress of the United States would, in the name of justice, expose the Communist program of world conquest; to the Committee on Foreign Affairs.

369. Also, petition of the directors-general, Hip Sing Association in America, New York City, N. Y., with reference to opposition to the admission of Communist China into the United Nations; to the Committee on Foreign Affairs.

370. Also, petition of the president, Chinese Consolidated Benevolent Association, New York City, N. Y., expressing opposition to the agreement reached between the United States and the Chinese Communist regime at the Geneva talk that India be requested to assist those Chinese who may wish to return to the China mainland now under Communist occupation; to the Committee on Foreign Affairs.

371. Also, petition of the secretary-treasurer, the National Association of Civil Defense Directors, Providence, R. I., endorsing the policy of favoring civil defense as an eligible of Federal surplus property; to the Committee on Government Operations.

372. Also, petition of the secretary-treasurer, Gulf States Marine Fisheries Commission, New Orleans, La., with reference to an appropriation for weather-ship service in the Gulf of Mexico; to the Committee on Interstate and Foreign Commerce.

373. Also, petition of the executive director, National Association of Educational Broadcasters, Urbana, Ill., urging the Federal Communications Commission to continue the reservation of television channels for noncommercial educational stations, and requesting that there be no encroachment on the FM band presently used by schools; to the Committee on Interstate and Foreign Commerce.

374. Also, petition of the president, Junior Chamber of Commerce, Honolulu, T. H., requesting amendment of the Hawaiian Organic Act so as to provide for reapportionment of the Legislature of the Territory of Hawaii, etc.; to the Committee on Interior and Insular Affairs.

375. Also, petition of the secretary, American Association of University Women, Honolulu Branch, Honolulu, T. H., requesting amendment of the Hawaiian Organic Act so as to provide for reapportionment of the Legislature of the Territory of Hawaii, etc.; to the Committee on Interior and Insular Affairs.

376. Also, petition of the secretary, American Unitarian Association, Boston, Mass., petitioning consideration of their resolution with reference to "The Public Domain," "Indian Rights," and "Peace Through the United Nations"; to the Committee on Interior and Insular Affairs.

377. Also, petition of the mayor, city of Sitka, Alaska, urging the Congress of the United States to enact legislation enabling the Federal Government to convey to the city of Sitka, Alaska, fee simple title to all of the tidelands within the corporate limits of said city at a fair and equitable price; to the Committee on Interior and Insular Affairs.

378. Also, petition of the Wesleyan Service Guild of Columbia Methodist Church, Columbia, Ala., providing for the health and education of the Indian Americans; to the Committee on Interior and Insular Affairs.

379. Also, petition of the national administrator, Jewish War Veterans of the United States of America, Washington, D. C., requesting that the nomination of members of this Commission be expedited; to the Committee on the Judiciary.

380. Also, petition of the legislative secretary, Women's International League for Peace and Freedom, Washington, D. C., expressing gratification by the passage of Senate Joint Resolution 21, providing for a full investigation of the entire Government security system, etc.; to the Committee on the Judiciary.

381. Also, petition of the president, National Association for the Advancement of Colored People, Boston branch, Boston, Mass., requesting investigation of the murders of Rev. George Lee, Mr. Lamar Smith, and Emmett Till in Mississippi; to the Committee on the Judiciary.

382. Also, petition of the director, National Prayer Mobilization Association, Washington, D. C., requesting an investigation of the murder of Emmett Till in Mississippi; to the Committee on the Judiciary.

383. Also, petition of the secretary, Jewish Community Council, Utica, N. Y., requesting that prompt attention be given to the revising of the Immigration and Naturalization Act of 1952 and the Refugee Relief Act of 1953; to the Committee on the Judiciary.

384. Also, petition of the secretary, Congregational Conference of Southern California, Los Angeles, Calif., requesting an investigation of the death of Emmett Till, Chicago youth recently killed at Leflore County, Miss.; to the Committee on the Judiciary.

385. Also, petition of the secretary, the Silver Committee of the Panama Canal, New York, N. Y., requesting amendment of Public Law 318, 77th Congress, so as to comply with the "noble spirit of human rights" as it affects the members of the Silver Committee of the Panama Canal; to the Committee on Merchant Marine and Fisheries.

386. Also, petition of the corresponding secretary, North Carolina Library Association, High Point, N. C., urging passage of the postal classification bill; to the Committee on Post Office and Civil Service.

387. Also, petition of the supreme secretary, Knights of Columbus, New Haven, Conn., urging the Congress of the United States to have printed for use during the Christmas mails a special 3-cent stamp bearing the Nativity scene; to the Committee on Post Office and Civil Service.

388. Also, petition of the supreme secretary, Knights of Columbus, New Haven, Conn., requesting passage of H. R. 692 authorizing the Postmaster General to provide for the use in first- and second-class post offices of a special cancellation mark on mail bearing the words "Pray for peace"; to the Committee on Post Office and Civil Service.

389. Also, petition of the city clerk, Waterbury, Conn., requesting that an immediate program of public works in Waterbury, Conn., and the rest of the flood area in order to ease the unemployment burden resulting from the flood disaster be instituted; to the Committee on Public Works.

390. Also, petition of the city clerk, Waterbury, Conn., requesting that funds be provided for the adoption of the flood protection for Waterbury and the Naugatuck Valley; to the Committee on Public Works.

391. Also, petition of the secretary-treasurer, Western Association of State Highway Officials, Salem, Oreg., petitioning consideration of their resolution with reference to Federal aid highway legislation; to the Committee on Public Works.

392. Also, petition of the clerk of Council, City of Cincinnati, Cincinnati, Ohio, requesting the Congress of the United States to adopt necessary legislation to appropriate an amount of money over and above the $60,000 the city has appropriated as the contribution of the Federal Government for certain pumping and pipeline facilities to serve the Taft Sanitary Engineering Center; to the Committee on Public Works.

393. Also, petition of the secretary, American Fisheries Society, Iowa Conservation Commission, Des Moines, Iowa, requesting the Congress of the United States to give prompt consideration to S. 890, relative to the Water Pollution Control Act; to the Committee on Public Works.

394. Also, petition of the commander, North Union Township, Veterans of Foreign Wars of the United States, Mount Braddock, Pa., urging the passage of appropriate laws granting to World War I veterans the same pension, medical, and other benefits now enjoyed by veterans of the Spanish-American War; to the Committee on Veterans' Affairs.

395. Also, petition of the pastor and moderator, Junius Heights Baptist Church, Dallas, Tex., with reference to opposition to legalized gambling; to the Committee on Ways and Means.

396. Also, petition of the secretary, Governors' Conference, Chicago, Ill., with reference to the establishment of sane and sensible textile tariffs; to the Committee on Ways and Means.

397. By Mr. GROSS: Petition of 20 residents of Sumner, Iowa, favoring passage of legislation to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and its broadcasting over radio and television; to the Committee on Interstate and Foreign Commerce.

398. Also, petition of 30 Iowa residents, favoring passage of legislation to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and its broadcasting over radio and television; to the Committee on Interstate and Foreign Commerce.

399. By Mr. HESELTON: Resolution passed unanimously at a meeting of the Hampshire Association of Congregational Churches and Ministers on October 9, 1955, urging that the Congress, by constitutional amendment, if necessary, enact legislation designed to lighten the burden of the Office of the Presidency; and that the people cease to demand exhausting handshaking and an endless round of speeches at conferences, conventions, county fairs, etc.; to the Committee on the Judiciary.

400. By Mr. SHORT: Petition of Rev. L. M. Starkey and other residents of Springfield, Mo.; to the Committee on Interstate and Foreign Commerce.

401. Also, petition of Rev. Eugene Gilmore and other residents of Springfield, Mo.; to the Committee on Interstate and Foreign Commerce.

402. Also, petition of Pearle Tibbetts and other citizens of Marionville, Mo.; to the Committee on Interstate and Foreign Commerce.

403. By the SPEAKER: Petition of the president, American Chamber of Commerce of Mexico, Mexico, D. F., requesting that they be placed on record in favor of Mexico's application for an increased and adequate sugar quota for the sale of its exportable sugar surplus, etc.; to the Committee on Agriculture.

404. Also, petition of the city and county clerk, Honolulu, T. H., requesting the enactment of legislation appropriating $3 million for land acquisition, plans, construction, equipping, and furnishing a war memorial municipal auditorium in the city and county of Honolulu; to the Committee on Interior and Insular Affairs.

405. Also, petition of Ohio Bell, 9115 South Lafayette Avenue, Chicago 20, Ill., requesting a relief bill be introduced into the Congress in the amount of $179,086 to cover damages incurred, etc.; to the Committee on the Judiciary.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308 (b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

QUARTERLY REPORTS

The following quarterly reports were submitted for the third calendar quarter 1955:

(NOTE.—The form used for reports is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

File two copies with the Secretary of the Senate and file three copies with the Clerk of the House of Representatives.
This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.
Place an "X" below the appropriate letter or figure in the box at the right of the "Report" heading below:
"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.
"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____	REPORT PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT	P	QUARTER 1st	2d	3d	4th
		(Mark one square only)				

NOTE ON ITEM "A".—(a) In General: This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee," state in Item "B" the name, address, and nature of business of the "employer." (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee.")
(ii) "Employer".—To file as an "employer," write "None" as answer to Item "B."
(b) Separate Reports.—An agent or employee should not attempt to combine his Report with the employer's Report.
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING.—(1) State name, address, and nature of business; (2) if this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers; except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—Section 302 (e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place ☐ an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed, in connection with legislative interests, set forth: (a) description; (b) quantity distributed; (c) date of distribution; (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed.)

4. *If* this is a "Preliminary" Report (Registration) rather than a Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. *If this is a "Quarterly" Report, disregard this Item "C 4" and fill out Items "D" and "E" on the back of this page.* Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302 (a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value.
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter
5. $_____Received for services (e. g., salary, fee, etc.)
6. $_____TOTAL for this Quarter (Add items "1" through "5")
7. $_____Received during previous Quarters of calendar year
8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302 (a).

9. $_____TOTAL now owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during the Quarter.
12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more
(from Jan. 1 through this Quarter)

13. Have there been such contributors?
Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* ("*Period*" from Jan. 1 through _____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N. Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E."—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302 (b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures
9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year
11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302 (b).

12. $_____TOTAL now owed to person filing
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More
In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7–11: Roe Printing Co., 3214 Bank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7–15, 8–15, 9–15: Britten & Blatten, 3127 Gremlin Bldg., Washington, D. C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. J. Carson Adkerson, 976 National Press Building, Washington, D. C.
E. (9) $11.84.

A. Arthur F. Aebersold, 900 F Street NW., Washington, D. C.
B. Retirement Federation of Civil Service Employees of the United States Government, 900 F Street NW., Washington, D. C.
D. (6) $910.58. E. (9) $50.25.

REGISTRATIONS

The following registrations were submitted for the third calendar quarter 1955:

(NOTE.—The form used for registration is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "4," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

	QUARTER			
P	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.
2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302 (e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed).

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C 4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a Quarterly" Report.

SENATE

THURSDAY, JANUARY 5, 1956

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Our Father God, by whom the meek are guided in judgment and light riseth up in darkness for the godly, may these keepers of the Nation's faith and fate not stumble on the path their feet are called to take. This day, so tangled and tragic as in a tapestry of words and phrases the Chief Executive and his coadjutors sketch out the pattern of a year's record as it appears to them, may it be heard with a sympathetic realization of the vast global responsibilities, complications, and commitments with which it deals. We give Thee hearty thanks that our President has so risen up in restored strength as to face all the problems of the Republic which will be dealt with in the picture he draws of the Nation's state. Thou knowest what untold millions of prayers like sweet incense have ascended for his restoration since the sad day he was so suddenly stricken.

And as the panorama of the Nation's life passes before our eyes and minds may we here highly resolve that this white-domed Capitol edifice shall be not only an arsenal of material might but also a cathedral of faith where are proclaimed to all the earth the sanctions of irresistible moral force and the spiritual verities upon which our freedoms were reared and on which they rest and without which our boasted democracy is a bruised and broken reed.

We ask it in the dear Redeemer's name. Amen.

ATTENDANCE OF SENATORS

RALPH E. FLANDERS, a Senator from the State of Vermont, ESTES KEFAUVER, a Senator from the State of Tennessee, ROBERT S. KERR, a Senator from the State of Oklahoma, and A. S. MIKE MONRONEY, a Senator from the State of Oklahoma, appeared in their seats today.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, January 3, 1956, was dispensed with.

NOTIFICATION TO THE PRESIDENT

Mr. JOHNSON of Texas and Mr. KNOWLAND advanced in the center aisle, and

Mr. JOHNSON of Texas said: Mr. President, on behalf of the joint committee appointed by the Senate and the House of Representatives, I wish to report that on Tuesday, January 3, 1956, the joint committee of the Senate and House communicated with the President of the United States by telephone and advised him that a quorum of each House had assembled and the Congress was ready to receive any message he might desire to transmit. We were advised by the President that he would send his state of the Union message to the Congress today.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, informed the Senate that a quorum of the House is present and that the House is ready to proceed with business.

The message also informed the Senate that a committee of three Members had been appointed by the Speaker on the part of the House of Representatives to join with a committee on the part of the Senate to notify the President of the United States that a quorum of each House had assembled and Congress was ready to receive any communication that he may be pleased to make.

The message communicated to the Senate the intelligence of the death of Hon. John D. Dingell, late a Representative from the State of Michigan, and transmitted the resolutions of the House thereon.

The message also communicated to the Senate the intelligence of the death of Hon. Vera Buchanan, late a Representative from the State of Pennsylvania, and transmitted the resolutions of the House thereon.

REPORT ON MUTUAL SECURITY PROGRAM—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 226)

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, received by the Secretary of the Senate subsequent to the sine die adjournment, which was read, and with the accompanying report, referred to the Committee on Foreign Relations:

To the Congress of the United States:

I am transmitting herewith the eighth semiannual report on the mutual security program, covering operations from January 1 to June 30, 1955, in furtherance of the purposes of the Mutual Security Act of 1954.

During this period, there was a marked increase in the free world's economic well-being and defensive strength.

Working in partnership together, the nations of the free world have individually and collectively benefited from the mutual security program. Their peoples are better fed and better clothed than ever before in this century, and their governments and their boundaries are better protected from external aggression or internal subversion.

In the current world situation, the dollars invested in the mutual security program have brought greater security to the people of the United States than could the same amount of dollars used in any other manner.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *August 24, 1955.*

REPORT ON LEND-LEASE OPERATIONS—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 221)

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, received by the Secretary of the Senate subsequent to the sine die adjournment, which was read, and with the accompanying report, referred to the Committee on Foreign Relations:

To the Congress of the United States:

I transmit herewith the 36th report to Congress on lend-lease operations covering the calendar year of 1954.

An amount in excess of $49 million was realized as the result of collections and credits during the year.

Brazil made the final payment under the lend-lease settlement arrangement of April 15, 1948, and completed the liquidation of that Government's defense aid commitments to the United States under the lend-lease programs. Final payment also was made by Nicaragua under the lend-lease settlement arrangement of September 26, 1951. The Government of Peru signed a lend-lease settlement arrangement with the United States on November 25, 1954, providing for the liquidation of its lend-lease indebtedness.

Various other countries continued to make payments under agreed settlement terms and, as usual, large installments on their accounts were paid by France, the Netherlands and the United Kingdom.

The report describes the developments during 1954 in the settlement negotiations with Poland and the Soviet Union.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *October 19, 1955.*

(Enclosure: 36th report to Congress on lend-lease operations.)

CALL OF THE ROLL—PROPOSED VISIT TO SENATE BY THE PRESIDENT-ELECT OF BRAZIL

Mr. JOHNSON of Texas. Mr. President, before I suggest the absence of a quorum, I should like to inform the Senate that the State Department has advised the leadership that at 2 o'clock the President-elect of Brazil, the Honorable Juscelino Kubitschek de Oliveira, will visit the Capitol. It is planned to present the President-elect to the Senate and ask him to make a brief statement at that time.

In the event the Senate should conclude its business prior to 2 o'clock, the leadership will suggest a recess until shortly before the arrival of the President-elect of Brazil.

I now suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Bible	Case, N. J.
Allott	Bricker	Case, S. Dak.
Anderson	Bridges	Chavez
Barkley	Bush	Clements
Barrett	Butler	Cotton
Beall	Byrd	Curtis
Bender	Capehart	Daniel
Bennett	Carlson	Dirksen

Douglas	Johnston, S. C.	O'Mahoney
Duff	Kefauver	Pastore
Dworshak	Kerr	Payne
Eastland	Kilgore	Potter
Ellender	Knowland	Purtell
Ervin	Kuchel	Robertson
Flanders	Langer	Russell
Frear	Lehman	Saltonstall
George	Long	Schoeppel
Goldwater	Magnuson	Scott
Gore	Malone	Smith, Maine
Green	Mansfield	Smith, N. J.
Hayden	Martin, Iowa	Sparkman
Hennings	Martin, Pa.	Stennis
Hickenlooper	McCarthy	Symington
Hill	McClellan	Thurmond
Holland	McNamara	Thye
Hruska	Monroney	Watkins
Humphrey	Morse	Welker
Ives	Mundt	Wiley
Jackson	Murray	Williams
Jenner	Neely	Young
Johnson, Tex.	Neuberger	

Mr. CLEMENTS. I announce that the Senator from Massachusetts [Mr. KENNEDY] and the Senator from Florida [Mr. SMATHERS] are absent on official business.

Mr. SALTONSTALL. I announce that the Senator from Colorado [Mr. MILLIKIN] is necessarily absent.

The VICE PRESIDENT. A quorum is present.

STATE OF THE UNION—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 241)

The VICE PRESIDENT laid before the Senate a message from the President of the United States, which was read by the legislative clerk [Edward E. Mansur, Jr.], and ordered to lie on the table and to be printed.

(For President's message, see House proceedings for today.)

MORNING BUSINESS

Mr. JOHNSON of Texas. Mr. President, as I understand, under the rule, there will be a morning hour until 2 o'clock, subject to the 2-minute limitation on statements. Is that correct?

The VICE PRESIDENT. The Senator is correct.

BOARD OF VISITORS TO UNITED STATES MILITARY ACADEMY

The VICE PRESIDENT. The Chair desires to announce that, pursuant to the provisions of title 10, section 1055, United States Code, he appointed, on November 29, 1955, the Senator from Alabama [Mr. HILL], the Senator from Oregon [Mr. MORSE], and the Senator from Michigan [Mr. POTTER] as the members on the part of the Senate of the Board of Visitors to the United States Military Academy for the year 1956.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT ON STUDY OF METHODS OF MARKETING CONTROL APPLICABLE TO BURLEY TOBACCO

A letter from the Secretary of Agriculture, transmitting, pursuant to law, a report on the study made of the various methods of marketing control applicable to burley tobacco dated November 1, 1955 (with an accompanying report); to the Committee on Agriculture and Forestry.

ELIMINATION OF REQUIREMENT OF CERTAIN NOTICES

A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation to amend the act of May 29, 1884 (23 Stat. 31), as amended, and the act of March 3, 1905 (33 Stat. 1264), as amended, to eliminate the requirement of certain notices thereunder, and for other purposes (with an accompanying paper); to the Committee on Agriculture and Forestry.

REPORTS ON COOPERATION WITH MEXICO IN CONTROL AND ERADICATION OF FOOT-AND-MOUTH DISEASE

A letter from the Acting Secretary, Department of Agriculture, transmitting, pursuant to law, a confidential report on cooperation of the United States with Mexico in the control and eradication of foot-and-mouth disease, for the month of June 1955 (with an accompanying report); to the Committee on Agriculture and Forestry.

A letter from the Assistant Secretary of Agriculture, transmitting, pursuant to law, a confidential report on cooperation of the United States with the Republic of Mexico, in the control and eradication of foot-and-mouth disease, for the month of July 1955 (with an accompanying report); to the Committee on Agriculture and Forestry.

A letter from the Assistant Secretary of Agriculture, transmitting, pursuant to law, a confidential memorandum of understanding executed by the Mexican-United States Commission for the Prevention of Foot-and-Mouth Disease, effective on October 1, 1955, relative to the financial arrangements for carrying on the work of that Commission (with an accompanying paper); to the Committee on Agriculture and Forestry.

Three letters from the Assistant Secretary of Agriculture, transmitting, pursuant to law, copies of reports on cooperation with Mexico in the control and eradication of foot-and-mouth disease, for the months of August, September, and November 1955 (with accompanying reports); to the Committee on Agriculture and Forestry.

AMENDMENT OF AGRICULTURAL ADJUSTMENT ACT OF 1938, RELATING TO REFUND OF CERTAIN PENALTIES

A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 314 of the Agricultural Adjustment Act of 1938, as amended (with an accompanying paper); to the Committee on Agriculture and Forestry.

REPORT OF NATIONAL FOREST RESERVATION COMMISSION

A letter from the Secretary of the Army, President, National Forest Reservation Commission, transmitting, pursuant to law, a report of that Commission, for the fiscal year ended June 30, 1955 (with an accompanying report); to the Committee on Agriculture and Forestry, and ordered to be printed, with an illustration.

REPORT OF FARM CREDIT ADMINISTRATION

A letter from the Governor, Farm Credit Administration, Washington, D. C., transmitting, pursuant to law, a report of that Administration, for the fiscal year ended June 30, 1955 (with an accompanying report); to the Committee on Agriculture and Forestry.

LUMP-SUM APPROPRIATION FOR CREDITING POSTAL REVENUES

A letter from the Postmaster General, requesting a lump-sum appropriation in the amount of $2,076,000 be made to the Post Office Department for crediting postal revenues, for the fiscal year 1956; to the Committee on Appropriations.

REPORT ON EMPLOYMENT OF SPECIAL ASSISTANTS, DEPARTMENT OF JUSTICE

A letter from the Attorney General, transmitting, pursuant to law, a report showing the Special Assistants employed in the Department of Justice during the period January 1 to June 30, 1955 (with an accompanying report); to the Committee on Appropriations.

REPORT ON APPROPRIATIONS AND TRANSFERS

A letter from the Acting Director, Bureau of the Budget, Executive Office of the President, transmitting, pursuant to law, a report on appropriations, and transfers, for the fiscal year 1955 (with an accompanying report); to the Committee on Appropriations.

REPORTS ON OVEROBLIGATIONS OF ALLOTMENTS OF APPROPRIATIONS

A letter from the Administrator, General Services Administration, reporting, pursuant to law, on certain overobligations of allotments of appropriations; to the Committee on Appropriations.

A letter from the Deputy Administrator, Veterans' Administration, Washington, D. C., reporting, pursuant to law, on the overobligation of an appropriation; to the Committee on Appropriations.

A letter from the Chairman, Atomic Energy Commission, Washington, D. C., reporting, pursuant to law, on the overobligation of an appropriation; to the Committee on Appropriations.

A letter from the Chairman, the Commission of Fine Arts, Washington, D. C., reporting, pursuant to law, on the overobligation of an appropriation; to the Committee on Appropriations.

REPORTS ON APPORTIONMENTS OF APPROPRIATIONS

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Tax Court of the United States for salaries and expenses, for the fiscal year 1956, had been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation (with an accompanying paper); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the administrative expense authorization of the Commodity Credit Corporation for the fiscal year 1956 had been apportioned on a basis which indicates a necessity for a supplemental estimate of administrative expense authorization (with accompanying papers); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Department of Labor for unemployment compensation for Federal employees, for the fiscal year 1956, had been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation (with an accompanying paper); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the administrative expenses appropriation of the Public Housing Administration, Housing and Home Finance Agency, had been reapportioned on a basis which indicates a necessity for a supplemental estimate of appropriation (with an accompanying paper); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation for salaries and expenses, Office of the Administrator, Housing and Home Finance Agency, had been reapportioned on a basis which indicates a necessity for a supplemental estimate (with an accompanying paper); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the administrative and nonadministrative expense limitations of the Federal Housing Administration, Housing and Home Finance Agency, had been reapportioned on a basis which indicates a necessity for supplemental estimates (with accompanying papers); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Department of Justice for fees and expenses of witnesses, for the fiscal year 1956, had been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation (with an accompanying paper); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Department of Agriculture for salaries and expenses, Forest Service, for the fiscal year 1956, had been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation (with an accompanying paper); to the Committee on Appropriations.

A letter from the Acting Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Department of Health, Education, and Welfare for grants to States for public assistance, for the fiscal year 1956, had been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation (with an accompanying paper); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that certain appropriations had been apportioned on a basis which indicates a necessity for supplemental estimates of appropriation (with an accompanying paper); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Civil Service Commission for annuities under special acts, for the fiscal year 1956, had been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation (with an accompanying paper); to the Committee on Appropriations.

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation "Salaries and expenses, Railroad Retirement Board," for the fiscal year 1956, had been apportioned on a basis which indicates a necessity for a supplemental estimate of appropriation (with an accompanying paper); to the Committee on Appropriations.

Report on Judgments Rendered by United States Court of Claims

A letter from the Clerk, United States Court of Claims, Washington, D. C., transmitting, pursuant to law, a report of all judgments rendered by that Court, for the year ended October 1, 1955 (with an accompanying report); to the Committee on Appropriations, and ordered to be printed.

Donations of World War II Paintings to Government of New Zealand

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to authorize the Secretary of the Army to give 25 World War II paintings to the Government of New Zealand (with an accompanying paper); to the Committee on Armed Services.

Reports on Number of Officers on Duty With the Department of the Army and Army General Staff

Two letters from the Secretary of the Army, transmitting, pursuant to law, reports on the number of Army commissioned officers and warrant officers assigned to headquarters agencies of the Department of the Army, as of June 30, 1955, and September 30, 1955 (with accompanying papers); to the Committee on Armed Services.

Amendment of Warrant Officer Act of 1954

A letter from the Acting Secretary of the Army, transmitting a draft of proposed legislation to amend the Warrant Officer Act of 1954 (with an accompanying paper); to the Committee on Armed Services.

Disposition of Moneys Arising From Deductions From Carriers for Loss or Damage to Military and Naval Material

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to provide for the disposition of moneys arising from deductions made from carriers on account of the loss of or damage to military or naval material in transit, and for other purposes (with an accompanying paper); to the Committee on Armed Services.

Loan of Two Submarines to Government of Brazil

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to authorize the loan of two submarines to the Government of Brazil (with an accompanying paper); to the Committee on Armed Services.

Report on Collection of Claims for Damage Caused to Navy Property

A letter from the Under Secretary of the Navy, transmitting, pursuant to law, a report on the collection of claims for damage caused to Navy Department property, for the fiscal year ended June 30, 1955 (with an accompany report); to the Committee on Armed Services.

Report on Payment of Claims for Damage Caused by Naval Vessels

A letter from the Under Secretary of the Navy, transmitting, pursuant to law, a report on the payment of claims for damage caused by naval vessels, for the fiscal year ended June 30, 1955 (with an accompanying report); to the Committee on Armed Services.

Report on Average Monthly Flying Pay to Certain Officers of the Navy and Marine Corps

A letter from the Assistant Secretary of the Navy (Personnel and Reserve Forces), transmitting, pursuant to law, a report of the number of certain officers in the Navy and Marine Corps and the average monthly flying pay paid to such officers, for the 6-month period ended December 30, 1955 (with an accompanying report); to the Committee on Armed Services.

Reports on Overallotments of Appropriations

A letter from the Secretary of Defense, transmitting, pursuant to law, reports received from the Departments of the Army, Navy, and Air Force, covering violations relative to the overallotment of appropriations (with accompanying papers); to the Committee on Appropriations.

Report on Air Force Contracts Negotiated for Experimental, Developmental, Research, and Test Projects

A letter from the Deputy Assistant Secretary of Defense (Supply and Logistics), Department of Defense, transmitting, pursuant to law, a report on Air Force contracts negotiated for experimental, developmental, research, or test projects, and to assist in the maintenance of the industrial mobilization base, for the period January 1, through June 30, 1955 (with an accompanying report); to the Committee on Armed Services.

Report on Real and Personal Property, Department of Defense

A letter from the Deputy Secretary of Defense, transmitting, pursuant to law, a report on Real and Personal Property of the Department of Defense, as of December 31, 1954 (with an accompanying report); to the Committee on Armed Services.

Report on Pershing Hall Memorial Fund

A letter from the Acting Secretary of the Treasury, transmitting, pursuant to law, a report covering transactions during the fiscal year 1955, for account of the Pershing Hall Memorial Fund (with an accompanying report); to the Committee on Armed Services.

Amendment of Officer Personnel Act of 1947—Withdrawal of Request

A letter from the Chief of Legislative Liaison, Department of the Army, withdrawing a request for the enactment of legislation to provide for the retention on active duty of certain permanent major generals beyond statutory retirement age, transmitted to the Congress on May 27, 1955; to the Committee on Armed Services.

Flying Pay Report, Department of the Air Force

A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting, pursuant to law, a report of the number of officers, Lieutenant Colonel and above, by grade and age, receiving flying pay on August 31, 1955, together with a monthly statement of such pay, during the period March 1, 1955 to August 31, 1955 (with an accompanying report); to the Committee on Armed Services.

Report Entitled "Research and Development Procurement Action Taken," Department of the Air Force

A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting, pursuant to law, a confidential report entitled "Research and Development Procurement Action Taken," for the period January 1, 1955, through June 30, 1955 (with an accompanying report); to the Committee on Armed Services.

Report on Research and Development Contracts, Department of the Army

A letter from the Director of Research and Development, Department of the Army, transmitting, pursuant to law, a confidential report on research and development contracts, Department of the Army, for the period January 1, 1955 to June 30, 1955 (with an accompanying report); to the Committee on Armed Services.

Statistical Supplement, Stockpile Report

A letter from the Director, Office of Defense Mobilization, Executive Office of the President, transmitting, pursuant to law, a confidential statistical supplement to the stockpile report, for the period January 1 through June 30, 1955 (with accompanying papers); to the Committee on Armed Services.

Stockpile Report

A letter from the Director, Office of Defense Mobilization, Executive Office of the President, transmitting, pursuant to law, a confidential report on the stockpiling program, for the period January 1 to June 30, 1955 (with an accompanying report); to the Committee on Armed Services.

C., transmitting, pursuant to law, a report on licensed hydroelectric projects and on personnel of that commission, for the fiscal year ended June 30, 1955 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

REPORT OF ADMINISTRATOR OF REFUGEE RELIEF ACT

A letter from the Secretary of State, transmitting, pursuant to law, a report of the Administrator of the Refugee Relief Act of 1953 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON CERTAIN ADJUDICATIONS RENDERED AND COMPROMISE SETTLEMENTS, DEPARTMENT OF JUSTICE

A letter from the Attorney General, transmitting, pursuant to law, a report on certain adjudications rendered, and compromise settlements effected by the Department of Justice, for the year 1955 (with accompanying documents); to the Committee on the Judiciary.

REPORT ON PAYMENT OF CLAIMS ARISING FROM CORRECTION OF MILITARY OR NAVAL RECORDS

A letter from the Deputy Secretary of Defense, transmitting, pursuant to law, a report on the payment of claims arising from the correction of military or naval records, for the period January 1, through June 30, 1955 (with an accompanying report); to the Committee on the Judiciary.

CHIEF WARRANT OFFICER GEORGE C. CARTER

A letter from the Secretary of the Army, transmitting a draft of proposed legislation for the relief of Chief Warrant Officer George C. Carter (with an accompanying paper); to the Committee on the Judiciary.

COL. HENRY M. ZELLER

A letter from the Secretary of the Army, transmitting a draft of proposed legislation for the relief of Col. Henry M. Zeller (with an accompanying paper); to the Committee on the Judiciary.

DANIEL O. HULSE, JR.

A letter from the Secretary of the Army, transmitting a draft of proposed legislation for the relief of Daniel O. Hulse, Jr. (with an accompanying paper); to the Committee on the Judiciary.

NATHAN A. KAHN

A letter from the Secretary of the Army, transmitting a draft of proposed legislation for the relief of Nathan A. Kahn (with an accompanying paper); to the Committee on the Judiciary.

ARTHUR E. WEEDEN, JR.

A letter from the Secretary of the Army, transmitting a draft of proposed legislation for the relief of Arthur E. Weeden, Jr. (with an accompanying paper); to the Committee on the Judiciary.

EUGENE GARDNER, BYRON M. BARBEAU, JOHN R. REAVES, AND JACKSON L. HARDY

A letter from the Acting Secretary of the Army, transmitting a draft of proposed legislation for the relief of Eugene Gardner, Byron M. Barbeau, John R. Reaves, and Jackson L. Hardy (with accompanying papers); to the Committee on the Judiciary.

ACCEPTANCE OF OKINAWAN EMIGRANTS

A letter from the Acting Secretary of the Army, transmitting a resolution adopted by the Legislature of the Government of the Ryukyu Islands, relating to the acceptance of Okinawan emigrants (with accompanying papers); to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY DEPARTMENT OF COMMERCE

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report of tort claims paid by that Department during the fiscal year 1955 (with an accompanying report); to the Committee on the Judiciary.

PROTECTION OF OFFICERS AND EMPLOYEES OF THE UNITED STATES

A letter from the Acting Secretary of Commerce, transmitting a draft of proposed legislation to amend section 1114 of Title 18 of the United States Code relating to the protection of officers and employees of the United States (with an accompanying paper); to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY DEPARTMENT OF THE AIR FORCE

A letter from the Secretary, Department of the Air Force, transmitting, pursuant to law, a report on tort claims paid by that Department for the fiscal year 1955 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF CLAIMS PAID BY DEPARTMENT OF THE AIR FORCE

A letter from the Secretary, Department of the Air Force, transmitting, pursuant to law, a report of claims paid under the Military Personnel Claims Act of 1945 by the Department of the Air Force, for the fiscal year 1955 (with an accompanying report); to the Committee on the Judiciary.

PAYMENT OF CERTAIN CLAIMS BY DEPARTMENT OF THE AIR FORCE

A letter from the Secretary of the Air Force, transmitting, pursuant to law, a report on the payment of certain claims by the Department of the Air Force, pursuant to the Maritime Claims Act (with an accompanying report); to the Committee on the Judiciary.

PAYMENT OF CLAIM OF JAMES STEWART & CO., INC.

A letter from the Acting Secretary of the Treasury, reporting, pursuant to law, the payment of the claim of James Stewart & Co., Inc., of Falls Church, Va.; to the Committee on the Judiciary.

REPORT ON PAYMENT OF CLAIM OF CURTIS COCHRAN

A letter from the Acting Secretary of the Treasury, reporting, pursuant to law, the payment of the claim of Curtis Cochran, Immokalee, Fla.; to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY TREASURY DEPARTMENT

A letter from the Acting Secretary of the Treasury, transmitting, pursuant to law, a report on tort claims paid by that Department, for the fiscal year 1955 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF TORT CLAIMS PAID BY POST OFFICE DEPARTMENT

A letter from the Acting Deputy Postmaster General, transmitting, pursuant to law, a report of tort claims paid by that Department during the fiscal year 1955 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON SETTLEMENT OF CERTAIN PERSONNEL CLAIMS, DEPARTMENT OF THE NAVY

A letter from the Under Secretary of the Navy, transmitting, pursuant to law, a report on the settlement of certain personnel claims by the Department of the Navy, for the fiscal year 1955 (with accompanying papers); to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY DEPARTMENT OF AGRICULTURE

A letter from the Administrative Assistant Secretary, Department of Agriculture, transmitting, pursuant to law, a report of tort claims paid by that Department, for the period July 1, 1954, through June 30, 1955 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF TORT CLAIMS PAID BY ATOMIC ENERGY COMMISSION

A letter from the Chairman, United States Atomic Energy Commission, transmitting, pursuant to law, a report on tort claims paid by that Commission, for the period July 1, 1954, through June 30, 1955 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY VETERANS' ADMINISTRATION

A letter from the Administrator, Veterans' Administration, transmitting, pursuant to law, a report on tort claims paid by that Administration, during the fiscal year ended June 30, 1955 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY CENTRAL INTELLIGENCE AGENCY

A letter from the Acting Director, Central Intelligence Agency, Washington, D. C., reporting, pursuant to law, on tort claims paid by that Agency, for the fiscal year 1955; to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY GENERAL SERVICES ADMINISTRATION

A letter from the Administrator, General Services Administration, Washington, D. C., transmitting, pursuant to law, a report of tort claims paid by that Administration, for the fiscal year 1955 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON TORT CLAIM PAID BY FEDERAL CIVIL DEFENSE ADMINISTRATION

A letter from the Administrator, Federal Civil Defense Administration, reporting, pursuant to law, that the tort claim of Richard B. Downs, of Silver Spring, Md., had been settled during the fiscal year 1955; to the Committee on the Judiciary.

REPORT OF SUBVERSIVE ACTIVITIES CONTROL BOARD

A letter from the Chairman, Subversive Activities Control Board, Washington, D. C., transmitting, pursuant to law, a report of that Board, for the fiscal year ended June 30, 1955 (with an accompanying report); to the Committee on the Judiciary.

GRANTING OF APPLICATIONS FOR PERMANENT RESIDENCE FILED BY CERTAIN ALIENS

Three letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered granting the applications for permanent residence filed by certain aliens, together with a statement of the facts and pertinent provisions of law as to each alien, and the reasons for granting such applications (with accompanying papers); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS

Three letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders suspending deportation of certain aliens, together with a statement of the facts and pertinent provisions of law as to each alien, and the reasons for ordering such suspension (with accompanying papers); to the Committee on the Judiciary.

ADMISSION OF DISPLACED PERSONS—WITHDRAWAL OF NAMES

Nine letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, withdrawing the names of certain displaced persons from reports heretofore transmitted to the Senate, pursuant to section 6 of the Refugee Relief Act of 1953, with a view to the adjustment of their immigration status (with accompanying papers); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS—WITHDRAWAL OF NAMES

Three letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, withdrawing the names of certain aliens from reports relating to aliens whose deportation has been suspended, transmitted to the Senate on January 17, 1955, February 1, 1955, and May 1, 1955; to the Committee on the Judiciary.

GRANTING OF TEMPORARY ADMISSION INTO THE UNITED STATES OF CERTAIN ALIEN SEAMEN

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a list of Yugoslav crewmen who were granted temporary admission into the United States (with an accompanying paper); to the Committee on the Judiciary.

ADMISSION INTO THE UNITED STATES OF CERTAIN DEFECTOR ALIENS

Five letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered granting temporary admission into the United States of certain defector aliens (with accompanying papers); to the Committee on the Judiciary.

TEMPORARY ADMISSION INTO THE UNITED STATES OF CERTAIN ALIENS

Six letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered granting temporary admission into the United States of certain aliens (with accompanying papers); to the Committee on the Judiciary.

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a copy of a confidential order admitting Amelia Aleksich to temporarily enter the United

States as a visitor, pursuant to the Commissioner's letter transmitted to the Senate on November 4, 1955 (with an accompanying paper); to the Committee on the Judiciary.

ADMISSION INTO THE UNITED STATES OF CERTAIN DEFECTOR ALIENS — WITHDRAWAL OF NAME

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, withdrawing the name of Leon Gorodetsky (Max Kovalsky) from a report granting admission into the United States of certain defector aliens, transmitted to the Senate on August 17, 1955 (with an accompanying paper); to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY CANAL ZONE GOVERNMENT

A letter from the Governor, Canal Zone Government, Balboa Heights, C. Z., transmitting, pursuant to law, a report on tort claims paid by that Government for the fiscal year 1955 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

A letter from the Secretary, Department of Health, Education, and Welfare, transmitting, pursuant to law, a report of that Department, for the fiscal year 1954 (with an accompanying report); to the Committee on Labor and Public Welfare.

PROGRESS REPORT RELATING TO NATIONAL PROGRAM AGAINST DISCRIMINATION IN EMPLOYMENT ON FEDERAL CONTRACTS

A letter from the Deputy Attorney General reporting, pursuant to law, concerning the progress in helping to implement the national program against discrimination in employment on Federal contracts; to the Committee on Labor and Public Welfare.

AUTHORIZATION TO IMPOUND MAIL IN CERTAIN CASES

A letter from the Acting Postmaster General, transmitting a draft of proposed legislation to authorize the Postmaster General to impound mail in certain cases (with an accompanying paper); to the Committee on Post Office and Civil Service.

AUTHORITY TO PUBLISH INFORMATION PAMPHLETS, ETC.

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to authorize the Chief of Engineers to publish information pamphlets, maps, brochures, and other material (with an accompanying paper); to the Committee on Public Works.

REPORT OF LIBRARIAN OF CONGRESS

A letter from the Librarian of Congress, transmitting, pursuant to law, his report for the fiscal year ended June 30, 1955 (with accompanying documents); to the Committee on Rules and Administration.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Archivist of the United States, transmitting, pursuant to law, a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The VICE PRESIDENT appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the committee on the part of the Senate.

REPORT OF SECRETARY OF THE SENATE

A letter from the Secretary of the Senate, transmitting, pursuant to law, his report of receipts and expenditures for the period July 1, 1954, to June 30, 1955 (with an accompanying report); ordered to lie on the table and to be printed.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A resolution of the Legislature of the State of Pennsylvania; to the Committee on Appropriations:

"Whereas the executive department of the United States has recommended an appropriation of $6 million to be expended by the Corps of Engineers for fiscal 1955–56 to begin the authorized improvement of the Delaware River Channel, Philadelphia, Pa., to Trenton, N. J.; and

"Whereas the Senate of the United States approved the recommended sum of $6 million; and

"Whereas the members of the conference committee (representing the House of Representatives), in opposing the appropriation of the sum of $6 million, have refused to concur with the recommendation of the executive department and the Senate of the United States: Now, therefore, be it

"Resolved (the house of representatives concurring), That the Senate and House of Representatives of the Commonwealth of Pennsylvania, on behalf of the people of Pennsylvania, voice its disapproval of the discriminatory action of the House of Representatives of the United States (through its Representatives on the conference committee) in jeopardizing the welfare of our Delaware Valley three-State area by refusing to recognize the urgent need for improvement of the Delaware River by providing funds for the prompt start of construction of this vital project; and be it further

"Resolved, That the Senate and House of Representatives of the Commonwealth of Pennsylvania petition the executive and legislative branches of the United States Government through this resolution to approve legislation during the present session of the Congress of the United States that will make available in the current fiscal year the recommended sum of $6 million so that the justified and approved improvement of the Delaware River can be started promptly in the interests of our national defense, industry, commerce, and the welfare of all the people of the Delaware Valley; and be it further

"Resolved, That the President of the Senate of the Commonwealth of Pennsylvania appoint 3 members of the senate to serve as a continuing committee together with 3 members of the House of Representatives of the Commonwealth of Pennsylvania who, upon the concurrence of the house of representatives, shall be appointed by the speaker of the house; and be it further

"Resolved, That said committee shall cooperate with the Governor of the Commonwealth of Pennsylvania in such actions as may be desirable and necessary to achieve the required legislative appropriation from the Congress of the United States to assure not only the prompt start of the construction of the Delaware River Channel improvement but to assure, also, the earliest possible completion of this important project; and be it further

"Resolved, That the secretary of the senate be directed upon the passage of the instant resolution to forward copies thereof to His Excellency the President of the United States; to the Vice President of the United States, in his capacity as Presiding Officer of the Senate of the United States; to the Speaker of the House of Representatives of the Congress of the United States; to the two United States Senators from Pennsylvania, the Honorable EDWARD MARTIN and JAMES H. DUFF; to each one of the members of the Pennsylvania delegation to the House of Representatives of the Congress of the United States; to the Director of the Bureau of the Budget; and to the Chief of Engineers, United States Corps of Engineers."

Resolutions of the House of Representatives of the State of Massachusetts; to the Committee on Armed Services:

"Resolutions urging the naval authorities of the United States to provide for an underpass in the town of Rockland

"Whereas under present plans the extension of a South Weymouth Naval Air Station runway calls for the closing of Union Street in the town of Rockland; and

"Whereas Union Street is the only major road from Rockland into South Weymouth; and

"Whereas if this road is closed, it will practically isolate the town of Rockland; and

"Whereas by the building of an underpass on Union Street this situation will not develop: Now, therefore, be it

"Resolved, That the Massachusetts House of Representatives hereby respectfully urges the naval authorities in charge of this work to abandon their present plans and instead provide for an underpass on Union Street in the town of Rockland; and be it further

"Resolved, That a copy of these resolutions be forwarded by the secretary of the Commonwealth to the United States Navy Department and to the Members representing this Commonwealth in the United States Senate and House of Representatives."

A joint resolution of the Legislature of the State of Connecticut; to the Committee on Banking and Currency:

"House Joint Resolution 2

"Joint resolution memorializing Congress to make a study of the possibilities and problems of a Federal disaster-insurance program

"Whereas the northeastern States have suffered an estimated uninsured loss of over $2 billion in real property alone as the result of flood damage in August and October 1955; and

"Whereas flood disasters reemphasize the need for flood insurance protection which cannot be provided by private insurance companies except at prohibitive cost to the policyholder: Now, therefore, be it

"Resolved, That this general assembly in special session for the purpose of enacting a flood-recovery program urges the Congress of the United States to explore the need for forms of flood insurance not now obtainable from private insurance companies and that Congress take the initiative in the field by enacting a Federal insurance-disaster program; and be it further

"Resolved, That a suitable copy of this resolution be sent to each House of the Congress of the United States and to the Senate Committee on Banking and Currency."

A resolution of the Senate of the State of New Jersey; to the Committee on Banking and Currency:

"Senate Concurrent Resolution 25

"Concurrent resolution memorializing the Congress of the United States to adopt legislation providing a national flood-insurance program to indemnify all citizens of the country from damage and loss resulting from floods

"Whereas the recent flood disaster in New Jersey and in the eastern States generally has caused untold suffering and widespread loss and damage to the property of many citizens of New Jersey and of our neighboring States; and

"Whereas flood disasters are not the sole concern of New Jersey and its neighboring States but have caused similar loss, damage, and hardships in recent years to those citizens of our country residing in the vicinity of the Missouri, Mississippi, Ohio, and other rivers throughout this great country of ours; and

"Whereas such recent flood disasters have pointed up the lack of adequate flood-insurance programs to indemnify the citizens

of the country as a whole from damage and loss resulting from such flood disasters; and

"Whereas the damage, loss and suffering caused by such disasters is a problem of national concern: Now, therefore, be it

"Resolved by the senate of the State of New Jersey (the General Assembly concurring):

"1. The Congress of the United States is memorialized to adopt legislation providing a national flood-insurance program to indemnify all citizens of the country from damage and loss resulting from floods.

"The secretary of the senate is hereby directed to transmit, immediately following the passage of this concurrent resolution, a copy thereof, properly authenticated, to the President of the United States, to the respective presiding officers of the United States Senate and the House of Representatives and to all of the Senators and Representatives of the State of New Jersey in Congress.

"3. This concurrent resolution shall take effect immediately."

A concurrent resolution of the Legislature of the State of Alabama; to the Committee on Finance:

"House Joint Resolution 64

"Whereas the Federal Social Security Act provides for grants to States for aid to dependent children, and defines the term "dependent child" to include a needy child under the age of 16, or under the age of 18 if regularly attending school; and

"Whereas children between 16 and 18 years of age who are not regularly attending school are thus not eligible for aid to dependent children; and

"Whereas some of these children between 16 and 18 years of age are incapable of attending school because of some permanent physical or mental disability, and are thereby not eligible for aid to dependent children through no fault of their own: Now, therefore, be it

"Resolved by the House of Representatives of Alabama (the Senate concurring):

"1. The Congress of the United States is hereby memorialized to enact legislation necessary to make needy children between 16 and 18 years of age, who are incapable of regularly attending school because of some permanent physical or mental disability, eligible for aid to dependent children under the provisions of the Federal Social Security Act to the same extent that children under 16 years of age are eligible.

"2. The clerk of the house of representatives is directed to transmit a copy of this resolution to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to each member of the Alabama delegation in Congress."

A joint resolution of the Legislature of the State of Wisconsin; to the Committee on Interstate and Foreign Commerce:

"Joint resolution relating to air routes to the Orient

"Whereas the Civil Aeronautics Board, after thorough and exhaustive study, has again concluded there should be two separate and competing United States flag air routes across the Pacific, one through the California gateway to the Orient via the Central Pacific, and other through the Seattle gateway via Alaska and the short Great Circle course to the Orient; and

"Whereas the Civil Aeronautics Board maintains that retention of these different flight courses under existing conditions is vital to keep the balanced competitive pattern required by public convenience and necessity and that modification of this policy would undoubtedly require substantial Government subsidy; and

"Whereas a request by the airline now serving the Orient through the Central Pacific for authority to also fly over the Great Circle track is pending before the President of the United States; and

"Whereas the Civil Aeronautics Board recommended denial of that request because the duplicating service would destroy the balanced competitive air pattern in the Pacific and result in additional Government subsidies; and

"Whereas the airline now authorized to fly over the Great Circle course serves Chicago on direct flights to the Pacific Northwest and is the only direct air tie between the State of Wisconsin and Alaska, Japan, Korea, Okinawa, Formosa, and the Philippines; and

"Whereas this direct international air service has assumed increased importance to business, industry, and the traveling public in Wisconsin and the Midwest generally and has helped broaden markets and expand trade territories for Midwest products; Now, therefore, be it

"Resolved by the assembly (the senate concurring), That we respectfully request that the proper governmental authorities take heed of these circumstances; that we express our adherence to the policy set forth by the Civil Aeronautics Board, an authoritative governmental agency thoroughly familiar with all aspects of international air problems, and therefore oppose any application for duplication of service on the Great Circle course as contrary to the interests of the State, the Government, and the public generally; and, be it further

"Resolved, That properly attested copies of this resolution be sent to the Civil Aeronautics Board, the President of the United States, each United States Senator and Representative from the State of Wisconsin, and to each House of the Congress."

A joint resolution of the Legislature of the State of Illinois; to the Committee on the Judiciary:

"Senate Joint Resolution 25

"Be it resolved by the senate of the 69th General Assembly of the State of Illinois (the house of representatives concurring therein), That the General Assembly of the State of Illinois, pursuant to article V of the Constitution of the United States, hereby makes application to the Congress of the United States to call a convention for proposing the following article as an amendment to the Constitution of the United States in lieu of article V:

" 'ARTICLE —

" 'SECTION 1. The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or on the application of the legislatures of two-thirds of the several States shall call a convention for proposing amendments; or the legislature of any State, whenever two-thirds of each House shall deem it necessary, may propose amendments to this Constitution by transmitting to the Secretary of State of the United States and to the secretary of state of each of the several States a certified copy of the resolution proposing the amendment, which shall be deemed submitted to the several States for ratification when certified copies of resolutions of the legislatures of any 12 of the several States by two-thirds of each House shall have been so transmitted concurring in the proposal of such amendment; which, in any case, shall be valid to all intents and purposes as part of this Constitution when ratified by the legislatures of three-fourths of the several States: *Provided,* That no State, without its consent, shall be deprived of its equal suffrage in the Senate.

" 'SEC. 2. The act of proposal, concurrence in a proposal, or ratification of an amendment, shall not be revocable.

" 'SEC. 3. A proposal of an amendment by a State shall be inoperative unless it shall have been so concurred in within 7 years from the date of the proposal. A proposed amendment shall be inoperative unless it shall have been so ratified within 15 years from the date of its submission, or shorter period as may be prescribed in the resolution proposing the amendment.

" 'SEC. 4. Controversies respecting the validity of an amendment shall be justifiable and shall be determined by the exercise of the judicial power of the United States.'; and be it further

"Resolved, That such amendment shall be valid to all intents and purposes as part of the Constitution of the United States when ratified by the legislatures of three-fourths of the several States; and be it further

"Resolved, That as the power of the sovereign States to propose amendments to the Constitution of the United States by convention under article V has never been exercised and no precedent exists for the calling or holding of such convention, the State of Illinois hereby declares the following basic principles with respect thereto: That the power of the sovereign States to amend the Constitution of the United States under article V is absolute; that the power of the sovereign States to propose amendments to the Constitution by convention under article V is absolute; that the power of the sovereign States extends over such convention and the scope and control thereof and that it is within their sovereign power to prescribe whether such convention shall be general or shall be limited to the proposal of a specified amendment or of amendments in a specified field; that the exercise by the sovereign States of their power to require the calling of such convention contemplates that the applications of the several States for such convention shall prescribe the scope thereof and the essential provisions for holding the same; that the scope of such convention and the provisions for holding the same are established in and by the applications therefor by the legislatures of the two-thirds majority of the several States required by article V to call the same, and that it is the duty of the Congress to call such convention in conformity therewith; that such convention is without power to transcend, and the delegates to such convention are without power to act except within the limitations and provisions so prescribed; and be it further

"Resolved, That such convention shall be called and held in conformity with the following limitations and provisions, and that the Congress, in the call for such convention, hereby is requested to and shall prescribe:

"(1) That such convention shall be held in the city of Philadelphia, in the State of Pennsylvania, on the first Monday of the first December following transmission to the Senate and the House of Representatives of the Congress of the United States of applications for such convention by the legislatures of two-thirds of the several States and, in honor of the Nation's founders and for invocation, shall convene at Constitution Hall, at Independence Square, at the hour of 10 o'clock in the morning of such day, and thereupon adjourn to more commodious quarters within said city for session as the convention shall determine;

"(2) That the several States shall have equal suffrage at such convention; that each of the several States shall be entitled to 3 delegates thereat and that each of such delegates shall be entitled to 1 vote; that the delegates to such convention from the several States shall be the highest officer of the senate and the highest officer of the house of representatives of their respective legislatures at the time of such convention, except that in States where the lieutenant governor is president of the senate, the president of the senate pro tempore or other highest officer from the membership of the senate shall be such delegate from the senate, and in States having a unicameral legislature the two highest officers of its legislature shall be

such delegates, which two delegates in each of the several States shall jointly designate a citizen of such State at large who shall be the third delegate from such State to such convention; that in case of a vacancy in the office of any delegate during such convention, not otherwise filled pursuant to law or by legislative act or as herein provided, such vacancy shall be filled by the governor of such State from the senate or house of its legislature or the State at large, respectively, as the case may be; that during such vacancy and during the absence of a delegate from the floor of the convention the delegates present from such State shall be empowered to exercise the vote of the absent delegate or delegates from such State; that the legislature of any State may choose its delegates to such convention, other than hereinabove designated, in which case the delegates so chosen shall be certified to the convention by the secretary of state of such State and shall constitute the delegates of such State at such convention in lieu of the delegates otherwise hereinabove designated.

"(3) That such convention shall be limited and restricted specifically to the consideration and proposal of such amendment to article V, the choosing of officers and adoption of rules of procedure for the conduct of such convention and the maintenance of order thereat, the determination of any issue respecting the seating of delegates, adjournment from day to day and to a day certain and from place to place within said city as may be convenient, and adjournment sine die; and such convention shall not be held for any other purpose nor have any other power, and the delegates thereto shall have no power other than within the limitations herein prescribed;

"(4) That a permanent record shall be made of the proceedings of such convention, which shall be certified by the secretary of the convention, the original of which shall be placed in the Library of Congress and printed copies of which shall be transmitted to the Senate and the House of Representatives of the Congress, to the Secretary of State of the United States, and to each house of the legislature, and to the secretary of state of each of the several States;

"(5) That the powers of such convention shall be exercisable by the States, represented at such convention by duly constituted delegates thereat, by majority vote of the States present and voting on such proposal, and not otherwise; and be it further

"*Resolved*, That this application shall constitute a continuing application for such convention under article V of the Constitution of the United States until the legislatures of two-thirds of the several States shall have made like applications and such convention shall have been called and held in conformity therewith, unless the Congress itself propose such amendment within the time and the manner herein provided; and be it further

"*Resolved*, That proposal of such amendment by the Congress and its submission for ratification to the legislatures of the several States in the form of the article hereinabove specifically set forth, at any time prior to 60 days after the legislatures of two-thirds of the several States shall have made application for such convention, shall render such convention unnecessary and the same shall not be held; otherwise such convention shall be called and held in conformity with such applications; and be it further

"*Resolved*, That as this application under article V of the Constitution of the United States is the exercise of a fundamental power of the sovereign States under the Constitution of the United States, it is requested that receipt of this application by the Senate and the House of Representatives of the Congress of the United States be officially noted and duly entered upon their respective records, and that the full context of this resolution be published in the official publication of both the Senate and the House of Representatives of the Congress; and be it further

"*Resolved*, That certified copies of this resolution be transmitted forthwith by the secretary of state to the Senate and the House of Representatives of the Congress of the United States, to each Senator and Representative in the Congress from this State, and to the Secretary of State of the United States, and to each house of the legislature and to the secretary of state of each of the several States, attesting the adoption of this resolution by the legislature of this State."

A resolution adopted by the General Board of the National Council of the Churches of Christ in the United States of America, at Omaha, Nebr., favoring the distribution of surplus food in the United States to the hungry and needy peoples overseas; to the Committee on Agriculture and Forestry.

A letter, in the nature of a petition, from the Health Education League of Portland, Inc., signed by Roy H. Woodruff, president, and Mrs. Gene Woodruff, secretary, praying for a congressional investigation of the Pure Food and Drug Administration and the Public Health Service; to the Committee on Agriculture and Forestry.

Two resolutions adopted by the city council, city of Glendora, and the city council, city of Azusa, both of the State of California, favoring the enactment of legislation to provide the necessary funds for the immediate construction of the Walnut Creek System for the control and conservation of flood waters in Los Angeles County; to the Committee on Appropriations.

A resolution adopted by the American National Retail Jewelers Association, New York, N. Y., favoring the elimination of all unnecessary governmental expenses; to the Committee on Appropriations.

A resolution adopted by the Gulf States Marine Fisheries Commission at Clearwater, Fla., favoring the construction and operation of a weather ship in the Gulf of Mexico; to the Committee on Appropriations.

Resolutions adopted by the Liberal Religious Youth Inc., at Olivet, Mich., favoring the enactment of legislation to provide increased contributions to the United Nations Children's Fund and the United Nations Technical Assistance Program; to the Committee on Appropriations.

A resolution adopted by the Harbor Commissioners, Honolulu, T. H., favoring the enactment of legislation to provide further appropriations for the completion of certain public works construction at Kawaihae Harbor, Nawiliwili Harbor, and Honolulu Harbor; to the Committee on Appropriations.

A resolution adopted by the Missouri Conference of the Methodist Church, at Moberly, Mo., relating to the appointment of a chaplain at the West Point Military Academy; to the Committee on Armed Services.

A resolution adopted by a convention of the 82d Airborne Division, at Detroit, Mich., favoring an increase instead of a reduction in the United States Army forces, and so forth; to the Committee on Armed Services.

A resolution adopted by the National Association of State and Territorial Civil Defense Directors, at Washington, D. C., favoring the donation of Federal surplus property for civil-defense purposes, and so forth; to the Committee on Government Operations.

The memorial of R. J. Maass, Reese Air Force Base, Tex., remonstrating against Federal donation for medical care for dependents of soldiers; to the Committee on Armed Services.

A letter from the Deputy Director, Civil Defense Corps, State of Ohio, Columbus, Ohio, transmitting an amendment to the original interstate compact between the States of Ohio and Wyoming, and a copy of an original interstate compact between the State of Ohio and the District of Columbia (with accompanying papers); to the Committee on Armed Services.

A letter from the Coordinator, Office of Civil Defense, Commonwealth of Virginia, Richmond, Va., transmitting, pursuant to law, a certified copy of an interstate civil-defense compact between the States of Virginia and Kentucky (with an accompanying paper); to the Committee on Armed Services.

A letter from the Deputy Director, Civil Defense Corps, Adjutant General's Department, State of Ohio, Columbus, Ohio, transmitting copies of amendments to the existing interstate compacts between the State of Ohio and the States of West Virgina and Florida (with accompanying papers); to the Committee on Armed Services.

Resolutions adopted by the Veterans of Foreign Wars Post, No. 21, of Connellsville; Post No. 47, of Uniontown; Post No. 5576, of Cardale; and Post No. 8543, of Mount Braddock, all of the State of Pennsylvania, favoring the enactment of legislation providing pensions for World War I veterans; to the Committee on Finance.

A resolution adopted by the American Chamber of Commerce of Mexico, relating to an increased sugar quota for the Republic of Mexico; to the Committee on Finance.

A resolution adopted by Berwyn Post, No. 422, the American Legion, Berwyn, Ill., favoring the enactment of legislation to provide pensions for World War I and World War II veterans; to the Committee on Finance.

A resolution adopted by the Southern Governors' Conference, Point Clear, Ala., relating to textile tariffs; to the Committee on Finance.

A letter, in the nature of a petition, from Willis Sherrill, of West Palm Beach, Fla., relating to old-age assistance (with an accompanying paper); to the Committee on Finance.

A resolution adopted by the League of Republican Women, at Jackson, Mich., relating to tax-exempt foundations; to the Committee on Finance.

A resolution adopted by the International Assembly of the Commercial Telegraphers' Union, at Vancouver, British Columbia, Canada, favoring the enactment of legislation to lower the permissive retirement age under the Social Security Act from 65 years to 60 years; to the Committee on Finance.

A resolution adopted by the State Council of North Carolina, Junior Order of United American Mechanics, Asheville, N. C., relating to free public schools; to the Committee on Labor and Public Welfare.

A resolution adopted by the American Congress of Physical Medicine and Rehabilitation, of Chicago, Ill., protesting against the enactment of Senate bill 1951, to provide for the establishment of an independent Federal Agency for the Handicapped; to the Committee on Labor and Public Welfare.

A resolution adopted by the Board of Directors, Wisconsin Good Roads Association, at Milwaukee, Wis., relating to the improvement of highway conditions in Wisconsin; to the Committee on Public Works.

A resolution adopted by the Council of the City of Cincinnati, Ohio, favoring the enactment of legislation to provide for a Federal contribution for certain public works construction in that city; to the Committee on Public Works.

A resolution adopted by North Willapa Harbor Grange 947, of the State of Washington, relating to navigation menace and erosion control in the Willapa Bay area; to the Committee on Public Works.

A resolution adopted by the Disabled American Veterans, Washington, D. C., favoring the establishment of a standing Senate Committee on Veterans' Affairs; to the Committee on Rules and Administration.

COMMUNICATIONS FROM ORGANIZATIONS OF FOREIGN COUNTRIES

The VICE PRESIDENT. The Chair has also received three communications from organizations of foreign countries, two of which extend thanks to the Congress for certain action taken, and the other transmitted by the Ambassador from Nationalist China opposing any negotiations with Communist China.

While receipt of such communications is prohibited by the Senate rules, in view of the circumstances, if there be no objection, these three communications will be received and appropriately referred.

There being no objection, the communications were referred as follows:

To the Committee on Foreign Relations: A letter from the Minister-Councillor of the Chinese Embassy, Washington, D. C., transmitting a statement signed by the Chairman of the Taipei Trade Union, Chairman of the Taichung Farmers' Union, and the Chairman of the Taichung Chamber of Commerce of Formosa, and a communication from the Commission de L'Europe Centrale Et Orientale, of Paris, expressing the gratitude to the Senate for supporting the fight for self-determination of enslaved nations.

To the Committee on Appropriations: A letter from the Federacion Interamericana de Automovil-Clubs, of Buenos Aires, relating to the completion of the Pan-American Highway.

STRENGTHENING OF THE UNITED NATIONS—RESOLUTION

Mr. THYE. Mr. President, at the annual meeting of Branch 437 of the Slovak League of America, Minneapolis, Minn., the members of branch 437 adopted a resolution which I desire to bring to the attention of the Members of Congress.

The resolution extends the inspired wishes of branch 437 for the continuation and the strengthening of the United Nations. I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas this annual meeting of Branch 437 of the Slovak League of America, Minneapolis, Minn., is being held on the 10th anniversary of the founding of the United Nations; and

Whereas it has always been the contention of this branch of our organization and all branches of the Slovak League of America, a national educational and cultural society, that only through the United Nations can we save succeeding generations from the scourge of war; and

Whereas we adhere to all principles of the United Nations, especially those relating to the fact that all nations should be sovereign and equal (including Red-dominated Slovakia, the home of our ancestors); and

Whereas it is our heartfelt hope that the United Nations will continue its efforts toward the freeing of enslaved peoples, such as those in Slovakia: It is therefore

Resolved, At this annual meeting to extend our inspired wishes for a continuance of the works of the United Nations with a prayer that this body of nations be strengthened with each succeeding year. God grant the United Nations a long life.

Dated this 24th day of October 1955 at Minneapolis, Minn.

ANDREW HUDAK,
President.
PAUL KORDIAK,
Treasurer.
ANDREW HROMADA,
Financial Secretary.
PETER P. PIKALA,
Recording Secretary.

INCREASED LIMIT OF EXPENDITURES BY COMMITTEE ON PUBLIC WORKS—REPORT OF A COMMITTEE

Mr. CHAVEZ, from the Committee on Public Works, reported an original resolution (S. Res. 159), which, under the rule, was referred to the Committee on Rules and Administration, as follows:

Resolved, That section 1 of Senate Resolution 70, 84th Congress, 1st session, agreed to March 18, 1955 (increasing the limit of expenditures by the Committee on Public Works), is amended by striking out "January 31, 1956" and inserting in lieu thereof "January 31, 1957."

REPORTS OF JOINT COMMITTEE ON THE ECONOMIC REPORT

Mr. DOUGLAS. Mr. President, the Joint Committee on the Economic Report has had five subcommittees conducting hearings and studies during 1955. These subcommittees were established by the full committee after completion of our work on the January 1955 Economic Report of the President—Senate Report No. 60, 84th Congress, 1st session—under provision of the Employment Act which charges the Joint Economic Committee not only with reporting on the main recommendations of the Economic Report but also directs it to make a continuing study of economic matters. Each of these subcommittees has prepared a report which has received the unanimous approval of the members of the subcommittees participating, and all five reports have been approved by the full committee for transmission to the Congress. Findings and recommendations of the subcommittee reports will be given further consideration in connection with the full committee's report on the 1956 Economic Report of the President.

The first report to be issued was Automation and Technological Change, prepared by the Subcommittee on Economic Stabilization under the chairmanship of Representative WRIGHT PATMAN, of Texas. This report makes a number of significant findings and recommendations on the current and prospective importance to the economy of rapid and technological change.

The Subcommittee on Economic Statistics, under the chairmanship of Representative RICHARD BOLLING, of Missouri, has prepared a 1955 report containing findings and recommendations in respect to a series of hearings held to review reports prepared by Federal Reserve Board consultant committees on statistics of inventories, savings, consumer expectations, plant and equipment expectations, and general business expectations. The subcommittee also reports its findings on employment and unemployment statistics and various continuing activities such as the preparation of the 1955 Historical and Descriptive Supplement to Economic Indicators.

The Subcommittee on Tax Policy, under the chairmanship of Representative WILBUR D. MILLS, of Arkansas, focused its study on the relationship of tax policy to the attainment of the Employment Act objectives, with particular emphasis on maintaining a steady and sustainable rate of economic progress. In its report entitled "Federal Tax Policy for Economic Growth and Stability," the subcommittee explored a wide range of tax issues with some 81 economists, accountants, lawyers, and other tax experts in order, first, to formulate acceptable general criteria for evaluating tax policy from the standpoint of the growth and stability objectives of the Employment Act; and, second, to outline a general tax policy designed to conform to the Nation's economic requirements for the coming years.

The Subcommittee on Low-Income Families, under the chairmanship of Senator JOHN SPARKMAN, in its report, A Program for the Low-Income Population at Substandard Levels of Living, sets forth its findings and recommendations on—

First. The role of the Federal Government in programs to aid the low-income population;

Second. The function and economic value of income-security measures, public assistance, vocational rehabilitation, and health programs;

Third. The role of education and training programs in improving the earning capacity of the individual, and in breaking the cycle of self-perpetuation within the low-income group; and

Fourth. Measures designed to reduce the number of rural and industrial areas which are characterized by chronic labor surplus and underemployment.

The Subcommittee on Foreign Economic Policy, under the chairmanship of Congressman RICHARD BOLLING, of Missouri, has submitted findings and recommendations on the significance of our international economic relations for the stable growth of the Nation's domestic economy. The subcommittee's report, Foreign Economic Policy, undertakes a broad appraisal of the basic theories of foreign trade as they pertain to the position of the United States in the world economy and considers the feasibility of setting up broad criteria to be used in developing an effective economic policy and in evaluating specific proposals in the field of foreign trade.

The five subcommittees heard a total of some 250 witnesses and panel experts on the major subjects which they covered, and prepared a total of 15 publications, a list of which I have added at the end of this statement. I am also attaching to my statement a list of the membership of the five subcommittees.

As chairman of the Joint Committee on the Economic Report, it is now my privilege to submit to the Senate the reports of these five subcommittees which have been approved for transmission to the Congress by the full committee.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a list of subcommittee reports, hearings, and materials, together with a list of the membership of the subcommittees of the Joint Committee on the Economic Report.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

JOINT COMMITTEE ON THE ECONOMIC REPORT—SUBCOMMITTEE REPORTS, HEARINGS, AND MATERIALS

SUBCOMMITTEE ON ECONOMIC STABILIZATION

Hearings, Automation and Technological Change, October 1955, $2.

Report, Automation and Technological Change, November 1955.

SUBCOMMITTEE ON ECONOMIC STATISTICS

Hearings, Reports of Federal Reserve Consultant Committees on Economic Statistics, November 1955, $2.25.

Hearings, Employment and Unemployment Statistics, November 1955, 45 cents.

1955 Report of the Subcommittee on Economic Statistics—Historical and Descriptive Supplement to Economic Indicators, November 1955, 40 cents.

SUBCOMMITTEE ON TAX POLICY

Federal Tax Policy for Economic Growth and Stability (papers submitted by panelists appearing before the subcommittee), November 1955, $2.50.

The Federal Revenue System: Facts and Problems (materials assembled for the Subcommittee on Tax Policy by the committee staff), January 1956.

Hearings, Federal Tax Policy, December 1955.

Report, Federal Tax Policy, December 1955.

SUBCOMMITTEE ON LOW-INCOME FAMILIES

Characteristics of the Low-Income Population and Related Programs (materials prepared by the staff of the subcommittee), October 1955, 60 cents.

Hearings, Low-Income Population, December 1955.

Report, Low-Income Population, December 1955.

SUBCOMMITTEE ON FOREIGN ECONOMIC POLICY

Hearings, Foreign Economic Policy, December 1955, $1.75.

Report, Foreign Economic Policy, December 1955.

Single copies of all publications are available from the committee's office. Prices are shown for publications available from the Superintendent of Documents, United States Government Printing Office, Washington, D. C.

SUBCOMMITTEES OF THE JOINT COMMITTEE ON THE ECONOMIC REPORT

Economic Stabilization: Representative Wright Patman, Texas, chairman; Representative Augustine B. Kelley, Pennsylvania; Senator Joseph C. O'Mahoney, Wyoming; Representative Jesse P. Wolcott, Michigan; Senator Arthur V. Watkins, Utah.

Economic Statistics: Representative Richard Bolling, Missouri, chairman; Senator

John Sparkman, Alabama; Representative Henry O. Talle, Iowa.

Tax Policy: Representative Wilbur D. Mills, Arkansas, chairman; Senator Paul H. Douglas, Illinois; Senator Joseph C. O'Mahoney, Wyoming; Senator Barry Goldwater, Arizona; Representative Thomas B. Curtis, Missouri.

Low-Income Families: Senator John Sparkman, Alabama, chairman; Representative Augustine B. Kelley, Pennsylvania; Senator Ralph E. Flanders, Vermont.

Foreign Economic Policy: Representative Richard Bolling, Missouri, chairman; Senator Paul H. Douglas, Illinois; Senator J. William Fulbright, Arkansas; Representative Henry O. Talle, Iowa; Senator Ralph E. Flanders, Vermont.

Mr. KNOWLAND. Mr. President, will the Senator yield for a point of information?

Mr. DOUGLAS. I yield.

Mr. KNOWLAND. I make this inquiry on behalf of other Members of the Senate, in view of the situation which may develop in the future. Have the subcommittee reports to which the Senator has referred been cleared through the full committee?

Mr. DOUGLAS. That is correct. The full committee has given permission to the subcommittees to make these reports.

Mr. KNOWLAND. I thank the Senator from Illinois.

The PRESIDING OFFICER. The reports will be received and printed.

The reports are as follows:

Report of Impact of Automation and of Technological Change on the Economy; (S. Rept. No. 1308);

Report on Economic Statistics; (S. Rept. No. 1309);

Report on Tax Policy; (S. Rept. No. 1310);

Report on Low Income Families; (S. Rept. No. 1311); and

Report on Foreign Economic Policy; (S. Rept. No. 1312).

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MANSFIELD (by request):

S. 2760. A bill for the relief of Yee Chung Fong Ming, Yee Chung Nom Ming, and Gee Shee Ming; to the Committee on the Judiciary.

By Mr. MANSFIELD (for himself and Mr. MURRAY):

S. 2761. A bill for the relief of Fethi Hepcakici; to the Committee on the Judiciary.

By Mr. PAYNE (for himself, Mr. CAPEHART, Mr. IVES, Mr. BUSH, Mr. PURTELL, and Mr. BEALL):

S. 2762. A bill to amend the United States Housing Act of 1937, as amended, to authorize assistance in the provision of housing for elderly families; to the Committee on Banking and Currency.

By Mr. PAYNE:

S. 2763. A bill to amend title 3 of the United States Code to provide for the ascertainment of the physical inability of the President to perform the duties of his office, and for other purposes; to the Committee on the Judiciary.

By Mr. CASE of South Dakota:

S. 2764. A bill to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture and Forestry.

S. 2765. A bill to make the amendment made by the act of August 9, 1955, to section 232 (d) of the Veterans' Readjustment Assistance Act of 1952 effective as of July 16, 1952; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. CASE when he introduced the above bills, which appear under separate headings.)

By Mr. ROBERTSON (for himself and Mr. SMITH of New Jersey):

S. 2766. A bill to authorize the issuance of a Presidential proclamation in connection with the observance of 1956 of the 100th anniversary of the birth of Woodrow Wilson; to the Committee on the Judiciary.

By Mr. SYMINGTON:

S. 2767. A bill for the relief of Anna Atzinger and her minor child; to the Committee on the Judiciary.

By Mr. SALTONSTALL (for himself, Mr. KENNEDY, Mr. GREEN, Mr. JOHNSTON of South Carolina, Mr. LANGER, Mr. NEUBERGER, Mr. BUTLER, Mr. PAYNE, and Mr. CASE of New Jersey):

S. 2768. A bill to provide for national flood insurance and reinsurance, and for other purposes; to the Committee on Banking and Currency.

By Mr. RUSSELL:

S. 2769. A bill authorizing the Administrator of General Services to convey certain land to the city of Hogansville, Ga.; to the Committee on Government Operations.

By Mr. MAGNUSON (by request):

S. 2770. A bill to amend section 1 (15) of the Interstate Commerce Act, so as to aid in alleviating shortages of railroad freight cars during periods of emergency or threatened emergency, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. THYE (for himself and Mr. HILL):

S. 2771. A bill to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and provide certain services to the Boy Scouts of America for use at the Fourth National Jamboree of the Boy Scouts of America, and for other purposes; and

S. 2772. A bill to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and to provide transportation and other services to the Boy Scouts of America in connection with the World Jamboree of Boy Scouts to be held in England in 1957, and for other purposes; to the Committee on Armed Services.

(See the remarks of Mr. THYE when he introduced the first above-mentioned bill, which appear under a separate heading.)

S. 2773. A bill to authorize the addition of certain lands to the Pipestone National Monument in the State of Minnesota; and

S. 2774. A bill to authorize a $75 per capita payment to members of the Red Lake Band of Chippewa Indians from the proceeds of the sale of timber and lumber on the Red Lake Reservation; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. THYE when he introduced the above bill, which appear under a separate heading.)

S. 2775. A bill to amend section 204 (b) of the Small Business Act of 1953, as amended; to the Committee on Banking and Currency.

By Mr. THYE (for himself and Mr. MUNDT):

S. 2776. A bill to preserve the family farm; to the Committee on Agriculture and Forestry.

By Mr. CHAVEZ (for himself and Mr. ANDERSON):

S. 2777. A bill to require conformance with State and Territorial fish and game laws and licensing requirements on Federal lands not subject to such laws; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. CHAVEZ when he introduced the above bill, which appear under a separate heading.)

By Mr. BRICKER:

S. 2778. A bill for the relief of Maria Pao-Hsin Lee;

S. 2779. A bill for the relief of Evelyn Levenson Harris; and

S. 2780. A bill for the relief of Nellie Khourie; to the Committee on the Judiciary.

By Mr. CHAVEZ:

S. 2781. A bill for the relief of Kiyoshi Takahashi, Kyoko Takahashi, and Nozomu Takahashi;

S. 2782. A bill for the relief of Mrs. Frieda Painter-Luenenschloss; and

S. 2783. A bill for the relief of Caecilia Rama; to the Committee on the Judiciary.

By Mr. SMATHERS:

S. 2784. A bill to provide for the conveyance of certain lands to the town of Don Ce-Sar Place, Fla.; to the Committee on Government Operations; and

S. 2785. A bill for the relief of Elsa Emelina Rosado y Rodriguez de Brower; to the Committee on the Judiciary.

By Mr. WILEY (by request):

S. 2786. A bill for the relief of Yi Nyong Suk; to the Committee on the Judiciary.

By Mr. SPARKMAN:

S. 2787. A bill to amend section 344 of the Agricultural Adjustment Act of 1938, as amended, relating to cotton-acreage allotments; to the Committee on Agriculture and Forestry.

S. 2788. A bill to quiet title and possession with respect to certain real property in the State of Alabama; to the Committee on Interior and Insular Affairs.

S. 2789. A bill for the relief of Lawrence B. Frahn; to the Committee on Labor and Public Welfare.

By Mr. SPARKMAN (for himself, Mr. DOUGLAS, Mr. LEHMAN, Mr. MORSE, Mr. MONRONEY, and Mr. NEUBERGER):

S. 2790. A bill to amend the National Housing Act and the United States Housing Act of 1937 to authorize assistance in the provision of housing for elderly persons, and for other purposes; to the Committee on Banking and Currency.

(See the remarks of Mr. SPARKMAN when he introduced the above bill, which appear under a separate heading.)

By Mr. HENNINGS:

S. 2791. A bill to amend title 18 of the United States Code to provide for the trial in the Federal district courts of persons not subject to military jurisdiction for certain offenses committed by them while subject to such jurisdiction;

S. 2792. A bill to amend title 18 of the United States Code in order to make the wrecking of certain aircraft a criminal offense; and

S. 2793. A bill for the relief of Waclaw Tadeusz Nowosielski; to the Committee on the Judiciary.

By Mr. BENDER:

S. 2794. A bill to exempt certain benefit boxing matches from the admissions tax; to the Committee on Finance.

S. 2795. A bill for the relief of George Leonidas Parthemos;

S. 2796. A bill for the relief of Michael N. Zirounis;

S. 2797. A bill for the relief of David Y. Ong; and

S. 2798. A bill for the relief of Edward Zepp; to the Committee on the Judiciary.

By Mr. ANDERSON (for himself, Mr. CLEMENTS, Mr. HUMPHREY, Mr. SPARKMAN, and Mr. EASTLAND):

S. 2799. A bill to provide for the liquidation of Commodity Credit Corporation's surplus stocks of agricultural commodities; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. ANDERSON when he introduced the above bill, which appear under a separate heading.)

By Mr. POTTER:

S. 2800. A bill for the relief of David Chih-Wei Kwok;

S. 2801. A bill for the relief of Brigitte Lechner Wagner;

S. 2802. A bill for the relief of Ethel Nellie Hummer;

S. 2803. A bill for the relief of Max Mazak Terian and his wife, Maria Terian; and

S. 2804. A bill for the relief of Dr. Shan Yah Gin; to the Committee on the Judiciary.

By Mr. DIRKSEN:

S. 2805. A bill for the relief of Harriet E. Van Tassel; to the Committee on the Judiciary.

By Mr. DIRKSEN (by request):

S. 2806. A bill for the relief of Hsuan Wei; to the Committee on the Judiciary.

By Mr. WILEY:

S. 2807. A bill for the relief of William L. Lewis; to the Committee on the Judiciary.

By Mr. LANGER:

S. 2808. A bill to authorize the coinage of 50-cent pieces in commemoration of the 100th anniversary of the birth of Theodore Roosevelt; to the Committee on Banking and Currency.

S. 2809. A bill to alter certain bases for disability pension awards; and

S. 2810. A bill to permit certain veterans to obtain nonparticipating term insurance under the National Service Life Insurance Act of 1940; to the Committee on Finance.

S. 2811. A bill for the relief of John Rudolph Mohammed (also known as Ralph Gordon);

S. 2812. A bill to amend section 20 of the Refugee Relief Act of 1953 so as to extend the time for the issuing of visas under such act;

S. 2813. A bill to amend section 5 (a) of the Refugee Relief Act of 1953 so as to increase the number of visas authorized to be issued under such section, and to raise the age limitation of orphans entitled to such visas;

S. 2814. A bill to make it a crime for Federal employees to make unlawful threats to a taxpayer for the purpose of collecting taxes; and

S. 2815. A bill for the relief of Peter V. Bosch; to the Committee on the Judiciary.

S. 2816. A bill to readjust postal classification on educational and cultural materials; and

S. 2817. A bill to readjust size and weight limits on fourth-class (parcel post) mail matter at the post office at Grand Forks, N. Dak.; to the Committee on Post Office and Civil Service.

By Mr. MONRONEY:

S. 2818. A bill to amend the Civil Aeronautics Acts of 1938, as amended, the Federal Airport Act, as amended, and for other purposes; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MONRONEY when he introduced the above bill, which appear under a separate heading.)

By Mr. BEALL:

S. 2819. A bill to amend the Agriculture Act of 1949 and the act of June 28, 1937, in order to authorize disposal of surplus farm commodities, and products thereof, to Federal, State, and local penal and correctional institutions; to the Committee on Agriculture and Forestry.

S. 2820. A bill to confer jurisdiction upon the United States Court of Claims to hear, determine, and render judgment upon the claim of the Lacchi Construction Co.; and

S. 2821. A bill to amend section 100 of title 28 of the United States Code in order to provide that the United States District Court for the District of Maryland shall no longer be required to hold court at Cumberland and Denton, Md.; to the Committee on the Judiciary.

By Mr. GOLDWATER:

S. 2822. A bill to authorize and direct the Secretary of the Interior to transfer approximately 9 acres of land in the Hualapai Indian Reservation, Ariz., to school district No. 8, Mohave County, Ariz.; to the Committee on Interior and Insular Affairs.

S. 2823. A bill for the relief of William C. Brady; and

S. 2824. A bill for the relief of Joyce Brady; to the Committee on the Judiciary.

By Mr. IVES:

S. 2825. A bill to provide for a preliminary examination and survey to be made of Little River and Cayuga Creek at and in the vicinity of Cayuga Island, Niagara County, N. Y., in the interest of flood control and allied purposes; to the Committee on Public Works.

S. 2826. A bill for the relief of Dr. Ching-Lin Hsia and wife, Wai Tsung Hsia; to the Committee on the Judiciary.

By Mr. IVES (for himself and Mr. SCHOEPPEL):

S. 2827. A bill for the relief of Hazel Elizabeth Scott; to the Committee on the Judiciary.

By Mr. BARRETT (for himself and Mr. O'MAHONEY):

S. 2828. A bill to provide for the conveyance of a portion of the former Prisoner of War Camp, near Douglas, Converse County, Wyo., to the State of Wyoming, and for other purposes; to the Committee on Government Operations.

By Mr. ALLOTT:

S. 2829. A bill to amend title 18 of the United States Code in order to make the damage and destruction of certain aircraft and motor vehicles a criminal offense; to the Committee on the Judiciary.

By Mr. DIRKSEN:

S. 2830. A bill to repeal the tax on admission, refreshment, service, and merchandise at roof gardens, cabarets, and other similar places; to the Committee on Finance.

S. 2831. A bill authorizing the acquisition of certain lands in the Sinnissippi Lake, Ill., in connection with the operation of Illinois and Mississippi Canal, and for other purposes; to the Committee on Public Works.

S. 2832. A bill to amend section 17 of the Bankruptcy Act; to the Committee on the Judiciary.

By Mr. AIKEN:

S. 2833. A bill for the relief of Louis Henri Stassart; and

S. 2834. A bill for the relief of Yue Yin Wong (also known as William Yueyin Wong); to the Committee on the Judiciary.

By Mr. CAPEHART:

S. 2835. A bill to authorize the Secretary of the Interior to quitclaim all interest of the United States in and to certain lands located in Indiana to the State of Indiana and to the Board of Trustees for the Vincennes University, Vincennes, Ind.; to the Committee on Interior and Insular Affairs.

S. 2836. A bill for the relief of Choh-Yi Ang; to the Committee on the Judiciary.

By Mr. MANSFIELD (for himself and Mr. MURRAY) (by request):

S. 2837. A bill for the relief of the Thomas Cruse Mining & Development Co.; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 2838. A bill for the relief of Antonia Soulis;

S. 2839. A bill for the relief of Rosetta Ittner;

S. 2840. A bill for the relief of Anniemae M. Swanson and Armylee V. Swanson;

S. 2841. A bill for the relief of Annemarie Appelt;

S. 2842. A bill for the relief of Toini Margareta Heino; and

S. 2843. A bill for the relief of Dr. Shou Soon Kwong; to the Committee on the Judiciary.

By Mr. THURMOND:

S. 2844. A bill to deny tax-exempt status under the Internal Revenue Code of 1954 to any organization which engages in the promotion of litigation to which it is not a party; to the Committee on Finance.

S. 2845. A bill to prevent the service or consumption of alcoholic beverages aboard commercial passenger aircraft and military aircraft; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. THURMOND when he introduced the above bills, which appear under separate headings.)

S. 2846. A bill for the relief of Don-chean Chu; and

S. 2847. A bill for the relief of Lt. Col. William D. Gantt; to the Committee on the Judiciary.

By Mr. JOHNSTON of South Carolina:

S. 2848. A bill relating to the order of filling vacancies in armed services housing constructed or acquired under title VIII of the National Housing Act; to the Committee on Banking and Currency.

(See the remarks of Mr. JOHNSTON of South Carolina when he introduced the above bill, which appear under a separate heading.)

By Mr. LANGER:

S. 2849. A bill for the relief of Mr. Janos Schreiner; to the Committee on the Judiciary.

S. 2850. A bill to increase the annual income limitations governing the payment of pension to certain veterans and their dependents; to the Committee on Finance.

By Mr. GOLDWATER:

S. 2851. A bill to transfer certain lands from the Veterans' Administration to the Department of the Interior for the benefit of the Yavapai Indians of Arizona; to the Committee on Labor and Public Welfare.

By Mr. CAPEHART (for himself, Mr. MUNDT, Mr. THYE, Mr. YOUNG, Mr. BUTLER, Mr. WELKER, Mr. GEORGE, Mr. CASE of South Dakota, Mr. JENNER, and Mr. BARRETT):

S. 2852. A bill to create an International Food Community Board, and for other purposes; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. CAPEHART when he introduced the above bill, which appear under a separate heading.)

By Mr. BUSH:

S. 2853. A bill to authorize the construction of flood protection measures, with particular reference to areas where severe damages have recently occurred as the result of extreme rainfall accompanying hurricane storms; to the Committee on Public Works.

By Mr. BUSH (for himself, Mrs. SMITH of Maine, Mr. COTTON, Mr. PURTELL, Mr. MARTIN of Pennsylvania, Mr. BEALL, Mr. IVES, Mr. SMITH of New Jersey, Mr. DUFF, and Mr. KUCHEL):

S. 2854. A bill to amend the National Housing Act, as amended; to the Committee on Banking and Currency.

By Mr. BUSH (for himself, Mr. PURTELL, Mrs. SMITH of Maine, Mr. MARTIN of Pennsylvania, Mr. BEALL, Mr. IVES, Mr. SMITH of New Jersey, Mr. DUFF, and Mr. KUCHEL):

S. 2855. A bill to provide authority to stockpile temporary housing for disaster relief, and for other purposes; to the Committee on Banking and Currency.

By Mr. BUSH (for himself, Mrs. SMITH of Maine, Mr. BIBLE, Mr. COTTON, Mr. PURTELL, Mr. MARTIN of Pennsylvania, Mr. PAYNE, Mr. BEALL, Mr. IVES, Mr. SMITH of New Jersey, Mr. DUFF, and Mr. KUCHEL):

S. 2856. A bill to increase the amount of appropriations authorized for disaster loans, and for other purposes; to the Committee on Banking and Currency.

By Mr. BUSH (for himself, Mrs. SMITH of Maine, Mr. PURTELL, Mr. MARTIN of Pennsylvania, Mr. PAYNE, Mr. BEALL, Mr. IVES, Mr. SMITH of New Jersey, Mr. DUFF, and Mr. KUCHEL):

S. 2857. A bill to provide for Federal procurement of materials and supplies in major disaster areas, and for other purposes; to the Committee on Banking and Currency.

By Mr. BUSH (for himself, Mr. PURTELL, Mrs. SMITH of Maine, Mr. COTTON, Mr. MARTIN of Pennsylvania, Mr. PAYNE, Mr. BEALL, Mr. IVES, Mr. SMITH of New Jersey, Mr. DUFF, and Mr. KUCHEL):

S. 2858. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

By Mr. BUSH (for himself, Mrs. SMITH of Maine, Mr. COTTON, Mr. PURTELL, Mr. MARTIN of Pennsylvania, Mr. BEALL, Mr. IVES, Mr. SMITH of New Jersey, Mr. DUFF, and Mr. KUCHEL):

S. 2859. A bill to provide rent-free accomodations in certain federally aided housing for needy victims of major disasters, and for other purposes; to the Committee on Banking and Currency.

By Mr. BUSH (for himself, Mr. PURTELL, and Mr. SMITH of New Jersey):

S. 2860. A bill to authorize the construction of additional flood-control reservoirs in the Connecticut River Basin; to the Committee on Public Works.

By Mr. BUSH (for himself, Mrs. SMITH of Maine, Mr. COTTON, Mr. PURTELL, Mr. MARTIN of Pennsylvania, Mr. PAYNE, Mr. IVES, Mr. SMITH of New Jersey, Mr. HRUSKA, Mr. DUFF, and Mr. KUCHEL):

S. 2861. A bill to authorize an increase of emergency relief highway funds from $10 million to $30 million for the fiscal year ending June 30, 1956; to the Committee on Public Works.

By Mr. BUSH (for himself, Mr. PURTELL, Mr. DUFF, Mr. KUCHEL, Mr. IVES, Mr. PAYNE, Mr. CASE of New Jersey, Mr. KENNEDY, Mr. WATKINS, Mr. CAPEHART, Mr. SMITH of New Jersey, Mr. SALTONSTALL, Mr. FLANDERS, Mr. WILEY, and Mr. MALONE):

S. 2862. A bill to provide for an experimental national flood indemnity and reinsurance program, and for other purposes; to the Committee on Banking and Currency.

(See remarks of Mr. BUSH when he introduced the above bills, which appear under a separate heading.)

By Mr. KNOWLAND:

S. J. Res. 105. Joint resolution authorizing the President of the United States to designate the period beginning September 17 and ending September 23 of each year as Constitution Week; to the Committee on the Judiciary.

(See the remarks of Mr. KNOWLAND when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. BUSH (for himself, Mr. PURTELL, Mr. DUFF, Mrs. SMITH of Maine, Mr. PAYNE, Mr. IVES, and Mr. SMITH of New Jersey):

S. J. Res. 106. Joint resolution to establish a Northeastern United States Watershed Development and Flood Protection Commission; to the Committee on Public Works.

(See the remarks of Mr. BUSH when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. SALTONSTALL:

S. J. Res. 107. Joint resolution authorizing the President of the United States of America to proclaim October 11, 1956, General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski; to the Committee on the Judiciary.

By Mr. SALTONSTALL (for himself, Mr. KENNEDY, Mr. MARTIN of Pennsylvania, Mr. DUFF, and Mr. GREEN):

S. J. Res. 108. Joint resolution authorizing the President to proclaim the week in which January 17, 1956, occurs as Benjamin Franklin Week in commemoration of the 250th anniversary of the birth of Benjamin Franklin; to the Committee on the Judiciary.

By Mr. GORE (for himself and Mr. ERVIN):

S. J. Res. 109. Joint resolution relating to burley tobacco acreage allotments and marketing quotas; to the Committee on Agriculture and Forestry.

By Mr. GOLDWATER:

S. J. Res. 110. Joint resolution directing the Secretary of the Interior to conduct a study and investigation of Indian education in the United States; to the Committee on Interior and Insular Affairs.

By Mr. CLEMENTS (for himself and Mr. BARKLEY):

S. J. Res. 111. Joint resolution relating to burley tobacco acreage allotments and marketing quotas; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. CLEMENTS when he introduced the above joint resolution, which appear under a separate heading.)

AMENDMENT OF AGRICULTURAL ADJUSTMENT ACT OF 1938 RELATING TO DURUM WHEAT

Mr. CASE of South Dakota. Mr. President, I introduce, for appropriate reference, a bill to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended. The bill proposes to extend the provisions of that law with reference to the production of durum wheat. There is no shortage of durum wheat at this time.

The PRESIDING OFFICER (Mr. BIBLE in the chair). The bill will be received and appropriately referred.

The bill (S. 2764) to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended, introduced by Mr. CASE of South Dakota, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

AMENDMENTS OF VETERANS' READJUSTMENT ASSISTANCE ACT, RELATING TO ON-THE-FARM TRAINING

Mr. CASE of South Dakota. Mr. President, I also introduce, for appropriate reference, a bill to amend further section 232 (d) of the Veterans Readjustment Assistance Act of 1952, the so-called Korean GI bill, with reference to on-the-farm training.

It will be recalled that during the first session of this 84th Congress that section was amended to provide that veterans taking on-the-farm training would not suffer any reduction in educational allowance during their first year of training—but it became effective October 1, 1955. It should have been retroactive to apply to all Korean G. I.'s, not merely those who started their farm training since last October.

My bill would provide for retroactive payment to give equal benefits to all veterans who had taken that training since the G. I. Bill of 1952 became effective.

Any desire to eliminate the bookkeeping of making retroactive payments does not excuse the very evident discrimination.

I feel that in all equity, veterans taking on-the-farm training between July 16, 1952, and October 1, 1955, should receive the same amount of educational allowance as veterans after that period and I commend this bill to the Senate's attention.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2765) to make the amendment made by the Act of August 9, 1955, to section 232 (d) of the Veterans' Readjustment Assistance Act of 1952 effective as of July 16, 1952, introduced by Mr. CASE of South Dakota, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

AUTHORIZATION TO PROVIDE CERTAIN EQUIPMENT AND SERVICES TO BOY SCOUTS OF AMERICA

Mr. THYE. Mr. President, in June and July of 1957, the Boy Scouts of America will hold its fourth national jamboree at Valley Forge, Pa. The same year, and subsequent to the national jamboree, the World Jamboree of Boy Scouts will be held in England.

In the past Congress has indicated its interest in the Boy Scouts of America and its desire to assist by authorizing the loan of certain equipment to be used during the jamboree.

I am pleased to introduce, for appropriate reference, a bill, in which the distinguished Senior Senator from Alabama [Mr. HILL] joins me, to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and provide certain services to the Boy Scouts of America for use at the fourth national jamboree of the Boy Scouts of America.

Further, I am also introducing a bill, in which the Senior Senator from Alabama [Mr. HILL] joins me, to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and to provide transportation and other services to the Boy Scouts of America in connection with the World Jamboree of Boy Scouts to be held in England in 1957.

In my opinion, these are very meritorious bills, and I sincerely hope Congress may be able to proceed to early and favorable action on them.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2771) to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and provide certain services to the Boy Scouts of America for use at the fourth national jamboree of the Boys Scouts of America, and for other purposes, introduced by Mr. THYE (for himself and Mr. HILL), was received, read twice by its title, and referred to the Committee on Armed Services.

PER CAPITA PAYMENT TO CHIPPEWA INDIANS OF MINNESOTA

Mr. THYE. Mr. President, I introduce, for appropriate reference, a bill to authorize a $75-per-capita payment to members of the Red Lake Band of Chippewa Indians from the proceeds of the sale of timber and lumber on the Red Lake Reservation.

There is no question but that some of the members of the Red Lake Band of Chippewa Indians are in serious circumstances at the present time. Already the winter has been a severe one, and during these months opportunities for employment are greatly curtailed or are nonexistent. As a consequence, the income of these Indians is, in many cases, at the bare minimum.

The bill I am introducing would authorize a per capita payment of $75 in two installments, the first of which would be a $50 payment to be made within 30 days after ratification by the Red Lake Band of Chippewa Indians. The second installment of $25 would be paid within 60 days from the date of the first payment.

While I personally feel that the proposed total per capita payment is somewhat modest, I have been governed principally by the consideration of the stability of the Red Lake Chippewa tribal fund on deposit in the Treasury of the United States, from which the moneys for the per capita payment will be drawn. Department of the Interior officials have informed me that in their judgment a minimum of $750,000 should be retained in the tribal fund. While a $75-per-capita payment would probably reduce the fund below the $750,000 minimum, the need of these Indians is great, and I firmly believe the payment should be approved by Congress.

I sincerely hope for early and favorable action by Congress on this proposed legislation. I respectfully urge prompt committee consideration, and I wish to pledge now my cooperation and assistance toward final approval of the per capita payment.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2774) to authorize a $75-per-capita payment to members of the Red Lake Band of Chippewa Indians from the proceeds of the sale of timber and lumber on the Red Lake Reservation, introduced by Mr. THYE, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

ENFORCEMENT OF STATE AND TERRITORIAL FISH AND GAME LAWS

Mr. CHAVEZ. Mr. President, on behalf of myself and my colleague the junior Senator from New Mexico [Mr. ANDERSON], I introduce, for appropriate reference, a bill to establish clearly and finally the enforcement of all State game and fish laws upon Federal lands. In some areas, military lands have been acquired under exclusive jurisdiction and some military commanders have used this strictly, with a resulting almost autocratic empire.

The bill is occasioned by episodes in the last 2 or 3 years. In the case of my own State, we had an Army commander at Fort Bliss, Tex., who wanted to create a private game preserve in New Mexico on lands used in connection with guided missiles. I understood from the State game department that his initial proposal was there would be no season, no limit and no licenses for military personnel under his command on this land in New Mexico. Subsequently it resolved itself down to the matter of whether or not persons residing outside of the State could go hunting in the State without acquiring nonresident licenses.

The game and fish laws of any State are conservation measures and should be respected if we are to preserve our wildlife resources. This bill would require that the head of any Federal department or agency, which owns or controls any lands, are subject to the game and fish laws of a State or Territory in which the lands are located. It requires that any hunting, trapping, or fishing be done in strict accordance with the game and fish laws of the State or Territory.

I have had numerous letters from game protective associations urging the enactment of such legislation. I hope the Congress can enact this bill into law in this session of Congress.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2777) to require conformance with State and Territorial fish and game laws and licensing requirements on Federal lands not subject to such laws, introduced by Mr. CHAVEZ (for himself and Mr. ANDERSON), was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

ELDERLY PERSONS HOUSING BILL

Mr. SPARKMAN. Mr. President, on behalf of myself and the Senator from Illinois [Mr. DOUGLAS], the Senator from New York [Mr. LEHMAN], the senior Senator from Oregon [Mr. MORSE], the Senator from Oklahoma [Mr. MONRONEY], and the junior Senator from Oregon [Mr. NEUBERGER] I am introducing for appropriate reference, an elderly persons housing bill.

This bill is designed to meet the housing needs of elderly persons in two principal ways: First, it would create an elderly persons housing insurance fund and liberal credit terms as an incentive to private industry to build suitable housing for the aged; second, it would broaden the opportunities for low-income elderly persons to find shelter in public housing accommodations.

The national housing policy, adopted by the enactment of the Housing Act of 1949, envisioned the goal of a decent home and suitable living environment for every American family. Millions of Americans have been aided by this enlightened national policy.

But this policy is not yet a reality for large segments of our population. This is especially true with respect to our senior citizens, whose immediate housing requirements constitute an unmet need of major proportions.

The Senate last year demonstrated a deep understanding of this growing national problem. The omnibus housing bill, S. 2126, passed by the Senate last year, included the provisions of S. 1642, a bill I introduced to provide housing for the aged. I was deeply disappointed that the housing bill finally enacted by the Congress did not retain the much needed aids for the aged.

Following adjournment last August, I instructed the staff of the Subcommittee on Housing to undertake a comprehensive review of existing knowledge relating to the aged, with special emphasis on housing needs. This information has been compiled, and is now available in the form of a committee print. While it is too voluminous to review here, it discusses who the aged are, how they live, what some of their problems are, and it reports on some of the current developments in improving their housing accommodations.

This subcommittee survey served as the basis for the elderly persons housing bill.

This bill would add a new section to the National Housing Act, to provide an FHA mortgage insurance for low-cost housing for elderly persons. Housing insured under this section would be of such design as to be suitable for occupancy by elderly persons, and conveniently located so as to provide to the maximum extent practicable for their comfort and welfare.

Added incentives would be available to nonprofit organizations that provided rental housing for the aged.

In addition to these private housing provisions, the bill makes public housing available to elderly persons in the same amount and under the same conditions as did S. 2126, which was passed by the Senate at the last session. The bill also provides for an extensive research program covering all aspects of the growing problem of supplying adequate housing for the aged, and provides for the establishment of an Advisory Committee under the sponsorship of the Administrator of the Housing and Home Finance Agency.

Mr. President, I ask unanimous consent to have a section-by-section analysis of the bill printed at this point in the body of the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the section-by-section analysis will be printed in the RECORD.

The bill (S. 2790) to amend the National Housing Act and the United States Housing Act of 1937 to authorize assistance in the provision of housing for elderly persons, and for other persons, introduced by Mr. SPARKMAN (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Banking and Currency.

The section-by-section analysis, presented by Mr. SPARKMAN, is as follows:

HOUSING FOR THE ELDERLY BILL—SECTION-BY-SECTION ANALYSIS

DECLARATION OF POLICY

Section 1 acknowledges the responsibility of Congress to establish a national policy designed to provide adequate housing for elderly persons and that the full utilization of our national resources is necessary not only to meet the needs of hitherto neglected groups but to encourage the orderly growth and development of a healthy housing industry.

It is the sense of the Congress that suitably designed housing at reasonable cost

has not been provided for elderly persons in adequate amounts and that further aid and impetus should be provided to both private enterprise and public agencies.

The Congress seeks through the enactment of this law to promote equal opportunity for elderly persons to obtain suitable housing accommodations at prices they can afford to pay; to encourage both private enterprise and public agencies to provide these accommodations; to contribute toward the stability and orderly growth of the housing industry; and to stimulate research that will lead to the development of new and economical methods of meeting the housing needs of elderly persons.

ELDERLY PERSONS HOUSING INSURANCE

Section 2 (a) of the bill adds a new section 229 to the National Housing Act which would provide an FHA mortgage insurance program for low-cost housing for elderly persons. The term "elderly persons" is defined in the new section 229 as persons 65 years of age or over, or families the heads of which or their spouses are 65 years of age or over.

Under this new section the Federal Housing Commissioner is required to prescribe procedures to secure to elderly persons a preference or priority of opportunity to purchase or rent the dwellings involved. The total number of dwelling units in properties covered by mortgages insured under section 229 in any locality could not exceed the total number of such dwelling units which the Housing Administrator certifies to the Commissioner to be needed in such locality. Any housing assisted under this section must be of such design as to be suitable for occupancy by elderly persons, and conveniently located so as to provide to the maximum extent practicable for their comfort and welfare.

The maximum mortgage amount under this section for single-family sales housing would be $7,600, or up to $8,600 in high-cost areas. Where the mortgagor is the owner-occupant, the mortgage could not exceed 95 percent of appraised value, and, where the mortgagor is not the owner-occupant, the mortgage could not exceed 85 percent of value.

Mortgage insurance would also be provided under this section for the construction, as well as the repair or rehabilitation, of dwellings for use by 10 or more families as rental accommodations where the mortgagor is a private nonprofit corporation, association, or organization which is regulated under Federal or State laws as to rents, charges, and methods of operation. The maximum mortgage could not exceed $12,500,000, and $7,600 (or up to $8,600 in high-cost areas) per family unit.

The maximum terms of mortgages under this section could not exceed 30 years from date of insurance, or three-quarters of the Commissioner's estimate of the remaining economic life of the building improvements, whichever is the lesser. The interest rate on section 229 mortgages could not exceed 5 or 6 percent if the Commissioner determines that the mortgage market so requires.

The section contains provisions for insurance payments similar to those applicable to section 221 (relocation housing) mortgages.

An elderly persons housing-insurance fund would be established for the purposes of the mortgage-insurance program under this new section 229. It would be a revolving fund, and would consist originally of $1 million transferred from the war housing insurance fund.

Section 2 (b) of the bill amends section 227 of the National Housing Act (builder's cost certification) to make the requirements of that section applicable to rental housing assisted under section 229.

Section 2 (c) amends section 305 of the National Housing Act to authorize the Federal National Mortgage Association to enter into advance commitment contracts (not exceeding $50 million outstanding at any one time) with respect to section 229 mortgages. Of such authorization not more than $5 million outstanding at any one time shall be available for commitments in any one State.

PUBLIC HOUSING

Section 3 (a) would amend section 2 of the National Housing Act of 1937 and would define the term "families" as meaning families consisting of 2 or more persons or consisting of a single person 65 years of age or over or the residuum of a tenant family. "Elderly families" would be defined as meaning families the head of which or his spouse is 65 years of age or over.

Section 3 (b) would amend the United States House Act of 1937 by authorizing the Authority to enter into contracts for loans and annual contributions for 10,000 low-rent dwelling units designed for elderly families. The units may either be separate projects or parts of projects or new or remodeled units. This authorization is effective on July 1, 1956, and an additional 10,000 units are authorized July 1 in each of the years 1957, 1958, 1959, and 1960. The total authorization for annual contributions would also be increased by $4 million on July 1, 1956, and by a further $4 million each year for 4 additional years thereafter.

Such dwelling units shall be in addition to dwelling units authorized by other provisions of law. However, other low-rent units may be designed and authorized for elderly persons under other authorizations. Elderly families would be given a first preference for admission to all units developed pursuant to this section, and a first preference for admission could also be extended to such families in respect to other low-rent units.

The income requirements applicable to other families admitted to public housing may be waived for elderly families.

RESEARCH

Section 4 (a) would authorize the Housing and Home Finance Administrator to undertake and conduct a research program with respect to the varying types of markets that exist for different types of housing for elderly persons, and such other matters bearing upon the housing needs of elderly persons as he shall determine. The research program would include but not be limited to: (1) the extent and nature of the market for varying types of housing; (2) the most practicable and suitable design of housing; (3) the means of encouraging private enterprise to develop suitable housing; (4) the extent, if any, to which elderly persons are discriminated against by mortgage lenders; and (5) the types of housing being provided by private enterprise, voluntary and nonprofit agencies, and public housing authorities.

Section 4 (b) would provide that, as used in this section, the term "elderly persons" shall have the same meaning as when used in section 229.

ADVISORY COMMITTEE

Section 5 would provide for the establishment, in accordance with provisions of section 601 of the Housing Act of 1949, as amended, an advisory committee on matters relating to elderly persons.

TRIAL OF CIVILIANS IN CERTAIN CASES—PROTECTION OF AIRCRAFT FROM SABOTAGE

Mr. HENNINGS. Mr. President, I introduce, for appropriate reference, two bills. One of the bills is designed to create a forum for the trial of civilians committing certain offenses while subject to military jurisdiction, but who were not tried at the time by court-martial. The other bill provides for the protection of aircraft against sabotage.

I ask unanimous consent that an explanatory statement by me accompanying the bills may be printed in the RECORD, together with an article from the Washington Star and one from the New York Herald Tribune of this morning.

The PRESIDING OFFICER. The bills will be received and appropriately referred and, without objection, the explanatory statement and newspaper articles will be printed in the RECORD.

The bills, introduced by Mr. HENNINGS, were received, read twice by their titles, and referred to the Committee on the Judiciary, as follows:

S. 2791. A bill to amend title 18 of the United States Code to provide for the trial in the Federal district courts of persons not subject to military jurisdiction for certain offenses committed by them while subject to such jurisdiction; and

S. 2792. A bill to amend title 18 of the United States Code in order to make the wrecking of certain aircraft a criminal offense.

The explanatory statement presented by Mr. HENNINGS is as follows:

STATEMENT BY SENATOR HENNINGS

Today I have introduced two bills for appropriate reference. The first bill is designed to close the serious gap created by the decision of the Supreme Court of the United States in *Toth* v. *Quarles* (350 U. S. 11) that Congress has no power to subject ex-servicemen to trial by court-martial for offenses committed during their military service. The facts of this case and the reasoning of the Court deserve close attention.

Article 3 (a) of the Uniform Code of Military Justice provides that "* * * any person charged with having committed, while in a status in which he was subject to this Code, an offense against this Code, punishable by confinement of 5 years or more and for which the person cannot be tried in the courts of the United States or any State or Territory thereof or of the District of Columbia, shall not be relieved from amenability to trial by courts-martial by reason of the termination of said status."

Under the authority of this law, one Robert W. Toth, an honorably discharged veteran of the Korean war, was arrested in the United States and taken to Korea to stand trial before a court-martial for a crime allegedly committed by him while in the military service. The court of appeals rejected Toth's contention that civilian exservicemen could not constitutionally be subjected to trial by court-martial. The Supreme Court took the opposite view and the majority opinion delivered by Mr. Justice Black declared article 3 (a) unconstitutional.

It is my belief that this opinion is one of the great constitutional pronouncements of the Supreme Court. It reasserts the fundamental principle set forth in the Declaration of Independence, that our Government is a government of the people and, therefore, a civilian government.

The Court refused to sustain the constitutionality of article 3 (a) as a proper exercise of the power granted Congress in article I of the Constitution "to make rules for the Government and regulation of the land and naval forces," as supplemented by the necessary and proper clause.

It is this power which authorizes Congress to subject persons actually in the armed service to stand trial by court-martial for military and naval offenses. But the Supreme Court decision in the Toth case specifically states that this power cannot be so broadly interpreted as to supersede the right of a

civilian to trial by jury in a civil court—a right guaranteed by article III of the Constitution.

Our military leaders, I am happy to note, fully respect the primacy of civil authority in our Government. Significantly enough, during the 1949 committee hearings on the Code of Military Justice, the Judge Advocate General of the Army strenuously opposed the passage of section 3 (a).

The bill that I am introducing authorizes a trial of such cases as that of Toth in the district courts of the United States and, thus, would carry out the legislative suggestion contained in the opinion of the Supreme Court. Under the terms of my proposed bill, certain punitive articles of the Code of Military Justice are made part of title 18 of the United States Code (Crimes and Criminal Procedure). The articles of the Code of Military Justice which I have selected for inclusion in title 18 involve treason and collaboration with enemies of the United States as well as articles which involve other common-law crimes or offenses of similar general import. In other words, a discharged serviceman would not be exonerated of treason or other serious crimes committed during his period of service merely by virtue of the fact that he may have been discharged before being subjected to a trial by court-martial. Under my bill, such a person would be subject to trial by a Federal district court.

The second bill is designed to remedy the fatal defect in existing law—that Federal criminal law does not contain provisions under which acts of sabotage against aircraft can be adequately punished. This fact was brought into relief when on November 1, 1955, 44 lives were lost in the explosion of a United Airlines transport plane which took off from Denver, Colo. The disaster was caused by one John Gilbert Graham, who placed a bomb in the baggage of his mother in order to collect on the flight insurance taken out by him in her name. This murder was undoubtedly one of the most horrible and almost incredible crimes in American history. And in recent years, similar cases were reported from Canada, the Philippines, Mexico, and from Hong Kong. It lies in the nature of air communication that the damage caused to aircraft is more dangerous than any such damage caused by any other means of transportation. The sabotage of an aircraft usually leads to mass murder.

It was shocking to realize, therefore, that Graham could be tried under Federal law only for violation of Interstate Commerce Commission regulations concerning the transportation of explosives with a maximum punishment of $10,000 and 10 years imprisonment (18 U. S. C. 835). For this reason Graham was turned over to State authorities for trial under a more appropriate State statute. It is an impossible state of affairs when the United States, with our enormous, ever-growing, and globally-operated air power, military as well as commercial, fails to provide adequate punishment for aircraft saboteurs.

A survey of reported cases of sabotage against aircraft show that they were committed for different reasons: some because of greed, others for personal revenge or for political motives. The bill I am introducing is, therefore, not only a measure of protection of life and property, but is also intended to safeguard the security of the United States.

My bill on sabotage of aircraft makes punishable any willful wrecking of aircraft by setting fire to it, by tampering with it, or by placing on it any explosive flammable substance, or dangerous instrument or device with the intent to injure or endanger the safety of the aircraft, of its cargo, or of any person on board.

Such willful acts will entail the following punishments:

In case of property damage—a fine of up to $10,000 or imprisonment for up to 20 years, or both.

In case of bodily injury—imprisonment of not less than 20 years or for life.

In case of death, the culprit "shall suffer death, or shall be sentenced to imprisonment for life if the jury qualifies its verdict by adding thereto 'without capital punishment' or in the case of a plea of guilty if the court so directs."

Attempts to commit a willful act of sabotage are equally punishable.

As in other cases of criminal statutes, these provisions, in their interpretation, are subject to the general propositions of criminal law. I note especially that, in accordance with 18 United States Code 2, those who aid, abet, counsel, command, induce, and procure as well as those who willfully cause the commission of any of the enumerated acts are punishable as principals.

Under the terms of the bill negligent wrecking of aircraft is also made a crime and the punishments for it are as follows:

In case of property damage—a fine of not more than $2,000 and imprisonment of not more than 18 months or both.

In case of bodily injury—a fine of not more than $5,000 or imprisonment of not more than 5 years, or both.

In case of death—a fine of not more than $10,000 and imprisonment of not less than 10 years, or both.

In conclusion, I wish to invite the attention of the Senate to the extraterritorial aspect of the proposed legislation. Under the terms of the bill both willful and negligent wrecking of aircraft committed outside the territorial limits of the United States are, in certain circumstances, made United States crimes. Specifically, any act of sabotage committed against American aircraft or any other aircraft scheduled for an immediate and direct flight to the United States (other than a military aircraft of any foreign nation at war with the United States or any of its allies) outside the territorial limits of the United States is punishable as if it were committed within our territorial jurisdiction.

To my mind, this provision is necessary in order to give full credit to the importance of air communication in our age. It is true, as stated by the Supreme Court of the United States, that "* * * the criminal jurisdiction of the United States is in general based on the territorial principle, and criminal statutes of the United States are not by implication given an extraterritorial effect." (*U. S.* v. *Flores* (289 U. S. 137, 155).)

At the same time, I believe that the United States District Court of New York has correctly stated the law when it said:

"I think both sides are clear on the point that there is no obstacle of any kind, constitutional or otherwise, to the enactment and enforcement of a Federal statute for a punishment of offenses committed within the jurisdiction of another sovereign, at least as far as American citizens are concerned. Cf. *U. S.* v. *Flores* (289 U. S. 137.)" (*Ex parte Monti* (79 F. Supp. 651, at 653).)

In fact, our criminal law contains extraterritorial provisions. To these the United States Supreme Court explicitly referred without questioning their validity:

"We have an example of this in the attempted application of the prohibition of the antitrust law to acts done by citizens against other such citizens in a foreign country. *American Banana Company* v. *United Fruit Company* (213 U. S. 347)." (*U. S.* v. *Bowman* (260 U. S. 94, at 98).)

But even by implication the criminal statutes of the United States have extraterritorial validity in those cases where the offense committed abroad is directed against the Government of the United States as for instance in the case of fraud or is within the naval jurisdiction of the United States. (*U. S.* v. *Bowman* (260 U. S. 94).)

An explicit statement as to the extraterritorial force of a statute becomes necessary only in case of a localized crime committed within the territorial jurisdiction of a foreign sovereign.

As we see, there is no constitutional reason why a criminal statute of the United States should not assert extraterritorial jurisdiction. Any restraints on the power of Congress lie in the field of the law of nations. The doctrine of comity lays a restrictive hand on national legislation. But even under the doctrines of traditional international law the doctrine of comity has no absolute application. It is thus recognized that where an offense is committed on board of a merchant marine vessel within the territorial jurisdiction of a foreign sovereign, we simply have a case of concurrent jurisdiction—the jurisdiction of the law of the flag and the foreign territorial jurisdiction. Moreover, as the Supreme Court of the United States said:

"There is not entire agreement among nations or the writers on international law as to which sovereignty should yield to the other when the jurisdiction is asserted by both." (*U. S.* v. *Flores* (289 U. S. 137, at 158).)

But my thought goes even further. In our generation we have witnessed a significant development in the field of international law. The notion that it deals exclusively with States and their interrelations has been now supplemented by the idea that its rules apply also to individuals. The Nuremberg trials of the major German war criminals made this new principle an integral part of modern international law.

The prominence of these trials, however, has obscured the fact that personal responsibility, as a matter of international law, is not limited to war crimes. The law of peace is certainly not less important than the law of war. The novel branch of international criminal law deals not only with war criminals but with any crime committed in violation of international order.

It is true that international criminal law is still in its infancy. The idea of international crimes grows with the expansion of the technological process which brings nations into an ever closer contact. As any other ideas that animate mankind, legal ideas develop gradually and unfold their significance against the background of historical conditions. Air law itself is an example of this truth. It is still in its infancy and many of its principles, although recognized, have not yet reached the stage of legislation. My bill is an example of how much there is to be done in the field of air law.

No technological development has influenced the life of mankind more than the airplane. It has reduced space to insignificance and made neighbors out of distant countries. It has also revolutionized the concept of warfare and security of nations. World economy and military power are both inconceivable today without air communication. If suddenly we should eliminate the airplane from reality, our world would collapse. I have no doubt that air communication belongs to the order of things that transcend the interest of individual countries and has become the concern of the community of nations. As such, air communication is rightfully a subject of international law. Consequently any act of sabotaging aircraft is a violation of international criminal law and an international crime. But, as I said, international criminal law and air law are in their infancy and I believe that every country has a duty to anticipate the formulation of an international criminal air code.

The extraterritorial aspect of my bill, therefore, has no intention of intruding

upon the territorial jurisdiction of a foreign sovereign. On the contrary, it is conceived in the spirit of mutual aid and cooperation which one member of the community of nations owes to the others so that air saboteurs shall be adequately punished wherever they are found. The bill expresses this intention in the following words:

"Nothing in this chapter shall be deemed to infringe upon or diminish any right or rights, including the right to extradition, of a foreign sovereign in whose jurisdiction any act or acts, made punishable herein, have been committed."

For all these reasons, it is my conviction that the extraterritorial aspect of the present legislation is authorized by clause 10 of section 8 of article I of the Constitution which gives to Congress the power "to define and punish * * * offenses against the law of nations." And, furthermore, from this point of view, there is no need to draw a line between American citizens and aliens.

The newspaper articles, presented by Mr. HENNINGS, are as follows:

[From the Washington Evening Star of January 5, 1956]

EXPLOSIVE DEVICE ON PLANE IDENTIFIED AS SOLDERING TOOL

PITTSBURGH, January 5.—After 24 hours of anxiety, Army bomb-disposal officers have identified a small object found aboard a TWA passenger plane as a soldering iron heat element often used by airplane mechanics.

Lewis Rinebold, head of the Civil Aeronautics Authority here, said last night the object apparently was harmless unless it was set off and it would require considerable force to do so. He said a mechanic probably dropped it after some repair work at Chicago before the two-engine plane took off Tuesday on a flight to Washington.

The pilot discovered the object in the aisle of the plane and turned it over to a TWA representative at a stopover in Wheeling, W. Va. Finally, an Army bomb-disposal unit from Pittsburgh and the FBI joined the investigation on the possibility that sabotage was involved.

Mr. Rinebold said the heat element was a machined steel cylinder containing a small amount of magnesium and some chemical powder.

"It is incendiary only to a small degree," the CAA spokesman added. "It has a percussion cap. When it (the cap) is struck it causes the rest of the element to give out quite a bit of heat for a few minutes. It is used inside the chamber of a soldering iron."

[From the New York Herald Tribune of January 5, 1956]

EXPLOSIVE EXPERTS PUZZLED—SMALL BOMBLIKE DEVICE FOUND ON PLANE WITH 32

PITTSBURGH, January 4.—A Civil Aeronautics Administration official said tonight that a small incendiary device discovered last night aboard a Trans World Airlines plane carrying 32 passengers on a flight from Chicago to Washington was "not of sufficient power" to blow up the plane.

The exact nature of the device still puzzled Federal explosives experts. The cigarette-length cartridge was being run through extensive tests at the Federal Bureau of Mines Laboratory at Bruceton, Pa.

Louis Reinbold, a CAA official, said: "We don't have the full story, but we are going on the possibility of sabotage."

F. B. I. agents also were awaiting final reports from Army ordnance experts before launching a full-scale inquiry.

"We are taking the same precautions as if the mechanism were a time bomb," Mr. Reinbold disclosed. "We have outlined a program to back-check freight carried previously aboard the plane. There was no cargo or air freight aboard last night."

He said he requested TWA officials in Chicago to recheck the plane there to determine if any similar devices were still aboard, "maybe in the seats."

But airline spokesmen in Chicago said the recheck failed to find additional clews as to how the object got aboard.

Capt. Gilbert A. Sather, of the 145th Army Ordnance Detachment here, said the strange device consisted of a steel cylinder, about the size of a shotgun shell with a percussion cap at one end and a blowout plug at the other. In between was a black mixture of highly inflammable magnesium and steel filings, then a still-to-be-determined type of yellow powder.

Capt. Sather said the mechanism had no timing apparatus to detonate it and "the only way for it to ignite would have been for someone to strike the (percussion) cap."

The incident recalled the November 1 explosion of a United Air Lines DC-6 in Colorado. Forty-four persons were killed as the result of a dynamite bomb explosion in the plane's luggage compartment.

LIQUIDATION OF SURPLUS STOCKS OF AGRICULTURAL COMMODITIES BY COMMODITY CREDIT CORPORATION

Mr. ANDERSON. Mr. President, on behalf of the Senator from Kentucky [Mr. CLEMENTS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Alabama [Mr. SPARKMAN], the Senator from Mississippi [Mr. EASTLAND], and myself, I introduce, for appropriate reference, a bill to provide for the liquidation of Commodity Credit Corporation surplus stocks of agricultural commodities. I ask unanimous consent that the text of the bill be printed in the RECORD, and that if other Senators desire to join in the introduction of the bill they may have an opportunity to do so.

The PRESIDING OFFICER. The bill will be received and appropriately referred, and without objection, will be printed in the RECORD.

The bill (S. 2799) to provide for the liquidation of Commodity Credit Corporation's surplus stocks of agricultural commodities, introduced by Mr. ANDERSON (for himself and other Senators) was received, read twice by its title, referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the Secretary of Agriculture is directed to make a study of various methods of disposing of surplus agricultural commodities and to submit to Congress within 30 days after the enactment of this act a detailed program for the orderly and complete liquidation within not more than 5 years of all surplus stocks of agricultural commodities held by the Commodity Credit Corporation.

AMENDMENT OF CIVIL AERONAUTICS ACT

Mr. MONRONEY. Mr. President, I introduce, for appropriate reference, a bill to amend the Civil Aeronautics Act to provide for the establishment of the Civil Aeronautics Administration as an independent agency of the Government.

Many years ago the Civil Aeronautics Administration was placed under the control and supervision of the Department of Commerce. The hearings of the past few days would, I believe, demonstrate to almost anyone the fact that aviation must not be chained to the ground-minded thinking of the men who operate the Department of Commerce.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2818) to amend the Civil Aeronautics Acts of 1938, as amended, the Federal Airport Act, as amended, and for other purposes, introduced by Mr. MONRONEY, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

DENIAL OF TAX-EXEMPT STATUS IN CERTAIN CASES

Mr. THURMOND. Mr. President, I introduce, for appropriate reference, a bill which would deny tax-exempt status under the Internal Revenue Code of 1954 to any organization which engages in the promotion of litigation to which it is not a party. This bill would also affect the tax status of contributions made to such organizations by individuals or other organizations. Donors would not be allowed to deduct such gifts in listing deductions on their income-tax returns.

The bill would not affect legal-aid societies or similar organizations which provide free legal services to persons unable to pay litigation costs. It would, however, apply to approximately 35,000 organizations currently enjoying tax-exempt status under the Internal Revenue Code.

Passage of this bill will be a positive step to plug one of the loopholes in our tax laws. Our internal-revenue laws require almost constant scrutiny and revision to protect the Government and the taxpayer and to prevent unfair discrimination in favor of certain organizations.

Allowing any organization to spend thousands and millions of tax-free dollars to promote lawsuits to which such an organization is not a party is certainly not fair to the Government or other taxpayers.

I also hope the Internal Revenue Service will keep a closer watch on all tax-exempt organizations to make certain the privilege of tax exemption is not being abused in any manner. Mr. Rose, Under Secretary of the Treasury Department, testified before a congressional committee last year that the status of certain organizations was being reviewed.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2844) to deny tax-exempt status under the Internal Revenue Code of 1954 to any organization which engages in the promotion of litigation to which it is not a party, introduced by Mr. THURMOND, was received, read twice by its title, and referred to the Committee on Finance.

PROHIBITION OF SERVICE OR CONSUMPTION OF ALCOHOLIC BEVERAGES ABOARD CERTAIN AIRCRAFT

Mr. THURMOND. Mr. President, I also introduce, for appropriate reference, a bill which would ban the consumption or service of alcoholic beverages aboard our commercial and service airliners. Legislation in this field is necessary because the Civil Aeronautics Board has refused to issue an administrative order against this hazard to commercial air safety.

Alcohol has a very detrimental effect on some people, and it could cause any person so affected to disrupt the operation of an aircraft in flight, thus endangering many lives unnecessarily. Whether one sanctions drinking is not the question. The question to be considered is the safety and welfare of all our citizens.

I have received many letters from persons all over the country urging enactment of this legislation. I hope it will receive prompt and favorable action by the Congress in the interest of public safety.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2845) to prevent the service or consumption of alcoholic beverages aboard commercial passenger aircraft and military aircraft, introduced by Mr. THURMOND, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

ORDER OF FILLING VACANCIES IN CERTAIN ARMED SERVICES HOUSING

Mr. JOHNSTON of South Carolina. Mr. President, I introduce, for appropriate reference, a bill relating to the order of filling vacancies in armed services housing constructed or acquired under title VIII of the National Housing Act.

Essentially, this bill establishes a system of seniority for the rental of Wherry housing at military bases so as to insure the rental of those earliest constructed units prior to subsequently constructed units.

The goal of this bill will be to save millions of dollars in taxpayers' money that might otherwise be wasted through overbuilding of housing facilities and through failure to rent housing units still mortgaged. These housing units must be paid for and the logical way to accomplish this is to rent them in the order in which they were constructed.

I wish to make it clear that this bill is authored by me in a spirit of obtaining efficient, economical operation of Wherry housing and in no way reflects any change in my wholehearted support for adequate housing for the military.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2848) relating to the order of filling vacancies in armed services housing constructed or acquired under title VIII of the National Housing Act, introduced by Mr. JOHNSTON of South Carolina, was received, read twice by its title, and referred to the Committee on Banking and Currency.

DESIGNATION OF CONSTITUTION WEEK

Mr. KNOWLAND. Mr. President, during the last session of the Congress, the Senate and House of Representatives passed Senate Concurrent Resolution 40 authorizing and requesting the President to proclaim the 7-day period from September 17 to September 23 as Constitution Week. Subsequent to the President's proclamation on August 19, 1955, civic organizations, patriotic societies, and dedicated men and women throughout the country banded together to pay proper respect and allegiance to the form of government established by our Constitution.

For 169 years this written charter, drafted and approved by unanimous vote at the Constitutional Convention in Philadelphia on September 17, 1787, has stood the tests of trial through international crises that in other countries and among other peoples have shaken the very foundations of representative forms of government.

Today a new and unyielding threat stands before the remaining ramparts of free government. International communism, with its foundations deep in atheism, today holds sway over the bodies and spirits of one-third of the earth's inhabitants. If, as we believe, the historic acts of 1787 have produced the fullest development of a freeman in a free society that the world has known to date, it seems to me critically necessary that our citizens have an opportunity each year to demonstrate to the world at large their national devotion and dedication to our republican way of life.

Therefore, Mr. President, I am introducing at this time, for appropriate reference, a joint resolution establishing the week commencing September 17 of every year as Constitution Week for appropriate ceremonies and activities among our people.

I ask unanimous consent that the joint resolution may be printed in the RECORD at this point.

The PRESIDING OFFICER. The joint resolution will be received, appropriately referred, and without objection, will be printed in the RECORD.

The joint resolution (S. J. Res. 105) authorizing the President of the United States to designate the period beginning September 17 and ending September 23 of each year as Constitution Week, introduced by Mr. KNOWLAND, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Resolved, etc., That the President of the United States is authorized and requested to designate the period beginning September 17 and ending September 23 of each year as Constitution Week, and to issue annually a proclamation inviting the people of the United States to observe such week in schools, churches, and other suitable places with appropriate ceremonies and activities.

BURLEY TOBACCO ACREAGE ALLOTMENTS AND MARKETING QUOTAS

Mr. CLEMENTS. Mr. President, as the 2d session of the 84th Congress moves underway, one of the major concerns resting uppermost in the minds of the Members of this body is the economic plight of the farmers of the Nation. The forgotten people in this so-called era of prosperity are beset on all sides with falling prices for the commodities they produce, compounded by rising prices for commodities which they consume. Dramatic proof of their troubles is reflected in the announcement this past week that the parity index now lies at 80—the lowest point in the past 16 years, with no indication that the bottom has been reached.

I do not intend to dwell on this overall problem at length today—it will be the subject of lengthy discussion in the days that lie ahead. Rather, on behalf of my colleague from Kentucky and myself, I bring before the Senate a singular agricultural problem of relative urgency and extraordinary aspect.

In 1954, burley tobacco growers produced a record crop of 665 million pounds of tobacco. Coupled with stocks of burley on hand, the unprecedented yield of the 1954 crop created excessive supplies dangerous to the future of the program.

The national marketing quota for burley tobacco for 1955 had already been reduced 10 percent from the 1954 level by the time it became apparent supplies were even more excessive than realized. Recognizing this as a jeopardy to the program, representatives of the growers, farm organizations, and other segments of the tobacco industry came before Congress last spring and requested that the Secretary of Agriculture be granted authority to further reduce the size of the 1955 crop. In the enactment of Public Law 21 of the last session, the Congress granted the authority requested, and in turn the Secretary further reduced 1955 allotments by 15 percent, or a total of 25 percent reduction under 1954 allotments.

Since enactment of that legislation, the burley situation has undergone a radical change. The total 25 percent reduction in allotments for the 1955 crop has culminated in an estimated production of between 470 to 480 million pounds—approximately 60 million pounds below annual average consumption of 540 million pounds, and 200 million pounds below the production of the record 1954 crop.

However, on December 2, prior to the marketing of the 1955 crop, the Secretary of Agriculture proclaimed a reduction of 15 percent on the 1956 crop, having officially estimated a 1955 production of 520 million pounds. This reduction was made despite advance information which my colleague and I made available to Secretary Benson indicating actual production was from 40 to 60 million pounds less than the official estimate. On four separate occasions in November I personally communicated with the Secretary urging that no reduction be made in 1955 allotments prematurely, but that he direct a reevaluation of crop estimates be carried out in the burley

area, which I was confident would bear out my belief. Although the Secretary did not see fit to carry out my suggestion, the lightness of the crop was in part recognized by the Department in its December 10 estimate revising the 1955 production downward from 520 to 509 million pounds. To date 390 million pounds have been marketed from the 1955 crop and valid estimates indicate that no more than 80–90 million pounds remain unsold, thus bearing out my earlier assertion that production was apparently markedly smaller than the United States estimate. With this information as background, it becomes increasingly evident that the 15 percent reduction of allotments on the 1956 crop is unnecessary and will wreak additional havoc on burley growers, growers already sorely pressed for continued livelihood by the 25 percent reduction voluntarily requested only 10 months ago.

Mr. President, as I have stated, every effort was made to acquaint the Secretary with the consequences of his action prior to announcement of the further reduction in acreage allotments. In my final communication to him in late November, concurred in by my colleague, I stated that if he should proceed to reduce 1956 acreage allotments, and the crop was as small as I had every reason to believe, legislation would be introduced to restore such allotments to their 1955 level. The facts now indicate the 1956 acreage reduction to have been unnecessary, and I take the floor this morning to introduce a joint resolution on behalf of my colleague the junior Senator from Kentucky [Mr. BARKLEY] and myself, for the restoration of 1956 individual burley acreage allotments to the level they would have been if no reduction had been proclaimed. We urge that the resolution be promptly considered by my fellow members of the Committee on Agriculture and Forestry, to whom it will be referred, and quickly returned to the Senate floor for early approval by this body.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 111) relating to burley tobacco acreage allotments and marketing quotas, introduced by Mr. CLEMENTS (for himself and Mr. BARKLEY), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

DESIGNATION OF NATIONAL JUNIOR ACHIEVEMENT WEEK

Mr. JOHNSON of Texas submitted the following concurrent resolution (S. Con. Res. 59), which was referred to the Committee on the Judiciary:

Resolved by the Senate (the House of Representatives concurring)—

Whereas it was the initiative, the sense of individual dignity, and the determination to mold their own futures that motivated those who founded this Nation; and

Whereas Junior Achievement, Inc., through its "learn-by-doing" program is inculcating those ideals in American youth by helping them to set up and operate their own small-scale business enterprises; and

Whereas their experience in running Junior Achievement companies will provide these young people with a heightened understanding of the privileges and duties of citizenship and better prepare them to assume the responsibilities of community leadership; and

Whereas thousands of American businessmen voluntarily give unstintingly of their time, their counsel, and their experience for the benefit of the members of Junior Achievement; and

Whereas it is understood that the week beginning January 29, 1956, and ending February 4, 1956, will be observed as National Junior Achievement Week: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the President of the United States is requested to issue a proclamation designating the week of January 29, 1956, through February 4, 1956, as National Junior Achievement Week and urging all citizens of our country to salute the activities of Junior Achievers and their volunteer adult advisers through appropriate ceremonies.

PRINTING OF ADDITIONAL COPIES OF HEARINGS ON AUTOMATION AND TECHNOLOGICAL CHANGE

Mr. DOUGLAS submitted the following concurrent resolution (S. Con. Res. 60), which was referred to the Committee on Rules and Administration:

Resolved, That there be printed for the use of the Joint Committee on the Economic Report 1,000 additional copies of the hearings on automation and technological change, held before said joint committee during the 84th Congress, first session.

(See the remarks of Mr. DOUGLAS when he submitted the above concurrent resolution which appear under a separate heading.)

PRINTING OF ADDITIONAL COPIES OF JOINT COMMITTEE PRINT ENTITLED "FEDERAL TAX POLICY FOR ECONOMIC GROWTH AND STABILITY"

Mr. DOUGLAS submitted the following concurrent resolution (S. Con. Res. 61), which was referred to the Committee on Rules and Administration:

Resolved, That there be printed for the use of the Joint Committee on the Economic Report 1,000 additional copies of the joint committee print, entitled "Federal Tax Policy for Economic Growth and Stability."

(See the remarks of Mr. DOUGLAS when he submitted the above concurrent resolution which appear under a separate heading.)

PRINTING OF PAMPHLET ENTITLED "A HANDBOOK FOR AMERICANS" AS A SENATE DOCUMENT

Mr. EASTLAND submitted the following concurrent resolution (S. Con. Res. 62), which was referred to the Committee on Rules and Administration:

Resolved, That the pamphlet entitled "A Handbook for Americans," prepared for the use of the Subcommittee on Internal Security of the Senate Committee on the Judiciary, be printed as a Senate document.

SEC. 2. There shall be printed 50,000 additional copies of such Senate document for the use of the Subcommittee on Internal Security of the Senate Committee on the Judiciary.

PUBLICATION OF ADDITIONAL COPIES OF REPORTS FROM THE JOINT COMMITTEE ON THE ECONOMIC REPORT

Mr. DOUGLAS. Mr. President, I have just submitted to the Senate five reports from the Joint Committee on the Economic Report prepared since Congress recessed. The hearings and other materials printed in connection with these studies are in great demand. I am sure the Members of the Senate know it has always been the practice of the Joint Committee on the Economic Report to make available single copies of such materials not only to other Members of the Congress but to teachers, students, libraries, other nonprofit research institutions, and to technicians and administrators in the executive agencies of the Federal Government. At the same time, copies are put on sale by the Superintendent of Documents for persons desiring quantity orders. Over 60,000 copies of committee publications have been sold since 1948.

The committee's supply of two of the current publications, first, hearings of the Subcommittee on Economic Stabilization on Automation and Technological Change, and second, Federal Tax Policy for Economic Growth and Stability—papers submitted by panelists appearing before the Subcommittee on Tax Policy—is already exhausted and stocks of these publications at the Government Printing Office are being rapidly depleted. I am submitting, therefore, the concurrent resolutions which I now send to the desk, requesting that 1,000 additional copies of each of these publications be approved for printing. It may interest Members of the Senate to know that we have a backlog of nearly 500 unfilled requests for each of these publications and are receiving many additional requests daily. I hope it will be possible for the Committee on Rules and Administration to give this request its early and favorable consideration and that the Senate and the House will approve the additional printing to meet this pressing need.

The PRESIDING OFFICER. The concurrent resolutions will be received and referred to the Committee on Rules and Administration.

Senate Concurrent Resolution 60

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Joint Committee on the Economic Report one thousand additional copies of the hearings on automation and technological change, held before said joint committee during the Eighty-fourth Congress, first session.

Senate Concurrent Resolution 61

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Joint Committee on the Economic Report 1,000 additional copies of the Joint Committee print, entitled "Federal Tax Policy for Economic Growth and Stability."

EXTENSION OF TIME FOR INVESTIGATION OF ADMINISTRATION OF THE CIVIL-SERVICE SYSTEM AND POSTAL SERVICE

Mr. JOHNSTON of South Carolina submitted the following resolution (S.

Res. 153), which was referred to the Committee on Post Office and Civil Service:

Resolved, That the first section of Senate Resolution 33, 84th Congress, agreed to May 11, 1955 (authorizing an investigation of the administration of the civil-service system and the postal service), is amended by striking out "January 31, 1956" and inserting in lieu thereof "January 31, 1957."

EXTENSION OF TIME FOR STUDY OF GOVERNMENT EMPLOYEE SECURITY PROGRAM

Mr. JOHNSTON of South Carolina submitted the following resolution (S. Res. 154), which was referred to the Committee on Post Office and Civil Service:

Resolved, That Senate Resolution 20, 84th Congress, agreed to February 21, 1955 (authorizing a study of the administration of the Government employees security program), is amended by striking out "January 31, 1956" wherever it appears in such resolution and inserting in lieu thereof "January 31, 1957."

AUTHORITY TO INVESTIGATE CERTAIN MATTERS BY COMMITTEE ON BANKING AND CURRENCY

Mr. FULBRIGHT (for himself and Mr. CAPEHART) submitted the following resolution (S. Res. 155), which was referred to the Committee on Banking and Currency:

Resolved, That the Committee on Banking and Currency, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to—

(1) banking and currency generally;

(2) financial aid to commerce and industry;

(3) the Federal Reserve system, including monetary and credit policies;

(4) economic stabilization, production, and mobilization;

(5) valuation and revaluation of the dollar;

(6) prices of commodities, rents, and services;

(7) securities and exchange regulation; and

(8) disaster insurance or indemnity.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. Expenses of the committee, under this resolution, which shall not exceed $100,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

INVESTIGATION OF METHODS OF INCREASING HIGHWAY SAFETY

Mrs. SMITH of Maine submitted the following resolution (S. Res. 156), which was referred to the Committee on Labor and Public Welfare:

Resolved, That the Senate Committee on Labor and Public Welfare, or any duly authorized subcommittee thereof, is authorized and directed to make a full and complete investigation and study for the purpose of determining what action can be taken by the Federal Government to promote the public welfare by increasing highway safety in the United States. In making such investigation and study the committee shall give consideration to—

(1) the need for Federal assistance to State and local governments in the enforcement of necessary highway safety and speed requirements and the forms such assistance should take;

(2) the advisability and practicability of uniform State and local highway safety and speed laws and what steps should be taken by the Federal Government to promote the adoption of such uniform laws;

(3) possible means of promoting highway safety in the manufacture of the various types of vehicles used on the highways;

(4) educational programs to promote highway safety; and

(5) such other matters as it may deem advisable and appropriate. The committee shall report its findings, together with such recommendations as it may deem advisable, to the Senate at the earliest practicable date.

M. B. HUGGINS, JR.—AMENDMENT

Mr. THURMOND submitted an amendment, intended to be proposed by him to the bill (S. 2169) for the relief of M. B. Huggins, Jr., which was referred to the Committee on the Judiciary, and ordered to be printed.

INCREASE OF COMPENSATION OF CERTAIN OFFICIALS OF THE EXECUTIVE DEPARTMENT—BILLS RE-REFERRED TO COMMITTEE

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent that Calendar No. 1316, H. R. 7619, to adjust the rates of compensation of the heads of the executive departments and certain other officials of the Federal Government, be re-referred to the Committee on Post Office and Civil Service.

I also ask unanimous consent to have Calendar No. 1274, S. 2628, to increase rates of compensation of the heads and assistant heads of executive departments and independent agencies, a companion bill to H. R. 7619, re-referred back to the Committee on Post Office and Civil Service.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. BIBLE in the chair). Does the Senator from South Carolina yield to the Senator from Texas?

Mr. JOHNSTON of South Carolina. I yield.

Mr. JOHNSON of Texas. Will the Senator give us his reasons for the request that the bills be referred back to the committee; and is the request being made with the knowledge of the ranking minority member?

Mr. JOHNSTON of South Carolina. No hearings were held on the bills. They were reported at the last session, but no action was taken on them. These are the executive pay bills.

Mr. JOHNSON of Texas. Is the ranking minority member aware of the request which the Senator is now making?

Mr. JOHNSTON of South Carolina. No. I have not seen him here today.

Mr. JOHNSON of Texas. I wonder if it is agreeable to the Senator from South Carolina to withhold his request——

Mr. JOHNSTON of South Carolina. I do not want to do anything that is not proper. It is well known that proper hearings were not had. The bills were rushed through the committee and placed on the calendar.

Mr. JOHNSON of Texas. In line with the usual procedure, I should very much like to have the Senator from South Carolina agree to postpone his request until the ranking minority member of the committee can be notified. If such action is agreeable to him, the Senate can then acquiesce in the Senator's request. If not, further consideration can be given to the matter.

Mr. JOHNSTON of South Carolina subsequently said: Mr. President, at this time I renew my unanimous-consent request of a few moments ago, and ask that Calendar No. 1316, H. R. 7619, and Calendar 1274, S. 2628, be re-referred to the Committee on Post Office and Civil Service.

Mr. HUMPHREY. Mr. President, will the Senator from South Carolina yield?

Mr. JOHNSTON of South Carolina. I am happy to yield.

Mr. HUMPHREY. In line with the statement of the majority leader, I should like to inquire whether the matter referred to by the Senator from South Carolina has been cleared with the minority members of the committee.

Mr. JOHNSTON of South Carolina. I have discussed it with the ranking minority members of the Committee on Post Office and Civil Service, the Senator from Kansas [Mr. CARLSON], and he does not object to my request.

Mr. KNOWLAND. Mr. President, as I understand, the Senator from South Carolina requests a re-referral of the two bills to which he has adverted.

Mr. JOHNSTON of South Carolina. Yes; that is correct. I ask that both bills be re-referred to the Committee on Post Office and Civil Service for further study. I believe the Senator from Kansas [Mr. CARLSON] will also concur in the statement that last year, during the closing hours of the session, a request was made for executive pay increases. At that time we did not have opportunity to hold hearings on the bills which were introduced on that subject.

It is only for that reason that I am asking that the bills be re-referred to the Committee on Post Office and Civil Service, so that the members of the committee may study the bills and inquire into the whole subject of executive pay increases, and submit to the Senate a report on the bills.

Mr. CARLSON. Mr. President, I should like to make inquiry of the distinguished chairman of the Committee on Post Office and Civil Service with reference to the possibility of getting early consideration of the bills. As I understand, the chairman requests that the bills be re-referred to the committee for further study, and the chairman gives

the Senate his assurance that the bills will receive early consideration by the committee.

Mr. JOHNSTON of South Carolina. I shall be very glad to schedule hearings on the bills in the near future. As the Senator from Kansas knows, last year we worked under considerable pressure during the closing days of the session, and we did not have time to hold hearings on the bills. However, I shall be very glad to hold hearings on them.

Mr. CARLSON. Mr. President, I believe the Senator from South Carolina has made a very good request. It is well to have a thorough review and study of the proposed legislation, and I wish to be certain that some consideration will be given to the bills if consent is granted that they be re-referred to the committee.

Mr. MORSE. Mr. President, I wish to join with the Senator from Kansas [Mr. CARLSON] in the suggestion that the bills receive early consideration by the Committee on Post Office and Civil Service and that they be reported to the Senate at an early date.

Senators will recall that during the closing hours of the last session I held the floor for some hours, in part because of my opposition to the passage of the executive pay bills under discussion. These executive pay bills had never been subjected to committee hearings. The record is very clear on that point. An attempt was made to steamroller those bills through the Senate without hearings. I said on that occasion that I thought a case could be made for executive pay increases for some jobs, but that the Senate was entitled to the benefit of the record of hearings on any such bills. Therefore, I said, in view of the fact the bills had not been subjected to hearings, I was not prone to let them come to a vote in the closing hours of the session. Therefore I held the floor until the session adjourned, making clear that I favored early committee hearings on the bills, early debate in the next session on the bills, and an early vote on the issue in the next session.

I am perfectly willing to stand on that record.

I also stated in my remarks in the closing hours of the session that I would support pay retroactivity in those instances in which retroactivity could be justified so far as any pay increases for some jobs were concerned.

I am glad to note that the chairman of the Committee on Post Office and Civil Service is asking that the bills be rereferred to the committee, so that the committee may hold hearings on them.

I wish to join the Senator from Kansas in urging early consideration of the bills, so that we may have a committee report ready for our judgment as to what, if any, executive pay increases should be voted.

The PRESIDING OFFICER. Without objection, the bills will be referred to the Committee on Post Office and Civil Service.

Mr. JOHNSTON of South Carolina. Along the same line, Mr. President, I should like to state that one of the bills under discussion was introduced by me, and that the other bill was introduced in the House. The latter bill was passed by the House and was sent to the Senate. I assure the Senate that we shall hold hearings on the bills as soon as possible.

IMMIGRATION AND NATURALIZATION ACT

Mr. KILGORE. Mr. President, I ask unanimous consent that there be printed in the body of the RECORD a few of the many letters and statements relating to proposed changes in our immigration and nationality laws which I have been receiving as chairman of the Senate Judiciary Committee and its Subcommittee on Immigration and Naturalization. The first is a letter released to the public by the addressee, the chairman of a Massachusetts committee to revise the Immigration Act; the second is a clipping from the Boston archdiocesan newspaper, the Boston Pilot; the others are letters addressed to me as chairman. These statements are from the following distinguished American citizens:

Adlai E. Stevenson, former Governor of the State of Illinois.

Patrick A. O'Boyle, archbishop of Washington, D. C.

Christian A. Herter, formerly a Member of the United States House of Representatives, and presently Governor of the Commonwealth of Massachusetts.

William J. Donovan, outstanding member of the American bar and World War II head of the Office of Strategic Services.

Philip D. Reed, chairman of the board of General Electric Co.

David Sarnoff, chairman of the board of Radio Corporation of America.

Jacob S. Potofsky, general president of the Amalgamated Clothing Workers of America.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

CHICAGO, *December 28, 1955.*

Mr. JEROME PRESTON, Jr.,
Chairman, Massachusetts Committee for Revision of the McCarran-Walter Immigration and Nationality Act, Boston, Mass.

DEAR MR. PRESTON: I have your letter of December 27 asking my views on our immigration and naturalization laws and policies. I had been scheduled to testify on this subject in the course of the recent hearings of the Senate Subcommittee on Immigration and Naturalization headed by Senator KILGORE first in Washington and then in New York but, as you know, the hearings were recessed.

I am glad, however, to pass along my general views on these laws which have aroused such resentment both at home and abroad.

In criticizing the McCarran-Walter Act, I criticize not only the restrictive innovations which appeared in that law for the first time, but also harsh and restrictive provisions passed over the years since 1924, and reenacted by the McCarran-Walter Act, such as the national-origins quota system.

I am aware, of course, that the act contained some good features, for example, the removal of absolute barriers to immigration and citizenship based on race, applicable to Japanese and a few other Asiatic groups. There was also the very good provision permitting husbands of American citizens to be admitted into the United States on a nonquota basis.

But unfortunately the bad outweighs the good. And in my opinion the worst thing about the law is the national-origins quota system of selecting immigrants. As originally passed in 1924, the discriminations based on race and national origin affected aliens, but the McCarran-Walter Act goes further by discriminating against naturalized citizens of the United States.

The national-origins system of selection was originally designed to confine the larger part of immigration to northern and western Europe, and to diminish immigration from southern and eastern Europe and from Asia. The limitation on southern Europe adversely affects Italy and Greece, and the limitation on eastern Europe was chiefly aimed at Poland. The total immigration quota as it works out is about 154,000, distributed on the basis of the national origins of the people of the United States in 1920. This resulted in Great Britain and Northern Ireland receiving an annual quota of 65,361 and Ireland 17,756, or more than one-half of the available annual quota. But in more recent years there has been but little immigration from the countries with the largest quotas, like Great Britain, with the result that from 1925 through 1952 out of a total of about 4,362,000 who might have been admitted, under 2 million—about 44 percent—were actually admitted.

While granting the original discriminatory motive behind the national-origins quota system, defenders of this system today disclaim any such motivation. But we cannot convince the people of Italy, Spain, and Greece, for example, that we really do not mean to discriminate if the law does in fact discriminate.

The existence of such discriminations has created ill will throughout the world. Without conferring any benefit upon our country, the national-origins system has worked against us in many ways. We are almost alone in the world as an English-speaking country with immigration laws based on racial and national discriminations. Of course, immigration to this country can no longer be unlimited, but whatever annual maximum is determined by or under the authority of Congress should be distributed in a way best suited to our needs and to world conditions.

The authority to grant immigrant and nonimmigrant visas is vested in our consular officers abroad. The discretion is so absolute that not even the Secretary of State has any power or duty or function relating to the granting or refusal of visas. Thus the fate of an applicant for permission to enter the United States may be determined by the whim or caprice of a single individual. The decision of a customs official with regard to the admission of a sack of beans can be appealed to the highest court of the land. But the decision of a consular official with regard to the admission of an American citizen's mother or wife is final and subject to no appeal whatever. This situation is offensive to all our ideas of due process of law and to the principles of equal justice.

Another indefensible situation exists with respect to proceedings for exclusion and deportation of aliens. The inquiry officer conducts the proceedings, examines the witnesses, and then proceeds to act as judge and to pass upon the sufficiency of the evidence he has put into the record. This combination of administrative and judicial functions in one officer is a surviving relic of methods condemned by the Administrative Procedure Act.

We are all familiar with the damage we have suffered from delays and refusals to issue visas to visiting scientists. World organizations are shunning the United States and holding their conventions and congresses elsewhere to avoid such unfortunate experiences. Of course, everyone is in favor of every reasonable precaution to insure the

security of our people, our property, and institutions, but an excessive zeal that bars from our shores the best minds of other nations is inconsistent with our position of liberalizing international communication.

The McCarran-Walter Act of 1952 subjects naturalized citizens to restrictions which do not apply to native-born citizens, for instance, in the matter of permissible length of residence abroad. The claim that there is no satisfactory basis for such distinctions seems sound, and I hope that the difficulties visited upon naturalized citizens by the operation of the McCarran-Walter Act of 1952 will also be removed.

Piecemeal changes in this law, however well-intentioned, are certain to be unsatisfactory because the many sections of the immigration code are so interwoven as to make a complete revision, with a new and more humane approach, the best remedy. President Truman not only vetoed the act but he advised a revision of the preexisting law. President Eisenhower, both during and after the campaign of 1952, advocated revision of the McCarran-Walter Act. Unfortunately, neither President Eisenhower nor members of his administration have yet taken any steps to redeem those pledges. I hope the Congress will nevertheless proceed to dispel the atmosphere of fear and prejudice and other unworthy motives in which our immigration laws and policies are cloaked, and give the American people an honest, forthright piece of legislation, guarding our shores and our people from undesirables, but extending a traditionally warmhearted welcome to those we can help and who can help us.

Sincerely yours,

ADLAI E. STEVENSON.

[From the Boston (Mass.) Pilot of Dec. 10, 1955]

PRELATE ASKS FOR LIBERALLY REVISED IMMIGRATION LAW—ARCHBISHOP O'BOYLE CALLS POLICY UN-CHRISTIAN, UN-AMERICAN

NEW YORK, Dec. 8.—American immigration policies were condemned as un-Christian and un-American by Archbishop Patrick A. O'Boyle of Washington, in an address here.

Speaking at the annual dinner of the American Committee on Italian Migration (ACIM) in the Hotel Commodore, the Capital City prelate advocated a let-down of the immigration bars so as to permit some 250,000 immigrants to enter the country annually.

Some 1,350 persons from all sections of the country attended the $50-a-plate dinner.

His Eminence Francis Cardinal Spellman, Archbishop of New York, who presided, was decorated with the Grand Cross of the Order of Merit, while Governor Dennis J. Roberts of Rhode Island, and United States Senator John O. Pastore of Rhode Island, were decorated with the Grand Officer of the Order of Merit. The high Republic of Italy awards were presented by Manilo Brosio, Italian Ambassador to the United States.

The dinner honored the memory of Bishop John Baptist Scalabrini, who died 50 years ago, founder of the Scalabrini Fathers and a champion in the cause of caring for Italian migrants. Father Francesco Prevedello, superior general of the Scalabrini Fathers, flew to New York from Rome especially for the dinner. He was presented with the 1955 ACIM award made posthumously to Bishop Scalabrini.

FEAR, PREJUDICE, HATRED

Archbishop O'Boyle said that the present immigration laws are a "culmination of false fears, prejudices, and hatreds."

He criticized severely the national origins quota system in the immigration law which, he said, weighed heavily in favor of nationalities that have little need or desire to come to the United States.

It is a duty and a privilege to offer a home to others who are oppressed, Archbishop O'Boyle said. No one would be so foolhardy as to ask for unlimited, uncontrolled immigration, he added.

THE COMMONWEALTH OF MASSACHUSETTS,
Boston, December 6, 1955.

SENATE JUDICIARY SUBCOMMITTEE ON IMMIGRATION AND NATURALIZATION,
Senate Office Building,
Washington, D. C.

GENTLEMEN: According to traditional American principle, the rights of native and naturalized citizens are held to be equal and identical. Under the Immigration and Nationality Act, however, residence abroad by the naturalized citizen may jeopardize his citizenship while the native-born American may reside abroad at will, without fear of citizenship loss. This loss of citizenship by foreign residence may even affect the citizenship rights of the children of the naturalized citizen.

To illustrate by a specific case of an American-born woman, child of a naturalized citizen, upon whom warrant of arrest in deportation proceedings was served June 16, 1955. She was granted the privilege of voluntary departure, at her own expense, in lieu of deportation. Since by expatriation she comes under Italian quota, on which there is a long wait, her case is now pending action on a private bill filed in her behalf.

This woman was born in Brown's Gulch, Butte, Mont., on October 19, 1898. Her father, a native of Italy, had been a citizen of the United States for 16 years as he was naturalized in the District Court, White Pine, Nev., in October, 1882. When the American-born child was 10 years old, she was taken to Italy by her mother. They were joined by the citizen father in 1910. He had been a citizen of the United States for 20 years. He was a very ill man and went primarily to Italy for treatment by a physician who had been successful in curing him of a similar ailment as a younger man. He never recovered his health and after long invalidism died in Italy in 1929. By the law and regulations governing residence abroad of naturalized American citizens in the period between 1910, his departure from America, and his death in 1929, he was not subject to loss of citizenship by American law. In fact, his naturalization certificate has never been canceled.

His daughter married in Italy and had a son born there. She did not lose American citizenship by her marriage. Both the State Department and the Department of Justice have ruled that this boy, born in Italy, is a citizen of the United States, although his only claim to citizenship is through his mother, now considered a deportable alien.

This native American, child of a deceased naturalized citizen, applied for an American passport in 1948. It was issued to her in 1950 and she entered the United States, as a citizen, on May 13, 1950. Subsequently, she filed a petition, as a citizen, to get nonquota status for her Italian husband so that he could join her and their son in the United States.

Because of this petition, which was ultimately denied, the Immigration and Naturalization Service issued the order of arrest for deportation, claiming that she had lost her American citizenship because she had not returned to the United States before December 1946. As a native American she ordinarily would be exempt from the foreign resident requirements but the Department of Justice has decided that, although American born, she became an Italian national also in 1914 because of the Italian Nationality Act of 1912 which decreed that an Italian national who had acquired a foreign citizenship could reacquire it by residing in Italy for 2 years. The naturalized citizen father had completed two years' residence in Italy in 1914, so the Department of Justice ruled that from that date on the American-born daughter was a dual national and subject to the rules of foreign residence of naturalized citizens.

The interesting aspect in this particular case is that the Italian law in question applies only to Italian subjects who acquired other citizenship. If the American-born child's father had remained alien in America, his return to Italy would not have jeopardized the citizenship of his child born here.

There are, of course, some other unusual aspects in this case. The facts on which this expatriation are based occurred years before the Immigration and Nationality Act was on the statute books. The Italian law in question, passed in 1912, merely states that an Italian national may reacquire his Italian citizenship, it is not mandatory. Furthermore, in 1912 or 1914, when the law became effective in this case, we had no naturalization treaty with Italy; in fact, we still have none. The naturalized citizen, whose absence in his native land has caused the expatriation of his American daughter, died over 25 years ago, and no American law, at that period, would have expatriated him or his American-born child.

By present statute, however, or by its interpretation by the Department of Justice, a naturalized citizen who died more than 25 years ago has forfeited for his daughter her birthright of American citizenship because as a dual national she has the rights of a naturalized rather than a native citizen.

This case of the native-born American, granted a United States passport by the Department of State, admitted by an agent of Immigration Service under the Attorney General as a citizen and then later, when availing herself of her right of petition for her alien husband, ordered deported as having entered illegally, graphically portrays the confusion in the individual judgments of the employees of the two services. Obviously, if the present judgment of the Board of Immigration Appeals is correct, two errors were made by the two departments involved. The consul should not have issued the American passport and the immigrant inspector should not have admitted the person. The second error might have been corrected administratively by changing the record of admission from that of a citizen to that of an alien, if there were quota numbers available. Italian nonpreference quota was probably not available in 1950 and the old nunc pro tunc procedure has vanished under present law. By a singularly contradictory writing of the law, all persons born in the Western Hemisphere are nonquota except those expatriated persons whose country of birth is the United States. Brown's Gulch, Mont., is de facto Western Hemisphere but de jure the quota needed is that of Italy.

A single administration of the complex law would eliminate such situations. If they must exist, it appears that simple justice requires some administrative remedy for official errors. In this specific case, the American-born woman suffers the penalty of deportation, or its expensive alternative, voluntary departure, because the two departments administering the law had different opinions about it.

During my service as a United States Congressman, I went on record on October 2, 1952, in favor of revising the McCarran-Walter Immigration and Nationality Act of 1952 because I felt that sections of this law definitely discriminated against worthy immigrants from Greece, Italy and other southern European countries, as well as from Jamaica and other West Indian areas. I did favor certain new and progressive features which had been introduced in the

act for the admission of immigrants from Asiatic nations.

Today, 3 years later, I still retain my opposition to the discriminatory sections of the McCarran-Walter Act, and I feel strongly that the primary difficulties and injustices in it stem from the quota system using the national origins formula with the 1920 census as base. Certainly, if the formula and philosophy on which the national origins quota is based must be continued in the law, it could be more factually correct and consistent with ethnic statistics if based on the 1950 census.

In 1920, the Republic of Poland, the Baltic States, the now satellite nations of Albania, Czechoslovakia, Rumania and Yugoslavia were just coming into existence after World War I. In the 1920 census it is most likely that nationals of these countries were listed by the census takers as Austrians, Hungarians or Russians. Therefore, the count of such quotas as Estonians, Latvians, Lithuanians, Albanians, etc., would necessarily be upped if the 1950 count were used. Actually, under the displaced persons law, more Baltic peoples entered this country than in the prior decade.

It should also be pointed out that the "mortgaging" of quotas, provided for in the displaced persons law, in the suspension of deportation cases and by various private bills for sheepherders and others, have made the small quotas an absurdity and even a tragedy.

The first preference for special skills, a commendable step toward selectivity, takes 50 percent of the quotas, thus reducing the small quotas almost to the vanishing point. The fourth preference, for certain relatives of American citizens, has reached numerical proportions that it could take years to utilize. This particularly applies to the Italian quota.

So, if quotas must continue to be set by nationality, let it be done as a matter of convenience, not discrimination. The 1950 census base, on a straight percentage basis without weighted formula, would approach fairness.

It, however, is not impossible, or even difficult to set up an annual quota based on the 1950 census without regard to nationality, birthplace or ethnic background. Our law provides this procedure for the independent countries of the Western Hemisphere. In practice, the large British quota is used, also, on the first-come, first-served basis.

An immediate need is the elimination of the mortgages on all quotas, the establishment of nonquota for the classes now covered by the first, second, third, and fourth preferences. With these modifications and an increased census base, a truly American law could become operative.

Almost 40 million immigrants have come to America in the past 100 years. The records show that, by and large, they have made great contributions to our national life regardless of their ethnic origin. In war and in peace, immigrants and their children have a record of proved loyalty to the United States.

Also, data has been forthcoming from population experts which indicate that we are in actual need of a higher rate of immigration to meet manpower shortages. In the area where the American labor force is most needed—those aged 25 to 45 years—there will be a population decrease of 2,000,000 over the next decade. The United States is nowhere near the point where extra population is a danger or a drain. We still have room to grow. An increase of population means a gain in prosperity for all of us.

In addition to this enlightened self-interest, the United States, by increasing immigration, can create the spirit of friendship abroad by helping overpopulated countries to decrease their surplus populations. This is especially true in Italy, West Germany, Austria, Greece, Holland, and Malta.

Sincerely yours,

CHRISTIAN A. HERTER.

NEW YORK, N. Y., *November 28, 1955.*

Hon. HARLEY M. KILGORE, *Chairman,*
Committee on the Judiciary,
Senate Office Building,
Washington, D. C.

MY DEAR SENATOR KILGORE: You are very kind to invite my views on the effect of the Immigration and Nationality Act since its passage in 1952. I have had an opportunity to talk to many people affected by and interested in the act, and am pleased to report their views to you.

The complaint has been made that the immigrants who came in under the displaced persons acts of 1948 and 1950 did not come in quota free. Their entry was charged against either their countries' current or future quotas. This mortgaging of immigration quotas is criticized. It has also caused hardship for those immigrants who now seek entry under regular quota limits.

Another objection frequently heard is against the computation of immigration quotas on the basis of the 1920 census figures. Some feel that the last available official census should be used for these computations. There is also criticism of the handling of special situations, such as the need of uniting families by allowing the immigration of close relatives of American citizens. Those concerned would like to see the United States continue its willingness to help the victims of racial, religious and political persecution.

I send these comments to you in the hope that they will be helpful in your deliberations. They are not intended as an expert opinion, but they do reflect conversations and discussions with persons close to the problems of immigration.

With all good wishes, I am,

Sincerely yours,

WILLIAM J. DONOVAN.

GENERAL ELECTRIC CO.,
New York, N. Y., November 16, 1955.

Hon. H. M. KILGORE, *Chairman,*
Senate Judiciary Subcommittee on Immigration and Naturalization,
Senate Office Building,
Washington, D. C.

DEAR SENATOR KILGORE: This is in reply to your letter of October 26, 1955, inviting me to appear before the Senate Judiciary Subcommittee on Immigration and Naturalization and testify with respect to my views on the effect of the Immigration and Nationality Act at home and abroad since its passage in 1952 or, in the alternative, to convey any comments I might care to make by letter.

It is generally recognized, I believe, that our national policy as expressed by the Immigration and Nationality laws of our Nation does have a significant impact on our relations with other nations and their peoples. The manner and efficiency of administration of these laws, likewise, affect these relationships. Government officials, teachers, scholars, engineers, scientists, businessmen and others are visiting our country in increasing numbers. Thus, an opportunity is created to establish and expand friendly relationships with other peoples. Likewise, our citizens are traveling abroad in great numbers. It is by such interchange of visits that a favorable understanding may be created.

It is submitted that our immigration and nationality laws, as implemented by regulations and administrative policies are somewhat complicated, and only an expert could discuss or comment on them in specific detail. Nevertheless, there are two or three points I should like to raise for the consideration of your committee.

Existing law provides for a "preference" or "out of turn" treatment of quota immigrants of certain specified categories desiring to migrate to the United States. This preferential treatment, insofar as I am able to determine, is limited to those possessing special skills and whose services are urgently needed in the United States. Aliens with commercial, marketing and managerial experience and training are not included in any of these so-called preference categories. It is submitted that those with such knowledge of the overseas market place could make a valuable contribution to the economy of our country in view of the anticipated and desired expansion of international trade. This point may also be made with respect to non-quota immigrants.

Another point is believed worthy of consideration by your committee. Provision is made for admission of several classes of nonimmigrants, such as government officials, temporary visitors, treaty traders and treaty investors, students, etc. No provision is made for the admission of an alien employee of a foreign subsidiary or overseas branch of a United States company engaged in an international business, to be atached to and to be paid by headquarters office for services rendered in the United States. Many of these overseas alien employees whether engineers, scientists, or commercial or managerial people, have great potential in the development of international trade. Their knowledge of the foreign market could be invaluable to the international trader.

Without suggesting any other specific weakness in existing law for your consideration, I would like to say that the exchange student and exchange visitor programs are making great contributions to international understanding. I am informed that these programs are somewhat difficult to administer, and for this reason full benefit is not always achieved. Difficulty arises where, for instance, a student after completing his formal institutional training desires to get "on the job" training and experience. Possibly some practical method could be devised to make it more conducive to United States industries to offer "on the job training" to foreign students.

As you may know, the company with which I am associated has carried on a foreign student program since before 1900 by which foreign students receive academic and practical experience, particularly in the field of engineering. Ours is a formal educational program, and many former students are now back at work in their own country making their contribution to progress. And we have every reason to believe that, because of their associations here in the States, they are friendly toward the United States and will continue to be.

I appreciate the opportunity extended to me to express my views to you and your committee.

Respectfully,

PHILIP D. REED.

RADIO CORPORATION OF AMERICA,
New York, N. Y., November 21, 1955.

The Honorable H. M. KILGORE,
Chairman, Senate Judiciary Subcommittee on Immigration and Naturalization, United States Senate, Washington, D. C.

DEAR SENATOR KILGORE: In response to the invitation contained in your letter of October 26, I welcome the opportunity to present my views on immigration policy to the United States Senate Judiciary Subcommittee on Immigration and Naturalization.

In all frankness, I must say at the outset that my knowledge of immigration matters is not extensive. I have no familiarity with the provisions of the present law nor

with its administration other than such general information as I have read in news reports.

The only personal experience I have had with our immigration laws was when I was admitted to the United States as an immigrant a boy of nine. I shall be ever grateful for the opportunity the laws afforded me to come to this blessed country and to become a United States citizen, and I deplore those provisions of the present immigration law which discriminate on the basis of race and ethnic origin.

I agree with the statement made by President Truman in 1952 that the provisions of the present law "perpetuate injustices of long standing against many other nations of the world" and I concur with the statement made by President Eisenhower in his 1955 state of the Union message that the "discriminatory and inequitable" provisions of the law should be changed. Such a law disregards the American doctrine of equality and provides fuel for the Communist propaganda machine.

On April 5, 1955, I prepared and submitted to President Eisenhower a memorandum which I called "Program for a Political Offensive Against World Communism." In my memorandum I pointed out that the Communists expertly exploit all our internal tensions, injustices, and discontent; that we must, in concert with all peoples, carry the message of freedom to cancel out the destructive power of Soviet-based communism.

We cannot ask peoples of other countries and other races for assistance in our struggle against communism and by our immigration policy treat these peoples as inferiors. We must capitalize on our basic democratic American concept of non-discrimination. We must never relax our efforts to demonstrate to the world how our principles differ from callous Communist indifference to human welfare and human rights. And we cannot capitalize on these principles unless we have an immigration law which does not discriminate against persons by reason of their race and ethnic origin.

In addition to damaging the United States in its efforts abroad in the cold war, discrimination in our immigration law can also hurt us internally. It can slow to a trickle that infusion of new blood and new ideas from diverse sources which has nurtured our culture and industry and has helped significantly to make the United States preeminent among nations of the world.

On November 14, 1955, at the Geneva meeting of the Big Four Foreign Ministers, Mr. Molotov referred to suggestions for increased freedom of the exchange of ideas between peoples of the West and his country as being a freedom that "would lead to the unleashing of subversive activities of all kinds of scum of society thrown out by the peoples of the countries of socialism and people's democracy." By Mr. Molotov's standards millions of those people who fled to our shores to escape persecutions in their native lands—from the Pilgrim Fathers in 1620 to the German and Italian scientists who helped to conceive and execute the splitting of the atom—would be classed as "scum of society." In contrast I am reminded of the words engraved on a small tablet set in the base of the Statue of Liberty:

"Give me your tired, your poor,
Your huddled masses, yearning to breathe free.
The wretched refuse of your teeming shore.
Send these, the homeless tempest-tost to me,
I lift my lamp beside the golden door."

Of course, there must be a limit on the number of immigrants allowed to enter this country as permanent residents, both for our good and for the good of those who enter. We must exercise continuous vigilance to prevent infiltration of Communists and other subversives and we must continue to exclude aliens such as those who are physical and mental defectives, immoral persons, criminals, and those who are likely to become public charges. But, other than exercising this necessary screening, I believe that selection of the number we will admit should be based on a realistic and generous appraisal of our ability to absorb newcomers; not on any policy of discrimination on the basis of race and ethnic origin.

I hope that your committee will see fit to recommend changes in the present immigration law to correct its inequities and make it truly representative of our democratic principles.

With kindest personal regards,

Respectfully,

DAVID SARNOFF.

AMALGAMATED CLOTHING WORKERS OF AMERICA,
New York N. Y., November 30, 1955.

Hon. HARLEY M. KILGORE,
Chairman, Senate Judiciary Committee on Immigration and Naturalization,
Senate Office Building,
Washington, D. C.

DEAR SENATOR KILGORE: I address you as the president of the Amalgamated Clothing Workers of America, a labor union of almost 400,000 members living and working in 41 States and 500 cities and towns, all of them employed in some branch of the men's and boys' apparel industry.

Let me make it clear at the outset that the Amalgamated vigorously opposes many of the basic principles underlying the McCarran-Walter Act. We oppose this act because it is palpably discriminatory; because it is harming the industrial strength of our country; and because it has tended to degrade our country in the eyes of the world.

Since its birth in a revolutionary war, the United States has stood as a haven of freedom and humanitarianism. Today we are the wealthiest and most productive land in the world, but at a time when the symbol of haven is needed most, we have virtually shut the doors of immigration.

The quota system which has allowed most immigration to nations where it is needed least, and the least immigration where it is needed most, is a sorry reflection on our most honored principles of equal opportunity for all. The elaborate system of quotas is an obvious fraud that has fooled no one, least of all the freedom loving peoples in other nations. Basing the quotas on the national origins of our population as of several decades ago merely obscures the discrimination against the peoples of several nations in southern Europe and elsewhere. The present quota system is worse than a fraud; it is actually serving to subvert our own foreign policy, by lowering us in the esteem of the same nations we are most sedulously trying to win to the cause of democracy.

The harm it has caused our prestige abroad is matched by the harm the act is working on our own industrial strength. In our own industry, for example, we are faced with a shortage of skilled workers, particularly of tailors. Under the present system, the largest quotas have been awarded to nations, such as Great Britain, where there are relatively few skilled workers in the tailoring trades, and where there is the least pressure for immigration to the United States. In other nations, such as Italy, where there are many skilled tailors and where over-population has created a need for emigration, the quota is insufficient to meet the demands of either the Italian people or of our own industry.

The inadequacy of the act is proved by the fact that only through the Refugee Relief Act, which will expire in a year, have we been able to obtain even a temporary and insufficient measure of relief for our manpower shortages. Using the provisions of the Refugee Relief Act, the Amalgamated, in cooperation with several other organizations, has been able to bring in workers with needed skills from other lands. But in other industries besides our own, this Nation is being confronted with a continuing shortage of certain skills which could most readily be relieved through permanent policies which would permit increased immigration.

Our hope is that out of these hearings will come a new understanding of the role immigration can play both in implementing our foreign policy and in contributing to the continuing economic strength of our Nation. Even more important, however, I urge that new legislation will be considered in the light of the deep humanitarianism that has always inspired the great mass of the American people. This humanitarianism, based on our respect for individual rights and opportunities, has been a bright thread linking the American people with their heritage, and it is we who would suffer most if this heritage were to be continued to be denied in our immigration policies.

Sincerely yours,

JACOB S. POTOFSKY,
General President.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. KNOWLAND:

Speech delivered by him before National Association of Manufacturers in New York City, N. Y., on December 9, 1955.

Speech delivered by him before Women's National Press Club, in Washington, D. C., on January 3, 1956.

By Mr. ANDERSON:

Address entitled "Do We Need a New Approach?" delivered by him before the Texas Farm Bureau annual convention at Fort Worth, Tex., on November 8, 1955.

By Mr. WILEY:

Address delivered by him over Wisconsin radio stations, discussing the President's state of the Union message.

By Mr. HOLLAND:

Address entitled "Southern Forestry—An Industrial Revolution With Roots," delivered by him before the American Forestry Association and Florida Forestry Association, at Jacksonville, Fla., on October 3, 1955.

By Mr. LEHMAN:

Address delivered by him at Hanukkah festival sponsored by Israeli Bonds, December 15, 1955, at Madison Square Garden, New York City.

By Mr. LANGER:

Statement entitled "Your Congressman Comments," by Representative USHER L. BURDICK, of North Dakota.

SENATOR WILEY'S VIEWS ON CERTAIN EUROPEAN AFFAIRS

Mr. WILEY. Mr. President, the eyes of the world have focused on the Republic of France, as it seeks to interpret the results of this week's significant election.

It is only stating a fact, a grim fact, when I point out that there are very serious misgivings in the United States, in Great Britain, in other friendly lands, and, yes, in the hearts of many of the French people themselves, concerning the confused and indecisive results of the election, the disturbing effect on NATO, and related problems.

We of the United States, believing as we do so strongly in the ability of each people to work out its own destiny in its own way, would not attempt to tell the French people what they should or should not do in their own internal affairs. Like the French people, we prize our own right to cast our own ballots for our own selections in our own way. Next November that is precisely what we will do, but with more encouraging results, I believe, to ourselves and the world.

In any event, the people of our two lands, who have, on the battlefield, fought shoulder to shoulder, the good fight for freedom, are entitled to speak frankly from the heart to one another when the fate of our nations and the world's fate are involved.

While speaking forthrightly and expressing our concern, we would be shortsighted if we did not, at the same time, express the faith that France will work out her parliamentary problem in a constructive fashion. Yes; the Republic will prevail, despite the mountain of difficulties which now apparently lie before her because of deadlock between rival groups of the center and the rise of extremism of right and left.

I append a brief statement and an attached newspaper advertisement which it seems to me symbolizes the thinking mind and creative judgment of the Republic in the field of foreign policy. I do so, on what I believe is a most appropriate occasion, since today marks the 80th birthday of that great European, that distinguished German who has done so much to compose the historic differences between France and Germany, Dr. Konrad Adenauer.

I ask unanimous consent that these materials be printed at this point in the body of the RECORD.

There being no objection, the statement and advertisement were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WILEY

From all sides, there have been pouring out a tremendous volume of critical comments on the uneasy French national situation, on France's economy, her politics, her international relations, her relations with the North African peoples, and on other phases.

It is a fact that there are many exceedingly disturbing elements in all these phases, I need only point up one phase, namely, the increased capacity, by virtue of the recent election, on the part of the international Communist conspiracy—a capacity to expand its evil mischief-making in trying to weaken the Western Alliance.

PREVIOUS GLOOM OVER EDC, SAAR

Nevertheless, I think that now is an appropriate time to recall that the Western Alliance has been able to weather other unhappy turns of events. And France, in particular, has, despite the predictions of the gloomy pessimists, emerged to a stronger and more constructive role.

It was not so long ago that the spreaders of gloom told us that France, three times within 70 years invaded and despoiled by her German neighbor, would allegedly never consent to a German settlement, involving the reconstitution of German armed forces in a sovereign West Germany.

Fortunately, the pessimists were disproved. The setback of the European Defense Community was succeeded by the progress of the Western European Union.

We were told that the setback over the Saar settlement would prove "fatal." But there is good reason to believe that there will be a meeting of minds on the Saar question, despite the obvious difficulties still ahead.

ADENAUER—EUROPE'S STATESMAN

In this and related issues an indispensable factor in refuting the calamity-howlers has been that remarkable figure, the Chancellor of the Federal Republic, Dr. Adenauer, who today celebrates the achievement of his fourscore milestone. The free world greets and congratulates this great European statesman whom I, personally, am proud to know as a friend.

The characteristic French problem of dealing with an occasionally shaky coalition is hardly unknown to Dr. Adenauer, albeit in far less acute a form, fortunately.

But with wisdom and judgment and strength of character, he has held his parliamentary forces together, just as he has resolutely molded and strengthened the spirit of a democratic peaceful Republic, determined to bear its burden of self-defense against the Communist foe, and just as in days gone by, as mayor of Cologne, he so resolutely opposed the then triumphant Nazi foe.

Now, once more, his neighbor, America's neighbor, France heads for more stormy seas. So, once more, the doubters express gloomy forebodings about the future of the French Republic.

Without in any way underestimating the situation, without in any way minimizing the necessity for our French friends to put their own house in order—for purposes of their own well-being and for the well-being of the world, I express the hope and the belief that France will prove adequate to the challenge which is hers.

NEITHER EXTREME RIGHT NOR LEFT WILL PREVAIL

France has had her Verduns, and she has stood. And France will stand, despite those who seek to undermine her from within—from the extreme left—to sell her out down the Volga River, or from the extreme right to drag down the Republic of "liberty, equality, and fraternity" by Fascist or neo-Fascist demogogery and hatemongering.

I have in my hand one of a thousand evidences of the thinking mind and creative judgment of the French Republic. I have held it for some time, expecting that at the start of this session of the Congress, I would call it to the attention of my colleagues, as I am pleased to do now.

NEWSPAPER AD OF PINAY STATEMENT

It is entitled "The Humane French Credo." It consists of excerpts from an address by the former Minister of Foreign Affairs, Antoine Pinay, as delivered at the Big Four Foreign Ministers Conference, on the problem of Germany.

The statement is a most admirable one, one worthy of a long tradition of French statesmanship, and one worthy of the new day in French-German relations.

I was delighted that these excerpts were printed as a part of a public-service series by the International Latex Corp., of Playtex Park, Dover, Del.

It is not too frequently that the American people have such an oportunity to read in convenient, display form so important a pronouncement by a foreign policy leader. Most such foreign policy remarks tend to be condensed in the rush of the day's news from at home and abroad.

I append now the text of this statement as it was published in the Washington Post and Times Herald and in other leading newspapers throughout our country.

I present it for its spirit as well as for its letter. It is basically the spirit of France which can give revitalized life to France.

I hope that those who doubt the capacity of the French people to meet their own problems will read these comments and thereby be enabled to extend to a good friend that confidence which a friend must have in her own hour of need and in her own hour of self-doubt.

Let us not sell France short.

[Published by International Latex Corp. in leading cities and in the Washington Post and Times Herald]

THE HUMANE FRENCH CREDO

(By Antoine Pinay, French Minister of Foreign Affairs)

GENEVA.—Following are excerpts from an address to the Foreign Ministers' Conference Friday by Antoine Pinay of France on the problem of Germany:

"The Soviet proposals relating to the unification of Germany accomplish nothing other than to prolong the division of this country. They do not contain in effect any provisions destined to permit the reestablishment of a united Germany. On the contrary, they sanctify the existence of two separate German states, and they have the effect of giving the existing partition of the country an institutional character.

"There is nothing new in these proposals.

"The Soviet delegation doubtless asserts, to justify its own position, that for several years the two parts of Germany have developed in completely different ways. Does it propose to bring them closer together by perpetuating the division? The Soviet delegation tells us again that the reunification of Germany should be the work of the Germans themselves.

"We have never ceased to proclaim this principle vigorously. That is why we have always believed that we must let the Germans speak for themselves in order that they may choose freely the institutitons and the government they desire.

"Does the Soviet delegation mean to tell us that since the beginning of time a better method has ever been found for letting men express their opinions than to let them go to the polls, in liberty and security, to designate those who will speak for them?

"No; to refuse the German people the free elections they demand, other arguments will be needed; besides, the heads of government considered last July that there were no valid arguments in this domain.

"I would like to convince the Soviet delegations, the delegations of the United States, Great Britain, and France are not moved by political preoccupations or ulterior motives. One does not talk politics to a people that has been divided for 10 years.

"I wish that all of us in this room, who represent united countries, could make an effort to understand what 10 years of partition means, 10 years of separation, 10 years of estrangement, 10 years in which relatives have been unable to see each other, human beings torn apart by force of circumstances, resources that have not been put to common use, research conducted in isolation, creations of the mind and works of art that are unknown to millions of men who share the same tradition, who talk the same language, who have the right to profit by their common heritage.

"If we could conceive of the sum total of difficulties, complications, unhappiness, and pain that 10 years of such a division brings with it, we would better understand the unanimous drive of the whole German people to wish passionately for the reestablishment of its unity and to demand that this unification take place without any further delay.

"Even if we were here without any previous instruction it would be no less our duty, as a humane act apart from all political considerations, to seek the reunification of the German people by every means and in the shortest time possible."

REORGANIZATION OF CIVIL DEFENSE

Mr. WILEY. Mr. President, I ask unanimous consent that there be printed in the RECORD a statement which I have prepared on the reorganization of civil defense.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WILEY

I was glad to see the report on Tuesday frankly pointing out the serious deficiencies in civil defense concepts and planning in the face of the threat of superhydrogen bombs and intercontinental missiles.

In light of our rapidly contracting world and the continued Soviet military threat, I have constantly advocated that we be on our toes and that we adjust our civil defense plans to dynamic advances in science and technology.

I agree with this civilian committee, so ably led by Otto Nelson, vice president of the New York Life Insurance Co. and his 12 colleagues, that civil defense should be based on metropolitan target zones rather than on individual towns and cities. I am glad to see that Val Peterson, Federal Civil Defense Administrator; Arthur Flemming, Director of Defense Mobilization; and Charles E. Wilson, Secretary of Defense, have adopted this recommendation as well as the practical and commonsense recommendation that there be closer cooperation between Federal, State, and local civil-defense agencies.

I am not surprised to see Milwaukee recommended as 1 of the 14 metropolitan target zone areas which they suggest be surveyed and for which a plan of nonmilitary defense be developed.

Our national authorities know that greater Milwaukee is not only one of the major industrial-living areas in the United States, but that it is one of the very few such areas which has taken its civil defense responsibilities seriously. It has surveyed, planned, conferred exhaustively so as to improve its defense capabilities.

However, I hope that the 14 proposed surveys will be undertaken without delay. I will urge authorizing and appropriating legislation to that effect if necessary.

During the course of a recent speaking trip to my State, I have told over 80 groups in all parts of Wisconsin that they must realize and prepare for the fact that they are closer to Soviet striking strength—over the polar route—than are the people of New York City.

I have been impressed with the able job being done in civil defense planning and execution from Madison by Maj. Gen. Ralf J. Olson, Wisconsin State civil defense director, and all the fine people he has working for him.

Just the other day Brig. Gen. Don E. Carleton, a civil defense administrator for the city of Milwaukee, sent me an article entitled "We're All in This Together," written by Dr. William M. Lamers, assistant superintendent of Milwaukee public schools and director of education and pupil safety for Milwaukee civil defense. I am glad to see our civilians so alert to this peril. As General Carleton wrote me, this article was not prepared at his request but grew out of the conviction on Dr. Lamers' part that these grim facts needed to be understood by everybody. The whole article is well worth reading.

I call particular attention to his conclusion and convictions when he stresses:

"Let's accentuate the positive together. We are a great united people, not a cowering herd of kine. Let us hold up our heads together. Together we can survive and win."

Mr. WILEY. I ask unanimous consent that Dr. Lamers' article, referred to in my statement, be printed in the RECORD, and that it be preceded by a list of the distinguished Wisconsinites, who, I am delighted to emphasize, serve as members of the newly organized State civil defense advisory council under General Olson's chairmanship.

There being no objection, the article and the list of members were ordered to be printed in the RECORD, as follows:

MEMBERS OF WISCONSIN STATE CIVIL DEFENSE ADVISORY COUNCIL

Maj. Gen. Ralph J. Olson, State civil defense director, chairman.

Richard E. Barrett, assistant attorney general.

Norman H. Blume, codirector for warning and communications, State OCD.

Walter B. Calvert, assemblyman.

Melvin O. Larson, codirector for safety services, State OCD.

James B. Lippert, assemblyman.

Gerald D. Lorge, senator.

Donald N. McDowell, director, State department of agriculture.

Dr. Carl N. Neupert, codirector for health services, State OCD.

Harold L. Plummer, commissioner, State highway commission.

Wilbur J. Schmidt, codirector for welfare services, State OCD.

Brig. Gen. Harry G. Williams, codirector for transportation, State OCD.

Richard C. Wilson, codirector for administration, State OCD.

Richard J. Zaborski, senator.

WE'RE ALL IN THIS TOGETHER

(By William M. Lamers)

In the indefinitely prolonged period of critical foreign relations ahead, continued existence of civil defense in the United States hangs upon the thread of public opinion. Unless those who directly or indirectly control purse strings at all levels, national, State, and local, agree in sufficient numbers and with sufficient persistent vehemence that an adequate civil defense program must be supported out of public funds, instead of such adequate program we will continue to have a Nation poorly defended at home and therefore less than well defended abroad. I hasten to add that much excellent work has been and is being done in civil defense at all levels. But the program is spotty, generally understaffed, and underequipped, and lives by sufferance or whim rather than by the firm will of the American people. All agree that the Nation must be made safe. Many less agree that without civil defense there is no national safety. There is no general realization in this country that a minimum civil defense program consistent with national security cannot be pulled out of the hat on the outbreak of war. By painful lesson in three World Wars—including the Korean crusade—we learned that we cannot, as some of our statesmen believed in the period before 1918, create an army overnight by putting muskets in the hands of indignant civilians. But many Americans still feel that we can create civil defense in a day by passing out tin helmets.

Chief obstacle, then, to the survival of civil defense, is a state of mind at all levels. Let us classify people as opinion-makers or opinion-takers. The opinion-maker possesses a strategic position astride the media of mass communication, a message, some articulateness, prestige, a receptive audience. He may be politician, writer, publicist, editor, speaker, elected official. The opinion-taker turns to the opinion-maker: "What says Sir Oracle" he asks, "so that I may adjust my thinking to his?" Opinion-makers determine among other matters why, when, and how much the public purse strings are loosed. And today, for various reasons, a segment of opinion-makers in this country are not so convinced of the need of civil defense as to render them competent supporters, cooperators in its several programs.

Adequate civil defense in the United States today demands that opinion-makers shall have a proper awareness of its need, an understanding of what constitutes proper long-term civil defense programing, a willingness to supply necessary support to implement this program into an effective organization capable of conducting an effective operation. Opinion-takers must be willing to go along with them in this, even though they do not entirely agree or understand. In both groups enough hostility must be converted into indifference, and indifference into friendly understanding to permit the development of a proper program.

The immediate crisis in civil defense is financial. At all levels today, it operates on a shoestring. Legislators say that funds are not forthcoming because the public does not clamor for adequate civil defense. The public says that they do not want it because opinion-makers, legislators among them, are not convinced of the need for it. And so the program is caught in a vicious circle. Why? Let me suggest four reasons:

1. We believe in part what we want to believe. No one, not even the most exposed, consciously wishes to believe that he, his family, his chattels and his works are gravely vulnerable to extinction by bombing.

2. We believe in part what conforms to our previous experience. Since the War of 1812 no foreign foe has invaded the United States.

3. We reject from consciousness problems for which we perceive no adequate solution. Having no answer to atomic bombing, the average man refuses to think about it an instant. This natural tendency to escape hard reality by turning from it can be found historically in the Middle Ages where people met the unsolvable problem of the plague by intensifying their social activities. These three reasons account for a great deal of lethargy and indifference upon the part of opinion-makers and takers even in primary target areas.

4. Many of us do not see that all of us are inescapably involved in the problems of civil defense. While such detachment operates normally to keep us from uselessly tearing ourselves to pieces over the inevitable woes of other people and peoples, in the case of civil defense this feeling—call it the nontarget area mentality or what you will—is not only disastrous, but completely unrealistic.

Let's consider this last point. Civil defense is needed in order that we may be less likely to get into a war in which everyone suffers; or, if we do get into it, that we may win it more readily with the smallest amount of hurt to everyone.

I stress a truism about civil defense as a deterrent to attack. If this country is excessively vulnerable on the home front, it is less able to attract allies, less able to sustain attack, and therefore, less able to wage retaliatory warfare. Therefore, it invites attack. Civil defense as insurance against attack is an effective but not completely accurate concept. Insurance pays losses after disaster; civil defense in part operates to prevent disaster. Since war entails loss to everyone in a country, this preventive function benefits everyone.

The concept that modern war is total war—that the whole nation in a manner bears arms; that the homefront is equally vulnerable with the military front; that unless the homefront sustains itself so that the flow of replacements of men and material continues, the military front must collapse; that only by the preservation of the homefront does the military front have adequate reason for continuing the struggles—is neither self-evident nor has it been sufficiently sold to the American people. Nor does the headline reader

vitally perceive that in manpower we are hopelessly outnumbered today, and sustain our place largely because of our geographical position, developed natural resources, and unique industrial potential. Nor does he realize that we no longer have security in strong allies and alliances, but that our foreign relations are today a quagmire of uncertainty, and our strong allies the anemic ghosts of yesterday's great empires.

The Nation, therefore, stands in grave peril, and bids to remain so for years. That peril is not to major target cities alone. Threatened damage will not be sustained by them alone. Peril hangs over the head of every small city, town, village, every dweller on a farm or in the wasteland. No one in America can put himself beyond it.

One method of clinching this thought is to consider the disasters which will come upon this Nation if we lose a war. Such speculation is not academic to the millions of Americans who have lived among defeated peoples during the last decade. If we lose, among other evils, we may expect:

1. Enemy occupation: Occupying troops will not confine themselves to the corporate boundaries of cities of 500,000 or over. Nor will the cost of occupation be levied exclusively against captive metropolitan areas. Nor the shame or discomfort of it.

2. Reparations: Reparations in cash will be levied against everybody directly by the conqueror or indirectly by taxation levied under compulsion or necessity. Reparations in kind undoubtedly will take crops, livestock, farm machinery—whatever the greed or need of the conqueror can lay a hand upon.

3. Slave labor: If distinguished modern precedent is followed, forced labor will be levied against city and country alike. Our citizens may be hauled off to work in foreign lands. Most of our captured military personnel may never be returned to this country.

4. Loss of liberties: The conqueror, to the best of his ability, will abridge freedom of speech, religion, nobility. We will know terror, fear. The Bill of Rights will become an outdated document.

5. Rapine, plunder, damage—and not all the pretty girls live in Manhattan. Nor will looting be confined to the Chicago loop.

6. Taxes, inflation, confiscation at home and abroad: Not all foreign investments will be held by rich people. Nor insurance policies. Nor currency rotted by depreciation.

7. Change of governmental form: The city mouse will be able to say to the country mouse: "Greetings, comrade, how is life on the collective farm?"

8. Loss of foreign markets: Our exports are not exclusively confined to articles manufactured in critical target areas.

9. War guilt and war crimes trials.

10. The slave use of the American war machine: Confiscation of our battleships, aircraft, guns, material of war. The use of our military personnel in the service of the aggressive plans of our enemies.

Any American who has served in garrison duty among a conquered people could double this list and render it vivid with example and anecdote. Such things can happen here.

Even so incomplete a listing will convince any intelligent person that the injuries resulting from defeat cannot be sequestered to primary-target areas, but will blight the living and lives of American citizens everywhere and for years. But if these specifics do not prove proximate enough to touch the nontarget area mentality, then let it be said that if city X is badly hurt, the hinterland within 300 miles including small city Y and town Z will inescapably be damaged because:

1. The living, panicking hordes out of city X will stream across the surrounding region, creating problems, doing damage.

2. City X will not be able to rehabilitate itself out of its own funds. Everyone will contribute or be taxed to restore city X.

3. Many people in the country have close relatives in city X. If these are destroyed, the country people lose; if these escape they are likely to live with their country relatives for a long time.

4. City X is the best customer of the rural region surrounding it. If many people are destroyed in city X, for instance, the milk producers lose customers.

5. City X is part of the shopping center for the country surrounding. It is also the best equipped health and amusement center in the area. It contains institutions of higher learning, patronized by adjacent rural areas. It is a receiving, shipping, banking center for the whole area, urban and rural.

6. City X always contains a large number of visitors from the surrounding rural area. Some time or other virtually every rural dweller in the area visits city X.

7. City X manufactures bombsights or jeeps, or tanks, or a thousand kinds of the foods and engines of war. These are part of the essential equipment used by the fighting sons of town Z as well as city X.

8. City X is highly vulnerable to atom bombs. But small town Y is not immune to incendiary and demolition bombs, particularly in diversionary raids. And the cornfields and animals of town Z are rich targets for bacterial warfare. It may be to the advantage of town Y and township Z to be willing partners with city X in a program of legislative support, mutual aid, and mobile and static support. They may need the help of city X. No one can afford to be smug, while everyone is vulnerable.

That, in summary, is the argument that must be made to win the support of the opinion-makers in the nontarget area. Anyone using such argument need make no apology for it. The other argument, "Please help us out. We are in a mess. We need you. But you don't need us"—is not only futile, but fallacious, contrary to fact.

How can this concept of essential interdependence be substituted for the more common, "We take, you give" approach?

Let me suggest a few of the more obvious steps:

1. Let civil defense authorities at each major level analyze thoroughly the significance of civil defense to national defense, and of national defense to the welfare of all individuals and groups in their country, particularly to those not in critical or nontarget areas. Then let appeals to key people in these areas be made at least as much upon the basis of enlightened selfishness as on the basis of altruism.

2. Let the whole range of weapons for enemy attack be constantly explored, and let special vulnerabilities of rural populations be stressed, and their dependence upon the aid to be found exclusively or largely in primary target areas. So much of civil thinking has been given to atomic bombing that rural areas, safe from atomic attack, have incorrectly reckoned themselves safe from all attack.

3. Let there be made a declaration by highest authority of the "We're all in it together" facts. Let the President of the United States solemnly tell his people that unless we give adequate support to an adequate program of civil defense, the whole Nation will suffer, and with the whole Nation, each one of us.

4. Let those responsible for defense programs in critical target areas use the larger viewpoint in selling civil defense to their own people, to the people of the support areas.

5. Let national, regional, State, district, local meetings be held and the whole matter of shared vulnerability be thoroughly explored and exhibited.

We must not count as wasted effort anything that has been done to make any person, any place in America less vulnerable to enemy attack. Many good people possessed of prophetic vision have labored selfishly and selflessly to make us less vulnerable. But sometimes we have been so preoccupied with the smaller housekeeping details of civil defense as to fail to see the problems of the national community.

We need more emphasis on, "We're all in this together." The nontarget area mentality results from lack of understanding; not lack of patriotism or good will. But target areas have talked too much with one another and not enough with the rest of the Nation. Or when they have spoken, their cry has been, "Rescue us. We are desperately vulnerable. We need your help." When it should have been, "Help yourself by helping us. Your vulnerability is also great. We're all in this together." And let's accentuate the positive together. We are a great united people, not a cowering herd of kine. Let us hold up our heads together. Together we can survive and win.

RELIGIOUS PERSECUTION BY COMMUNISTS IN THE UKRAINE—STATEMENT BY REV. W. SMULKA

Mr. THYE. Mr. President, within recent weeks I have received a number of communications, the contents of which I should like to bring to the attention of the Members of Congress. I ask unanimous consent, therefore, to have printed in the body of the RECORD one of the communications, which is from the Reverend W. Smulka, of Minneapolis, Minn.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

Christianity has been existing in Ukraine for more than 1,000 years. It has fostered a profound faith in God among the people, and has begotten abiding moral principles, and nourished a new culture and erudition.

In December 1917 Communist Russia invaded Ukraine and in 1919–1920 occupied the eastern provinces of this country. The Soviets were bent on extirpating Christianity from these regions. In their coup d'etat they published aggressive antireligious propaganda and terrorized the people with threats of exile, torture, and death.

First, the Communists attacked the church in eastern Ukraine. Within 10 years, from 1921 to 1931, they unjustly arrested and ruthlessly murdered 34 Ukrainian orthodox bishops and more than 3,000 priests. Hundreds of thousands of the faithful were inhumanly tortured in prisons or deported to concentration camps in Siberia; a greater part of these innocent people died martyrs to their faith; the remainder still endures the appalling trials and hardships of imprisonment.

The Reds destroyed 80 percent of the churches (many of these churches contained precious historical relics, as for example the Golden Domed Michalivsky Monastery in Kiev from the 12th century); other churches were despicably converted into warehouses, theaters, and convention halls; monasteries were outraged and cemeteries profaned.

By 1930 the Communists had completely liquidated the entire Ukrainian orthodox church, barring it from all public activity.

Through article 123 of the Soviet constitution, which is binding in Ukraine as well as the U. S. S. R., explicitly recognizes freedom of religion, yet, during the first Red occupation of western Ukraine (1939–1941), the Communist regime overtly persecuted the church, arresting many Ukrainian priests and ruthlessly murdering 27 of them.

This anti-Christian terror adopted more hideous means of exterminating Christianity in Ukraine during the second occupation

of this country beginning in 1945. On April 11, 1945, the Soviets arrested the Metropolitan of Halych and Archbishop of Lviv, Joseph Slipyj, 80-year-old Bishop Gregory Khomyshyn, Bishop John Latyschevskyj, Bishop Nicholas Charnetskyj, C. SS. R., and Bishop Nykyta Budka. On June 25, 1946, Bishop Josaphat Kotsylovskyj, OSBM, and Bishop Gregory Lakota were imprisoned. All these bishops were condemned to forced labor for 8 to 10 years and even life; the imputation was lawfully unjust. Some of these bishops (for instance Bishop Gregory Khomyshyn and Bishop Josaphat Kotsylovskyj) later died from maltreatment in prison. Still more, when Archbishop Joseph Slipyj's or other bishops' terms expired, the Reds would not release them from prison.

In the autumn of 1947, the Communists murdered Bishop Theodore Romza, Uzhorod, Carpathian Ukraine, and in 1950, the bishops Paul Gojdich, OSBM, and Basil Hopko, Pryashiv, Czechovakia, were imprisoned. On January 15, 1951, Bishop Paul Gojdich was tried and unjustly condemned to forced labor for life. Bishop Basil Hopko is now in a concentration camp.

Altogether, 10 Ukrainian Catholic bishops have been liquidated by the Reds.

In 1946, the Soviets enjoined the legal continuance of the Ukrainian Catholic church in Ukraine. Thus, in our own 20th century, it has been reduced to the sorrowful plight of the Church of the Catacombs, as was the primitive church during the Neronian persecution.

Two thousand secular priests and monks, for rightfully refusing to acknowledge the Patriarch of the Russian Orthodox Church as their head—this church is now subservient to the Communists—were arrested and deported to slave labor camps. The Reds exterminated all five dioceses of the Ukrainian Catholic church, desecrated 4,400 of its churches and chapels together with 195 religious houses. The Communists continue to oppress mercilessly the Ukrainian laity for remaining steadfast to its Christian heritage, church, and faith.

Therefore, I respectfully request to present to Congress the dreadful situation of the religious persecution in Ukraine and ask to propose that Congress inquire into this anti-Christian terror, and that a special designated congressional committee hold hearings of witnesses of the aforesaid situation.

I also request that the Secretary of State propose to the American delegation in the United Nations that the condition of the persecuted church in Ukraine be placed on the agenda of the United Nations Assembly.

Rev. W. Smulka,
664 N. E. Spring Street.
Minneapolis, Minn., *December 5, 1955.*

DEATH OF RALPH DAMON

Mr. MONRONEY. Mr. President, I invite the attention of Senators to the death of one of the truly great aviation statesmen of the world. Ralph Damon, president of TWA, died of pneumonia yesterday.

He was an early-day pilot, a man respected by men who fly and men who service the planes, and by everyone who has ever had a part in the great development of the great commercial aviation industry in this Nation.

I ask unanimous consent to have printed in the Record at this point as a part of my remarks a brief statement which I made yesterday before the Aviation Subcommittee of the Senate Committee on Interstate and Foreign Commerce.

There being no objection, the statement was ordered to be printed in the Record, as follows:

I would like to make a very sad announcement that anybody who has any connection with civil aviation in the United States will deeply regret hearing. One of the great pioneers of civil aviation in the United States, Ralph Damon, head of TWA, died this morning of pneumonia.

I had known Mr. Damon for many years, and members of this committee had known him for many years, and I know of no one who has done more for the progressive advancement of the air age than did this great pioneer of civil aviation.

He was one of the early-day World War I pilots who saw the future of commercial aviation, worked up through the ranks as a flier to head not only American Airlines during the critical period of its big post-World War II development, but also to go over the Trans World Airline system and expand that to its worldwide service.

I know that everyone who flies, every pilot who has been at the controls of a plane from the days of Jennies to the days of the jets will deeply regret the passing of this truly great American.

THE "GROUND-MINDED" POLICY TOWARD COMMERCIAL AVIATION

Mr. MONRONEY. Mr. President, I ask unanimous consent to have printed in the body of the Record at this point an article entitled "Weeks Hit for Policy on Plane Safety," published in the Philadelphia Inquirer of January 4, 1946, dealing with the investigation of the railroading of Frederick B. Lee, Civil Aeronautics Administrator, pursuant to the ground-minded policy of the Secretary of Commerce toward commercial aviation.

There being no objection, the article was ordered to be printed in the Record as follows:

Weeks Hit for Policy on Plane Safety—Monroney Calls Commerce Head Ground Minded

(By Nicholas P. Gregory)

Washington, January 3.—Senator A. S. Mike Monroney, Democrat, of Oklahoma, today accused Secretary of Commerce Sinclair Weeks of endangering air safety by playing politics and pursuing a ground-minded policy toward commercial aviation.

"The vital progress of aviation cannot be tied to the old coal-burning locomotive days Secretary Weeks seems to live in," Monroney said.

Monroney, chairman of the Interstate and Foreign Commerce Committee, made his charges as the committee prepared to open hearings tomorrow into the reasons for the dismissal of Frederick B. Lee, Civil Aeronautics Administrator, by Weeks for alleged insubordination.

SENATE O. K. NEEDED

Lee, a consistent opponent and critic of Weeks' aviation policies, is slated to be the first witness tomorrow. The hearings will cover his firing and Weeks' administration of the CAA since he took office.

President Eisenhower has nominated Charles Lowen to succeed Lee. Lowen, a friend of Under Secretary of Commerce Louis S. Rothschild, also under attack by Monroney, must be confirmed by the Senate.

"Lowen is nothing but a political stooge," Monroney said, "a political appointment of Rothschild."

Monroney accuses Weeks of trying to enforce political control over aviation safety, approval of new type aircraft, regulation of airways, improvements in instrument landing for bad weather, and development of an adequate system of airports.

REPORT CRITICIZED

Weeks, who headed the President's recent transportation study which issued a report that was highly criticized by airlines and truckers for its alleged favoritism to railroads, has been stingy about funds for new airports, Monroney said.

The Senator also charged Weeks with planning a transportation policy favorable to railroads against the airlines. The President's transportation policy report did not spell out any proposals for airlines.

Monroney pointed out that in the first year Weeks was in office—1954—he made no recommendations for airports. Weeks, he said, also cut from the Truman budget $30 million in airport funds, which the former President had requested in the 1954 budget.

SOUGHT FUND INCREASE

"For fiscal year 1955, Weeks recommended nothing for airport development," Monroney said.

For fiscal year 1956, he pointed out, the Secretary of Commerce asked for only $11 million in airport funds, but Congress appropriated $20 million. The current authorization figure is $63 million a year for the next 4 years.

Lee aroused the ire of Weeks, it is reported, because he testified for larger funds than the Secretary sought. As a result Lee was fired for insubordination.

"Weeks' entire background favors the railroads," Monroney declared. "He has been actively against every aviation issue that has come up during his supervision of CAA since he was appointed Secretary of Commerce."

SEEKS COMPLETE STORY

"What are you going to develop in the public hearing?" the Senator was asked.

"We want the complete story of why Lee was fired," Monroney replied, "what forces prompted Weeks to ignore Lee's career service and his technical experience."

Lee sent the White House a complete report on his technical experience as well as his career service in the Federal Government. In that document he submitted his resignation. The White House accepted it.

Monroney believes the President did not know of Lee's background, otherwise he never would have accepted his resignation.

CAREFULLY PREPARED

"We also want to know whether Lee's carefully prepared case was brought to the attention of the President," Monroney said. "The only thing Lee got was a letter accepting his resignation. It's doubtful if Mr. Eisenhower saw Lee's file."

Monroney is considering the introduction of a bill to strip Weeks and his Commerce Department of all control over the CAA.

The Senator was asked whether he expected to gain support for his measures. Monroney said he would.

"I have asked the Interstate Commerce Committee that a bill be drafted which would return the CAA to an independent status, and move it from the political control and ground-minded administration of Weeks and Rothschild," Monroney declared.

CHANGED IN 1940

Monroney noted that originally the CAA, a 3-member Air Safety Board and a 5-member Civil Aeronautics Board were parts of an independent agency, established in 1938.

Under the 1940 reorganization plans, the CAA was placed under the direction and supervision of the Department of Commerce.

Monroney said he already had been pledged support for an independent CAA from the Airline Pilots Association, the AFL-CIO ground crews' union, private and executive pilot associations, and municipal and

State authorities who have been complaining of the lack of funds to develop airports.

"I feel," MONRONEY declared, "that the millions of people who use commercial airlines will be more interested in having competent technicians to regulate the Nation's airlines. Safety is being threatened by patronage."

Mr. MONRONEY. Mr. President, the sordid details of the dismissal of Frederick B. Lee and the assumption of Presidential power by men not entitled to exercise such Presidential power paint a very sorry picture in the history of this administration.

PUBLIC POWER

Mr. NEUBERGER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a most illuminating letter addressed to the Eugene (Oreg.) Register-Guard of December 22, 1955, by a former distinguished Member of this body, the Honorable Rufus C. Holman, who served as United States Senator from Oregon during the period 1939 to 1945.

Senator Holman was known during his tenure as a stanch supporter of hydroelectic power development in the interest of all the people, rather than for a privileged few. It is extremely significant that Senator Holman, an outstanding member of the Republican Party, calls attention to the fact that public power in our State of Oregon was originally sponsored by such notable Republicans as Senator Charles L. McNary, Governor Julius L. Meier, State Senator George W. Joseph, and by Senator Holman himself.

Will the present national administration heed Senator Holman's advice and return to the public-power principles of these great progressive Republicans of the past?

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

POWER BIG ISSUE

To the EDITOR:

PORTLAND.—What is a Democrat? What is a Republican? Particularly as it pertains presently to Oregon politics, who has a definition for either? Neither political party in Oregon has adopted a platform of political principles; therefore, it seems to me that intelligent citizens and voters, perforce, must determine for themselves as best they can, which candidates, regardless of political party affiliation, advocate the best program for public affairs for the greatest good for the most people in our State and Nation.

I doubt if any two of us agree absolutely upon every political issue now before us, but undoubtedly the major domestic issue now facing the people of Oregon to decide concerns the maximum utilization of our abundant falling waters for the benefit of all the people forever, as opposed to the grasping greed of private interests seeking only private gain. Oregon has neither natural gas, oil nor coal; yet in the Columbia River system is 44 percent of all the potential waterpower in the United States. Is this great, God-given natural resource to be developed and administered for the benefit of all the people, or is it to be grabbed and looted by predatory interests for the aggrandizement of the already swollen fortunes of the private electric power trust, the banking monopoly, the timber barons, and similar ruthless special-privilege seeking gentry with their interlocking boards of directors, and their subsidized press, as were the public domain timberlands and the school lands in Oregon? This is the great and vital political issue in Oregon at this time. What is decided now will affect the lives of our people for generations yet unborn. Be it remembered that in population Oregon is one of the fastest growing States in the Union and is one of the most productive in natural, diversified land products, timber, grains, grasses, fruits, vegetables, livestock, poultry, and possibly some minerals. We need cheap and abundant dependable waterpower (hydroelectric energy) publicly operated and controlled to enable private enterprise to manufacture, refine, preserve and distribute to the four corners of the world these articles of commerce at a profit and to furnish gainful employment to our people.

It is ardently hoped that in the public interest and for the good of their own souls, the Republican candidates for the Federal Congress will declare, as the Democratic candidates already have, for the public development, ownership and control of the hydroelectric power operations in the Oregon country, as did the late State Senator George W. Joseph, Republican; Gov. Julius L. Meier, Republican; Charles N. McNary, Republican, among others, as I, Republican, a former United States Senator, did and do.

Be it also remembered always that honest men, patriots, and statesmen, like gold, are where you find them regardless of whether they are registered as Democrats or Republicans.

RUFUS C. HOLMAN.

(EDITOR'S NOTE.—The writer of the above letter represented Oregon in the United States Senate from January 3, 1939, to January 3, 1945. He was defeated by Wayne Morse when he sought renomination on the Republican ticket in 1944.)

IMMIGRATION AND CITIZENSHIP LAWS

Mr. LEHMAN. Mr. President, over the weekend there was published in the press an exchange of letters between Mr. Jerome Preston, Jr., chairman of the Massachusetts Committee for Revision of the McCarran-Walter Immigration and Nationality Act, and Governor Adlai Stevenson, titular leader of the Democratic Party. This correspondence dealt with Governor Stevenson's attitude toward our immigration and citizenship laws and represented the first detailed exposition of Governor Stevenson's views on this subject. In replying to an inquiry from Mr. Preston, an eminent lawyer and public-spirited citizen of Boston, who heads a nonpolitical organization representing all faiths, creeds, and political complexions, Governor Stevenson set forth his very specific and concrete objections to the McCarran-Walter Act.

As one who, day in and day out, has fought for the overhauling of the McCarran-Walter Act for 3½ years, I am deeply gratified at the position taken by Governor Stevenson in his wholehearted opposition to the national origins quota system and to the second-class citizenship status now occupied, under present law, by naturalized citizens. Governor Stevenson has pinpointed many of the fundamental evils in the present law, although there are scores of unfortunate provisions in the law which he has not touched in his letter to Mr. Preston. It would take more than a letter to cover all of them.

I believe this letter to be an important document in that it is a forthright, comprehensive, and concrete statement of objections to the present law by an outstanding public figure, a man who I hope, and expect, will be the next President of the United States.

Because this correspondence is of such vital importance, I ask that both Governor Stevenson's letter, and the letter of inquiry addressed to him by Mr. Jerome Preston, be printed in the body of the RECORD at this point in my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DECEMBER 27, 1955.

GOV. ADLAI E. STEVENSON,
Chicago, Ill.

MY DEAR GOVERNOR STEVENSON: Our committee, which is composed of religious and civic leaders representing a broad cross-section of the community from the political, ethnic and religious viewpoints, has been working since its establishment 2 years ago to secure a revision of the Immigration and Nationality Act of 1952 (the so-called McCarran-Walter Act) which would better serve our national interests and accord with traditional American principles of fair and equal treatment for all people irrespective of race or national origin. We are not a narrow lobbying group seeking favored treatment, but an assembly of citizens profoundly convinced that our present immigration and citizenship laws are harmful to the United States in both our domestic economy and our foreign affairs, and productive of individual injustices.

I am addressing this letter to you in the hope that as a distinguished American and leader of public opinion, you will express your views on this subject in the months ahead. It is our experience that the overwhelming majority of those who give the matter serious consideration conclude that revision is urgently needed and, in our opinion, if a sufficient number of people are made aware of the problem in the immediate future, appropriate revision of the law might be enacted at this session of the Congress. What is needed more than anything else is the leadership necessary to produce concrete legislation. While we are looking to the Administration for action, we also hope that you, as the head of the Democratic Party, will undertake leadership in this matter.

I feel certain, based on your brief comment on the subject in the past, that you are generally sympathetic with our point of view, but I would like to know, for the edification of the members of our committee and of our constituent organizations, what specific changes you would propose to be made in the McCarran-Walter Act. We hope that you will put forward proposals designed to correct the fundamental inadequacies of this law which so vitally affects our domestic and foreign affairs.

Sincerely yours,

JEROME PRESTON, Jr.,
Chairman.

DECEMBER 28, 1955.

MR. JEROME PRESTON, JR.,
Chairman, Massachusetts Committee for Revision of the McCarran-Walter Immigration and Nationality Act, Boston, Mass.

DEAR MR. PRESTON: I have your letter of December 27 asking my views on our immigration and naturalization laws and policies. I had been scheduled to testify on this subject in the course of the recent hearings of the Senate Subcommittee on Immigration and Naturalization headed by Senator KILGORE first in Washington and then in New York but, as you know, the hearings were recessed.

I am glad, however, to pass along my general views on these laws which have aroused such resentment both at home and abroad.

In criticizing the McCarran-Walter Act, I criticize not only the restrictive innovations which appeared in that law for the first time, but also harsh and restrictive provisions passed over the years since 1924, and reenacted by the McCarran-Walter Act, such as the national origins quota system.

I am aware, of course, that the act contained some good features, for example, the removal of absolute barriers to immigration and citizenship based on race, applicable to Japanese and a few other Asiatic groups. There was also the very good provision permitting husbands of American citizens to be admitted into the United States on a nonquota basis.

But unfortunately the bad outweighs the good. And in my opinion the worst thing about the law is the national origins quota system of selecting immigrants. As originally passed in 1924, the discriminations based on race and national origin affected aliens, but the McCarran-Walter Act goes further by discriminating against naturalized citizens of the United States.

The national origins system of selection was originally designed to confine the larger part of immigration to northern and western Europe, and to diminish immigration from southern and eastern Europe and from Asia. The limitation on southern Europe adversely affects Italy and Greece, and the limitation on eastern Europe was chiefly aimed at Poland. The total immigration quota as it works out is about 154,000, distributed on the basis of the national origins of the people of the United States in 1920. This resulted in Great Britain and northern Ireland receiving an annual quota of 65,361 and Ireland 17,756, or more than one-half of the available annual quota. But in recent years there has been but little immigration from the countries with the largest quotas, like Great Britain, with the result that from 1925 through 1952 out of a total of about 4,362,000 who might have been admitted, under 2 million—about 44 percent—were actually admitted.

While granting the original discriminatory motive behind the national origins quota system, defenders of this system today disclaim any such motivation. But we cannot convince the people of Italy, Spain, and Greece, for example, that we really do not mean to discriminate if the law does in fact discriminate.

The existence of such discriminations has created ill will throughout the world. Without conferring any benefit upon our country, the national origins system has worked against us in many ways. We are almost alone in the world as an English-speaking country with immigration laws based on racial and national discriminations. Of course, immigration to this country can no longer be unlimited, but whatever annual maximum is determined by or under the authority of Congress should be distributed in a way best suited to our needs and to world conditions.

The authority to grant immigrant and nonimmigrant visas is vested in our consular officers abroad. The discretion is so absolute that not even the Secretary of State has any power or duty or function relating to the granting or refusal of visas. Thus the fate of an applicant for permission to enter the United States may be determined by the whim or caprice of a single individual. The decision of a customs official with regard to the admission of a sack of beans can be appealed to the highest court of the land. But the decision of a consular official with regard to the admission of an American citizen's mother or wife is final and subject to no appeal whatever. This situation is offensive to all our ideas of due process of law and to the principles of equal justice.

Another indefensible situation exists with respect to proceedings for exclusion and deportation of aliens. The inquiry officer conducts the proceedings, examines the witnesses, and then proceeds to act as judge, and to pass upon the sufficiency of the evidence he has put into the record. This combination of administrative and judicial functions in one officer is a surviving relic of methods condemned by the Administrative Procedure Act.

We are all familiar with the damage we have suffered from delays and refusals to issue visas to visiting scientists. World organizations are shunning the United States and holding their conventions and congresses elsewhere to avoid such unfortunate experiences. Of course, everyone is in favor of every reasonable precaution to insure the security of our people, our property, and institutions, but an excessive zeal that bars from our shores the best minds of other nations is inconsistent with our position of liberalizing international communication.

The McCarran-Walter Act of 1952 subjects naturalized citizens to restrictions which do not apply to native-born citizens, for instance, in the matter of permissible length of residence abroad. The claim that there is no satisfactory basis for such distinctions seems sound, and I hope that the difficulties visited upon naturalized citizens by the operation of the McCarran-Walter Act of 1952 will also be removed.

Piecemeal changes in this law, however well intentioned, are certain to be unsatisfactory, because the many sections of the immigration code are so interwoven as to make a complete revision, with a new and more humane approach, the best remedy. President Truman not only vetoed the act but he advised a revision of the preexisting law. President Eisenhower, both during and after the campaign of 1952, advocated revision of the McCarran-Walter Act. Unfortunately, neither President Eisenhower nor members of his administration have yet taken any steps to redeem those pledges. I hope the Congress will nevertheless proceed to dispel the atmosphere of fear and prejudice and other unworthy motives in which our immigration laws and policies are cloaked, and give the American people an honest, forthright piece of legislation, guarding our shores and our people from undesirables, but extending a traditionally warm-hearted welcome to those we can help and who can help us.

Sincerely yours,

ADLAI E. STEVENSON.

NATIONAL DISASTER INSURANCE CORPORATION

Mr. CARLSON. Mr. President, in his message on the state of the Union the President urged the enactment of legislation providing for a disaster insurance corporation. In 1951, in the Kansas River Valley, and also in the Missouri Valley, particularly in Oklahoma and Missouri, there was experienced the most destructive flood in our Nation's history. The property loss was estimated at 2½ billion dollars, and 250,000 persons were displaced and their homes destroyed.

Following that disastrous flood, on September 20, I, in cooperation with the senior Senator from Kansas [Mr. SCHOEPPEL] and the then senior Senator from Missouri, Mr. Kem, introduced a bill providing for the creation of a disaster insurance corporation. At that time I made a statement in connection with the proposed legislation, which will be found in the CONGRESSIONAL RECORD, volume 97, part 9, page 11696. In view of the fact that the distinguished Senator from Connecticut [Mr. BUSH] is going to speak in a few moments on a proposed disaster insurance corporation in connection with floods and other disasters, I ask unanimous consent that my bill, together with the statement I made at that time, may be made a part of the RECORD at this point.

There being no objection, the bill (S. 2148) to establish a National Disaster Insurance Corporation, and the statement with reference thereto, were ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That this act may be cited as the "National Disaster Insurance Corporation Act of 1951."

DECLARATION OF PURPOSE

SEC. 2. It is the purpose of this act to promote the national welfare by alleviating the widespread economic distress suffered from time to time within the United States from certain national disasters, and the attendant impairment of the free flow of interstate and foreign trade and commerce, by providing, through a program of reinsurance of insurance companies, for reasonable cost insurance against property loss or damage caused by flood, tidal wave, earthquake, or hurricane.

ESTABLISHMENT OF CORPORATION

SEC. 3. (a) To carry out the purposes of this act, there is hereby created as an agency of the United States a body corporate to be known as the National Disaster Insurance Corporation (hereinafter referred to as the "Corporation"). The principal office of the Corporation shall be located in the District of Columbia, but agencies or branch offices may be established elsewhere in the United States under rules and regulations prescribed by the Board of Directors.

(b) The Corporation shall have a nonassessable captial stock of $50 million subscribed by the United States of America. There is hereby authorized to be appropriated to the Secretary of the Treasury not more than $50 million for the purpose of subscribing to such stock. Receipts for payments by the United States of America for or on account of such stock shall be issued by the Corporation to the Secretary of the Treasury, and shall be evidence of the stock ownership by the United States of America. Sums so received by the Corporation shall be deposited to its credit in the National Disaster Insurance Fund established by section 10 of this act.

MANAGEMENT AND PERSONNEL

SEC. 4. (a) The management of the Corporation shall be vested in a Board of Directors (hereinafter called the "Board") consisting of three persons appointed by the President of the United States by and with the advice and consent of the Senate, one of whom shall be designated by the President as Chairman of the Board. Not more than two members of the Board shall be members of the same political party. Each such appointment shall be for a term of 6 years, except that (1) the directors first appointed shall be appointed for terms of 2, 4, and 6 years, respectively, and (2) whenever a vacancy shall occur other than by expiration of term, the person appointed to fill such vacancy shall hold office for the unexpired portion of the term of his predecessor. The Chairman shall receive a salary at the rate of $16,000 per annum, and other directors at the rate of $15,000 per annum.

(b) Each director shall devote his time principally to the business of the Corpora-

tion. No person shall hold office as a director of the Corporation while holding any office, position, or employment in any privately or publicly owned insurance company.

(c) So long as there shall be two members in office, vacancies shall not impair the powers of the Board to execute the functions of the Corporation, and two of the members in office shall constitute a quorum.

SEC. 5. Within the limitation of appropriated funds, the Board shall (1) select, appoint, employ, and fix the compensation of such officers, attorneys, experts, employees, and agents as shall be necessary for the transaction of the business of the Corporation, (2) define their authority and duties, (3) delegate to them such of the powers vested in the Corporation as the Board may determine, (4) require bond of such of them as the Board may designate, and (5) fix the penalties and pay the premiums of such bonds.

SEC. 6. (a) The Board may appoint from time to time (1) an advisory committee, consisting of not more than five members experienced in the writing of insurance against property loss, to advise the Corporation with respect to the execution of its functions pursuant to this act, and (2) such part-time consultants and advisory personnel as the Board may deem necessary in carrying out the functions of the Corporation. Persons so appointed who, while so serving, hold other offices or positions under the United States shall receive no additional compensation for such service. Other persons so appointed shall receive (1) while actually so employed, such compensation, not in excess of $50 per diem, as may be determined by the Board, and (2) actual necessary traveling and subsistence expenses, or a per diem allowance in lieu thereof.

(b) Service of an individual under this section shall not be deemed subject to the provisions of section 281 or 283 of the United States Code, unless the conduct made unlawful by such section is performed with respect to a matter in which the Corporation is directly involved.

GENERAL POWERS

SEC. 7. The Corporation—

(a) shall have succession in its corporate name until dissolved by or pursuant to an act of Congress;

(b) may adopt, alter and use a corporate seal which shall be judicially noticed;

(c) may adopt, amend, and repeal bylaws, rules and regulations for the conduct of its business and the exercise of the powers granted to it by law;

(d) may make contracts and purchase, lease, hold, and dispose of such real and personal property as may be necessary and incident to the conduct of its business;

(e) may sue and be sued in its corporate name in any State or Federal court of competent jurisdiction;

(f) may conduct or cause to be conducted such researches, surveys, and investigations as may be determined by the Board to be necessary and incident to the performance of its functions or the exercise of its powers;

(g) with the consent of any board, commission, independent establishment, or executive department of the Government, including any field service thereof, or of any wholly-owned or mixed-ownership Government corporation, may avail itself of the use of information, services, facilities, officers, and employees thereof in carrying out the provisions of this act;

(h) may receive from or exchange with any State insurance commission or agency or with any private corporation or association engaged in the writing of insurance against property loss within the United States such loss experience information as may be necessary to the establishment of premium rates for reinsurance authorized to be issued by the Corporation upon a sound actuarial basis and upon the lowest practicable level;

(i) shall be entitled to the free use of the United States mails in the same manner as the other executive agencies of the Government; and

(j) may exercise, by the Board of duly authorized officers or agents of the Corporation, all powers specifically granted by the provisions of this act and such incidental powers as are necessary to carry out the functions and powers of the Corporation.

FUNCTIONS OF CORPORATION

SEC. 8. (a) The Corporation is authorized to provide such reinsurance of insurance companies against loss on account of insurance carried by such companies against damage to, or loss of, real or personal property (including property owned by State or local governments) due to flood, tidal wave, earthquake, or hurricane, occurring within the United States or its Territories, as may be necessary to enable such companies to provide insurance against such damage or loss where it would otherwise be unavailable.

(b) The Corporation shall prescribe premium rates for the reinsurance authorized by this act upon consideration of (1) the risks involved, and (2) the desirability in the public interest of providing insurance protection which would not otherwise be available.

(c) The Corporation shall by regulation provide for the determination of (1) the types of property with respect to which reinsurance will be granted, (2) the nature and limits of losses or damage which may be covered by such reinsurance, (3) such other matters as may be necessary to carry out the purposes of this act.

(d) Reinsurance shall be provided by the Corporation under this act only to the extent that it is not otherwise available at reasonable rates and upon reasonable conditions from private sources. In providing such reinsurance, the Commission shall utilize the facilities and services of private insurance companies to the maximum extent practicable.

PAYMENT OF CLAIMS

SEC. 9. Under such regulations as the Corporation may prescribe, it shall adjust and pay valid claims for losses covered by reinsurance under this act. Upon disallowance by the Corporation of any such claim, the claimant, within 1 year after the date of mailing of notice of disallowance by the Corporation, may institute an action on such claim in the United States district court for the district in which the insured property or the major part thereof shall have been situated. Exclusive jurisdiction is hereby conferred upon such court to hear and determine such action without regard to the amount in controversy.

NATIONAL DISASTER INSURANCE FUND

SEC 10. (a) There is hereby established in the Treasury of the United States a permanent trust fund to be known as the national disaster insurance fund (referred to hereinafter as the "fund"). All premiums paid to the Corporation for reinsurance under this act shall be deposited and covered into the Treasury to the credit of the fund, which, together with interest earned thereon, shall be available for the payment of liabilities under such reinsurance. Payments from the fund shall be made upon and in accordance with awards by the Corporation.

(b) The Corporation is authorized to set aside out of the fund such reserve amounts as may be required under accepted actuarial principles to meet all liabilities under such insurance. The Secretary of the Treasury is authorized to invest or reinvest all or any part of the remainder thereof in interest-bearing obligations of the Government of the United States, or in obligations guaranteed as to principal and interest by such Government, and to sell such obligations for the purposes of such fund.

(c) Administrative expenses of the Corporation shall not be paid from the fund, but shall be borne by the Government of the United States. There is hereby authorized to be appropriated to the Corporation, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary for the administration and operation of the Corporation.

ANNUAL REPORT

SEC. 11. The Corporation shall make a comprehensive annual report of its operations to the Congress as soon as practicable after the first day January in each year.

EXEMPTION FROM TAXATION

SEC. 12. The Corporation, including its franchise, capital, reserves and surplus, and its income and property, shall be exempt from all taaxtion now or hereafter imposed by the Government of the United States, any Territory, dependency, or possession thereof, any State, county, or municipality, or by any other local taxing authority.

MISCELLANEOUS PROVISIONS

SEC. 13. (a) The Board shall designate an agent upon whom service of process may be made in each State, Territory, or jurisdiction in which property upon which the Corporation has issued insurance may be situated.

SEC. 14. Section 101 of the Government Corporation Control Act is amended (a) by striking out "and" immediately preceding the name "Tennessee Valley Associated Cooperatives, Inc.," and (b) by inserting immediately after such name a semicolon and the following: "and National Disaster Insurance Corporation."

[From the CONGRESSIONAL RECORD of September 20, 1951]

NATIONAL DISASTER INSURANCE CORPORATION

Mr. CARLSON. Mr. President on behalf of myself, my colleague the senior Senator from Kansas [Mr. SCHOEPPEL], and the Senator from Missouri [Mr. KEM], I ask unanimous consent to introduce for appropriate reference a bill to establish a National Disaster Insurance Corporation, and for other purposes.

There being no objection, the bill (S. 2148) to establish a National Disaster Insurance Corporation, and for other purposes, introduced by Mr. Carlson (for himself, Mr. Schoeppel, and Mr. Kem), was read twice by its title and referred to the Committee on Banking and Currency.

Mr. CARLSON. Mr. President, the most destructive flood in the history of the United States occurred during the month of July 1951. The total damage in the States of Kansas, Missouri, and Oklahoma has been estimated to be as much as $2,500,000,000, to have displaced some 350,000 persons, to have been five times more damaging than the great Ohio-Mississippi flood of 1937, and to have ravaged an estimated 5,500,000 acres of the most fertile farmland in America.

I mention this only as a reminder that while many suggestions and words of sympathy have been received, along with considerable financial support, there still are many things to be done for the future protection and welfare of our people so as to assure them of more speedy aid and assistance should any such disaster strike our Nation again.

As is true in so many instances, a cure or remedy is never found or initiated until after disaster strikes.

As I stated on the floor of the Senate, August 13, 1951, and as the President stated in his message on August 20, 1951, we must take steps toward providing some type of insurance program for future protection.

I have prepared a bill which is being jointly sponsored by my colleagues, Mr. SCHOEPPEL,

of Kansas, and Mr. Kem, of Missouri, which I call the National Disaster Insurance Corporation Act of 1951.

The purpose of this act is to promote the national welfare by alleviating the widespread economic disaster suffered from time to time within the United States from certain national disasters, and the attendant impairment of the free flow of interstate and foreign trade in commerce by providing through a program of reinsurance of insurance companies for reasonable cost insurance against property loss or damage caused by flood, tidal wave, earthquake, or hurricane, these being fields not readily covered by private insurance companies.

It is my thought that the Corporation will take over or reinsure only that portion of the risk above which private insurance companies do not feel they can safely provide.

There are many problems, and will be many more, involved in the committee and on the floor before this bill can expect final consideration. As you will note, I have set up a capital stock subscription of considerable less than the estimated cost of the recent floods in Kansas. I speak of only the floods as it pertains to this insurance bill, mainly because it is most vivid in the minds of all of us. However, I do not want you to lose sight of the fact that this bill, as I mentioned before, provided reinsurance for damage caused by flood, tidal wave, earthquake, or hurricane. If the losses should exceed the figures established as the capital stock subscription, I do wish to point out that this is merely an arbitrary figure arrived at by myself and one which naturally Congress can amend from time to time, depending upon the need.

It is my thought or intent that the appropriated funds, that is, the capital stock subscription, together with premium receipts, should make up the fund from which the corporation's proportionate share of losses should be paid.

In the recent flood disaster in the Middle West, it was estimated that some twenty-five to fifty million dollars of the loss, which is an infinitesimal part of the total, is all that was covered by insurance. Such an insurance program as I offer today will be of great assistance in establishing a more firm economic basis for all businesses and individuals located within the danger zones and should be within the cost range of all.

IMPERATIVE NEED FOR A PRACTICAL PROGRAM OF FEDERAL DISASTER INSURANCE

First. The provident individual or business firm cannot now purchase insurance protection to provide compensation for flood or disaster damage.

Second. The economy of devastated regions may be seriously handicapped because of the reluctance of individuals and corporations to make more than minimum investments in presently developed industrial districts located in river-bottom areas unless disaster-damage insurance can be made available at reasonable rates.

Third. A glance at the atlas will show that important inland cities are located on rivers or lakes because of the ease of rail, river, and road traffic, as well as need for power generation, making it all the more important that an insurance program be set up for their protection.

POSSIBILITIES OF DISASTER-INSURANCE PROGRAM THROUGH THE PRIVATE INSURANCE INDUSTRY

First. Sound insurance practices dictate that any plan be based on some method of spreading the disaster risks widely enough so that a moderate rate will be sufficient to provide the funds necessary to cover the major concentrated losses which will occur from time to time.

Second. The possibility has been suggested that disaster damage might be included in the extended coverage endorsement now added to fire insurance policies which cover the added hazards of hail, windstorms, tornadoes, falling buildings, and so forth.

Third. Past attempts to secure action on the part of the private insurance industry with relation to providing disaster-damage protection have been unsuccessful, we must succeed.

SUGGESTIONS FOR ESTABLISHMENT OF A FEDERAL DISASTER INSURANCE CORPORATION

First. Any Federal disaster-insurance program established can and, I believe, should be based on a partnership with the private insurance industry and not be in direct competition with the insurance industry. The Federal program should in no way duplicate the performance of functions with respect to disaster-damage insurance which can be better performed by utilizing the staff and records of the private insurance carriers of the Nation.

(a) The actual sale of disaster-insurance policies or endorsements to other types of insurance policies, such as fire, should be handled by insurance agents who are supplying other types of insurance to the customers.

(b) I recommend that the Federal Corporation be created to handle the Disaster Insurance Act as a reinsurance or underwriting agency only.

(c) I recommend that the adjustment of claims arising from insured disaster damage be handled by the regular claim-adjusting organizations and procedures of the insurance companies, subject to appropriate regulations to protect the interest of the Corporation.

(d) I recommend that the disaster-insurance underwriting agency be authorized to establish sound limitations to be incorporated in the damage policies. It is anticipated that various limitations, including some of the following, should be considered:

First. A minimum claim limit should be established of not less than $100 or possibly a minimum as high as $300 or $500 on losses that will be covered.

Second. Clear definition must be made of what damage will be considered to constitute disaster damage.

Third. It may be desirable to limit insurance of contents and any movable fixtures to a coinsurance maximum of 75 or 80 percent so that the property owner will have strong incentive to make every effort to remove such items in danger when warned by the Federal and State agencies of the possibility of flood damage.

PROVISION OF RETROACTIVE INSURANCE COVERAGE ON A LIMITED BASIS

I doubt the advisability of retroactive insurance. However, if the Congress should feel these obligations should be assumed in this manner, then many new problems will arise which will quite materially slow down the ultimate acceptance of this bill. My thought would be that if the Congress feels that we can assume even a portion of the past costs of disaster, and I strongly favor this, then I feel that it should be done through direct grants rather than by retroactive insurance.

Mr. LEHMAN. Mr. President, I may state to the Senator from Kansas that I have been deeply interested in his remarks. As acting chairman of the Banking and Currency Committee, which held hearings in nine different places in the country, in connection with which my esteemed colleague from Connecticut [Mr. BUSH] was active and very, very helpful and useful, I wish to say that I do not believe there is anything more important than agreement on a pattern of legislation which will make it possible for people to obtain insurance at reasonable rates to protect themselves against damages from floods and other natural disasters. I am pleased, as was the Senator from Kansas, to read the expression of interest in the President's message. I look forward to receiving his specific recommendations at an early date.

We have sought them for 3 months and have not yet received them. I am looking forward to the specific recommendations to be made by the President as he has promised in his message.

I assure the Senator from Kansas that the Banking and Currency Committee will take action on whatever recommendations may be made by the Senator from Connecticut or by any other Senator as promptly as may be possible.

Mr. CARLSON. Mr. President, I wish to commend the Senator from New York for his promise to take early action on this particular proposed legislation. In view of the recurrence of such disasters from time to time, I think it is a program which requires study; and I earnestly hope the study will be promptly made and will be fruitful of results.

Mr. CASE of South Dakota. Mr. President, I wish to join in the statement made by the Senator from Kansas. The Senator from Connecticut [Mr. BUSH] has certainly been tremendously concerned in the problem. I have seen evidence of his activity in the Committee on Public Works, and I am sure there will be considerable support for his proposal.

STATEMENT BY SENATOR MORSE ON THE STATE OF THE UNION MESSAGE

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a brief statement I have released on the state of the Union message.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The state of the Union message presents a view of the world and domestic problems through rose-colored glasses.

Claims are made for the achievements of the administration's foreign policy that do not accord with the facts. The interests of the free world in recent months have suffered many unnecessary setbacks. In the Middle East, in the Far East, at the United Nations, and in Europe the Communists have won great gains abetted by fumbles by our State Department.

The President's state of the Union message merely promises more of the same. What is needed is a policy of vision and vigor to win free peoples to the way of freedom by aggressive aid and loans and anticolonialism. In years past this administration claimed it had taken the initiative in world affairs. If it ever had it, it has most certainly lost it.

DOMESTIC AFFAIRS

The message tips the administration's hat to each of the major domestic problems we face. It expresses great "faith," but is regrettably deficient in "works."

There is little hope that this administration will improve on its dismal performance in the field of flood control and power development. Immediately after a year of tragic floods the administration continues its give-away partnership proposals and promises no more than continued disaster aid when what

is needed is a large-scale program of flood control and associated power development to prevent repetition of disasters.

The tax proposals in the message achieve a look of fairness. They come after a record Republican tax giveaway to big business by the 1954 Republican tax law. The shocking fact is that 77 percent of the Republican tax reduction, about which the President boasts, went to large corporations and individuals earning over $5,000 a year. The bulk of individual relief was concentrated in the higher brackets. The millions of low income families in America have not received the tax relief to which they are entitled. I am confident that the Democrats in Congress will make every effort to remedy some of those tax giveaways and substitute tax relief for low and middle income families.

The administration has been under heavy pressure to reverse its shortsighted policies on aid to education, highway construction, medical aid and research. This message does no more, however, than comment that these are problems. Indeed, they are pressing problems which the administration has increased by inaction and opposition to Democratic proposals.

The message promises much. This administration has yet to demonstrate that it will do anything but continue its programs of big-business-banking favoritism, while the general public interest receives lip service.

PROPOSED NATURAL GAS LEGISLATION

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an editorial entitled "Majority Leader's Leadership," which was published in the Washington Post and Times Herald of today. The editorial comments on the Harris-Fulbright bill in reference to the parliamentary procedure the editors of the Post seem to think the majority leader should adopt in respect to the bill. Apparently the editors of the Post think the bill should be pigeonholed.

In commenting on the Washington Post editorial, I wish to make this brief observation: As a liberal, I believe in the democratic process in the Senate of the United States. As a liberal, I wish to make it clear that I am opposed to bottling up legislation. There may be a prolonged debate on the Harris-Fulbright bill, but I say let us get on with it, because the people of the United States are entitled to have the Senate vote on this proposed legislation.

The bill has passed the House of Representatives. It has been reported to the Senate by the Committee on Interstate and Foreign Commerce by a vote of 11 to 4. In my judgment, we ought to dispose of the bill at an early date in this session of the Senate. I am opposed to any attempt to prevent this bill coming to a vote after a full and fair debate. It has been on the calendar for months. From a parliamentary-procedure standpoint it is ready for debate. Let us have it.

I shall fight the bill. I wish to make it very clear, as one who from time to time has engaged in filibusters in the Senate, and shall again in the future, that I never engage in a filibuster which seeks to prevent a vote from ever occurring on proposed legislation. I shall never hesitate to engage in prolonged debate on any highly controversial bill whenever I think it is necessary to inform the Senate about the merits of the bill or it is necessary to arouse the people of the country to an understanding of what is involved in a bill. Such a filibuster, if anyone wants to call it that, is always justified. Sometimes it is necessary to stop parliamentary steamrollers such as we faced with the administration's executive pay bill. But after a bill has been thoroughly debated or a steamroller has been blocked, then further prolonged debate cannot be justified. When that point is reached we ought to vote in the Senate on the proposed legislation. We should vote in the Senate on the Harris-Fulbright bill after it is thoroughly debated. I see no need for any filibuster in connection with the bill in light of the present parliamentary situation.

As a liberal, I wish to go on record in the Senate today as being against any parliamentary maneuver which seeks to bottle up the Harris-Fulbright bill, the Washington Post editorial to the contrary notwithstanding.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

MAJORITY LEADER'S LEADERSHIP

The hearty welcome extended to Senator LYNDON JOHNSON by the Vice President and by his Senate colleagues is warmly seconded by the Senator's many friends in Washington. His encouraging recovery from his heart attack is gratifying to Americans of all political persuasions who are concerned with effective action by Congress. As majority leader, Senator JOHNSON has demonstrated a fine understanding of the rights of the minority and a desire to subordinate partisan considerations to the national good. Few men could have come nearer meeting the requirements which these times have demanded of a Senate leader who is not a member of the President's party. In this sense he has occupied a unique position in relation to the administration and has won the respect of members of both parties.

We speak of the Senator's unique position as a conciliator not unmindful of a serious challenge to it. He is under strong pressure to bring up at the beginning of the session the Harris-Fulbright natural gas bill, designed to overturn a Supreme Court decision asserting the right of the Federal Power Commission to fix natural-gas prices at the wellhead. There is powerful and growing opposition to this measure not only in the Senate but on the part of natural-gas distributors and communities dependent upon gas as a fuel. It would be a mistake, at this time particularly, to try to force this measure through the Senate.

There are enough urgent measures before the Senate to occupy its full attention during this election year, when the session will be somewhat shorter than usual because of the desire to adjourn before the political conventions. Debate on the natural gas bill could last for weeks and engender much bitterness. Senator JOHNSON'S party particularly would suffer from such a divisive debate because of the threat of a civil-rights amendment as a countermeasure and the danger of a civil-rights filibuster. The disruption which such debate in all probability would cause at the outset could mar the whole performance of Congress and seriously blight the prospect of a productive session.

Mr. HUMPHREY. Mr. President, I was very much interested in what the senior Senator from Oregon [Mr. MORSE] said with reference to the so-called Harris-Fulbright bill, the natural gas bill. I have already expressed to the Democratic Policy Committee my view as to this proposed legislation.

I, too, feel that it would be unethical and very sad parliamentary practice to try to stop the consideration of a bill by bottling it up at the discretion of the majority leader, at the discretion of the Policy Committee, or at the discretion of any other group in the Senate. I feel that proposed legislation should be debated on its merits.

I think the Senator from Oregon and, I feel certain, the Senator from Connecticut [Mr. BUSH], also, know that I am opposed to the gas bill. I want to make my record, submit my case, fight the issue out, and then have the bill come to a vote.

I digress to say that I do not condone such tactics as the adding of nongermane legislation or nongermane commitments. I want to make the record quite clear that I do not believe that civil rights measures should be added as amendments to a gas bill. I believe in a civil rights program. I want the Senate to vote on a civil rights program in a civil rights bill. But I would not want to have added any kind of nongermane legislative policy to any bill in order to try to stifle the consideration of the bill or to kill it.

I believe it is wrong to assume that the majority leader, the majority whip, or the minority leader has the right in the Senate to lay down the law and to bottle up legislation. I know that that is not the wish of either the majority leader or the minority leader.

I simply desired to make my own position clear now. If the majority leader could stop this bill from being considered, he could stop some others. I do not want him to stop the natural gas bill or other bills. Let us consider bills on their merits.

FLOOD DAMAGE IN OREGON AND NEIGHBORING STATES

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD at this point, as a part of my remarks, a newsletter which I sent to my constituents under date of December 30, 1955, dealing with the terrible flood disaster which struck our State and our neighboring States within recent weeks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SENATOR MORSE REPORTS

FELLOW OREGONIANS: When those of us in my Washington, D. C., office heard the first radio reports on the terrible recent flood tragedy which struck Oregon and our neighboring States we hoped that the situation was not as serious as reported. I immediately put in telephone calls to the Washington, D. C., press services and to the United States Army engineers and they confirmed the seriousness of the disaster. Further calls to the Washington, D. C., headquarters of the American Red Cross and to the Civilian Defense Office and to the United States Army engineers gave me assurance that everything was being done and would be done to rush relief and assistance to the victims of the disaster.

I have kept in daily contact with Oregonians, all the Federal Government agencies that have disaster-relief jurisdiction, and with the American Red Cross, and I

have transmitted to them whatever information has been made available to my office which we thought might be of assistance to them. High commendation is due our Government agencies and the American Red Cross for the great dispatch with which they have responded to the tragedy. It is thrilling and reassuring to our faith in democracy to see how we Americans always present a united front in the fact of any emergency or great disaster.

I particularly wish to make a plea in this letter for a generous response to the needs of the American Red Cross. Once again it has rushed to the relief of stricken fellow citizens. The ministrations to the suffering of this great humanitarian, voluntary organization deserve the generous support of each one of us who has been spared the suffering and losses of our neighbors in this disastrous flood. We should remember that at almost any time through a change of events and happenstance we may very well find ourselves in a plight calling for Red Cross assistance. In a sense, the Red Cross might be described as the workshop of our people's conscience, or as the citadel of America's humanitarian impulses dedicated to keeping faith with the spiritual teaching that we are our brother's keeper.

Following my request to the Washington, D. C., headquarters of the American Red Cross for information about the flood disaster in Oregon and offering to the Red Cross the services of my Senate office in any way that we might be of assistance, I received the following wire from Mr. Ellsworth Bunker, president of the American National Red Cross:

"Greatly distressed over reports of human suffering and property destruction from floods in your State. Please assure those affected that total Red Cross resources are being made available to provide immediate emergency care and for necessary long-term assistance in rebuilding and repairing homes. CMA giving medical assistance. CMA providing furniture and other necessary items. We are moving in necessary trained disaster staff to assist Red Cross chapters in giving prompt aid to flood victims. Continuing assistance will be given until the job is finished."

I wish to say that, since receiving Mr. Bunker's wire, I have been advised time and time again by people in Oregon that the Red Cross, along with other relief agencies, both governmental and private, has been doing a herculean task of helping the flood victims.

I made the following reply to Mr. Bunker's wire:

"On behalf of the people of my State I want to express to you our deep appreciation and prayerful thanks for the great assistance that the Red Cross is rendering to the people of Oregon and the other areas of the West who are suffering from the terrible storm and flood disaster that has struck. Once again the Red Cross has put into action the humanitarian impulses and spirit of the American people. Please feel free to call upon me if I can be of any assistance in any way to you in the great work you are doing for the people of my State. Regards."

On the same day I wired to the President of the United States as follows:

"Mr. President, I am sure that I speak in behalf of all the people in Oregon in expressing to you our deep appreciation for everything you and the other officials of the administration are doing to help alleviate the terrible storm and flood tragedy that has struck my State of Oregon and the States of California, Washington, Idaho, and Nevada. All of us in Government, irrespective of partisanship, stand unified in carrying out our humanitarian obligations whenever tragedy hits our people. Please call upon me as a soldier in your ranks if I can be of any assistance to you in any way in connection with this serious disaster that has brought suffering to so many people of my State and of the West. I am sure that you will exercise all of the emergency powers you have in connection with this disaster and I am confident that Congress, when it reconvenes, will back you up in providing any supplemental appropriations that you need for your Presidential emergency funds. Respectfully * * *."

As you probably read in the press, immediately after the disaster struck the President issued instructions to Government agencies with disaster-relief powers to provide whatever help it was within their jurisdiction to make available in bringing relief to the stricken area. He certainly was justified in issuing such a blanket authorization because, as I pointed out in my wire to him, the Congress would never hesitate to appropriate whatever funds are necessary to carry out the purposes and intent of disaster-relief legislation.

On December 27 I received several reports from the Oakridge-Willamette City region from responsible citizens who feared another disaster in that area if a sudden thaw should come or heavy rains should start again. After doing some double checking on these reports in the Oakridge area with the Army engineers and after making several calls to Eugene, I was advised that the waters were receding and that the Oakridge-Willamette City area was out of immediate danger, subject, of course, to renewed danger if there should be a sudden change in the weather of the type feared by the Oakridge citizens who had appealed to me.

In view of the fact that, under existing law, a request for disaster relief from a Federal agency must come in the first instance from the State government, I felt that the Governor would appreciate my communicating to him the reports I had received from the Oakridge-Willamette City area. Therefore, I sent the Governor the following wire:

"Responsible leaders of Oakridge and Willamette City have called me several times today urging that emergency steps be taken to build temporary levees along the river in the Oakridge-Willamette City area to prevent threatened flood danger in case warm spell sets in creating sudden thaw or in case heavy rains start again. They represent to me that Army engineers and Civilian Defense personnel working in area are satisfied that temporary levees would be wise precaution. However, before taking matter up with you, I have checked with Army engineers and Civilian Defense offices here in Washington, D. C., and Army engineers have advised me that they think immediate danger has passed in Oregon flood areas, but they recognize that sudden thaw or return of several days of heavy rain might very well create serious situation which Oakridge-Willamette City spokesmen fear. Army engineers office advised me that under Public Law 99 they have authority to build temporary levees if requested by State government officials. I know you will appreciate my reporting to you requests which have been made of me by Oakridge-Williamette City spokesmen. I would appreciate it if you would have appropriate State officials look into this situation at once and advise you as to whether or not it would be a sound safety-first measure to call upon Army engineers to build some temporary levees in Oakridge-Willamette City area. Please be assured that if there is any assistance that I can render to your office in connection with the flood emergency which has struck our State, you need only ask for it. Regards."

The Governor replied:

"I have your wire on the Oakridge-Willamette City situation. I had been informed of this situation just today and have arranged for two Army engineers, two civil defense officials, and a highway engineer to inspect the levee tomorrow and report to me their findings. Will act in accordance with their recommendation as to what the situation requires. Appreciate your interest and will contact you on any matters where it is possible for you to assist in alleviating the suffering and repairing the damage caused by the current disaster. Regards."

I have made the foregoing report on the activities of my Senate office in connection with the Oregon flood disaster, because I am sure that the people in our State would appreciate the fact that public officials, irrespective of party, can always be counted upon to work together for the common good in any hour of emergency.

Out of this great disaster with its resultant suffering, loss of life, and property damage comes a signal lesson to all of us. This awful disaster proved that in those parts of the State where we have made considerable progress with flood-control projects, great protection was afforded our people. If we had not been prevented by shortsighted opposition from moving faster with river basin development, including very much needed flood-control projects for which many of us have been working so hard, the loss from this flood in human and material values would have been much, much less. Such a flood-control program as many of us have been fighting for, is completely justified from the standpoint of protecting human lives and preventing human suffering. However, if anyone wants to be materialistically minded about it, such a comprehensive flood-control program as we have been urging is bound to pay for itself in dollars and cents, as evidenced by the great economic losses of the present flood disaster.

No argument of governmental economy can justify a failure in our generation to take whatever flood-control safety measures are necessary to prevent such irreparable losses. This is not a matter of economy. This is not a matter of politics. This is a matter of just plain commonsense.

It is my prayer that in this next session of Congress commonsense will prevail and Members of Congress, irrespective of party, will proceed to appropriate funds for flood-control projects, combined wherever possible with power-development projects, anywhere in the country where the facts show they are needed. It is a proposal for a sound capital investment in the general welfare of our people.

You may be sure that I shall do everything that I can to help along a very much needed national flood-control program. If we have $56 million available as a United States contribution to a single dam in Egypt, we should make many more millions of dollars available to try to prevent a repetition of the great losses which were suffered by fellow American citizens in the East a few months ago, by other fellow Americans in the Mississippi Valley but a short time ago, and now by many of our fellow citizens in Oregon and other Western States.

Sincerely,

WAYNE MORSE.

Mr. MORSE. Mr. President, I wish particularly to invite attention to the closing part of the letter, which reads as follows:

Out of this great disaster with its resultant suffering, loss of life, and property damage comes a signal lesson to all of us. This awful disaster proved that in those parts of the State where we have made considerable progress with flood-control projects great protection was afforded our people. If we had not been prevented by short-sighted opposition from moving faster with river-basin development, including very much needed flood-control projects for which many of us have been working so hard, the loss from this flood in human and material values would have been much, much less. Such a flood-control program as many of us have been fighting for is completely justified from the standpoint of protecting human lives and preventing human suffering. However, if anyone wants to be materialistically minded

about it, such a comprehensive flood-control program as we have been urging is bound to pay for itself in dollars and cents, as evidenced by the great economic losses of the present flood disaster.

No argument of governmental economy can justify a failure in our generation to take whatever flood control safety measures as are necessary to prevent such irreparable losses. This is not a matter of economy. This is not a matter of politics. This is a matter of just plain commonsense.

It is my prayer that in this next session of Congress commonsense will prevail and Members of Congress, irrespective of party, will proceed to appropriate funds for flood-control projects, combined wherever possible with power-development projects, anywhere in the country where the facts show they are needed. It is a proposal for a sound capital investment in the general welfare of our people.

You may be sure that I shall do everything that I can to help along a very much needed national flood-control program. If we have $56 million available as a United States contribution to a single dam in Egypt, we should make many more millions of dollars available to try to prevent a repetition of the great losses which were suffered by fellow American citizens in the East a few months ago, by other fellow Americans in the Mississippi Valley but a short time ago, and now by many of our fellow citizens in Oregon and other Western States.

FLOOD DISASTER RELIEF LEGISLATION

Mr. BUSH. Mr. President, I ask unanimous consent that I may speak for about 10 minutes beyond the 2-minute limitation under the rule, in order to comment on several bills I desire to introduce.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from Connecticut may proceed.

Mr. BUSH. Mr. President, during the past year, the United States suffered the worst flood disasters in her entire history. The damages were as severe as those of war. Raging floodwaters, roaring down river channels with terrifying force, inflicted losses comparable to those which might result should a fleet of enemy bombers repeatedly penetrate our defenses and let loose a deadly rain of bombs.

Congress must come to grips at once with the problems arising from these catastrophes. One of the urgent needs is a sound, workable program of flood indemnity and reinsurance providing protection against losses—a program made available at a cost people can afford.

I am introducing in the Senate today in cooperation with my distinguished colleague [Mr. PURTELL] and other Senators, the so-called administration bill intended to provide such a program. It offers a sound base from which to start.

Mr. President, I send to the desk a bill entitled "National Flood Indemnity Act of 1956," and request that it be appropriately referred.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2862) to provide for a national flood indemnity and reinsurance program, and for other purposes, introduced by Mr. BUSH (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Banking and Currency.

Mr. BUSH. Mr. President, I ask unanimous consent that a statement describing the bill, together with a sectional analysis and the text of the bill itself, be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit A.)

Mr. BUSH. Mr. President, I am also introducing today a series of nine other measures arising from the flood disasters. In all or some of these measures, I am joined in sponsorship by my distinguished colleague from Connecticut [Mr. PURTELL] and other Members of the Senate.

I send these measures to the desk, Mr. President, and ask that they be appropriately referred.

I ask as to all these measures, unanimous consent to add the names of Senators for sponsorship through the close of business on Monday of next week.

The PRESIDING OFFICER. The bills will be received and appropriately referred; and without objection, the unanimous-consent request of the Senator from Connecticut is agreed to.

The bills, introduced by Mr. BUSH (for himself and other Senators), were received, read twice by their titles, and referred, as indicated:

To the Committee on Banking and Currency:

S. 2854. A bill to amend the National Housing Act, as amended;

S. 2855. A bill to provide authority to stockpile temporary housing for disaster relief, and for other purposes;

S. 2856. A bill to increase the amount of appropriations authorized for disaster loans, and for other purposes;

S. 2857. A bill to provide for Federal procurement of materials and supplies in major disaster areas, and for other purposes;

S. 2858. A bill to amend the Small Business Act of 1953; and

S. 2859. A bill to provide rent-free accommodations in certain federally aided housing for needy victims of major disasters, and for other purposes.

To the Committee on Public Works:

S. J. Res. 106. Joint resolution to establish a Northeastern United States Watershed Development and Flood Protection Commission.

S. 2860. A bill to authorize the construction of additional flood control reservoirs in the Connecticut River Basin; and

S. 2861. A bill to authorize an increase of emergency relief highway funds from $10 million to $30 million for the fiscal year ending June 30, 1956.

Mr. BUSH. Mr. President, I ask unanimous consent that brief descriptions of these bills be printed at this point in the RECORD, and that the text, together with certain explanatory material relating to some of the bills, be printed at the conclusion of these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(For the texts, see exhibit B.)

The descriptions are as follows:

FLOOD CONTROL AND DISASTER RELIEF BILLS

1. To establish a Northeastern United States Watershed Development and Flood Protection Commission. The primary purpose of the proposed bipartisan Commission would be to integrate the work in this field carried on by diverse governmental agencies, and to serve as a gadfly to stimulate action. The resolution contains a specific stipulation that "nothing in this act shall be construed so as to delay the prosecution of any flood control or related projects recommended by the Corps of Engineers, Department of the Army, and authorized by the Congress, or of any flood control projects now or hereafter undertaken under the authority of the Watershed Protection and Flood Prevention Act of 1954."

2. To authorize the construction of additional flood control reservoirs in the Connecticut River Basin. These are Cold River, New Hampshire, and Littleville, Massachusetts, the only two in the plan recommended by the Corps of Engineers before the New England floods which lack authorization. Additional authorizations may become necessary as a result of the restudy requested by resolution of the Senate Public Works Committee, dated September 14, 1955. It is hoped that recommendations of the Corps of Engineers based on that restudy will be forthcoming early in the present session.

3. To increase the maximum term of disaster loans to business to 20 years, provide a maximum interest rate of 3 percent on such loans, and to strengthen sections of existing law relating to Government procurement from small business in disaster situations.

4. To remove the $25 million limit in present law on the total amount of outstanding catastrophe loans by the Small Business Administration.

5. To provide for Federal procurement of materials and supplies in major disaster areas, and for other purposes.

6. To provide rent-free accommodations in certain federally aided housing for needy victims of major disasters, and for other purposes.

7. To authorize a stockpile of demountable housing for use in disaster areas.

8. To increase from $7,000 to $12,000, the limit on FHA–100 percent guaranteed loans for repair or restoration of flood-damaged or destroyed homes.

9. To authorize an increase in emergency relief highway funds from $10 million to $30 million for the fiscal year ending June 30, 1956.

Mr. BUSH. Mr. President, I also introduce for appropriate reference a companion bill to that introduced this week by the majority leader of the House, Mr. MCCORMACK, to authorize the construction of flood-protection measures, with particular reference to areas where severe damages have recently occurred as the result of extreme rainfall accompanying hurricane storms.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2853) to authorize the construction of flood protection measures, with particular reference to areas where severe damages have recently occurred as the result of extreme rainfall accompanying hurricane storms, introduced by Mr. BUSH, was received, read twice by its title, and referred to the Committee on Public Works.

Mr. BUSH. Mr. President, other legislative action will be required which must originate in the House of Representatives. I refer, of course, to tax relief for flood victims, and to appropriations for flood and hurricane protection. Ample funds, just as much as can be spent without waste in the remainder of this fiscal year, in fiscal 1957, and in every succeeding year until completion, must be provided for protection against

inland flooding in New England, for acceleration of the hurricane survey authorized by the Bush Act—Public Law 71—to find methods of protection against coastal flooding, and for continued improvement in hurricane and flood warning services. It is my hope that early and effective action will be taken in the House, so that these matters can soon be acted upon by the Senate.

Mr. President, so far as the people of Connecticut and New England are concerned, there will be no more important domestic issues before this Congress than those arising from the flood disasters which have so sorely afflicted us and our sister States. The Congress must live up to its responsibilities to provide the protection and relief so urgently needed.

I have compared the flood damages to the damages resulting from war. Lest anyone think I exaggerate, I call as my witness Brig. Gen. Robert J. Fleming, Jr., New England division engineer for the Corps of Engineers, who, incidentally, has been outstanding this year in what he has done. He has been a great friend of the State of Connecticut and other stricken States. I do not know what we would have done without General Fleming.

Testifying at hearings of the Banking and Currency Committee at Providence, R. I., on November 10, 1955, General Fleming said:

> I was the deputy chief of staff of an Army corps in Europe which was given the job of mopping up the Ruhr, in the Ruhr pocket, after the surrender of that German Army group, and one of our jobs, of course, was to restore essential public facilities. Outside of the piles of rubble which were left around on the streets from the bombing of the buildings, the damage which this storm did in New England in 2 days to public facilities is just as great as we did by 3 years of bombing in the Ruhr. It is almost indescribable.

It is possible that so far as some areas were concerned, General Fleming understated the effects. There was rubble in abundance when the flood waters had passed. The entire Main street of Winsted, Conn., large sections of Torrington, Putnam, Waterbury, Ansonia, Naugatuck, and other communities in my State looked as if they had been smashed by block-busters.

Connecticut had the unhappy distinction of suffering the worst losses, in lives, in property, and in terms of human suffering, in the floods of August and October, 1955, which so cruelly afflicted the Northeast. More recently, California, Oregon, and Nevada experienced similar disasters, and earlier in the year, to lesser extent, New Mexico and other States felt the damaging effects of floods.

I know I speak for the people of Connecticut in extending heartfelt sympathy to our sister States who suffered major disasters, to the people of the West who even now are barely recovering from catastrophe, and to the Senators from those flood-affected Western States and from other States exposed to flood hazards, I pledge my cooperation in seeking the maximum amount of protection within human power against a recurrence of these terrible disasters. Some of them can be prevented if Congress acts wisely; the effects of all can be minimized if we enact sound programs, backed by necessary appropriations, in flood control, in flood indemnity and reinsurance and other fields of legislation.

It may be months before we can know the full toll taken by the flood disasters of 1955. On the west coast, the losses are just beginning to be tallied. Preliminary totals show a loss of at least 70 lives, and property damages of $150 million.

In the Northeast, more than 200 lives were lost. Still incomplete estimates of property damages range from approximately $500 million to $1,600,000,000, the former figure including only direct damages, the latter including indirect as well.

But cold statistics alone cannot measure the impact of these disasters upon the lives of the people in the river valleys of Connecticut and our stricken sister States. In terms of human suffering and distress, the losses are incalculable. The disruption of family life, and of community life in the immediate post-flood period, can only be fully realized by one who has visited the scenes of destruction and has trudged through the muck and filth left in the wake of the torrents. Those of us with sad experiences of that kind have had them seared indelibly on our souls, and the enduring memory reinforces a determination that Congress must act, and act promptly, in every field within its power to prevent a recurrence.

As we in Connecticut and New England see it, the time has come when the Congress should correct the neglect of the flood protective system for our State and region. In none of the major areas of the United States has the flood-control system recommended by the Corps of Engineers been completed. And New England has lagged far behind the rest. There should be continued progress in all areas, and a greatly accelerated program in New England to enable her to make up lost ground and gain even terms with the other major regions of the Nation.

The cost will not be prohibitive; indeed, when compared with other expenditures, it appears trifling. The Corps of Engineers has estimated that funds totaling approximately $270 million will complete the system of dams, reservoirs and local protective works needed to safeguard the New England States against inland flooding. This is less than the cost of a single dam among the series of great dams in the West and Southwest.

The money spent will be well invested. On a nationwide annual basis, for every dollar invested in flood control, we have received a $3 return in damages prevented. Many of the existing flood control works paid for themselves several times over in the recent floods. For example, the cost of the levees at Hartford and East Hartford, Conn., and Springfield, Mass., was $19 million, and damages prevented in August, 1955, alone totaled $33 million.

We of New England have no hesitancy in asking Congress to give us priority in this time of our urgent need. For many years past, we have contributed more heavily to the Federal Treasury than other regions, and have received but negligible returns.

Dr. Seymour Harris, of Harvard University, testifying in Boston before the Banking and Currency Committee, submitted some illuminating figures.

Referring to the Northeast as "the stepchild of the Treasury," Dr. Harris said that:

> Over a recent period of almost 20 years, the three major industrial States in New England (Massachusetts, Connecticut, and Rhode Island) received back but one-third as much relative to what was paid into the Federal taxes as five major southern industrial States (North Carolina, South Carolina, Georgia, Alabama, and Tennessee). Again, from 1934 to 1943, Massachusetts, Connecticut, and Rhode Island received back 60 cents for every dollar of Federal taxes borne (Connecticut only 40 cents).

In regard to flood control, Dr. Harris noted that—

> New England has in recent years received from flood control outlays about one-fifteenth of what might be expected on the basis of the size of her economy or needs.

He pointed out that New England received only 3 percent of the $10 billion authorized for flood control, and only one-third of 1 percent of the $1.8 billion appropriated in the last 5 years.

With that background, we think it not unreasonable to insist that the Congress give priority and sympathetic understanding to our needs.

And action must be taken just as soon as humanly possible. There is danger of more flood disasters in Connecticut and the other New England States next spring. This is no cry of an alarmist, but comes from a responsible source, General Fleming, the New England division engineer, who warned in November:

> Every pond is full, the ground water table is up, everything is saturated. With a freeze now and a moderate snowfall, then moderate spring rains, the situation will be very dangerous.

Let us make certain that nothing within our power is left undone to reduce the hazard. The Congress must not fail the people of Connecticut and the Northeast.

EXHIBIT A

STATEMENT BY SENATOR BUSH CONCERNING THE BILL ENTITLED "NATIONAL FLOOD INDEMNITY ACT OF 1956"

I am introducing in the Senate today, by request and in cooperation with other Senators, a bill entitled "National Flood Indemnity Act of 1956." This draft seeks to provide a sound, workable program of flood indemnity and reinsurance which the people will be able to purchase at reasonable cost.

Major features of the bill include the following:

1. It provides a 5-year experimental program of flood indemnity and reinsurance conducted by the Federal Government in cooperation with the States and private insurers.

2. The word "flood" is defined to include coastal as well as inland flooding.

3. An individual purchasing an indemnity contract would pay 60 percent of the estimated premium, a participating State 20 percent, and the Federal Government the remaining 20 percent. Additionally, the Federal Government absorbs all administrative costs.

4. Individual indemnity contracts may be issued to a maximum of $250,000. Each would contain a deductible clause—$300 plus 10 percent of the claim.

5. The maximum amount of outstanding indemnity obligations is established at $1,900,000,000 with the President empowered to authorize an additional $1 billion.

6. Reinsurance, to the total amount of $100 million, is provided to enable private insurers to offer types of flood insurance which otherwise would be unavailable.

7. Administration of the program is vested in a Federal Flood Indemnity Administration under the jurisdiction of the Housing and Home Finance Agency.

The flood disasters of this past year which have so cruelly afflicted my own State of Connecticut and other States have demonstrated the urgent need for a flood indemnity and reinsurance program. As the staff study for the Committee on Banking and Currency has pointed out, this is the only kind of natural disaster against which private insurers do not provide protection.

It is essential that the Congress act to fill this gap in the protection needed by the householder, small-business man and manufacturer. Two types of programs, one limiting coverage to floods alone, and the other attempting to blanket in all other types of natural and manmade disasters, and war risks as well, have been under consideration by the Committee on Banking and Currency.

After mature consideration, I have concluded that a program dealing with flood indemnity and reinsurance alone is the soundest and has the best chance of adoption by the Congress and becoming law. If we should overload a bill with coverage against other types of natural disasters not only would we engage in socialistic competition with private enterprise but we also would run the danger of having the entire program fall of its own weight.

So far as war risks are concerned, the best insurance is a strong national defense. The losses involved, should we ever be subjected to an enemy attack of A-bombs and H-bombs, are so vast and incalculable that it would be utterly impracticable to attempt to insure against them. Fortunately, we are now at peace, subject though it be to the fluctuating temperatures of the so-called cold war. Should that peace be broken and we are attacked, the Congress will no doubt consider an indemnification program.

The need for protection against losses caused by floods has been amply demonstrated. So has the inability of private insurers to provide such protection. Let us concentrate our attention on the proven need and enact legislation by which the Federal Government, in partnership with the States and private companies, can meet it.

This is frankly an experimental 5-year program. As such, it contains an overall limitation on outstanding flood indemnity contracts of $1,900,000,000 increasable to $2,900,000,000 within the discretion of the President, and of $100 million on reinsurance. Because of the overall limitation on indemnity contracts, it was necessary to limit coverage to a single individual to $250,000.

This is ample to meet the needs of householder, the butcher, baker, and other small proprietors on Main Street, the farmer and the owners of small manufacturing enterprises. These folks need protection the most. They would be able to buy, at the most reasonable cost within limits of practicality, coverage against flood losses to their homes and other real property, household effects, business inventories, stored agricultural commodities, and other personal property for which protection is not now available.

Although many large corporations suffered heavy losses in the 1955 floods, they are in a better position to withstand them. Many are in a position to act as self-insurers; all are entitled to tax deductions not available to ordinary individuals.

One other point deserves mention. Each indemnity contract would contain a deductible clause—$300 plus 10 percent of the claim. This was provided, not only to eliminate the administrative expense involved in processing small "nuisance" claims, but also to discourage the invitation to disaster which lies in encroachments on river channels and high-water marks, and to encourage individuals situated in hazardous locations to take steps to protect themselves. It is allied with another provision authorizing the Administrator of the program to consult with other Federal, interstate, State, and local agencies on flood-zoning and related matters.

If coupled with an accelerated program of flood and hurricane control, as I earnestly hope it will be, I believe this program will provide substantial protection to the people of my State and other States who now have no way to safeguard themselves against crippling losses.

S. 2862

A bill to provide for an experimental national flood indemnity and reinsurance program and for other purposes

Be it enacted, etc., that this act may be cited as the "National Flood Indemnity Act of 1956."

CONGRESSIONAL FINDINGS AND DECLARATION OF PURPOSE

SEC. 2. The Congress hereby finds and declares that the recurrence of disastrous floods in the United States interferes with the production of goods and furnishing of services, impairs the free flow of interstate and foreign trade and commerce, causes widespread hardship and economic distress, and has a general adverse effect on the Nation's welfare. The Congress hereby further finds and declares that at present there is not generally available to the people of the United States any program through private enterprise which is adequate to provide reimbursement for damage to and loss of property as a result of such floods. It is therefore the purpose of this act to promote the national welfare by (1) making available, in cooperation with the various States, a program of indemnities with respect to certain types of property damaged or lost as a result of floods and (2) making available a program of reinsurance by the Federal Government of private insurers who underwrite certain flood risks.

DEFINITIONS

SEC. 3. As used in this act the term—

(a) "Administrator" means the Housing and Home Finance Administrator;

(b) "Person" means an individual or group of individuals, corporation, partnership, association, or any other organized group of persons, including State and local governments and agencies thereof;

(c) "Real property" means land, interests in land, and improvements on land which are permanently affixed to the land;

(d) "Insurable interest" means any right, title, interest or other property right, legal or equitable, in and to property and any other interest, benefit, or advantage with respect to property which, in the determination of the Administrator, is an insurable interest for the purpose of this act by reason of being of such nature that any loss or destruction of or damage to such property would result in an immediate and direct pecuniary loss to the person having such other interest, benefit, or advantage; and

(e) "United States," when used in a geographical sense, means the several States, the District of Columbia, the Territories of Alaska and Hawaii, the Commonwealth of Puerto Rico and all other territories of the United States.

(f) "State" includes the several States, the District of Columbia, the Territories of Alaska and Hawaii, the Commonwealth of Puerto Rico, and all other Territories of the United States.

TITLE I—INDEMNITIES

SEC. 101. Subject to the provisions of this act and such terms and conditions as the Housing and Home Finance Administrator may prescribe, the Administrator is hereby authorized to issue indemnity contracts obligating the United States to indemnify persons for damage to or loss of real property, business inventories, stored agricultural commodities, household effects, and such other personal property as he may determine, as a result of floods occurring within the limits of the United States. For purposes of this act, the term "flood" shall include rising water caused by tide, wind, or rain and shall have such further meaning as prescribed by regulation of the Administrator.

SEC. 102. Indemnity contracts issued under this act shall be subject to the payment of fees established by the Administrator. Such fees shall be based on consideration of the risks involved and the desirability in the public interest of providing indemnity protection at reasonable cost, and shall be uniform throughout the United States for similar risks: *Provided*, That in establishing such fees the Administrator shall set up estimated rates which would be necessary to provide an adequate reserve to pay all claims for losses over a reasonable period of years: *And provided further*, That no indemnity contract shall be issued for a fee less than 60 percent of such estimated rate, nor unless the State, in which the property covered by the indemnity contract is located, has paid into the Federal flood indemnity fund (hereinafter created), to the extent of such contract, an amount equal to 50 percent of the difference between the fee so charged and the estimated rate. The United States shall pay into such fund an amount equal to the State's contribution, for each indemnity contract issued, appropriations for which are hereby authorized. All administrative expenses of the Federal Government under this act shall be paid from funds appropriated by the Federal Government as authorized in section 304.

SEC. 103. The Administrator shall, by regulation, provide for the determination of (1) the types and location of property with respect to which indemnities shall be provided; (2) the nature and limits of losses or damage which may be covered by such indemnity contracts; (3) the fees, terms and conditions of such indemnity contracts; and (4) such other matters as may be necessary to carry out the purposes of this act. The Administrator may decline any application or risk and may issue from time to time such regulations with respect to the classification, limitation and rejection of risks and such regulations regarding coverage available to joint owners and subsidiary and affiliated corporations as he shall deem appropriate to effectuate the purposes of this act.

SEC. 104. No indemnity shall be provided under this act, (1) to any person without an insurable interest in the property covered; or (2) if insurance covering such property from the risk of floods is obtainable at reasonable rates and upon reasonable conditions from companies authorized to carry on insurance business in any State or if such insurance is provided by any public program.

SEC. 105. No indemnity contract or contracts shall be issued to any person obligating the United States in excess of $250,000 in the aggregate. The approved amount of any claim under an indemnity contract shall be reduced by $300, plus 10 percent of the remainder, or by such larger amount or percentage as may be prescribed in the indemnity contract.

SEC. 106. The aggregate amount of obligations under indemnity contracts outstanding and in force at any one time under this title shall not exceed $1,900,000,000, except that, with the approval of the President, such aggregate amount may be increased by not to exceed $1,000,000,000. Within the limitations herein prescribed, the Administrator shall from time to time determine the aggregate amount of such obligations which may be outstanding and in force under this title, at any one time, in particular geographical areas of the United States, taking into account the needs of persons in such areas for such indemnity protection.

TITLE II—REINSURANCE

SEC. 201. The Administrator is authorized to provide reinsurance of insurance companies, under any plan or plans of reinsurance, as he determines will best effectuate the purpose of this act, against loss on account of insurance issued by such companies against damage to or loss of real or personal property, due to floods occurring within the United States, as may be necessary to enable such companies to provide such insurance where it would otherwise be unavailable.

SEC. 202. The Administrator shall prescribe premium rates for the reinsurance he makes available under authority of this act and the terms and conditions under which, and the areas and subdivisions thereof within which, each rate shall be applicable. All such rates shall be based upon consideration of the risks involved and shall be adequate, in the judgment of the Administrator, to cover all claims for losses under reinsurance agreements over a reasonable period of years. All such rates shall be uniform throughout the United States for similar risks.

SEC. 203. The Administrator may by regulation provide for the determination of (1) the types of property with respect to which reinsurance will be granted, (2) the maximum premium rate permissible to be charged for any policy of insurance reinsured under the provisions of this act, (3) the nature and limits of losses or damage which may be covered by such policies, (4) provisions which must be contained in such policies, and (5) such other matters as may be necessary to carry out the purposes of this title.

SEC. 204. Reinsurance shall be provided by the Administrator under this act only to the extent that it is not otherwise available at reasonable rates and upon reasonable conditions from private sources.

SEC. 205. The aggregate amount of reinsurance outstanding and in force at any one time under this title shall not exceed $100 million.

TITLE III—ADMINISTRATION AND FINANCING

Federal Flood Indemnity Administration

SEC. 301. (a) There is hereby established a Federal Flood Indemnity Administration as a constituent unit in the Housing and Home Finance Agency at the head of which shall be a Commissioner, appointed by the Administrator, who shall be paid at the same basic rate of compensation established for the Commissioners of the other constituents of the Housing and Home Finance Agency.

(b) Section 101 of the Government Corporation Control Act, as amended, is hereby amended by inserting the words "Federal Flood Indemnity Administration," after the words "Federal Housing Administration."

(c) In the performance of, and with respect to, the functions, powers, and duties vested in him by this act, the Administrator, notwithstanding the provisions of any other law, shall maintain an integral set of accounts which shall be audited annually by the General Accounting Office in accordance with the principles and procedures applicable to commercial transactions as provided by the Government Corporation Control Act, as amended, and no other audit shall be required: *Provided*, That such financial transactions of the Administrator as the issuing of indemnity contracts and the making of reinsurance agreements, and vouchers approved by the Administrator in connection with such financial transactions, shall be final and conclusive upon all officers of the Government.

Financing

SEC. 302. To carry out the functions authorized by this act, the Administrator shall establish a Federal flood indemnity fund and a Federal flood reinsurance fund. All indemnity fees and all payments by the Federal Government and by States pursuant to section 102 of this act shall be deposited in the Federal flood indemnity fund. All reinsurance premiums collected under section 202 of this act shall be deposited in the Federal Flood Reinsurance Fund. Moneys in both such funds may be invested in obligations of the United States or in obligations guaranteed as to principal and interest by the United States. Such obligations may be sold and the proceeds reinvested as provided herein if deemed advisable by the Administrator. Income from such investment and proceeds from properties acquired under this act shall be deposited in the respective funds.

SEC. 303. In order to finance activities under this act, the Administrator is authorized to issue to the Secretary of the Treasury, from time to time, notes and other obligations in an amount not exceeding $500 million outstanding at any one time. Such obligations shall be in such forms and denominations, have such maturities, and be subject to such terms and conditions, as may be prescribed by the Administrator with the approval of the Secretary of the Treasury. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States of comparable maturities as of the last day of the month preceding the issuance of such notes or obligations. The Secretary of the Treasury is authorized and directed to purchase any notes and other obligations of the Administrator to be issued hereunder and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under such act, as amended, are extended to include any purchase of such notes and obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this section. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States. Funds borrowed under this section shall be deposited in such proportions as the Administrator deems advisable in the Federal Flood Indemnity Fund and the Federal Flood Reinsurance Fund.

SEC. 304. Moneys in the Federal Flood Indemnity Fund and in the Federal Flood Reinsurance Fund may be used for the following purposes as deemed necessary by the Administrator: (1) to pay from the Federal Flood Indemnity Fund approved claims for losses under indemnity contracts and other expenses incurred under title I of this act, and (2) to pay from the Federal Flood Reinsurance Fund approved claims under reinsurance agreements and other expenses incurred under title II of this act, and (3) to pay to the Secretary of the Treasury sums borrowed from him, with interest, in accordance with the provisions of section 303 of this title: *Provided*, That no administrative expenses of the Federal Government shall be paid from either of such funds. There is hereby authorized to be appropriated such sums as may be necessary for administrative expenses of the Federal Government under this act.

SEC. 305. In the event that the Administrator is unable to pay any valid claim under any indemnity contract or any reinsurance agreement, the Secretary of the Treasury shall pay the amount thereof which is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated.

TITLE IV—GENERAL PROVISIONS

Participation by private companies and public agencies

SEC. 401. The Administrator shall encourage the maximum participation of private companies in providing indemnities and reinsurance under this act. Notwithstanding the provisions of any other law, the Administrator is authorized and directed to utilize the facilities and services of other public agencies or private insurance companies and of established insurance agents and brokers and established insurance adjustment organizations to the maximum extent which he shall deem practicable and consistent with providing such protection at minimum cost and he may arrange and contract for payment of reasonable compensation for such services. The Administrator is hereby authorized to enter into agreements with private companies prescribing their respective rights and obligations and providing for any such company to act as underwriting agent or claim agent or both on behalf of the Administrator.

SEC. 402. The Administrator shall from time to time consult with representatives of the insurance industry and shall make continuing studies and investigations for the purpose of developing methods for expanding the reinsurance program and for facilitating the ultimate assumption of all flood risks by private insurance carriers.

SEC. 403. On or before January 3, 1961, the Administrator shall transmit a report to the President, for submission to the Congress, on the functions, organization, and accomplishments under this act, including information on the extent to which private insurance companies have participated in the indemnity and reinsurance programs established under the act. This report shall contain such recommendations as the Administrator deems appropriate including, however, either (1) a recommendation for such legislation as may be necessary for the termination of the Government programs under this act and an assumption of flood risks by private insurance companies, or (2) an explanation as to why such legislation at that time would not be feasible or desirable.

Payment of claims

SEC. 404. (a) Under such regulations as the Administrator may prescribe he shall adjust, compromise, and pay claims, either directly or through agents, for losses covered by indemnity contracts and reinsurance agreements under this act. No claim shall be approved in an aggregate amount which exceeds the actual cash value of the damaged or lost property or the cost of replacing, repairing, or rebuilding the said property with material of like kind and quality (less depreciation at the time of damage or loss), whichever is lower.

(b) Upon disallowance of any claim or upon refusal of a claimant to accept the amount allowed by the Administrator, the claimant, within 1 year after the date of mailing notice of disallowance or partial disallowance by the Administrator, may institute an action against him on such claim in the United States District Court for any district in which the property covered or a part thereof is situated. The Administrator shall appoint one or more agents within the jurisdiction of each United States district court upon whom service of process can be made in any action instituted under this section. Exclusive jurisdiction is hereby

conferred upon such courts, sitting without juries, to hear and determine such actions without regard to the amount in controversy.

Coordination with other programs

SEC. 405. (a) In carrying out the functions authorized in this act, the Administrator may consult with other agencies of the Federal Government and interstate, State, and local public agencies having responsibilities for land-use and flood control and for flood-zoning and flood-damage prevention in order to assure that the indemnity and reinsurance facilities offered are consistent with the programs of such agencies. Where the program of the Administrator may affect existing or proposed flood-control works under the jurisdiction of agencies of the Federal Government these agencies shall cooperate with the Administrator in coordinating their respective programs. The Secretary of Agriculture and the Administrator shall coordinate the administration of their respective programs relating to flood indemnities, insurance, and reinsurance for agricultural commodities.

(b) The Administrator may receive from, or exchange with, any State insurance commission or agency or any private corporation or association experienced in the problems of indemnities, insurance, or reinsurance, such information as may be helpful in the establishment of indemnity fees and reinsurance premiums and the administration of the programs authorized under the provisions of this act.

Additional powers

SEC. 406. For the purpose of carrying out functions under this act the Administrator may:

(a) sue or be sued;

(b) notwithstanding the provisions of any other law and without regard to sections 3648 and 3709 of the Revised Statutes, as amended (31 U. S. C. 529 and 41 U. S. C. 5) and section 322 of the act of June 30, 1932, 47 Stat. 412, as amended (40 U. S. C. 278a), enter into and perform contracts, leases, cooperative agreements, or other transactions, on such terms as he may deem appropriate, with any agency or instrumentality of the United States, or with any State or agency or political subdivision thereof, or with any person, firm, association, or corporation and consent to modification thereof, and make advance or progress payments in connection therewith;

(c) Notwithstanding the provisions of any other law and without regard to sections 3648 and 3709 of the Revised Statutes, as amended (31 U. S. C. 529 and 41 U. S. C. 5) and section 322 of the act of June 30, 1932, 47 Stat. 412, as amended (40 U. S. C. 278a), by purchase, lease or donation acquire such real and personal property and any interest therein, make advance or progress payments in connection therewith, and hold, use, maintain, insure against loss, sell, lease or otherwise dispose of such real and personal property as the Administrator deems necessary to carry out the purposes of the act;

(d) appoint, pursuant to civil service laws and regulations, such officers, attorneys and employees as may be necessary to carry out the purposes of this act; fix their compensation in accordance with the provisions of the Classification Act of 1949, as amended; define their authority and duties; require bonds from such of them as may be necessary; and delegate to them and authorize successive redelegations by them, of such of the powers vested in him by this act as he may determine;

(e) notwithstanding the numerical limitation in section 505 of the Classification Act of 1949, as amended, the Administrator may establish and place 1 position in grade GS–17, and 2 positions in grade GS–16 in carrying out the functions vested in him by this act, which positions shall be in addition to any positions presently allocated to the Housing and Home Finance Agency under said section 505.

(f) conduct researches, surveys and investigations relating to flood indemnities and reinsurance and assemble data for the purpose of establishing fees and premiums for flood indemnities and reinsurance under this act;

(g) issue such rules and regulations as he deems necessary to carry out the purposes of this act;

(h) exercise all powers specifically granted by the provisions of this act and such incidental powers as are necessary to carry out the purposes of this act.

Exemption of claims from levy

SEC. 407. Claims under any indemnity contract or reinsurance agreement under this act shall not be liable to attachment, levy, garnishment, or any other legal process before payment to the insured, or to deduction on account of the indebtedness of the insured or his estate to the United States except claims of the United States arising under this act.

Reservation of rights in real estate acquired

SEC. 408. The acquisition by the Administrator of any real property pursuant to this act shall not deprive any State or political subdivision thereof of its civil or criminal jurisdiction in and over such property or impair the civil rights under the State or local law of the inhabitants on such property.

Taxation

SEC. 409. Nothing in this act shall be construed to exempt any real property, acquired and held by the Administrator in connection with the payment of any claim under this act, from taxation by any State or political subdivision thereof, to the same extent, according to its value, as other real property is taxed.

Separability of provisions

SEC. 410. If any provision of this act or the application of such provision to any person or circumstances, shall be held invalid, the remainder of the act and the application of such provision to any person or circumstance other than those to which it is held invalid shall not be affected thereby.

SECTION-BY-SECTION ANALYSIS OF NATIONAL FLOOD INDEMNITY REINSURANCE BILL

SECTION 1—SHORT TITLE

This section provides that the act may be cited as the "National Flood Indemnity Act of 1956."

SECTION 2—CONGRESSIONAL FINDINGS AND DECLARATION OF PURPOSE

In this section Congress makes a finding that the recurrence of disastrous floods interferes with production, impairs the flow of commerce and causes widespread economic distress. The Congress further finds that there is not available through private sources any program to provide reimbursement for the losses resulting from such floods. The Congress therefore proposes to promote the general welfare by making available 2 programs—(1) a program of flood indemnities in cooperation with the various States, and (2) a program of reinsurance of private insurers who insure against flood risks.

SECTION 3—DEFINITIONS

This section defines the term "Administrator" to mean the Housing and Home Finance Administrator and the term "person" to mean an individual or group of individuals, corporation, partnership, association, or any other organized group of persons, including State and local governments and agencies thereof. The section also defines the terms "real property," "insurable interest," "United States," and "State" as used in the act.

TITLE I—INDEMNITIES

Section 101

This section authorizes the Administrator to issue indemnity contracts to persons for damage to or loss of real property, business inventories, stored agricultural commodities, household effects, and such other personal property as he may determine, resulting from floods. Floods are to be defined by the Administrator; the term shall include, however, rising water caused by tide, wind, or rain.

Section 102

This section provides for the payment of a fee by the person indemnified. In general, the fees shall be established on consideration not only of the risks involved but also the desirability of providing such protection at reasonable cost. The fees shall be uniform throughout the United States for similar risks.

In establishing fees for indemnity contracts, the Administrator is required to set up a schedule of "estimated rates," for different types of contracts, which would be sufficient to establish an adequate reserve for the payment of claims (but not administrative expenses). The fee charged the person indemnified cannot be less than 60 percent of the "estimated rate." The Administrator may not issue any indemnity contract unless the State in which the property is located has paid into the Federal Flood Indemnity Fund an amount equal to 50 percent of the difference between the fee charged and the "estimated rate." The United States is required to match all State contributions for every indemnity contract issued. Appropriations are authorized for the Federal contributions. This section also provides that all administrative expenses of the Federal Government shall be paid out of funds appropriated by the Federal Government.

Section 103

This section authorizes the Administrator to determine by regulation the types and location of property and the nature and limits of damage or loss which may be covered by indemnity contracts, as well as the fees, terms, and conditions of such contracts. It also authorizes the Administrator to classify, limit, and reject risks and to issue regulations concerning coverage available to joint owners, and subsidiary, and affiliated corporations.

Section 104

This section provides that no indemnity contract shall be provided if (1) the person to be insured does not have an insurable interest in the property; or if (2) similar coverage is obtainable at reasonable rates and upon reasonable conditions from private companies or is obtainable under any other public program.

Section 105

This section provides that the maximum coverage in favor of any one person (as defined in the act), under one or more indemnity contracts, shall be $250,000. Each indemnity contract shall be subject to a coinsurance provision under which the amount of any valid claim would be reduced by $300 plus 10 percent of the remainder of the claim or by such larger amount and/or percentage as the Administrator may determine.

Section 106

This section provides that the liability of the United States under indemnity contracts in force at any one time shall not exceed $1,900 million. The President may increase this amount by not to exceed $1 billion. The Administrator may determine the aggregate amount which may be in force at any time in particular geographical areas.

TITLE II—REINSURANCE

Section 201

This section authorizes the Administrator to reinsure private insurance companies

against loss on account of insurance, issued by such companies against flood risks, covering real or personal property. The Administrator is authorized to select the plan or plans of reinsurance which he believes will best effectuate the purposes of the act. Reinsurance is to be provided only where such insurance would not otherwise be available.

Section 202

This section authorizes the Administrator to prescribe premium rates for reinsurance made available under the act. The premium rates shall be based on the risks involved and must be adequate, in the judgment of the Administrator, to establish a reserve for all losses. No consideration shall be given to administrative expenses in establishing such rates. The rates shall be uniform throughout the United States for similar risks.

Section 203

This section authorizes the Administrator to issue regulations pertaining to reinsurance. He is given specific authority to determine by regulation the terms and conditions of policies of insurance against flood risks, which are to be issued by private companies who are reinsured under the act, including (1) the types of property to be covered, (2) the maximum premium rate to be charged, and (3) the nature and limits of losses to be covered.

Section 204

Under this section the Administrator is prohibited from providing reinsurance when it is available at reasonable rates and upon reasonable terms from private sources.

Section 205

This section provides that reinsurance in force at any one time shall not exceed $100 million.

TITLE III—ADMINISTRATION AND FINANCING

Section 301—Federal Flood Indemnity Administration

Subsection (a) establishes in the Housing and Home Finance Agency a new constituent unit to be known as the Federal Flood Indemnity Administration. The new unit is to be headed by a Commissioner appointed by the Administrator, who is to receive the same rate of compensation as the Commissioners of other constituents of this Agency.

Subsection (b) makes the Federal Flood Indemnity Administration subject to the Government Corporation Control Act, as amended, in the same manner as wholly owned corporations.

Subsection (c) provides that the Administrator, in carrying out his functions under the act, shall maintain an integral set of accounts which shall be audited annually by the General Accounting Office in accordance with the principles and procedures applicable to commercial transactions, as provided by the Government Corporation Control Act, as amended. It provides further that no other audit shall be required. Certain financial transactions of the Administrator such as the issuance of indemnity contracts, and the making of reinsurance agreements, and the approval of vouchers by the Administrator in connection with such financial transactions are made final and conclusive on all officers of the Government.

Section 302—Financing

This section authorizes the Administrator to establish a Federal flood indemnity fund and a Federal flood reinsurance fund. Indemnity fees and State and Federal contributions under section 102 of the act are to be deposited in the Federal flood indemnity fund and reinsurance premiums are to be deposited in the Federal flood reinsurance fund. The Administrator is authorized to invest the moneys in such funds, and the income from these investments, together with the proceeds from any properties acquired under either the indemnity or reinsurance programs, shall be deposited in the respective funds.

Section 303

This section authorizes the Administrator to borrow from the Secretary of the Treasury an amount not exceeding $500 million at any one time, to finance the activities under the act, by the issuance of notes and other obligations. The terms of such obligations are to be prescribed by the Administrator with the approval of the Secretary of the Treasury. Provision is also made for the interest rate on such notes or obligations. Funds borrowed under this subsection are to be deposited in the Federal flood indemnity fund and the Federal flood reinsurance fund in such proportions as the Administrator deems feasible.

Section 304

The Federal Flood Indemnity Fund is to be used to pay approved claims for losses under indemnity contracts as well as other expenses (excluding administrative expenses) incurred under title I of the act. The Federal Flood Reinsurance Fund is to be used to pay approved claims under reinsurance agreements and other expenses (excluding administrative expenses) incurred under title II of the act. The respective funds are also to be used to repay sums borrowed from the Secretary of the Treasury. This section also authorizes the appropriation of moneys for administrative expenses of the Federal Government under the act.

Section 305

This section provides that the Secretary of the Treasury shall pay any valid claim under either an indemnity contract or a reinsurance agreement if the Administrator is unable to pay the same and authorizes money to be appropriated for this purpose out of any money in the Treasury not otherwise appropriated.

TITLE IV—GENERAL PROVISIONS

Section 401—Participation by private companies and public agencies

Under this section the Administrator, in providing indemnities and reinsurance under this act, is authorized and directed to use the facilities and services of private insurance companies, established insurance agents and brokers, established insurance adjustment organizations and other public agencies insofar as practicable, consistent with minimum cost of providing such protection. He is authorized to pay reasonable compensation for such services.

Section 402

This section directs the Administrator to develop means of expanding the reinsurance program and facilitating the assumption of flood risks by private carriers. In performing this function he shall consult with representatives of the insurance industry and make necessary studies and investigations.

Section 403

This section provides that on or before January 3, 1961, the Administrator is required to make a report to the President for submission to the Congress concerning all operations under the act, including the extent to which private insurance companies have participated in the indemnity and reinsurance programs, and to make such recommendations as he considers appropriate. The report must contain either a legislative proposal for the termination of the Government indemnity and reinsurance program and for the assumption of flood risks by private carriers, or an explanation as to why such legislation would not be feasible or desirable.

Section 404—Payment of claims

Subsection (a) authorizes the Administrator to adjust, compromise, and pay claims (under indemnity contracts and reinsurance agreements), either directly or through agents. Claims shall not be approved in excess of the actual cash value of the damaged or lost property or the cost of replacing, repairing, or rebuilding the property with material of like kind and quality (less depreciation at the time of damage or loss) whichever is lower.

Subsection (b) permits the claimant to sue the Administrator if a claim is disallowed in whole or in part. The suit must be brought within one (1) year after the date of mailing the notice of disallowance. Suits must be brought in the United States District Court for any district in which the property or a part thereof is located. The Administrator is required to appoint agents upon whom service of process may be made. The United States District Courts are given exclusive jurisdiction to determine such actions without regard to the amount in controversy. The courts shall sit without juries in such cases.

Section 405—Coordination with other programs

Subsection (a) authorizes the Administrator to consult with Federal interstate, State, and local agencies having responsibilities for land use, flood control, flood zoning, and flood damage prevention, for the purpose of coordinating the respective programs. The Secretary of Agriculture and the Administrator are directed to coordinate the administration of their respective programs concerning indemnities, insurance, and reinsurance on agricultural commodities.

Under subsection (b) the Administrator is authorized to receive from or exchange with State insurance commissions and private insurance companies information pertaining to the problems of indemnities and reinsurance.

Section 406—Additional powers

Under subsection (a) the Administrator may sue or be sued. Subsection (b) authorizes the Administrator to enter into and perform contracts, leases, or other transactions on such terms as he deems appropriate, with Federal agencies or with any State or agency or political subdivision thereof and with private persons, firms, or corporations. He may consent to the modification of such agreements and make progress payments in connection therewith. Subsection (c) authorizes the Administrator to acquire real and personal property by purchase, lease, or donation, and to make advance or progress payments in connection therewith. He is also authorized to sell, lease, or otherwise dispose of such property and to use, maintain, and insure such property. Subsection (d) authorizes the Administrator to appoint, pursuant to civil service regulations and laws, officers, attorneys, and employees and to fix their compensation; define their authority and duties; to require bonds of them and to delegate to them and authorize successive redelegation by them of the powers vested in him by the act. Subsection (e) authorizes the Administrator to establish 1 position in Grade 17 and 2 in Grade 16, in carrying out his functions under this act. These positions are in addition to any position presently allocated to the Housing and Home Finance Agency under section 505 of the Classification Act of 1949. The Administrator is authorized under subsection (f) to make necessary investigations, surveys, and researches pertaining to flood indemnities and reinsurance. Subsection (g) authorizes the Administrator to issue such rules and regulations as he deems necessary. Under subsection (h) the Administrator is authorized to exercise all powers specifically granted and such incidental powers as are necessary to carry out the purposes of the act.

Section 407—Exemption of claims from levy

This section provides that all claims under either indemnity contracts or reinsurance

agreements for losses shall not be liable to attachment, levy, or garnishment or any other legal process or to deduction because of any indebtedness of the insured or his estate to the United States, except claims of the United States under the act.

Section 408—Reservation of rights in real estate acquired

Under this section any State or political subdivision shall not be deprived of its civil or criminal jurisdiction concerning real property acquired by the Administrator under this act nor shall such acquisition impair the civil rights of the inhabitants concerning such property under State and local laws.

Section 409—Taxation

This section provides that nothing in the act shall be construed to exempt property, acquired by the Administrator in connection with claims under indemnity contracts and reinsurance agreements, from local taxation.

Section 410—Separability of provisions

This section contains the usual separability clause.

EXHIBIT B

Senate Joint Resolution 106

Joint resolution to establish a Northeastern United States Watershed Development and Flood Protection Commission

Resolved, etc.,

ESTABLISHMENT OF COMMISSION

SECTION 1. (a) There is hereby established a commission to be known as the Northeastern United States Watershed Development and Flood Protection Commission (hereinafter referred to as the "Commission").

(b) The Commission shall be composed of 12 members as follows:

(1) Four appointed by the President of the United States, 2 from the executive branch of the Government and 2 from private life;

(2) Four appointed by the President of the Senate, 2 from the Senate (not more than 1 from any political party) and 2 from private life; and

(3) Four appointed by the Speaker of the House of Representatives, 2 from the House of Representatives (not more than 1 from any political party) and 2 from private life.

(c) Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

(d) Service of an individual as a member of the Commission or employment of an individual by the Commission as an attorney or expert in any business or professional field, on a part-time or full-time basis, with or without compensation, shall not be considered as service or employment bringing such individual within the provisions of section 281, 283, 884, 434, or 1914 of title 18 of the United States Code, or section 190 of the Revised Statutes (5 U. S. C. 99).

(e) The Commission shall elect a Chairman and a Vice Chairman from among its members.

(f) Seven members of the Commission shall constitute a quorum.

COMPENSATION OF MEMBERS OF THE COMMISSION

SEC. 2. (a) Members of the Congress who are members of the Commission shall serve without compensation in addition to that received for their services as Members of Congress; but they shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(b) Members of the Commission who are in the executive branch of the Government shall serve without compensation in addition to that received for their services in the executive branch, but they shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(c) The members of the Commission from private life shall each receive $50 per diem when engaged in the actual performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of such duties.

STAFF OF THE COMMISSION

SEC. 3. (a) The Commission shall have power to appoint and fix the compensation of such personnel as it deems advisable, without regard to the provisions of the civil-service laws and the Classification Act of 1949, as amended.

(b) The Commission may procure, without regard to the civil-service laws and the Classification Act of 1949, temporary and intermittent services to the same extent as is authorized for the departments by section 15 of the act of August 2, 1946 (60 Stat. 810), but at rates not to exceed $50 per diem for individuals.

EXPENSES OF THE COMMISSION

SEC. 4. There are hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the provisions of this joint resolution.

DUTIES OF THE COMMISSION

SEC. 5. (a) The Commission shall study the land and water resources of the northeastern section of the United States (including the States of Connecticut, Delaware, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont), and such other related matters as the Commission may deem appropriate in order to prepare recommendations for an integrated and comprehensive program for the development, use, and protection of such land and water resources, with special emphasis on protection against hurricanes and floods. With respect to the use of power produced or to be produced in whole or in part within the northeastern section of the United States the studies and recommendations of the Commission may extend to areas outside such section. In performing such study the Commission shall—

(1) consider and evaluate existing and proposed plans and programs for the development, protection, and use of such land and water resources;

(2) conduct in the northeastern section such on-the-site surveys and appraisals of land and water resources programs, and provide for the holding of such public hearings as it deems necessary and practicable with a view toward obtaining accurate and pertinent information and expressions of public sentiment of the inhabitants thereof;

(3) to the extent practicable, ascertain estimated costs and benefits of projects and programs;

(4) consult with appropriate State authorities with respect to the development, protection, and use of land and water resources in their respective areas within the northeastern section, and consult with the Connecticut River Valley Flood Control Commission and such other bodies and groups as may be appropriate;

(5) take into consideration the present and prospective economy of the northeastern section, the economic soundness of plans and programs for the development, protection, and use of its land and water resources, and the proper division of financial responsibility between the Federal Government and the States with respect to such plans and programs; and

(6) in view of the recent disastrous floods in the northeastern section, give necessary emphasis to prevention and control of inland and coastal flooding.

(b) The Commission may submit such interim reports at such time or times as it deems appropriate, and shall submit a final comprehensive report of its activities and the results of its studies to the Congress on or before January 1, 1958. The Commission shall cease to exist 30 days after the submission of such final report.

POWERS OF THE COMMISSION

SEC. 6. (a) The Commission or, on the authorization of the Commission, any subcommittee or member thereof, may, for the purpose of carrying out the provisions of this joint resolution, hold such hearings and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents as the Commission or such subcommittee or member may deem advisable. Subpenas may be issued under the signature of the chairman of the Commission, of such subcommittee, or any duly designated member, and may be served by any person designated by such chairman or member. The provisions of sections 102 to 104, inclusive, of the revised statutes (2 U. S. C., secs. 192–194), shall apply in the case of any failure of any witness to comply with any subpena or to testify when summoned under authority of this section.

(b) The Commission is authorized to secure directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality of the Federal Government information, suggestions, estimates, and statistics for the purposes of this joint resolution; and each such department, bureau, agency, board, commission, office, establishment, or instrumentality is authorized and directed to furnish such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman or Vice Chairman.

SEC. 7. Nothing in this act shall be construed so as to delay the prosecution of any flood control or related projects recommended by the Corps of Engineers, Department of the Army, and authorized by the Congress, or of any flood control projects now or hereafter undertaken under the authority of the Watershed Protection and Flood Prevention Act of 1954.

S. 2860

A bill to authorize the construction of additional flood-control reservoirs in the Connecticut River Basin

Be it enacted, etc., That the plan for the control of floods in the Connecticut River Basin, approved by the act of June 22, 1936 (Public Law 738, 74th Cong.), as amended and supplemented, is hereby modified to provide for the construction, under the direction of the Secretary of the Army and the supervision of the Chief of Engineers, of the following reservoirs, substantially in accordance with the plans on file in the office of the Chief of Engineers, and the authorization for said basin is increased accordingly.

Cold River Reservoir, Cold River, N. H., at an estimated cost of $7,273,000;

Littleville Reservoir, Middle Branch of Westfield River, Mass., at an estimated cost of $4,030,000.

S. 2857

A bill to provide for Federal procurement of materials and supplies in major disaster areas, and for other purposes

Be it enacted etc., That (a) The Defense Production Act of 1950 is amended by adding the following new sentence at the end of section 2:

"Our mobilization effort further requires that certain areas which have been or may be afflicted by a major disaster, as such term is defined in the act of September 30, 1950 (64 Stat. 1109) be rehabilitated and restored

to normal condition as expeditiously as possible, in order to maintain a broad potential base for economic mobilization."

(b) Said act is further amended by inserting the following as a new section and heading:

"SEC. 714. Disaster areas: Upon the occurrence of a major disaster as defined in the act of September 30, 1950 (64 Stat. 1109), in any area which in the opinion of the President is an important source of goods or services needed in the event of economic mobilization, he is hereby authorized and directed, notwithstanding any provision of law to the contrary, to arrange for immediate awards, to the maximum practicable extent, of negotiated contracts for procurement of materials or services needed by the Federal Government to victims of such major disaster capable of fulfilling such contracts in a satisfactory manner."

SEC. 2. (a) Section 3 of the act to authorize Federal assistance to States and local governments in major disasters, and for other purposes, approved September 30, 1950 (64 Stat. 1109) is amended by striking out the word "and" before "(d)" the first time this symbol appears in the first sentence of said section, and by inserting a comma after "(d)" the second time said symbol appears in said sentence and adding the following after such comma: "And (e) by procuring from private enterprise engaged in business in the area affected by such major disaster, by negotiated contract or otherwise, materials, or services of use to the Federal Government, in the opinion of the President."

(b) Section 8 of said act is amended by striking out "$5,000,000" and inserting in lieu thereof "$15,000,000."

FEDERAL PROCUREMENT IN DISASTER AREAS

Explanation: This bill will amend both the Defense Production Act and the Federal Disaster Relief Act of September 30, 1950, to enable procurement in certain major disaster areas of materials and services for the Federal Government.

Section 1 (a) of the bill amends the Declaration of Policy in the Defense Production Act by adding a provision that the mobilization effort requires expeditious rehabilitation of certain areas afflicted by major disaster.

Section 1 (b) of the bill restores a section 714 in the Defense Production Act. The original section 714 has terminated in the course of amendments to the Defense Production Act. It established the Small Defense Plants Administration, the predecessor of the Small Business Administration.

This bill gives new context to section 714 by providing that, upon finding an area to be an important source of goods or services needed in the event of economic mobilization, the President is directed to arrange for awarding negotiated contracts for procuring materials or services needed by the Federal Government from major disaster victims capable of satisfactory performance.

Section 2 (a) of the bill amends section 3 of the Federal Disaster Relief Act of September 30, 1950 (42 U. S. C., sec. 1855b) by authorizing Federal agencies, when directed by the President, to provide aid in any major disaster by procuring from private business enterprises in the afflicted area, by negotiated contract or otherwise, materials or services of use to the Federal Government in the opinion of the President.

Section 2 (b) of the bill increases to $15 million from $5 million the amount authorized to be appropriated to carry out the purposes of the Federal Disaster Relief Act, by making a suitable amendment to section 8 of that act.

Reason for the bill: Added to the severe injury to life and damage to property caused by major disasters is the interruption of business activity in the afflicted area. This causes reduced income to both the business enterprise and its employees, as well as a decrease in tax receipts by various levels of government. It is highly desirable that this interruption to business be reduced to a minimum, particularly in areas where the economic mobilization base requires productive capacity in being. The purpose of this bill is to provide express statutory authority for channeling Federal procurement contracts into areas of major disaster, in order to assist the area in making a speedy economic recovery. In this manner productive facilities in the area still capable of operation will help take up the slack of business interruption occurring in those facilities damaged by the disaster.

The bill places in the President the authority to decide when an area is important to the economic mobilization base. This decision triggers the procurement assistance the bill makes available under the Defense Production Act. It also vests in the President discretion to place into operation the procurement authority the bill grants under the Federal Disaster Relief Act.

This proposed legislation is based on the philosophy that materials or services useful to the Federal Government should be obtained in areas of major disaster when feasible. Such a course of action helps to reduce the need for other forms of Federal aid.

S. 2858

A bill to amend the Small Business Act of 1953

Be it enacted, etc., That this act may be cited as the "Small Business Administration Catastrophe Loan Amendments of 1956."

SEC. 2. The proviso in section 207 (b) of the Small Business Act of 1953 is amended as follows: "*Provided*, That no such loan, including renewals and extensions thereof, shall be made for a period exceeding 20 years or shall bear interest at a rate exceeding 3 percent per annum."

SEC. 3. (a) Section 207 of said act is amended by inserting an additional subsection, as follows:

"(f) Whenever the President has determined under the act entitled 'An act to authorize Federal assistance to States and local governments in major disasters, and for other purposes,' approved September 30, 1950, as amended (42 U. S. C., secs. 1855–1855g) that a major disaster has occurred, the Administration is hereby authorized and directed to make immediate use of the powers granted to it under the provisions of sections 207 (b) (2) and (3), 208, 211, 212, and 213 in order to aid any small-business concern or group of concerns that is a victim of any such major disaster."

(b) Section 214 of said act is amended by inserting before the period at the end thereof the following: ", or (c) to be in the interest of aiding victims of floods or other catastrophes."

SMALL BUSINESS ADMINISTRATION CATASTROPHE LOAN AMENDMENTS OF 1956

Explanation: This bill amends the Small Business Act of 1953 in three respects:

1. It extends the maximum maturity for catastrophe business loans to 20 years, making this the maximum maturity for all SBA catastrophe loans.

2. It clearly establishes a statutory maximum of 3 percent as the interest rate for all SBA catastrophe loans.

3. It directs SBA to use its general powers to channel Federal procurement contracts to small business enterprises in major disaster areas.

Section 1 entitles the act the Small Business Administration Catastrophe Loan Amendments of 1956.

Section 2 amends the proviso in section 207 (b) of the Small Business Act to fix a 20-year maximum maturity and a 3 percent maximum interest rate on all types of SBA catastrophe loans. As last amended in 1955, the proviso in section 207 (b) of the Small Business Act permitted a maximum maturity of 20 years only for SBA catastrophe loans for the acquisition or construction of housing for the personal occupancy of the borrower. The maximum maturity for all other SBA catastrophe loans was fixed at 10 years.

The 1955 amendments to section 207 (b) also prescribed a maximum interest rate of 3 percent per annum. Although the scope of this limit seems ambiguous to some, it is understood it was intended to apply to all SBA catastrophe loans, rather than to catastrophe home loans alone. This bill will clearly make the 3 percent maximum apply to all SBA catastrophe loans.

Section 3 (a) adds a new subsection (f) to section 207 of the Small Business Act. This will direct SBA to make use of powers granted it under sections 207 (b) (2) and (3), 208, 211, 212, and 213 in order to add small business enterprises suffering from any major disaster, designated as such by the President under the Federal Disaster Relief Act of September 30, 1950.

Briefly, these powers are as follows:

Section 207 (b) (2): SBA may make prime contracts with the Federal Government to furnish materials and supplies.

Section 207 (b) (3): SBA may sublet these prime contracts for performance by small business concerns and others.

Section 208: SBA may conclusively certify to any Federal procurement officer that it has competency to perform any such prime contract.

Section 211: The President may direct SBA to consult with Federal agencies in forming policies affecting small business concerns; to carry out the national policy of insuring that a fair proportion of Federal procurement be obtained from small business enterprises, the Department of Defense is required to make appropriate monthly reports to the President and the Congress.

Section 212: SBA is empowered to consult with Government procurement officers to obtain use of small business productive plant capacity; to get information concerning and encourage subletting to small business enterprises by prime Government contractors; to determine eligibility and certify competency of small business concerns; to obtain procurement contracting and loan information from Federal agencies; to obtain distribution information from materials suppliers when they are in short supply for small business; to study and recommend to Federal agencies procedures to insure a fair share of materials for small business; to consult with Government agencies to insure fair treatment from them for small business; and to establish advisory committees.

Section 213: Any small business concern or group certified as a competent Government contractor by SBA with respect to capacity and credit is conclusively cleared.

Section 2 (b) of this bill amends section 214 to provide that small business concerns shall be awarded all or that part of any contract which SBA and the procurement agency determine would be in the interest of aiding victims of floods or other catastrophes.

Reason for the bill—maturity: The maximum maturity for SBA catastrophe loans has been too restrictive in the case of business loans. Regular SBA business loans may already have a maturity of 10 years, or as long as 20 years in the case of a loan to a group of small businesses for construction facilities. When a business is afflicted by major disaster, it may well need a longer period of time than 10 years to repay the amount borrowed from SBA to overcome the ill effects of the disaster. This bill would empower SBA, in its discretion, to make a business catastrophe loan repayable over a 20-year period. This maximum maturity already applies to SBA catastrophe loans made for the purpose of acquiring or constructing a home for per-

sonal occupancy by the borrower. Such home loans could continue to be made under this bill.

Interest rate: Prior to the 1955 amendments to the Small Business Act of 1953, no statutory maximum interest rate was fixed for either regular or catastrophe loans by SBA. The rate was determined by the Administrator as a matter of discretion. In section 5 of Public Law 268, 84th Congress, approved August 9, 1955, section 207 (b) of the Small Business Act was amended, among other items, by inserting a maximum interest rate of 3 percent per annum. This is the maximum rate now being charged by SBA on catastrophe loans. However, the particular location of this provision in the statute may leave some ambiguity regarding the application of the maximum rate to catastrophe loans other than those for home acquisition or construction. This bill will make it clear that the 3-percent rate is intended as a maximum interest rate applicable to all SBA catastrophe loans. It will incorporate in the statute the present interest rate policy of SBA regarding catastrophe loans.

Procurement: When a major disaster hits an area, its effects on small business may be severe. In most cases, small business does not enjoy the advantage of geographic dispersal of several plant or business establishments. Therefore, the impact of disaster damage on small business may be much more severe than in the case of larger business enterprises.

Any measures that serve to speed the rehabilitation of small business establishments helps the small business interests in the stricken community in particular and all business interests in the community in general.

This bill therefore directs SBA to make use of its general powers in aid of small business to channel Federal procurement to small business establishments in major disaster areas. The bill encourages SBA to pay particular attention to the needs of small business enterprises in such areas, and makes full use of SBA powers to meet those needs.

Reducing to a minimum business interruption caused by major disaster serves the threefold purpose of restoring wages to employees, income to the enterprise, and tax receipts to Government. This bill will help meet the particular needs of small business.

A companion measure sponsored by me will encourage the channeling of Federal procurement contracts to all business enterprises in the area afflicted by a major disaster.

S. 2856

A bill to increase the amount of appropriations authorized for disaster loans, and for other purposes

Be it enacted, etc., That section 204 (b) of the Small Business Act of 1953 is amended (a) by striking out "$275,000,000" and inserting in lieu thereof "$300,000,000" each time it appears, and (b) by striking out the fifth and sixth sentences and inserting in lieu thereof the following: "Not to exceed an aggregate of $200,000,000 shall be outstanding at any one time for the purposes enumerated in sections 207 (a) and (b)."

INCREASE IN APPROPRIATIONS AUTHORIZED FOR DISASTER LOANS BY THE SMALL BUSINESS ADMINISTRATION

Explanation: This bill will consolidate SBA funds available for business loans and disaster loans and will increase the consolidated amount by $25 million over its present authorized status. This will make a total of $300 million appropriations authorized for SBA for either business or catastrophe loans, in its discretion.

The effect of subsection (a) in section 1 of the bill, which substitutes $300 million for $275 million in section 204 (b) of the Small Business Act of 1953, is to increase both the authorized appropriation and the amount SBA is authorized to obtain from the United States Treasury for use in carrying out its duties.

Subsection (b) of section 1 of the bill removes the present statutory limit of $150 million for outstanding SBA business loans and $25 million for outstanding SBA catastrophe loans. In place of these limits, it substitutes a single limit of $200 million for outstanding SBA business and catastrophe loans.

Reason for the bill: When a major disaster struck the Northeastern and Mid-Atlantic States in August 1955, SBA found itself with only about $17 million available for catastrophe loans, at a time when the Congress was not in session. Preliminary estimates of damage caused by this disaster varied from $464,500,000 in 6 Northeastern States alone to almost $1.5 billion.

The inadequacy of this meager amount available to SBA for catastrophe loans was recognized by SBA as soon as the magnitude of the Northeast flood became apparent. SBA Administrator Wendell B. Barnes so testified to the Senate Committee on Banking and Currency on October 31, 1955. On that date he indicated a total of $16.5 million catastrophe loans arising out of that flood had been approved and applications for more than an additional $16.5 million were in process. As against this $33 million total of disaster loans desired as a result of this single disaster, only $25 million could be outstanding as catastrophe loans under the statute, and funds for only about $17 million of such loans were actually available. This led to the device of processing some of the disaster loan applications as regular SBA business loan applications bearing a doubly high 6 percent per annum interest rate. Obviously a change in the statute in this respect is necessary.

The Senate Committee on Banking and Currency recognized the need of supplying more elasticity to SBA funds loanable for disaster purposes. On June 1, 1955, it reported favorably S. 2127 consolidating the $25 million disaster loan limit and the $150 million business loan limit into a single $175 million loan limit usable for both disaster and business loans. On June 7, 1955, the Senate passed the bill containing this consolidated limitation. However, due to action by the House of Representatives, this feature was removed from the bill which finally became Public Law 268 on August 9, 1955.

The wisdom of the action proposed by the Senate became obvious in the wake of demands for SBA catastrophe loans following the Northeast floods.

This bill to consolidate and increase the amount authorized to be lent by SBA in the event of catastrophe should receive immediate attention.

S. 2859

A bill to provide rent-free accommodations in certain federally aided housing for needy victims of major disasters, and for other purposes

Be it enacted, etc., That any provision of law to the contrary notwithstanding, no rent or other charge shall be demanded or received from any victim of a major disaster as defined in the act of September 30, 1950, as amended, (64 Stat. 1109, 65 Stat. 173, 67 Stat. 180), by reason of his occupancy of any housing accommodations controlled by any Federal, State, or local authority, which was constructed or acquired by the Federal Government, or constructed, rehabilitated, or acquired with any aid, direct or indirect, from the Federal Government, whether in the form of grant or loan.

SEC. 2. (a) The President, through such officer or agency of the Government as he may designate, is authorized and directed to enter into a contract with each authority making housing accommodations available rent-free under the provisions of this act providing among other things, that (1) annual contributions will be made to such authority to the extent necessary to pay the pro rata share of operating expenses of the authority attributable to such rent-free occupancy of housing accommodations, and (2) any provision of law to the contrary notwithstanding, such authority may use for operating purposes during such occupancy and for the period immediately following termination of such occupancy, such sums available to it as may be required to pay the pro rata share of operating expenses attributable to such rent-free occupancy of housing accommodations.

(b) The faith of the United States is solemnly pledged to the payment of all annual contributions contracted for pursuant to this section, and there is hereby authorized to be appropriated in each fiscal year, out of any money in the Treasury not otherwise appropriated, the amounts necessary to provide for such payments.

SEC. 3. As used in this act, the word "victim" shall mean any person (including his dependents) certified by a duly accredited representative of the American National Red Cross as being in need due to the occurrence of a major disaster within the meaning of that term as used in section 1 hereof and lacking sufficient financial means, considering his outstanding debts and future requirements for rehabilitation, to pay rent or other charges for housing during such period of emergency as may be set forth in such certificate.

SEC. 4. Whoever knowingly and willfully violates any provision of this act by demanding or receiving any rent or charge from any victim of a major disaster by reason of his occupancy of any such housing shall, upon conviction, be fined not more than $5,000 or imprisoned not more than 1 year, or both.

FREE RENT TO NEEDY DISASTER VICTIMS IN CERTAIN GOVERNMENT-CONTROLLED HOUSING

Explanation: This bill is intended to make it possible for needy disaster victims to obtain rent-free shelter in Government-controlled housing.

Section 1 prohibits the demand or receipt of rent from a major disaster needy victim occupying housing controlled by any Government agency and constructed with the aid of a Federal grant or loan.

Section 2 (a) authorizes the President to contract with each Government authority making such housing available. The contract may provide for annual contributions to the authority to the extent necessary to make up the deficit in operating expense caused by permitting such rent-free occupancy. The authority may use an equal amount for operating purposes during and immediately following such rent-free occupancy from any available funds.

Section 2 (b) pledges the faith of the United States to the payment of annual contributions called for in such contracts. It also authorizes appropriation of necessary amounts for that purpose out of unappropriated Treasury funds.

Section 3 defines "victim" as used in this act to mean a person (and dependents) certified by a Red Cross representative as being in need because of a major disaster as defined in the Federal Disaster Relief Act of September 30, 1950, and lacking financial means to pay rent or similar charges for housing during the time specified in the certificate.

Section 4 is a penal provision making it a crime punishable by a maximum $5,000 fine or 1-year imprisonment, or both, to demand or receive rent knowingly and willfully in violation of this act.

Reason for the bill: In any major disaster, the needs of humanity must receive first attention. The truly needy victims must receive adequate shelter, even though they lack the means of paying the economic rent for such shelter.

Where such shelter is available in housing constructed with Federal aid and still in governmental control, it is appropriate for the Congress to prohibit the charging of rent or similar charges for occupancy of such accommodations by needy disaster victims.

Since much of this housing is subject to restrictive legislation regarding rents which must be charged to occupants, it is imperative that appropriate legislation be adopted to make possible the offering of rent-free accommodations in such housing to needy victims of a major disaster. This bill will accomplish this purpose.

Safeguards against abuse of the privilege are provided by requiring that certification of need be obtained from the Red Cross.

Adequate financial means of reimbursing the cost of this program to the authority operating the housing so used are provided in the bill. The annual contribution method of assuring the housing authority that it will be properly reimbursed is the same method long in use in operation of low-rent public housing with Federal aid.

Housing controlled by local housing authorities, even though federally aided, is not as amenable to Federal directive as would be housing operated by the Federal Government. This bill has been drafted with that fact in mind, and attempts to encourage local housing authorities to cooperate with the Federal Government in providing rent-free accommodations for needy victims of major disasters.

The penal provisions of the bill will provide sanctions for its substantive provisions and should deter anyone from taking undue advantage of the misfortune of disaster victims who can be housed in accommodations covered by this act.

The recent floods in the Northeastern States emphasized the need for this type of legislation. Use by flood victims of vacancies in existing federally aided housing controlled by local authorities was impeded by legislative restrictions imposed without reference to the needs of victims of major disasters.

S. 2855

A bill to provide authority to stockpile temporary housing for disaster relief, and for other purposes

Be it enacted, etc., That this act may be cited as the Temporary Housing Disaster Relief Stockpiling Act of 1956.

SEC. 2. One thousand units of temporary housing of a mobile or portable character provided by the Housing and Home Finance Administrator (hereinafter referred to as the Administrator) under the provisions of section 302 (b) of the Defense Housing and Community Facilities and Services Act of 1951 that remains under his jurisdiction on the effective date of this act and is not being used for other purposes shall be dismantled, stored, and maintained in good condition in order to create a stockpile of such housing available for immediate use in the event of the occurrence of a major disaster within the meaning of the provisions of the act of September 30, 1950, as amended (64 Stat. 109, 65 Stat. 173, 67 Stat. 180).

SEC. 3. The Administrator shall arrange for storage of such housing at various locations throughout the continental United States, its Territories and possessions, so situated as to permit expeditious transportation of such housing to the sites where it may be needed to provide housing in the event of a major disaster.

SEC. 4. Whenever the total number of units of temporary housing so stored is less than 1,000, the Administrator is authorized and directed to acquire in such manner as he deems advisable sufficient additional units of temporary housing to maintain the stockpile at 1,000 units.

SEC. 5. In selecting and acquiring housing under the provisions of this act, the Administrator shall attempt to keep available at each storage point accommodations having from 1 to 3 bedrooms.

SEC. 6. In carrying out his functions under this act, the Administrator may utilize the services of any other Federal agency with the consent of the head of such agency, or any other public or private organization, and provide reasonable compensation for such services.

SEC. 7. Any such temporary housing may be made available for emergency housing purposes as a measure of disaster relief in the event of a major disaster.

SEC. 8. No rent or other charge demanded or received from any victim of a major disaster who occupies such housing shall exceed a rate calculated to be sufficient to pay the cost of operating and maintaining the unit occupied and a proportionate share of operation and maintenance costs common to all units in the project in which such unit is located: *Provided, however*, That no rent or charge shall be demanded or received from any such victim during the effective period of a certificate issued in his favor by a duly accredited representative of the American National Red Cross to the effect that after reasonable investigation, the person named in the certificate has been found to be a victim of a major disaster lacking sufficient financial means, considering his outstanding debts and future requirements for rehabilitation, to pay rent or other charges for housing.

SEC. 9. The Administrator shall determine when such housing is no longer needed for disaster relief and shall thereupon dismantle and again store and maintain the housing in accordance with the provisions of this act.

SEC. 10. When, in the opinion of the Administrator, it is no longer advisable to maintain in storage a particular unit, he may dispose of it pursuant to applicable Federal law.

SEC. 11. Such sums as may be necessary to carry out the provisions of this act are authorized to be appropriated.

TEMPORARY HOUSING DISASTER RELIEF STOCKPILING ACT OF 1956

Explanation: This bill is intended to enable the Housing and Home Finance Administrator to establish and maintain an adequate stockpile of temporary housing at suitable locations throughout the Nation. This housing would then be available for immediate transportation to the site of a major disaster in order to provide shelter for disaster victims.

Section 1 entitles the act of the Temporary Housing Disaster Relief Stockpiling Act of 1956.

Section 2 deals with units of temporary housing provided by the Housing and Home Finance Administrator under section 302 (b) of the Defense Housing and Community Facilities and Services Act of 1951, remaining under his jurisdiction on the effective date of this act, and not in use for other purposes. It requires that 1,000 of those units be dismantled, stored and maintained in good condition. These units then become a stockpile available for immediate use in the event of a major disaster.

Section 3 directs the Administrator to store these houses at various locations in the continental United States. Storage sites are to be chosen to permit expeditious transportation of the housing to disaster areas.

Section 4 directs the Administrator to maintain the stockpile at 1,000 units and authorizes him to acquire housing in such manner as he deems advisable for this purpose.

Section 5 urges him to keep available to each storage point units with 1 to 3 bedrooms.

Section 6 empowers the Administrator to use the services of any other Federal agency with its consent, or of any other public or private organization; and authorizes him to pay reasonable compensation for such services.

Section 7 authorizes any temporary housing so stockpiled to be made available as emergency housing during a major disaster.

Section 8 specifies that rent for such housing shall not exceed a rate sufficient to pay costs of operating and maintaining the unit occupied and a proportionate share of common operating and maintenance costs of the project. The proviso in this section provides that no rent shall be charged a disaster victim occupying such housing who is certified by the American National Red Cross as lacking sufficient financial means to pay rent. Such a certificate is to specify the period during which it remains effective and is to be issued after reasonable investigation, taking into consideration the victim's outstanding debts and future requirements for rehabilitation.

Section 9 authorizes the Administrator to determine when this temporary housing is no longer needed for disaster relief at any disaster site. Thereupon he is to have the housing dismantled and returned to stockpile.

Section 10 authorizes the Administrator to dispose of any unit in the stockpile when in his opinion it is no longer advisable to maintain it in storage. Disposal may be made under any applicable Federal law.

Section 11 authorizes the appropriation of sums needed to carry out the provisions of the act.

Reasons for the bill: One of the most urgent and immediate needs arising out of a major disaster is shelter for its victims. Adding to the need for an increase in the supply of housing in the afflicted area is the too common occurrence of major damage to existing housing. Experience has shown that this need can be filled in a most satisfactory manner by the use of temporary housing.

It is particularly appropriate to create a stockpile of such housing at the present time, since much of the temporary housing under the jurisdiction of HHFA is coming into the category of housing surplus to the need for which it was originally acquired.

Stored at sites handy to transportation facilities, such housing could be immediately pressed into service in the event of a major disaster.

Its use would afford a means of offering private housing accommodations to disaster victims instead of forcing them to accept less adequate makeshift shelter in buildings not designed or equipped for residential purposes.

Those who can afford to do so would be expected to pay rent sufficient to provide operation and maintenance of the temporary housing on-site in the disaster area. Those with insufficient financial means to pay even this amount of rent would be excused from doing so upon obtaining an appropriate certificate from the American National Red Cross.

Recent flood disasters in the Northeast have demonstrated the need for this type of a program.

S. 2854

A bill to amend the National Housing Act, as amended

Be it enacted, etc., That section 203 (h) of the National Housing Act, as amended, is hereby amended by striking out "$7,000" and inserting in lieu thereof "$12,000."

SEC. 2. Section 217 of said act, as amended, is hereby amended by striking out "$4,000,000,000" and inserting in lieu thereof "$4,060,000,000."

INCREASE IN MAXIMUM DOLLAR AMOUNT OF FHA-INSURED MORTGAGE FOR HOME REPLACING ONE DESTROYED IN MAJOR DISASTER

Explanation: Section 1 of this bill will increase to $12,000 from $7,000 the maximum principal amount of a mortgage that may be insured by FHA to enable reconstruction of a single-family home destroyed or damaged in a major disaster. No change is made in that portion of section 203 (h) of the National Housing Act which prescribes an alternate maximum limit of 100 percent of the property's appraised value. The requirement of that section that the mortgagor be the owner-occupant of the home is also retained; as is the requirement that the home he occupied as owner or tenant was destroyed or damaged to such an extent by a catastrophe found by the President to be a major disaster under the Federal Disaster Act of September 30, 1950, that reconstruction is required.

Section 2 of the bill increases by $60 million the insurance authorization of the Federal Housing Administration. This should provide FHA with adequate authorization to meet the increased demand for insurance resulting from enactment of this bill.

Reason for the bill: The $7,000 limit is unrealistically low in areas of this Nation. The Senate Banking and Currency Committee staff study on Federal disaster insurance, dated November 30, 1955, points up the inadequacy of this limitation. On page 45 of the staff study, preliminary estimates forwarded by the Federal Civil Defense Administrator indicate that in six Northeastern States visited by hurricane Diane in August 1955, there were 1,229 homes destroyed and 4,900 homes suffered major damage. Yet page 218 of the staff study indicates that under section 203 (h) of the National Housing Act, only 2 applications were received subsequent to June 30, 1955, and 1 had been issued. It is understandable that applications would not be filed by anyone unable to reconstruct a home for $7,000 or less.

In order to make it possible for this program to serve the purpose for which it was intended, it is imperative that the maximum mortgage limit be raised to a level more consistent with actual construction costs in areas afflicted by a major disaster.

S. 2861

A bill to authorize an increase of emergency relief highway funds from $10 million to $30 million for the fiscal year ending June 30, 1956

Be it enacted, etc., That the amount of $10 million authorized as an emergency relief fund by section 7 of the Federal-Aid Highway Act of 1952 for the repair and reconstruction of highways and bridges on the Federal-aid highway systems which have suffered serious damage as a result of disaster over a wide area is hereby increased to the amount of $30 million for the fiscal year ending June 30, 1956. Such amount shall be available to pay the Federal share of the cost of emergency relief projects programed for construction at any time during the fiscal year ending June 30, 1956.

Mr. KUCHEL, Mr. MALONE, and Mr. LEHMAN addressed the Chair.

The PRESIDING OFFICER (Mr. MCNAMARA in the chair). Does the Senator from Connecticut yield; and if so, to whom?

Mr. BUSH. I wish first to yield to the Senator from California.

Mr. KUCHEL. Mr. President, the wildest and the widest spread property damage from a natural disaster ever to fall upon the people of California overtook them in December of 1955.

Christmas day in thousands of homes in the northern and central areas of my State witnessed the exact opposite of happy rejoicing. While our Nation was celebrating on December 25, hundreds—yes, thousands—of my fellow Californians heard the awful roar of torrential floodwaters as they broke through river levees to overrun homes and business, indeed, whole towns and cities. Yuba City, for example, in northern California, one of our beautiful California communities, was almost swept away. In farflung cities all over northern California, floodwaters of equal intensity were wreaking their toll.

One of those strange deviations in nature came, suddenly, to plague us. The mountains of the Sierra Nevada, the Cascades and the Coast Range, had been covered deep by early storms. Then, in mid-December, a stream of very warm air flowed in from the Pacific. That brought on one of the heaviest and longest rains of record, and the snow pack on the mountains began to melt up to the level of 10,000 feet. The Eel, the Klamath, the Russian, the Feather and a score of other rivers overflowed and roared down upon the towns on the coast and in the Central Valley of my State. We have had a loss of scores of lives. Property damage will amount to hundreds of millions of dollars. Business and employment have been tragically interrupted, particularly in the northwestern coastal counties where both the highways and the one railroad have been washed out for distances of many miles. Some little towns literally have been destroyed. Others, from Klamath in the north to Visalia down in the lower part of the San Joaquin Valley, and from Yuba City lying near the base of the Sierra Nevada to Santa Cruz on the coast, face gigantic and costly tasks of restoration and recovery.

This has been a major calamity for our State—and the pity of it is that it could have been avoided. Most of the damage occurred on the Eel and Russian Rivers in northern California, on the Feather and Yuba in the central part of the Valley, the Kaweah and Tule near Visalia, and the San Lorenzo, which flows by the city of Santa Cruz—all of which now flow unrestrained to the sea. However, for a large proportion of the victims of the terrific downpour and snow runoff, suffering was held down and sadness was lightened because of the swiftness with which agencies of the Federal Government joined hands with State and local forces to remedy the devastating effects of forces of nature on the rampage.

On December 26, I attended a conference in the capital of my State with my colleague, the senior Senator from California [Mr. KNOWLAND], in which representatives of the Federal Government, the Governor of the State of California and his department heads participated. There was outlined the beneficent effects which might flow to the stricken people of California from Federal disaster legislation.

It was also indicated at the conference that there were great areas where Federal assistance ought to be provided, in good conscience, which, under the law, could not be provided.

No matter how energetically and imaginatively our Nation strives to prevent catastrophes of this kind, our people cannot ever devise protection against all emergencies that can occur. Consequently, all agencies of Government must be prepared to extend emergency relief and to assist in rehabilitation whenever such havoc-wreaking forces strike our country.

The immediate need is for expanded authority for Federal agencies to make available their resources in assisting the victims of these floods to repair or restore their homes, their businesses, their public utilities, and other essential facilities for daily living. For that reason, I have been conferring and consulting with officials of the Federal Government about steps which must be taken to aid a comeback from the shocking blow to our people. For that reason, I am happy to join in sponsoring these bills which should be enacted with utmost speed and which are vital to putting the flood victims back on their feet.

These pieces of legislation will be of immediate value not only to sections of California but also to those areas of New England and the Atlantic seaboard which suffered like damage from hurricanes last summer and fall. Furthermore, they will equip Federal authorities with standby powers to come more quickly to the aid of any other regions which unfortunately may suffer similar injury.

Because of the prompt action of President Eisenhower and other Federal officials, California already has been given material aid. The need for further assistance is evident from the fact that 42 of the 58 counties in our State have been designated as "disaster areas."

These bills will extend badly-required financial assistance to those confronting the heartbreaking job of rebuilding and repairing and replacing properties and facilities damaged or destroyed by the floods. Prompt approval of some of them is warranted because the funds available were exhausted by the demand for aid arising from the earlier disastrous storms on the Atlantic Coast.

I wish to pay my respects to my able friend from Connecticut [Mr. BUSH], whose State likewise heard the roar of waters as they tore out of their natural channels to damage great communities in his State, for standing here today and with some of the rest of us, introducing a series of bills the enactment of which will go far toward giving the Federal Government the opportunity to be of effective assistance to people in all disaster areas in this country.

Mr. President, I returned to Washington very hopeful that Congress will take specific action on the pieces of proposed legislation which are being introduced today. I particularly wish the Congress to consider the plight of the individual private citizen whose home or business has been damaged or destroyed by a disaster, either in California, from which State I come, or in any other part of this country. I speak here, Mr. President, of the man of little means who sees his

home or his business—or both—swept away, and is powerless to prevent it. I speak of families—average families whose homes and belongings are submerged in flood waters.

In considering the plight of such individuals, Mr. President, I want this Congress to adopt legislation bestowing on a Federal agency, the Small Business Administration, the right to make long-term, low-interest loans to American citizens to rebuild or repair their homes or businesses which have been devastated by floods. Otherwise, those citizens face a future bleak and black, indeed.

Beyond that, I ask the Congress to pay particular attention to the proposed legislation alluded to first by the Senator from Connecticut, which has to do with the establishment by this Congress of a disaster insurance program.

The Senator from Connecticut is rightly concerned with floods. So am I. But I also am going to ask this Congress to include in disaster insurance legislation provision for the people in this country to buy, upon the same basis that they would purchase flood insurance, insurance against the tragedies which the people of my State have suffered from time to time when earthquakes have destroyed great communities and large areas in California and elsewhere in the West.

Mr. President, I am sure this Congress can devise the proper kind of disaster insurance legislation so that the people can have an opportunity for some assurance against the tragedies which they have faced during 1955 in California, Connecticut, Massachusetts, and elsewhere.

And beyond all that, I am sure that, with the sympathy with which the Members of Congress on both sides of the aisle have viewed the tragedy that has struck again and again within these last many months, this Congress will painstakingly devote itself, during the ensuing weeks and months, to a stepped-up program of flood-control legislation in America, in which the magnificent Corps of Army Engineers can be given the authority and the money to be on the march in an accelerated program of controlling floodwaters in all those States of the American Union which so greatly need it.

I wish to take just one more moment; I desire to refer to the great capital city of California, Sacramento, where I was so pleased to live for 7 years with my wife and my child, when I participated in State government.

Mr. President, the people of Sacramento were saved, and they were saved because the Government of the United States and the Congress of the United States erected great multipurpose dams in that area. Today, Mr. President, the people of Sacramento can look to Shasta Dam, built by the power and might of the people of the United States, and can look to Folsom Dam, likewise constructed by Federal revenue and under Federal legislation, and can give thanks to a Federal Government which saw its duty and discharged it.

The mighty Sacramento River, and its major tributary, the American, are held in check by great dams constructed in past years by the United States of America. The Shasta Dam on the Sacramento is capable of holding back 4,500,000 acre-feet of water, and the Folsom on the American can now impound a million acre-feet. The Department of the Interior and the United States Army engineers have pointed out that if these dams had not been in existence, Sacramento—the capital of my State, a city of 250,000—would have been desolated in last month's floods. Folsom Dam was completed only 11 months ago. In 1950, without that protection, the suburban area of Sacramento suffered great losses when the American River flooded in January of that year.

In the opinion of the able General Itschner, of the Corps of Engineers, Folsom Dam paid for itself this last year in preventing a flood in Sacramento.

I am delighted to be able to participate as a cosponsor in a series of bills which will go far in being of specific assistance to the towns, communities, municipalities, and individual citizens of our country plagued with floods.

I am proud to sponsor this kind of constructive program with some of my brethren on both sides of the aisle. It will be a great day when we will have written into law legislation assisting the disaster victims of 1955 and, beyond that, legislation providing assurances against similar catastrophes in the years ahead.

Mr. LEHMAN, Mr. MORSE, Mr. LANGER, and other Senators addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Connecticut yield; if so, to whom?

Mr. BUSH. I shall yield, Mr. President; but first I wish to acknowledge the very generous remarks of my friend, the Senator from California [Mr. KUCHEL]; and I desire to tell him how much I appreciate his assurances of support for this proposed legislation.

Mr. President, the Senator from New York has been waiting to ask a question, and I now yield to him for that purpose.

Mr. LEHMAN. I thank the Senator from Connecticut.

Mr. President, I wish to repeat what I said earlier today; namely, the Senator from Connecticut [Mr. BUSH] has been a most valuable member of the Banking and Currency Committee, which conducted nine hearings, I believe, in different sections of the country—in Massachusetts, in New York City, in upper New York State, in Washington, in North Carolina, in Rhode Island, in Connecticut, and in 1 or 2 other places. As a result, we have a very complete record of the enormous damage which resulted from the floods and the torrential rains which occurred during the months of August, September, and October. As my colleagues may know, the damage has been estimated at between $800 million and $1,600,000,000. These figures do not include California, Nevada or Oregon as it has not yet been able to appraise the damage in these States.

The Banking and Currency Committee, of which I served as acting chairman, conducted those hearings, and obtained a tremendous volume of important data and a great mass of suggestions which need to be carefully considered.

I am glad the Senator from Connecticut has introduced his bills. I noticed he said they contain the recommendations and suggestions of the administration—in other words, that they are administration bills.

Mr. BUSH. Let me correct the Senator from New York by pointing out that that is true only of the flood indemnity bill, but not of the other bills. The flood indemnity bill is an administration bill.

Mr. LEHMAN. Of course, I thank my able friend the Senator from Connecticut, and gladly accept the correction. However, I do want to call his special attention to the statement on the subject made by the President in his message which was read to the Senate only an hour ago, in which the President said:

> Disaster-assistance legislation requires overhauling and an experimental program of flood-damage indemnities should be undertaken. The administration will make detailed recommendations on these subjects.

We have been waiting for those recommendations for more than 2 months—almost 3 months. I express the very deep and sincere hope that these specific recommendations will be made available to the Banking and Currency Committee, of which the distinguished Senator from Connecticut and I are members.

It is highly important that the committee have these specific recommendations and justifications. For instance, I proposed a very comprehensive and broad bill for disaster insurance. I intend to modify that bill very seriously and drastically in the light of the testimony which has been taken by the Banking and Currency Committee. During the hearings, which lasted 3 months, we learned things we had not known before, and which require very careful consideration by the committee. I mention these matters merely to show that this very vital subject will receive the most careful consideration by the Banking and Currency Committee.

There is one point I have been repeatedly emphasizing and that I would like to make again—and I believe the Senator from Connecticut will agree with me—namely, that legislation of this character cannot be considered as being merely of local concern. We cannot possibly hope to get legislation on this subject approved by Congress, if only the Northeastern States and California, Nevada, Oregon, the Carolinas, and some other States are interested. This issue and this problem are national in scope. The people of Arizona, New Mexico, Michigan, Minnesota, Tennessee, and Oklahoma are just as much concerned as are the people of the Northeastern States, the Southern States, and the Western States.

So I desire to emphasize that this issue is a national one, and I hope it will be treated in that way by the Members of Congress when the definitive bills come before us.

I thank the Senator from Connecticut for yielding to me.

Mr. BUSH. First, Mr. President, I wish to acknowledge gratefully the comments made by the Senator from New

York in the earlier part of his remarks, and to say that I commend him for the manner in which the hearings of the Banking and Currency Committee were held in various parts of the country, and for the vigor and enthusiasm with which he conducted them. They were very well conducted, and I am sure they shed a great deal of light on this problem.

On the other hand, I wish to take sharp issue with the remarks of the Senator from New York concerning the bill I have introduced; I refer to the flood indemnity bill. There is nothing local about it. It will provide benefits to citizens all over the United States in flood-threatened or flood-affected areas. So I hope the Senator from New York did not mean to indicate that the bill is a local one.

Some of the other bills I introduced today do have special bearing—for instance, the bill providing for the construction of several new dams in New England. Of course, in a sense that is a local bill.

Mr. LEHMAN. Mr. President, will the Senator from Connecticut yield further to me?

Mr. BUSH. I shall be glad to yield in a moment.

First, I wish to state emphatically that there is nothing local about the administration's proposal for flood-indemnity insurance.

Mr. LEHMAN. Mr. President, will the Senator from Connecticut yield at this time?

Mr. BUSH. I yield for a brief question.

Mr. LEHMAN. I merely wish to correct any misapprehension the Senator from Connecticut may have had if he felt that I reflected on his bill as a local one. I was trying to say that in order to obtain the enactment of the bill, we have to have the support of a majority of the 48 States and of the entire Nation. I am convinced the issue of disaster insurance affects every State in the Union and should have the support of every State in the Union.

Mr. BUSH. With that I agree. We have as sponsors of this bill Senators from the West coast, from the East coast, and from the Middle West. I think in a few days we shall have sponsorship for the bill from every area in the United States. So I fully agree with the Senator that the bill must be one which has a broad national appeal.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. BUSH. I was asked some time ago to yield to the Senator from Nevada [Mr. MALONE], which I now do, for a question.

THE WESTERN NEVADA FLOOD AREA

Mr. MALONE. Mr. President, I have joined the distinguished Senator from Connecticut [Mr. BUSH] in amending and strengthening the permanent legislation, because it is necessary pending the permanent preventive work, which should be the objective rather than relief after the damage is done.

Mr. BUSH. I agree very strongly with the Senator in that respect.

CREDIT IS DUE

Mr. MALONE. I wish to pay my respects, if the Senator will further yield to Mr. Val Peterson, Director of the Civil Defense Administration; Mr. George H. Roderick, the Assistant Secretary of the Army; Gen. Charles G. Holle and his staff, which included General Itschner with whom the first negotiations were conducted. A plane was provided leaving for Reno on Christmas day, Sunday at noon, via Battle Creek, Mich., to pick up Governor Peterson. They remained overnight and until 4 p. m. the next day, inspecting the damage. They were very prompt and very helpful.

I wish to pay my respects also to the Small Business Administration, the FHA, the Red Cross, the Army engineers, to whom I have already referred, the Bureau of Reclamation, the National Guard of Nevada and to Col. Burton E. McKenzie, head of the Air Corps at Reno.

Much of the potential damage was prevented because of the prompt work accomplished by these organizations already within the area. The real flood prevention, when the danger first threatened, was headed by Mr. Len Harris, mayor of Reno, assisted by the mayor of Sparks, and by E. Holgate, county engineer, Washoe County.

Governor Russell wired the President asking that the area be classified as a disaster area and the President, already advised of the danger, acted promptly.

Mr. BUSH. If the Senator will allow an interruption, I join very heartily with him in the comments which he has made with respect to Governor Peterson and the others whose service was so amazing at this time of crisis in our area. I am sure the same situation must have prevailed in the western part of the United States.

In due course I intend to join with other Senators in paying more extended tribute to these officers of the Government who rallied so beautifully to our aid.

CONGRESSIONAL AUTHORIZATION NECESSARY

Mr. MALONE. Such commendation is highly deserved.

On Sunday, Christmas day, I walked away from a turkey that was being placed in the oven and boarded a plane with the gentlemen I have mentioned. We picked up Val Peterson in Battle Creek, and proceeded from there. The Christmas dinner is still postponed.

I shall have much more to say when the bills come before the Senate. The Army engineers and the Bureau of Reclamation have been very industrious over the past 35 or 40 years in carrying out the mandates of Congress in flood control, river improvement, and irrigation projects, which, incidentally, furnish flood control.

I have worked with them as a private engineer, as State engineer in my State of Nevada, and then as a Member of the Senate. All they need is proper authorization by Congress and the appropriation necessary for their investigation and for the construction of the projects.

PUBLIC SHOULD KNOW ABOUT PREVENTIVE PROJECTS

It has not always been easy. Congress responds to public demand; however, the public, unfortunately, are only aroused after the damage is done.

With respect to my own State, the project which is now before our Committee on Interior and Insular Affairs for action, required several years of joint investigation by the Army engineers and the Bureau of Reclamation.

If that project—the Truckee-Carson project—had been constructed, with the large dam on the upper Truckee and a large dam on the upper Carson, much of the damage would have been avoided. Congress can accelerate action on such preventive projects. In my part of the country—perhaps contrary to what is done in the Senator's State—we store water and use it for irrigation. We have not always called that operation flood control; but when we build dams for irrigation they furnish flood control, and often power, to repay the cost.

EXISTING PREVENTIVE WORKS

I was State engineer when the Boulder Dam—now Hoover Dam—was built, to furnish flood control for the Imperial Valley and other areas and to furnish irrigation water and power. One of the proudest things in my record is the fact that that project was designed to pay back every dime of its cost, with interest, and is meeting the definite annual amortization and interest costs.

Then there was the Central Valley project, which was mentioned by the Senator from California [Mr. KUCHEL]. I was consulting engineer on that project, after I left the office of State engineer.

Then followed the Los Angeles flood-control project, and the Orange County flood-control project, for which I was consulting engineer.

PUBLIC REALIZATION

It is very unfortunate that such flood damage must occur to bring the subject to the attention of the public.

Now that attention has been called to the hundreds of millions of dollars of damage to these areas, I hope there will be a full realization on the part of all Members of Congress that such damage can happen anywhere and that also a major portion of such damage can be prevented through the construction of feasible projects.

Instead of waiting for the damage to occur and then appropriating millions of dollars to try in some small measure to reestablish individuals and industries ruined in whole or in part, it is so much better to authorize investigations of projects by the Army engineers and the Bureau of Reclamation and to construct such projects if such construction is justified under the principles long established by Congress.

FLOOD INSURANCE

Let me refer briefly to the subject of flood-control insurance. I refer to it only briefly at this time. When these subjects come before the Senate I expect to particpate in the debate.

Private insurance is not available for flood damage. The area threatened by floods is comparatively small. Fire insurance and other kinds of insurance are easy to obtain because of their universal application.

The cost of flood-control insurance to the individual makes it prohibitive. So preventive measures furnish the long-range answer—and a reasonable partial solution may be found pending such permanent solution.

Mr. BUSH. I am sure the Senator would not feel that we should not consider insurance until we have attained prevention. Does the Senator not agree?

Mr. MALONE. I agree that we must consider it. However, the further we go into the question, the clearer it will become that a large part of such flood insurance will be a subsidy. It will not be insurance in the usual sense.

At the proper time the debate will disclose all the available information. There may have to be some limited subsidy but it must be carefully considered.

ORIGIN OF PUBLIC LAW 875

In passing, let me say that I was a member of the Senate Committee on Public Works when a disaster to a little known industrial center in Oregon just outside Portland washed away practically the entire town.

The subject was considered before our committee. I was chairman of the subcommittee. At that time, whenever there was a great disaster, it had to be brought to the attention of Congress on an individual basis and no money was available until Congress acted.

My committee inquired, "Why do we not make some general revolving fund available to the President, so that when a governor asks for disaster relief, the President, if he deems the affected area to be a disaster area, may afford relief. He would then have a fund to use immediately without coming to Congress." I am proud to say that I had some part in framing the legislation now known as Public Law 875.

Insurance is another consideration.

I think we should consider the question, because we are a large enough country financially to participate in reorienting area disasters.

We have practically every country in the world on our payroll now. We are building projects all over the world by Executive order.

If a project is located in Egypt or France it is not necessary to come to Congress. Someone in a government that we hardly know can order the job done, so I think it is time that we paid more attention to our own people.

Mr. BUSH. I thank the Senator for his assurances and interest and support with respect to the proposed protective legislation; also for his interest in the insurance program.

I now yield to the Senator from Oregon.

Mr. MORSE. Mr. President, I commend the Senator from Connecticut for introducing the proposed legislation to which he has referred. As a coworker with him on the Committee on Banking and Currency, I am sure that he knows that it will receive our very careful consideration.

I greatly appreciate the kindness of the Senator in inviting me to be a cosponsor of the bill. I assure him that my declination in no way represents a lack of interest on my part in the objectives which the Senator has in mind. However, I happen to be preparing proposed legislation of my own on flood control and disaster problems which I think is more comprehensive. It is my view that the proposed legislation which I am certain co-sponsors are preparing is to be preferred to the proposals of the Senator from Connecticut.

Nevertheless, there is so much merit in the objectives of the Senator from Connecticut that he will find me a coworker with him in the committee in trying to accomplish our mutual objective in this field of flood control and disaster relief. I shall go as far as it is possible to go with him in support of certain features of his proposals, and I hope I can induce him to go further and give support to my more comprehensive program which places great emphasis on flood and disaster prevention.

As the Senator from Nevada [Mr. MALONE] has pointed out, our problem is not only to bring relief to the people who have suffered these disasters, and to provide some insurance protection to help them when other disasters come, but our real job of statesmanship in this field is to proceed with public works which will prevent the recurrence of such disasters.

The Senator from California [Mr. KUCHEL] pointed out the great attributes of Shasta Dam as a preventive bulwark in connection with floods in California.

I should like to show the Senator from Connecticut the horrible disaster in those parts of my State where we had not developed the dams which would have prevented the recent floods. Then I should like to show the Senator from Connecticut the parts of my State which, if we had not built the dams that are there now, would have been washed out along with those parts of the State that suffered the great flood disaster.

I should like to take the Senator from Connecticut to my home county in the area below Detroit Dam and show him what happens when we build flood control dams.

I wish to stress at this point—and I shall not take longer now, because I shall discuss the subject at some length next week—we need to build many flood control dams throughout the Nation. The importance of a preventive program of speeding along with the multiple-purpose dams, for which I have been fighting during all my years as a Member of the Senate should be faced up to by this session of Congress. I call particular attention to the Hells Canyon Dam and to the great flood control water storage which it would provide in my State from that standpoint alone. If flood control water storage were the only justification for the Hells Canyon Dam, it would be sufficient justification for the Federal Government to build the dam. I contrast the great water storage which would be provided by Hells Canyon Dam with the puny water storage which would result from the Idaho Power Company's plan, on which this administration to its discredit has placed its stamp of approval.

What we should do at this session of Congress is stop stalling on legislation which would protect our people from unnecessary flood losses and proceed with a Federal flood control program by appropriating money for the most rapid completion in the Willamette Basin of Cougar Dam, for example, by the Federal Government; of the Hills Creek project,, by the Federal Government; of the Green Peter project, by the Federal Government. Then on the Columbia we should appropriate the money for speeding up the John Day project as a Federal Government project, contrary to the unfortunate and sorry partnership recommendation of the President of the United States in his state of the Union message today. We should vote the necessary funds to speed up Ice Harbor and every other authorized project so sorely needed to give the people in the Pacific Northwest protection from the constant threat of flood disasters. Do I plead alone for the people of my State? Not at all. Each one of us is a Senator from our State for our Nation. I plead for a comprehensive flood control program for the Nation. I pledge my support to other Senators who are confronted with the same flood control needs in their States. If we build such great monuments to disaster prevention, we will live up to the requirements of statesmanship in the field of disaster prevention.

In this session I recommend such Federal projects to the President of the United States, and I respectfully suggest that he send to Congress an amended state of the Union message on the whole matter of water resource development and flood prevention.

Mr. BUSH. I thank the Senator from Oregon for his opening remarks with respect to my proposal and with respect to the whole subject in general. I am certain that as a member of the committee he will be very helpful in working out legislation which will be of benefit to the whole field of flood-stricken and flood-endangered areas.

However, I am afraid that I must dissociate myself with the last part of the Senator's remarks in the present debate on flood insurance. I am sure the Senator will excuse me if I do so.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. BUSH. I yield to the Senator from North Dakota.

Mr. LANGER. I wish to assure the distinguished Senator from Connecticut that the senior Senator from North Dakota will certainly fight for every proposal to build the dams that are needed in the area referred to by the Senator from Connecticut.

However, I am concerned with respect to the matter of insurance. Unfortunately I was called out of the Chamber during the first part of the debate, when the Senator from Nevada was interrogating the Senator from Connecticut. Of course the bills have not yet been printed, but I should like to inquire at this time whether the bills provide for private insurance or Government insurance.

Mr. BUSH. The bill which I have introduced on insurance provides indemnity. The premium would be paid, 60 percent by the individual, 20 percent by the State, and 20 percent by the Federal Government.

All the administrative expenses connected with the program would be paid by the Federal Government. A limit is

provided. For example, no person could obtain insurance in excess of $250,000. I point out to the Senator from North Dakota that such a provision of the bill would give very broad coverage, but would not allow any large industrial operator to receive more than $250,000 worth of insurance. The New Haven Railroad, for example, lost more than $10 million during the last disaster. However, under the bill, that company could get only $250,000 in insurance.

Mr. LANGER. That is one section of the bill I shall wish to scrutinize very carefully.

Mr. BUSH. I hope the Senator from North Dakota will do so.

Mr. LANGER. I do not propose to fight for any bill which gives a windfall to any private insurance company.

Mr. BUSH. The bill would not give a windfall to any private insurance company. The Senator from North Dakota will find that under the bill the Government would depend on the cooperation of private insurance companies, not for profit, but in the distribution of the insurance and in the settling of claims, and so forth, but under the aegis of the administrator of the program. Therefore the facilities of the private insurance industry would be utilized, but nothing in the bill could be of profit to such insurance companies.

ORDER OF BUSINESS

Mr. CAPEHART. Mr. President, I do not know when the President-elect of Brazil will arrive in the Chamber. However, I should like to ask unanimous consent that my remarks and any remarks in respect to them be printed in whole at the end of the ceremonies welcoming the President-elect of Brazil. I also ask unanimous consent that after the ceremonies I may have the floor.

The PRESIDING OFFICER (Mr. McNAMARA in the chair). Is there objection? The Chair hears none, and it is so ordered.

VISIT TO THE SENATE OF HON. JUSCELINO KUBITSCHEK DE OLIVEIRA, PRESIDENT-ELECT OF BRAZIL

Mr. MORSE. I understand that the President-elect of Brazil has arrived. If the Senator from Indiana will yield for that purpose, I should like to suggest the absence of a quorum.

Mr. CAPEHART. I shall be happy to yield for that purpose, with the understanding, however, that following the ceremonies honoring the President-elect of Brazil, I shall have the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MORSE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Presiding Officer appoint a committee to escort to the Chamber of the Senate the President-elect of Brazil.

The PRESIDING OFFICER. Without objection, the Chair appoints the senior Senator from Texas [Mr. JOHNSON] and the senior Senator from California [Mr. KNOWLAND] a committee to escort the distinguished President-elect of Brazil to the Chamber.

Mr. JOHNSON of Texas. Mr. President, I now move that the Senate stand in recess, subject to the call of the Chair.

The motion was agreed to; and (at 2 o'clock and 42 minutes p. m.) the Senate took a recess, subject to the call of the Chair.

The Senate being in recess, the Honorable Juscelino Kubitschek de Oliveira, President-elect of Brazil, and Mr. A. José de Seabra, of the State Department, escorted by the committee appointed by the Presiding Officer, consisting of Mr. JOHNSON of Texas and Mr. KNOWLAND, entered the Chamber, and took the places assigned them on the rostrum in front of the Vice President's desk. [Applause, Senators rising.]

The VICE PRESIDENT. Members of the Senate and our guests in the gallery, it is my great privilege to present at this time the President-elect of the United States of Brazil. [Applause, Senators rising.]

ADDRESS BY THE HONORABLE JUSCELINO KUBITSCHEK DE OLIVEIRA, PRESIDENT-ELECT OF THE UNITED STATES OF BRAZIL

Thereupon, from his place on the rostrum, the President-elect of Brazil delivered the following address:

President-elect KUBITSCHEK DE OLIVEIRA. Mr. Vice President and Members of the Senate: E com emoção que vos falo, na qualidade de Presidente eleito dos Estados Unidos do Brasil. Emoção justificada, pois tenho a oportunidade de dirigir-me, em nome de meu país, através de uma das maiores tribunas livres do mundo, à nação generosa e forte, a quem a nossa civilização deve apoio decisivo em algumas das horas mais perigosas e mais difíceis que a humanidade atravessou.

Maior do que o vosso progresso e do que êste poderio material incomparável, de que resultou a maior justiça social existente no mundo, justiça baseada na prosperidade e na dignidade da pessoa humana, maior do que vosso parque industrial, do que a fecundidade dos vossos campos, do que a vossa riqueza, é o emprêgo heróico que dela fizestes no passado de ontem, arriscando-a, duas vêzes em meio século, quando a opressão ameaçou o que constitui para vós e para nós também a própria essência da civilização, que é a liberdade do homem, o respeito pelo homem, inviolável na sua consciência e no seu direito e a independência da cultura.

Não vos impusestes ao mundo apenas pela fôrça das armas, mas pela fidelidade às vossas idéias, pela aplicação altruística de um poderio que provastes estar em condições morais de possuir.

Durante as duas últimas guerras em que interviestes, vencendo muitas resistências e rarazões que vos aconselhavam a permanecerdes na vossa casa, encontrastes o meu país ao vosso lado, não oferecendo cooperação comparável com a vossa, mas correndo o mesmo risco.

Participamos conjuntamente das duas conflagrações, não por espírito de solidariedade continental, embora êsse epírito seja forte no Brasil, mas por comungarmos nos mesmos, ideais, nos mesmos sentimentos, no mesmo respeito à eminente dignidade do homen, que vos levaram a pegar em armas e combater com decisão incomparável.

Não quero perder o ensejo de reverenciar a memória dos jovens mortos desta nação pelos serviços que prestaram às nossas pátrias e tudo o que fizeram para que vivêssemos no estilo em que desejamos viver: livres, com as crenças e princípios cristãos que nos formaram e a que desejamos continuar fiéis.

Não devemos esquecer as obrigações que assumimos com os que se devotaram até ao sacrifício da própria vida: essas obrigações consistem principalmente na defesa da democracia e na independência dos povos. Seria trair o que há de mais sagrado para as nações, os que morreram nas guerras justas por um ideal—e neste momento me lembro dos cemitérios militares europeus e entre êles o Campo Santo de Pistóia, onde estão adormecidos no seio do Eterno os soldados brasileiros—seria esquecer as horas decisivas o não defender a liberdade do homem, o não defender o govêrno democrático, enquanto êle estiver ameaçado.

A nação brasileira repele tôdas as formas de tirania, tal como vós também o repelís: a tirania e a opressão, venham da direita ou da esquerda, nos causam indignada repulsa. Estamos, nós brasileiros, atentos e empenhados em conservar as conquistas de nossa liberdade, que nos custaram muito a adquirir.

Anação brasileira ama a liberdade de seus filhos tanto quanto a nação americana a nação brasileira ama e defende o seu patrimônio moral e espiritual e nãa precisa de quem lhe dê lições de respeito a si mesma, como é também o vosso caso. Somos bastante conscientes para saber, porém, que a luta contra os extremismos atentatórios às prerrogativas do homem está ligada muito mais do que à repressão violenta, à solução dos problemas graves do desenvolvimento e da prosperidade.

Sabemos que o combate às idéias de opressão se faz com atos fecundos e não há remédio mais eficaz para a cura da doença anti-democràtica do que o contentamento e a satisfação dos povos. Combater as idéias extremistas em meu país, idéias cujos adeptos hoje estão em reduzida minoria, é principalmente fazer com que o Brasil se encontre com o seu destino, é trabalhar pela melhoria de nível de vida do povo, incessantemente, tal como o fizestes aqui.

Não acreditam os brasileiros que o problema social possa ser combatido com eficiência senão pelas armas do desenvolvimento, da expansão, do progresso, da melhoria das condições de vida da população, e naturalmente pela cultura de base humanística e pelo aprofundamento da noção da lei moral.

Creio que já vos disse o necessário, na brevidade destas palavras, senhores membros desta alta casa que é o Senado

dos Estados Unidos da América do Norte, para que conhecesseis as intenções e os desejos de colaboração e entendimento, os propósitos de progresso social e o pensamento político que animam o futuro govêrno do Brasil em relação ao vosso país.

Já vos disse do caráter afirmativo e pioneiro que norteará o meu govêrno. Quero, ao terminar estas palavras, saudar-vos mais uma vez e afirmar-vos que não seria realmente importante a vossa grandeza material, se não a tivesseis pôsto a serviço de grandes a nobras causas, notadamente a causa da defesa do homem, da sua liberdade e do seu bem estar neste deficil planeta de que nos fêz habitantes o alto designio de Deus.

The address of the President-elect of Brazil was interpreted by Mr. A. José de Seabra, of the State Department, as follows:

Mr. Vice President and Members of the Senate, it is with deep emotion that as President-elect of the United States of Brazil I am addressing this august assembly. My emotion is justifiable, for, on behalf of my country I am speaking from one of the greatest of free platforms in the world to the stalwart, generous nation to whom our civilization is indebted for timely support in some of the most perilous and perplexing hours of need that have ever befallen mankind.

Great as is your progress and that unequaled wealth and power which has vouchsafed you the highest form of social justice existing on earth, justice founded in the prosperity and dignity of the individual; great as is your industrial network, the fertility of your well-tilled fields, your very riches; nobler far is the heroic use you made of them in the near past, endangering them, twice in half a century, when oppression laid siege to what is for you, and for us too, the basic framework of civilization, and that is the freedom of man, the respect for man, unassailable in his conscience and in his rights, and the independence of his way of living.

Yet you did not sway the world merely by force of arms, but rather by faith in your ideals, by the unselfish exercise of power that you have proved morally fit to possess.

In the course of the last two wars in which you intervened, overcoming resistance from many a quarter and discarding multiple reasons that urged you to stay at home, you found my country at your side, unable to cooperate on the same scale as yours, but running the same risk.

Together we took part in the two conflagrations, not only from motives of continental solidarity, though this concept be firmly anchored in the Brazilian mentality, but also because we share the same ideals, the same sentiments, the same respect for the paramount dignity of man, that led you to take up arms and fight with unflinching valor.

I cannot fail to take this opportunity of paying homage to the young of your nation who died for this great cause and express my gratitude for the services they have rendered to our countries and for all they have done so that we may live as we want to live: free, and abiding by the Christian beliefs and principles of our upbringing, to which we aspire to remain faithful.

Nor should we forget the obligations we have assumed toward those whose devotion has gone as far as the sacrifice of life itself: these obligations consist mainly in the defense of democracy and the independence of peoples. It would be to betray what is most sacred to the nations, the dead fallen in righteous combat for an ideal—and here I call to mind the military cemeteries in Europe and among them, the Campo Santo of Pistoia, where the Brazilian soldiers are laid in eternal rest—it would be to forget the fateful hours not to defend the freedom of man, not to defend democratic government, whenever it is threatened.

The Brazilian nation rejects all forms of tyranny as you, too, reject them; tyranny and oppression, whether from right or left, are equally repulsive to us. We Brazilians are steadfast and determined to safeguard the fruits of our liberty, that we strove so hard to win.

The Brazilian nation holds the freedom of her sons as dear as does the American nation; the Brazilian nation cherishes and stands guard over her moral and spiritual heritage, and needs none to give her lessons in self-respect, herein again we are alike. We are, however, well aware that successful opposition to extremist ideologies that infringe on the prerogatives of man lies not so much in ruthless repression as in finding a solution to the grave problems of development and prosperity. We know that ideas of oppression must be routed by constructive action and that there is no more efficient remedy for curing the antidemocratic sickness than the contentment and satisfaction of the patient. To combat extremist ideas in my country—ideas now defended by but a small minority—it is chiefly necessary to bring Brazil into line with her destiny, to work constantly toward a higher standard of living as you have done in this country. Brazilians do not believe that the social problem can be efficiently coped with except by way of development, expansion, progress, an improvement in the living conditions of the population, and naturally by the spread of culture along humanistic lines and by deepening the concept of moral law.

I feel that I have now said enough, gentlemen of this high Chamber which is the Senate of the United States of America, for you to recognize the intentions and desires of cooperation and understanding, the design for social progress, and the political line of thought which characterize the future Government of Brazil with regard to your country. I have already outlined the constructive and pioneering zeal which will be the mainspring of my government. In a few parting words, I should like to convey once again the depth of my sentiments and to stress that your material greatness would not be really great, had it not been made available for the furtherance of great and noble causes, notably the defense of man, his freedom and his well-being on this complex planet of ours on which God has seen fit to place us.

The VICE PRESIDENT. Mr. President-elect, the Members of the Senate by their applause have indicated their appreciation of your very eloquent and kindly remarks. You have honored us by appearing before us on this day, and you have helped to make this day perhaps one of the most significant in the history of the United States Senate. I doubt if there has been another occasion on which this body has, during 1 day, heard messages from two Presidents, the President of the United States of America, and the President-elect of the United States of Brazil, the Presidents of the two largest countries in the American Hemisphere.

For helping to make this a memorable occasion, we express our appreciation to you. We hope that you and the members of your party in the diplomatic gallery will enjoy their visit to the United States. We certainly have enjoyed their visit to us.

Before you go to the well of the Senate to greet the Members of the Senate, I think we should first pay our respects to two very distinguished diplomats who are on the floor. One is a man who has served in the diplomatic corps of his country for 37 years. He is one of the great Ambassadors in Washington and in the whole world, the Ambassador to the United States from Brazil, Mr. João Carlos Muñiz. [Applause, Senators rising.]

Another Ambassador who is present today is a man many of us have met in various positions in which he has served, in Italy, in Spain, and now in Brazil, the distinguished Ambassador from the United States to Brazil, James Clement Dunn. [Applause, Senators rising.]

The President-elect of Brazil is now invited to repair to the well of the Senate to be introduced to the Members of the Senate.

The President-elect of Brazil was escorted to a position on the floor of the Senate in front of the Vice President's desk, and was there greeted by Members of the Senate, who were introduced to him by Mr. JOHNSON of Texas and Mr. KNOWLAND.

Following the informal reception, the President-elect was escorted from the Chamber.

LEGISLATIVE SESSION

At 3 o'clock and 11 minutes p. m., the Senate reassembled, when called to order by the Presiding Officer [Mr. MCNAMARA.]

PROPOSED INTERNATIONAL FOOD COMMUNITY BOARD ACT OF 1956—INTRODUCTION OF A BILL

Mr. CAPEHART. Mr. President, I introduce, for appropriate reference, a bill to create an international food community board. I am introducing the bill on behalf of myself, the Senator from South Dakota [Mr. MUNDT], the Senator from Minnesota [Mr. THYE], the Senator from North Dakota [Mr. YOUNG], the Senator from Maryland [Mr. BUTLER], the Senator from Idaho [Mr. WELKER], the Senator from Georgia [Mr. GEORGE], the Senator from South Dakota [Mr. CASE], the Senator from Indiana [Mr. JENNER], and the Senator from Wyo-

ming [Mr. BARRETT]. I understand that possibly other Senators may wish to join in sponsoring the bill.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2852) to create an International Food Community Board, and for other purposes, introduced by Mr. CAPEHART (for himself and other Senators) was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. CAPEHART. Mr. President, the purpose of the bill is fourfold: First, to help the American farmer; second, to help the American economy, because the American economy will not stand very long unless the farmers of America are prosperous; third, to help the poor people of the United States; and, fourth, to help the poor peoples of the free world.

Mr. President, every informed person must agree that farm commodity prices have not kept pace with our expanding economy, and that something must be done to raise the level of farm prices. I believe that one of the most direct causes of the current subnormal farm commodity prices is the $7,500,000,000 inventory owned by or pledged to the United States Government—a tremendously large inventory of farm products, which is hanging over the market and is tending to depress farm commodity prices.

Mr. President, I shall repeat myself many times in the course of my remarks during the next 20 minutes, when speaking of the problem caused by the surplus of farm commodities, because there can be only one reason for low farm-commodity prices today. As everyone knows, farm-commodity prices are too low in comparison with all other prices; and unless we correct that situation, the economy of America will eventually break down, and farm-commodity prices eventually will bring down all other prices. In my opinion, there will be a depression or a recession in the United States, unless we can get farm commodity prices back in line with all other prices, or at least get them near all other prices.

It must be that the cause of the low farm-commodity prices of today is the surplus. If not, what is the cause? It must be the surplus. I have traveled all over my State of Indiana, and have had meetings with farmers and farm leaders and the agricultural professors at Purdue University, and I have talked to dozens and dozens of persons. I have not found one who does not agree that the present low farm-commodity prices are due to the surplus. That must be the cause.

If the surplus is not the cause, then God help us, because under existing economic conditions one would expect farm commodity prices to be high. I refer to the situation which discloses that 66 million persons are employed at the highest wages in the history of the Nation, that business is enjoying the greatest prosperity it has ever known, that we are producing nationally, and in excess of $400 billion, that there is more money in the banks and more money in the people's pockets, than ever before in the history of the United States. Under those conditions, one would naturally think that farm-commodity prices would be high, or at least as high as other prices.

However, that is not the case. Today farm-commodity prices are not high. Those prices have not been kept in line with other prices, and that has resulted because of the huge surplus of farm commodities.

Mr. President, one may ask, what is the huge surplus of agricultural commodities? Who owns that surplus? How did it come to be created? Who was the cause of it?

I care not who owns it or how it came to be created. That makes no difference to me, and it should not make any difference to any other Member of the Senate. The fact is that we have approximately $8 billion worth of farm commodities as a surplus, and that surplus has been accumulating over a number of years, and under two Presidents—a Republican President and a Democratic President.

One can work out for the future all the farm plans he may care to, even the best farm plan in the world, but that will not solve the problem of existing farm-commodity prices. It will not result in farm-commodity prices rising again. The only way to get them up again is to get rid of the surplus.

I hold in my hand a copy of this morning's edition of the Washington Post and Times Herald. On the front page there appears a large headline, "Plan Drawn To Cut Farm Surpluses," and in the article following it is stated that a "two-phase plan" has been drafted to curb farm surpluses.

Mr. President, there is no question that the farm problem is a two-pronged affair. First, we have to get rid of the surplus, and then we have to put into effect legislation which will make certain that there will not be similar surpluses in the future. There can be no question about that. However, it will not do any good to work out the second phase—that calling for a long-range program to eliminate future surpluses—if we do not get rid of the present surplus. The article states that a long-range plan is being drafted to curb farm production. However, it does not say that the plan will get rid of the farm commodity surpluses at the moment.

Mr. President, the bill introduced by me, together with other Senators, is aimed at one purpose, and one purpose only; namely, to get rid of the existing farm commodity surpluses, and to get rid of them at the earliest possible moment. Our bill will do that through the medium of a five-man board which will be authorized to do certain necessary things. The administration has been getting rid of many surpluses. It has been doing a good job under existing conditions, but the job has not been good enough, because we still have surpluses.

Under this bill the Congress of the United States would say to the administration—and I happen to know that the administration would welcome such a mandate—"We want you to get rid of the existing surpluses."

Let me refer to some of the significant features of the bill.

First, the five-man board to administer the program would be composed of the heads of existing Government agencies. No new agency or staff would be created to administer this program. The distribution of agricultural surpluses would be through present Government agencies.

Second, distribution of these agricultural surpluses would be undertaken in such a manner as not to replace, divert, or interfere with existing commodity markets, but would be confined exclusively to peoples not otherwise able to purchase such goods.

The surpluses would go to people in the United States and other countries in the world who would not otherwise be able to purchase the foodstuffs. That is the only way we can help get rid of the surplus, because our surplus is a part of the world surplus. It is a part of the world food supply.

For example, it would do no good, if there were a surplus of shoes, to give me a pair of shoes, because I will buy a pair of shoes if I need them, and I have plenty of shoes. But it would help the surplus if we gave a pair of shoes to a little tot across the street who did not have a pair of shoes, or had a pair of shoes that was completely worn out, and who, if we did not give her a pair of shoes, would never have another pair. So we are talking about the humanitarian aspects of getting rid of the huge surplus of some $8 billion worth of foodstuffs, and at the same time helping our own farmers and our own economy.

Third, there would be excluded from the program such agricultural surpluses as the President estimates are needed for a national reserve, or can be sold through existing programs within the next 3 years. We would give away only what we could not sell and did not need for a national emergency reserve.

I have heard people say that they are against giving the surplus away. As a businessman, I know that when a businessman has a surplus, he endeavors to get rid of it. He sells it, if he can, at existing prices. If he cannot, he lowers the price. If he cannot sell it at a lower price, he says to a prospective buyer, "If you buy one, I will give you two." He takes whatever steps are necessary to get rid of his surplus. As a businessman, he knows that he cannot hope to conduct a stable, successful business so long as he has a surplus inventory.

We cannot operate the agricultural machine in the United States with a $8 billion surplus. One may ask, "What interest does the Congress have in it?" We, the Government, own the $8 billion surplus. The farmers do not own it. Businessmen do not own it. The Government owns it, and the Government is represented by the Congress of the United States. We own it. Only we—meaning the Congress of the United States—have any authority whatsoever to dispose of the surplus.

We must be realistic. We asked the farmer, during the Korean war, and at other times, to produce more and more, and he did so. The Government of the United States purchased his production

under support plans. The Government now owns the surplus. It is in warehouses all over the United States. It is our responsibility to get rid of it, and we had better get rid of it.

This bill would mandate the administration to establish a commission which would devise ways and means of selling, bartering, or giving away the surplus.

Gentlemen have said to me, "I do not know why we should give away foodstuffs to other peoples." Primarily we are doing it to help ourselves. We have the surplus. It is costing us $1 million a day to store it, and it will soon start bankrupting many farmers in the United States.

It is costing the American Government the interest on $8 billion, and it will be costing the American Government a great deal of money in the form of loss of taxes which the farmers will not pay because they will be making no profits.

I am pleading with the Congress of the United States to do something about the surplus, because the Congress is the only instrumentality that can do anything about it. I am pleading with the Congress to say to the administration, "We want you to get rid of the surplus. We want you to sell it if you can. If you are unable to sell it, we want you to barter it. We want you to sell it and take foreign currencies in exchange for it. If you are unable to do that—and there are places in the world where you will be unable to do it—we want you to give it away. You must get rid of it."

If we do not get rid of the surplus, we shall have low farm commodity prices, and we shall not solve the problem.

People say to me, "We ought to get out of the farm problem entirely. We have no business in it." I do not intend to argue that point today. It is too late to argue it. We went into the farm problem in 1934, when we adopted the general farm policy which we are using today.

Some 20 years ago we adopted the general farm policy which has been responsible for accumulating surpluses. It will do no good to blame anyone for it. That will not get rid of the surplus. We must dispose of it.

I do not know of any rational person who would ever recommend that we destroy or burn the surplus. There are thousands of people in the United States who are underfed, and perhaps some who do not have any food. There are millions of people in the world who are underfed. Have we not sufficient intelligence in the Congress, and as a people, to give away some of these foodstuffs?

I can think of many ways in which a commission could give foodstuffs away. First, of course, the food could be given to our own people.

Why do we not give the food to the township trustees, scattered throughout the United States in every county, and let them, in turn, distribute the food in the form of welfare relief, instead of the cash they now hand out?

Why do we not distribute the food in friendly free countries through private agencies and charitable organizations? The bill provides that the food shall be distributed by private nonprofit organizations.

The Government has already paid $8 billion for the food. My proposal does not require any additional appropriation. We have already paid for the food. It is already in storage. My plan would not require any additional money at all.

I say, Mr. President, we ought to have enough intelligence to handle the surplus problem. If somehow, in some way, tomorrow we could get rid of the huge surpluses, farm prices would go up to where they belong, and we would no longer have to worry about farm prices.

Of course, it will not be easy to get rid of the surpluses. It is not easy to give things away. It will require a great deal of intelligence. It will require the setting up of a commission such as I am proposing.

People have said to me, "Why do you wish to set up a commission? Do we not have many Government agencies already which could deal with the problem?"

My answer is that we do have a great many Government agencies. It is true, also, that they have been trying to do the job, but they have not been able to do it successfully, and that is because everybody's business is nobody's business. That is the trouble, Mr. President. There are too many people working on the job, with no one agency spending all its time in an effort to solve the problem. A centralized agency could deal with the problem, and we could hold such an agency responsible for getting rid of the surpluses.

Mr. President, I should like to have printed in the RECORD at this point a copy of the bill.

There being no objection, the bill (S. 2852) was ordered to be printed in the RECORD, as follows:

S. 2852

Be it enacted, etc., That this act may be cited as the "International Food Community Board Act of 1956."

DECLARATION OF PURPOSE

SEC. 2. It is the purpose of this act to distribute Government-owned stocks of surplus agricultural commodities by an orderly system of disposition of such commodities through private nonprofit organizations, and to needy peoples at home and in free foreign nations, and thus to relieve the agricultural economy of the United States of the harmful effect to fair market prices of these surpluses hanging over the market and at the same time provide food and clothing for underprivileged peoples of the free world.

INTERNATIONAL FOOD COMMUNITY BOARD

SEC. 3. There is hereby established in the executive branch of the Government an agency to be known as the International Food Community Board (hereinafter referred to as the "Board"). The Board shall be composed of 5 members who shall be appointed by the President from among the heads of departments in the executive branch most concerned with the purposes of this act. One of the members shall be designated by the President as Chairman and one shall be designated by him as Vice Chairman. No member of the Board shall receive any additional compensation for his services on this Board. Members of the Board shall serve at the pleasure of the President.

(b) The Board is authorized to appoint and fix the compensation of such officers and employees, and to make such expenditures as may be necessary to carry out its functions. The Board may delegate any of its functions to such of its officers and employees as it may designate.

(c) The Board shall, with the consent of the Government agency concerned, avail itself of the services and facilities of existing Government agencies in carrying out its functions under this act and may, with the approval of the President, delegate any of its powers to any Government agency.

(d) The Board is authorized to appoint without regard to the civil-service laws and regulations such advisory committees as it deems necessary to assist it in carrying out its functions under this act. Persons so appointed may be compensated at rates not in excess of $50 per diem and may be reimbursed for necessary traveling and subsistence expenses incurred by them while engaged in the business of the Board.

STATE LIAISON COMMITTEES

SEC. 4. The Board is authorized to appoint for any State or regional area, a State or regional liaison committee composed of three members. The Board shall perform its functions under this act in such States or regions with the advice and on the recommendations of such liaison committees. Members of such State or regional liaison committees shall serve at the pleasure of the Board, may be compensated at the rate of not more than $50 per diem, and shall be reimbursed for necessary traveling and subsistence expenses incurred by them while engaged in carrying out functions under this act. The Board shall provide each such liaison committee with such stenographic and other assistants as it may reasonably require. Such liaison committees shall be charged with the responsibility of assisting properly qualified applicants to avail themselves of the benefits of this program.

FUNCTIONS OF THE BOARD

SEC. 5. It shall be the duty of the Board to formulate and put into effect programs designed to carry out the purposes of this act. Such programs shall include, but shall not be limited to, plans for—

(1) the distribution over a period of approximately 3 years (or, in the case of perishable commodities, such shorter period as may be necessary to prevent spoilage) to needy peoples in the United States and in friendly foreign countries who would otherwise be unable to obtain such commodities or products, of all stocks of Government-owned surplus agricultural commodities, or products processed therefrom, less—

i. Such quantity of each commodity as the President may estimate is necessary to provide an adequate national reserve of such commodity for emergency purposes, and

ii. Such quantity of each such commodity as the President may estimate can be sold or otherwise disposed of, from the stocks of Government-owned agricultural surpluses, during the period of this program, through previously authorized programs, and

iii. The President may from time to time revise such estimates and thereupon this program shall be correspondingly revised.

(2) carrying out such distribution in a manner which will not materially displace, disrupt, or interrupt existing commercial markets;

(3) carrying out such distribution, to the maximum extent feasible, through the facilities of private nonprofit organizations in the United States and abroad and through locally sponsored or locally administered plans of operation;

(4) storing in foreign countries of commodities transported for ultimate distribution within, or in the areas of, such countries, and for the transportation abroad as soon as possible of the commodities proposed ultimately to be distributed abroad;

(5) transportation of commodities and products to be distributed to storage facilities in areas of distribution and the leasing,

or where necessary the construction, of necessary storage space in such countries;

(6) processing of commodities into consumable goods wherever possible without cost to the Government; and

(7) reimbursement of costs incurred by the Board in processing commodities into consumable goods and in providing transportation from storage facilities to points of consumption.

POWERS OF BOARD

SEC. 6. In carrying out its functions under this act, the Board is authorized to—

(1) obtain Government-owned surplus agricultural commodities from the Commodity Credit Corporation, without reimbursement to the Commodity Credit Corporation for such commodities, and the Commodity Credit Corporation is directed to deliver to the Board for the purposes of this act such commodities as the Board may request and which are to be disposed of under section 5 (1) of this act;

(2) enter into contracts for the processing into consumable goods and bulk packaging of such commodities, and for their transportation to storage facilities in areas of distribution (or, in exceptional cases, to points of consumption);

(3) enter into agreements, as provided in section 7 of this act, with private nonprofit organizations in the United States and in foreign countries for the distribution of commodities and products processed therefrom to the ultimate consumers thereof;

(4) accept donations of transportation, processing, and other services.

AGREEMENTS WITH DISTRIBUTING ORGANIZATIONS

SEC. 7. Agreements entered into pursuant to section 6 (3)—

(1) shall provide, except as provided in section 8, for payment to the Board for commodities or products furnished to the distributing organization, and reimbursement of the Board for costs incurred by it in the processing or transportation of such commodities or products, but such payment need bear no relation to the fair market value of the commodity or product, the purpose of this act being to distribute surplus goods to needy peoples;

(2) shall contain such provisions as the Board may deem necessary or appropriate to assure that the commodities and products to be distributed under such agreement will be delivered only to needy peoples not otherwise able to obtain such commodities, or to schools, hospitals, or other institutions for consumption or use by such peoples, all pursuant to the purposes stated in section 5, paragraphs 1 and 2, of this act;

(3) shall limit the charge made to recipients of such commodities or products to not more than actual cost to the nonprofit organization including processing and transportation (excluding local transportation in the country or area of distribution);

(4) may permit such nonprofit organization to contract with a processor to process any such commodities in exchange for byproducts thereof (provided that the fair value of the byproducts does not exceed the reasonable charge for such processing).

PAYMENT FOR COMMODITIES

SEC. 8. (a) The Board is authorized to distribute commodities and products under this act at such prices, not in excess of the fair value thereof, as recipients are able to pay, and as are consistent with the purposes of this act. Payment for such commodities and products may be in the form of—

(1) raw materials needed for stockpiling for national defense purposes;

(2) goods and services needed by Armed Forces personnel; or

(3) United States or foreign currencies.

Any foreign currencies acquired under the provisions of this subsection shall be purchased from the Board by the Export-Import Bank of Washington at current rates of exchange.

(b) Notwithstanding any other provision of this act, the Board may make commodities or products available for distribution under this act without any cost whatever to the distributing agency when the persons to whom ultimate distribution will be made are unable to make any payment therefor (or any payment in excess of transportation and processing costs).

(c) Amounts received by the Board under this section may be used to defray any proper costs of this program and any remaining funds shall be paid into the Treasury as miscellaneous receipts.

APPROPRIATIONS

SEC. 9. There are authorized to be appropriated such sums as may be necessary to enable the Board to carry out its functions under this act.

MISCELLANEOUS PROVISIONS

SEC. 10. (a) As used in this act, the term "Government-owned surplus agricultural commodity" means agricultural commodities acquired by the Commodity Credit Corporation prior to the date of enactment of this act through price-support operations or pledged to the Commodity Credit Corporation under agreements entered into prior to such date, and agricultural commodities acquired prior to such date through the use of funds made available under section 32 of the act of August 24, 1935 (Public Law 320, 74th Cong.).

(b) The Board shall take such action as may be necessary in order to make known to prospective applicants the availability of agricultural commodities and products for distribution under this act.

(c) Agricultural commodities and products stored in accordance with section 5 (4), shall remain the sole property of the United States and subject to its exclusive control until distributed by the Board in accordance with a program promulgated under this act. No commodities or products so stored shall be returned to the United States except in case of national emergency.

(d) The President is authorized to transfer to the Board any functions or duties of any other agency of the Government relating to the disposition of surplus Government-owned agricultural commodities.

(e) The Board shall transmit to the Congress annually a report of its activities under this act.

SEC. 11. This act shall expire on June 30, 1960.

Mr. CAPEHART. Mr. President, I should like to have printed in the RECORD at this point a statement which I have prepared on the subject.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR CAPEHART

I send to the desk a bill to create an International Food Community Board having as its purpose the distribution of existing excess agricultural surpluses to feed and clothe needy people in the United States and in free foreign nations, and thereby to relieve currently distressed farm prices of the depressing effect of these excess surpluses that hang over agricultural markets like a sword over one's head.

Every informed person must agree that farm prices have not kept pace with our expanding economy and that something must be done to raise the level of farm prices. I believe that one of the most direct causes of the current abnormal farm prices is the $7.3 billion inventory, owned by or pledged to the United States Government, of farm products hanging over the market and tending to depress farm prices.

We should, and we must, adopt production controls to keep future crops within reasonable limits of anticipated consumption. But this alone will not take care of the existing surpluses that have been building up in the United States since 1948.

I, therefore, propose that we dispose of this surplus, not only in the economic interests of this Nation, and particularly its farmers, but also that these surpluses may be used to feed and clothe underfed and ill-clothed people of the United States and of the free world.

Significant features of my bill are that:

1. The five-man board to administer the program would be composed of the heads of existing Government agencies. No new agency or staff would be created to administer this program; the distribution would be through existing Government agencies.

2. Distribution of these agricultural surpluses would be undertaken in such manner as not to replace, divert, or interfere with existing commodity markets and would be confined exclusively to peoples not otherwise able to purchase such goods.

3. There would be excluded from the program such agricultural surpluses as the President estimates are needed for a national reserve or can be sold through existing programs within the next 3 years. We would give away only what we cannot sell and do not need for a national emergency reserve.

4. Surplus supplies ultimately to be distributed abroad would promptly be transported to suitable areas outside the United States. The Board, of course, would consider military security features in its location of such storage areas. This would give us a storehouse from which to supply needy people outside the United States in the 3-year period of the program but would promptly remove those excess supplies from hanging over the United States agricultural market. Although stored abroad, these commodities would remain under the sole control of the United States until plans were promulgated for their ultimate distribution.

There are probably some features of my bill to create an International Community Food Board that it may be desirable to modify in order to perfect this bill. I will fight vigorously in this session of Congress for the adoption of this program; but I seek and will welcome help in achieving the most desirable means of carrying this program into effect.

The bill I am introducing today provides for the transfer of certain surplus agricultural commodities from the Commodity Credit Corporation to the International Food Community Board without reimbursement. I realize that this will result in a bookkeeping deficit in the operations of the Commodity Credit Corporation and will require an increase in its lending authority. Certainly this loss should not be charged against the farm program, and it would be unfair to consider that bookkeeping deficit of the CCC as attributable to the farm support program. On the other hand, to require this transfer at full market value would make necessary an appropriation by Congress of several billion dollars and thus perhaps make more difficult the actual achievement of this program. I am less concerned with the means by which the program is accomplished than I am that we succeed in removing these excess agricultural surpluses from being a continuing threat to the stability of farm prices and using those commodities to feed and clothe underprivileged peoples of the free world. On the mechanics of intragovernment bookkeeping for financing this program my views remain flexible.

This bill is intended to achieve points 1 and 2 in the Capehart farm program which I announced December 2, 1955. The eight points in that farm program are:

1. Increase farm prices by eliminating the great agricultural surpluses now depressing food markets through furnishing food to

hungry people throughout the world, this to be done in a manner that furnishes food to people who otherwise could not purchase those commodities. Every effort should be made to accomplish the purpose without displacing existing market demands for food commodities. It is time that we recognize the principle that providing food to the hungry, underprivileged people of the world by equitable distribution of our overabundance is more important than the maintenance of the present maladjusted distribution of food in the markets of the world.

2. The establishment of an international food community fund patterned after the Community Chest funds which are so effective throughout the United States. The purpose of this agency would be the distribution to needy peoples of the world, including those of the United States, of excess surplus food commodities of the United States until such time as supply and demand are in reasonable balance.

3. The establishment of rigid production controls to keep production within the reasonable limits of consumption until existing excess surpluses have been utilized; such production controls are necessary to achieve fair prices for farm commodities.

4. The establishment of a soil bank plan as an additional measure of limiting production. In most of the agricultural areas of the United States it is impossible to create substantially new acreage. The fertility of our soil is an important national asset that should not be wasted when its production is not presently needed.

5. That the Congress recommend that the President call a conference of food producers, processors, manufacturers, and distributors to seek means for enabling the farmer to receive a larger portion of the amount the American consumer pays for food.

6. The establishment of a Government research laboratory to find new and improved uses for farm products in industry with the objective that greater quantities and increased numbers of products of the farm can be utilized as raw materials of industrial production.

7. The promulgation of a plan to advertise farm products to promote their increased consumption such as has been utilized in the citrus fruit industry and would be financed by producers' contributions on a percentage of sales basis. Modern mass production in industry has been made possible through extensive promotional advertising. It is time we adopted those methods to increase consumption of farm products.

8. Take out of production land owned by the Government both for the growing of grains and for grazing purposes.

The last six points of the program are either: Capable of being put into effect without legislation; are apparently in the program of the Secretary of Agriculture—for example, the Soil Bank; or require only additional appropriations—the Government research laboratories.

When the agricultural appropriations bill comes to the floor of the Senate, I will offer an amendment to increase very substantially existing appropriations to the Department of Agriculture for its research laboratories in order to expand research into new and improved uses for farm products in industry.

During the next session I will press for each of these points in my December 2, 1955, farm program and will introduce whatever additional legislation may be necessary to achieve that end. We must, I repeat we must, bring the farmer up to the level of economic prosperity of the rest of the Nation.

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a press release which I issued on this subject.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C.—United States Senator HOMER E. CAPEHART today introduced, for himself and others, a bill creating an International Food Community Board for distribution of Government-owned agricultural surpluses to the needy of the United States and other nations.

Such a plan, the Indiana Republican said in an accompanying statement, would serve the dual purpose of utilizing surpluses for the needy and dissipating vast surpluses which continue to depress farm prices.

"I believe that one of the most direct causes of the current subnormal farm prices is the $7.3 billion inventory, owned by or pledged to, the United States Government, of farm products hanging over the market and tending to depress farm prices," Senator CAPEHART said.

"We should, and we must, adopt a program to keep future crops within the reasonable limits of anticipated consumption. But this will not take care of the existing surpluses that have been building up in the United States since 1948. I, therefore, propose that we dispose of this surplus, not only in the economic interests of this Nation, and particularly its farmers, but also that these surpluses may be used to feed and clothe underfed and ill-clothed people of the United States and of the world."

Senator CAPEHART'S bill covers 2 of the 8 points he enumerated in a program which he announced on December 2 as a means of bolstering the farm economy. He said the other six points of his overall program are either possible of being effectuated without additional legislation, covered by current proposals of the Department of Agriculture, or require only additional appropriations. He pointed out that Secretary Benson has favored the so-called soil bank plan, one of his original suggestions. He also said that when the agriculture appropriation bill comes before the Senate he will propose substantially increased appropriations for research laboratories to find new uses for farm products.

Other points in Senator CAPEHART'S overall plan call for production controls, a Presidential fact-finding board to study means of assuring that the farmer will receive a greater share of the amount Americans pay for food, a stepped-up advertising program for farm products, and removal of Government-owned lands from production of those farm commodities under crop control.

Senator CAPEHART proposed creation, through Presidential appointment, of a five-member International Food Community Board to be composed of the heads of executive agencies most concerned with the ramifications of the plan. They would not receive additional compensation. The Board would be authorized to appoint advisory committees and State liaison committees, the members of which would be compensated only on a per diem and expense basis.

Function of the International Food Community Board would be to effect the distribution over a period of approximately 3 years (or in the case of perishable commodities a shorter period) of such surplus commodities as the President deems not to be required for an adequate national reserve. In its allotments, the Board likewise would take into consideration such amounts of surpluses as can be disposed of in a 3-year program through existing disposal programs.

The bill directs that the Board carry out distribution insofar as possible through private nonprofit organizations in a manner designed to protect existing commercial markets.

Under the plan, the Board would transmit for storage in foreign nations such surpluses as might be required in any given area. In foreign countries, as well as in States within the United States, distribution would be carried out under locally sponsored or administered plans.

The Board would acquire commodities for distribution from Government-owned stocks without reimbursement to the Commodity Credit Corporation and would be authorized to accept donations of transportation, processing, and other facilities.

The bill sets up certain requirements to be included in agreements between the Board and distributing organizations, including the provision that the commodities may be distributed only to needy peoples not otherwise able to obtain such commodities or to schools, hospitals, or other eligible charitable institutions.

JANUARY 3, 1956.

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the RECORD at this point an editorial published in the Kokomo (Ind.) Tribune of December 5, 1955.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CAPEHART'S FARM PLAN

Senator HOMER CAPEHART, of Indiana, has given much time to consideration of the farm problem, as shown by a study of his broad plan for raising farm prices and disposing of the country's crushing food surpluses.

It remains to be seen whether the Senate and House Agriculture Committees will consider the Capehart program. Both committees are headed by Democrats and both will want to advance ideas offered by Democrats rather than by a Republican. Still, CAPEHART will be on record as proposing a powerful attack on the influences that have been depressing farm income.

The Capehart plan strikes at the problem on several fronts. It calls for feeding the world's hungry people—including the needy in America—with our food surpluses. This would be done through an international program similar to Community Chests. Referring to the surpluses, CAPEHART said: "When a businessman finds he's overstocked, he clears his shelves."

The Indiana Senator also proposes that production quotas be imposed on American farms until the surplus is cut down to a reasonable balance with consumption needs.

Another point in his program is for President Eisenhower to call a conference of food producers, processors, manufacturers, and distributors to seek means for enabling the farmer to receive a larger portion of the amount the consumer pays for food.

CAPEHART also favors:

1. Establishment of a soil bank (that is, taking land out of production and compensating its owners) as a production limiting device.

2. Establishment of a Government research laboratory to find new uses for farm products.

3. Plan an advertising program to promote increased food and fiber consumption.

4. Take out of production land the Government leases for grain production and grazing. (He said 20,000 acres are under lease for grain production in Indiana alone.)

No doubt the Eisenhower administration will have a program, too, for dealing with the farm problem. And it can be taken for granted that the Democrats will be ready with one of their own. Senator CAPEHART is just a step ahead of them.

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the RECORD at this point an editorial published in the Fort Wayne News-Sentinel of December 6, 1955.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SENATOR CAPEHART'S SANE FARM PROGRAM

Indiana's Senator HOMER CAPEHART'S obviously practical farm program just announced makes a lot of sense. It is particularly timely too, coming at a time when the die-hard prophets of New Dealism are screaming for a return to the high fixed price supports which are the very thing which got American agriculture into the predicament it finds itself today.

A far cry from any of the variety of inane fiscal legerdemain, which is the best most anyone else has been able to suggest so far as a solution for the farm problem, the farm-born Hoosier Senator's plan provides first for increasing farm prices by eliminating the great agricultural surplus now depressing food markets through furnishing food to hungry people throughout the world, this to be done in a manner that furnishes food to people who otherwise could not purchase those commodities.

Senator CAPEHART'S proposal commendably bespeaks his having thought the problem through from every angle. It provides that the distribution of food to the needy of the world be done in such a manner as not to displace existing market demands for food commodities.

CAPEHART'S plan also promises to do more real good for more hungry people of the world than most of the billions of dollars in monetary giveaways under the aegis of foreign aid.

The billions in foreign aid are turned over to the heads of governments in various countries, and, in many instances, precious little of our largess ever filters down to the real people who are in real need of the basic necessities of life. On the other hand, the great bulk of foodstuffs designed for hungry people of other lands, would reach the real people who really need it badly. Needless to say, this sort of help is bound to be productive of a thousand-fold greater measure of international good will for America, than the haphazard dishing out of billions of dollars in foreign-aid money.

While the first probably is the most important, the other seven points of Senator CAPEHART'S farm plan are nevertheless all important in marshaling a composite multi-pronged attack on the current farm crisis. His suggested establishment of an international food community fund, patterned after the Community Chest funds in use throughout the Nation, would systematically effectuate the distribution of excess surplus food commodities to needy peoples of the world, including the United States.

Further to achieve fair prices for farm commodities, the plan provides for establishing rigid production controls to keep production within reasonable limits until existing surpluses have been consumed. A soil bank conservation plan is also advocated by CAPEHART as an additional measure for sensibly limiting production. He would also take out of production all land owned by the Government, both for the growing of grains and grazing purposes.

The Indiana Senator also would have established a Government research laboratory to find new improved uses for farm products in industries, particularly with the objective of having more products of the farm utilized as raw materials in manufacturing.

Applying the time-tried axiom of "it pays to advertise," Senator CAPEHART'S plan provides for the development of a practical advertising campaign to educate the public in new uses of farm products, which has already been pioneered in highly successful manner by the citrus fruit industry. Greatly augmented consumption of dairy products has also already been achieved by practical advertising methods and marketing ideas, such as the many thousands of milk dispensing machines which are being operated in strategic locations throughout the country. In such promotional advertising techniques, modern mass farm production would take a page out of the book of modern industrial production in America, which has been responsible for the latter's phenomenal success.

In contrast to numerous socialistic gimmicks to solve the farm problem, dreamed up, in many cases, by persons who have never had any practical farm experience at all, it is refreshing indeed to have presented a real farm program, thought out by a real farmer, who still operates a large Indiana farm—our own Hoosier Senator, HOMER E. CAPEHART.

His sound logical plan merits the most earnest and speedy attention of Congress when it convenes 4 weeks hence.

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the RECORD at this point an editorial printed in the Lafayette (Ind.) Journal and Courier.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GOP AND THE FARM PROBLEM

The Republican Party's concern over the Nation's farm price problem is finding new expression every day.

One of the latest manifestations of this type is the announcement by Indiana's Senator HOMER E. CAPEHART that he has formulated a program designed to increase present prices on farm products and permanently bolster the Nation's agricultural economy.

Agriculture Secretary Ezra Taft Benson is actively engaged in drawing up a program to be presented to Congress at its session next year. Representative CECIL M. HARDEN, of Covington, representing Indiana's Sixth District, analyzed the problem and called for prompt congressional action in recent addresses in the Lafayette vicinity.

Senator CAPEHART, in announcing his program, demanded prompt consideration by proper House and Senate committees so that the groundwork may be laid for early action on farm legislation when Congress convenes next month. By his action he has placed himself at the forefront of those attacking the issue constructively.

The Capehart farm program is based, he explains, on the "necessity for courageous measures to increase farm prices, dispose of existing oversupply, increase consumption, prevent surpluses in the future, and recognize that, if they do occur, surpluses must be disposed of in the most expeditious way we are able to devise."

One feature provides for the distribution of food to hungry people throughout the world who otherwise could not purchase these commodities. A novelty proposed in this connection is the establishment of an "International Food Community Fund," which would supervise this distribution, both at home and abroad.

The Senator's plan appears to have been realistically conceived. It attacks the main points of the problem. Under such circumstances it deserves serious consideration. It may be that he does not have the final and complete answer, but any contribution toward a solution must be welcomed. A number of minds working together should bring the best results.

Democrats may well be thwarted in their determination to make farm prices the main issue in the 1956 campaign. For one thing, they are most vulnerable themselves on this score. Second, the oft-repeated charge that Republicans are doing nothing about it just won't stand up. Mr. Benson, Senator CAPEHART, and numerous other Republican legislators are actively concerned. The same is true of President Eisenhower himself. It happens that this is one of the most knotty problems facing the Nation and won't yield to snap judgment or demagoguery.

Hoosiers are vitally concerned, but perhaps not directly in the degree many may suppose. Representative HARDEN makes the point that actually only about 15 percent of Indiana farm income is derived from crops on price support lists. However the Nation's agriculture has much to do with the well-being of the entire economy, which means that all must be concerned.

It is important to keep the problem in perspective. The present crisis developed from policies established when Democrats were in full control at Washington. It was they who established high price supports, which encouraged the present huge, expensive, and unmanageable surpluses. The parity ratio tumbled 19 points in months immediately preceding the time when the Eisenhower administration took office. There has been comparatively little change since.

The new administration inherited the problem. It did not create it. The Eisenhower administration inherited the growing surpluses and the falling farm prices. And in the words of Mr. Benson: "Now the same people who handed us this neat package of carefully fused bombs are blaming us for the explosions."

The more recently enacted flexible price supports have not yet had time to reveal how they will work. Yet certain loquacious Democrats would return at once to high, firm supports, unwilling to wait and see how the newer plan will operate. They would return to the plan which brought on the farm problem in the first place. A good physician will not turn to a medicine which, upon previous trial for the same malady, nearly killed the patient.

Partisan politics is the last thing which may be expected to contribute to a solution of the farm problem. Time, study, and patience should turn up something helpful. Under the able leadership of such men as President Eisenhower and Secretary Benson, with the assistance of Senator CAPEHART and others, concrete results may be expected.

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the RECORD at this point numerous letters which I have received on this subject. I should like to call particular attention to the letter received by me from the president of Purdue University, in which he gives his thoughts and ideas on the plan to dispose of the surpluses.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

PURDUE UNIVERSITY,
Lafayette, Ind., December 27, 1955.

The Honorable HOMER E. CAPEHART,
The United States Senate,
Washington, D. C.

MY DEAR SENATOR CAPEHART: Thank you for sending me, under date of December 5, a copy of your press release outlining an eight-point program to increase present farm prices and bolster permanently the Nation's agricultural economy. You were good enough to ask for comments and I am pleased to transmit the following, which represent primarily the views of Purdue's leading agricultural economists. These comments were prepared largely by Prof. J. Carroll Bottum, who is acknowledged as one of the Nation's most able agricultural economists and one who has made a thorough study of farm policy.

You are quite right, of course, in recognizing that the solution to the agricultural

income problem requires a multiple approach. Likewise it appears to us at Purdue that you have included in your program most of the essential practical approaches for improving the farm income. Some of the points would, of course, give more immediate response than others. Comments on each of your eight points follow.

Points 1 and 2: It seems to us that anything that can be done along these lines is desirable. This is a worthy goal. I think you must recognize that there is a limit to how much food other countries will take except in the case of crop disaster. Even in giving away food abroad, we run into the same problem of disrupting the established markets as we do at home except in the case of crop disaster. Nevertheless, this is an area that should be exploited to the fullest.

Points 3 and 4: One of the quickest ways to get response in agricultural production in line with effective demand is adjusting supplies. This may be done either by rigid controls or by the soil bank or grass approach, which is a positive approach. Of course, both can be used. It seems to us that the positive approach of shifting some of our 350 million acres of harvested crops into grass by making payments to farmers to induce them to do this offers one of the least objectionable methods to accomplish this end. It tends to leave both prices and production freer and is less objectionable to farmers than rigid controls. It would, however, require some incentive payments. This would raise farm income immediately and would tend to bring supply into adjustment with demand in the short run. Perhaps controls would continue to be needed on cotton and wheat.

Point 5: Any attempt to increase the share of the food dollar which the farmer receives is an important and worthy goal. This is a long-time proposition and we fear no quick gains can be obtained along this line. An examination of the widening processing margin shows that most of this is due to increased labor costs and increased services. The long-run opportunities, however, of increasing efficiency in marketing are important.

Point 6: Here again is an area that should be pursued, but the gains in this area are likely to be long run rather than anything that can be done quickly. We know how to use many agricultural products in industry, but economic factors prevent their use in large quantities.

Point 7: There is no question that food competes to a certain extent with other products offered to consumers. Therefore, a vigorous promotion program to increase the consumption of agricultural products is in order. Here again the gains from the aggregate standpoint cannot be expected to be great. To the extent that we can shift the national diet to more proteins, such a shift tends to help solve the agricultural surplus problem and also improve the national diet. Again this is not a short-run proposition. Undoubtedly the consumption of individual commodities can be stepped up at least temporarily, but our problem at the present time is that we have too large a supply of all farm commodities.

Point 8: This is a good point, it seems to us, and certain lands owned by the Government can be taken out of production. In the West we have large bodies of grazing land approaching the 200 million acre level which are owned by the Government and leased to ranchers. To take such lands out of production would throw the ranchers out of business, as their whole livestock segment in certain areas is built around these lands. Smaller bodies owned by the various departments of Government could be taken out without creating undue individual hardship. All we are saying here is that there would have to be some modifications depending on individual situations.

In closing we make one general comment—that is, one of our basic problems is that we have too many resources in agriculture. We need, before we can have a prosperous agriculture, to let a few more people move into industry and service occupations. We may need some cushioning while this is taking place and it seems to me this is what your program is attempting to do. The real issue is how much cushion should we put into the agricultural economy at this point. If we place too much, it will decrease the shift out of agriculture which is fundamental to the solution of the agricultural problem.

Professor Bottum treated this point in a recent speech before the American Farm Bureau Federation in Chicago. Through his courtesy I enclose a copy of that speech. In addition I am enclosing an article entitled "A Program To Whip the Diverted Acre Problem With Grass and Livestock" by Bottum and Dunbar of the Purdue staff. I think you will find both of these articles most interesting.

Yours cordially,

FREDERICK L. HOVDE,
President.

THE COMMODITY OUTLOOK

(Address of J. Carroll Bottum, professor of agricultural economics, Purdue University, Lafayette, Ind., before the Joint Commodity Conference of the American Farm Bureau Federation, Chicago, December 12, 1955)

The United States agricultural plant is geared to produce between 5 and 6 percent more agricultural products annually than the present market will take at generally acceptable prices. Herein lies the heart of the outlook for farm commodities and the heart of the farm problem.

This situation is true even though the general economy has been running near boom levels and gives promise of continuing near or above these levels for the year 1956. The domestic demand for farm products was slightly higher in 1955 than in 1954 and appears likely to be slightly higher in 1956 than in 1955. Foreign exports rose slightly in 1955 over 1954 and appear likely to be maintained at present levels in 1956. Therefore, our overall demand situation for farm commodities should be slightly stronger in the year ahead.

As the elderly lady up in the hills remarked during the depression of the thirties, "The agricultural depression wouldn't have been as bad if it hadn't come in the middle of hard times." This time our difficulties in agriculture have not come in hard times but under near boom conditions for the nonagricultural segment.

If in 1956 we could lock up all the commodities in storage or dump them in the ocean so they would not affect the market and remove all supports, farm prices would likely fall to somewhere around 75 percent of parity with a normal crop. From that point on I would expect the price relationship to work more favorably for agriculture. I mention this not because I think we are going to do it, or should, but rather to clarify the magnitude of our problem.

Now, how did we get in this shape? In late 1952 foreign agricultural exports began to decline from the war and postwar highs. By 1953 they equaled the product from 9½ percent of our crop acreage compared with 13 percent for the 6 preceding years, 1946–51, a decline of 3½ percent. Prices had been favorable for a decade and farmers had been adopting new techniques of production slightly faster than was necessary to keep up with the growth in population. This brought us out with a 5 to 6 percent greater production than the market would take at acceptable prices in 1952 and 1953. Normal increases in production have continued in 1954 and 1955 so that the same situation has continued to persist.

This excessive production showed up most sharply in the exported crops of cotton and wheat. During 1952 and 1953 prices were supported and these surpluses were diverted in large quantities into storage. During 1954 and 1955, acreage control programs in these crops diverted 26 million acres out of these crops. Most of these acres then went into feed crops and the surplus spread to feed and livestock.

Most studies indicate that when you increase total production 1 percent, it decreases prices 2 to 4 percent. Thus a small change in the aggregate or total output has a greater influence on price and income. It should be recognized that here I am speaking of total agricultural output for all commodities. This indicated relationship does not hold for individual commodities.

Let us next turn to what the outlook is if we go ahead with our present farm program without any changes being made. What would be the support prices and probable level of prices in 1956?

Wheat: The loan on wheat, as we all know, has been announced at not less than $1.81 and the acreage allotment has been set at 55 million acres. This should give us an annual supply of wheat about in line with our domestic and foreign needs. With normal weather we would expect prices near the loan rate.

Corn: The present formula for calculating corn supports would indicate supports for corn at not less than $1.35 to $1.40 a bushel. They could be set higher than this at the Secretary's discretion but probably not any lower. Under the present law some further decrease in corn allotments of around 10 percent would seem likely.

Cotton: Cotton supports could be set according to the formula at a minimum 25 or 26 cents. Where they may be set is a question.

Rice: Rice supports could be set at a minimum of approximately $4.05.

Peanuts: Peanut supports could be set at about 10 cents if the formula is followed.

Tobacco: No material change would take place in the price support of tobacco.

Please understand that I am setting up approximately what the minimum supports could be under the formula contained in the law. I am not attempting to outguess what the Secretary's action will be or at this stage what modifications may be made in the farm program.

When we look at the livestock situation, it would size up about as follows:

Hogs: After we get through the heavy runs of this month, we would expect a cent or two strengthening in prices. We would expect for the marketing period January to May a fluctuation between $13 and $15 level. Some strengthening above this should occur in June. The latter half of the year should not be much better than the latter half of this year. This will be particularly true if we raise nearly as many spring pigs in 1956 as last spring. By 1957 we should be pulling out of the heavy hog cycle and see some strengthening in the hog-corn feeding ratio.

Cattle: No large change in numbers of cattle is expected this year. Numbers may be down slightly January 1. Barring a drought, we would not expect any substantial change in overall prices next year. Fed cattle margins may reverse their situation in 1956 and average a little lower the first half and be a little better the second half of the year.

Dairy products: Dairy prices should be near the past year's levels to slightly higher.

Poultry: Because of prospective increased production, including turkey, in 1956 prices are likely to average slightly lower than this year despite the strong demand.

Sheep: Sheep prices will probably be favorable relative to hogs and beef cattle.

To sum up, it seems to us that this means a continuation of the cost-price squeeze and a further drop of 5 percent or so in the net farm income in 1956.

Now, if we want to do something about this situation, what can we do? We have

all types of proposals for solving our present situation varying all the way from going back from the tractor to horses to eat up the surpluses, to shutting off the fertilizer supply, to closing down the Experiment Station and Extension Service, to requiring the fuel for tractors being made partly from farm products, to dumping the surpluses in the ocean, to bringing back the plump girl as an ideal to induce each one to eat a little more, as well as the more realistic ones such as attempting to expand the market at home and abroad and shrinking production by production controls or by grass programs. These are but examples of the ends to which people are thinking in regard to our present problem.

Let us for a moment as we tackle this problem take a little longer look at the agricultural situation in order to put the current problem in its proper setting. In 1820 we had a little less than 10 million people in this country. Today we have a little over 165 million. Conservative estimates point to an increased population of somewhere between 200 and 225 million by 1975—20 years hence. This means an increase of up toward 1½ percent per year. Thus we have an expanding market at home, as we all recognize, of something like 1½ percent for the next several years assuming there is no change in food habits. If incomes are increased and diets are upgraded, we might have something more than this increase in food consumption.

Looking at the other side of the coin, during this entire period agricultural production increased at about the same rate as the population. During the period previous to 1920 the expansion in food production in this country came through the route of increased acres in production, increased workers in agriculture, increased capital investments and increased technical efficiency.

Starting in 1920 the rate of increased efficiency per worker in agriculture began to exceed the rate of increase in the population. This was a significant development in agriculture and has had far-reaching effects. It meant for the first time that the rate of improvement in technology was sufficiently fast that it required less absolute people in agriculture to supply the food for the expanding population. At this point farm population and number of farm workers started to decline even though the rate of output continued to rise at its normal ratio. Not only has the population in agriculture been declining since 1920, but also the acreage in land in crops has stopped increasing. This has meant, therefore, not only a decline of the number of people in agriculture, but a combining of farm units and a decrease in their number. The number of farms in the United States declined from 5.4 million in 1950 to 4.8 million in 1955—a decline of 600,000 farms in 5 years or a decline of 11 percent. The decline in the number of farm people and number of farms along with other developments is forcing rapid changes in our farm organizations. It works hardships upon those who cannot make the change and because of this adjustment some people are hard hit financially. These are the farms hurt most seriously now by price declines. Part of their low incomes are due to low prices and part due to the inability to adjust to modern technology.

Nevertheless, this is the characteristic of a progressive, growing economy. The carriage makers, the blacksmiths and the candlestick makers were hurt by the same process. When a society grows and improves in efficiency, it does not require the same proportion of people in each occupation. Likewise, society wants more of some products and less of others and some it never wanted before. This is how our standard of living has been raised. It is an old story, but we need to keep it constantly before us as we think of the current period. Because the problem that we face today is that we have a few too many resources in agriculture.

Since 1920 5 million workers have moved out of agriculture into other lines of activity. This has meant a reduction of over one-third in the agricultural working force. These individuals have all found employment out of agriculture. In most cases they have moved because they felt they had greater opportunities in some other line of activity.

The next question you may raise is, "Can we continue to assimilate into the rest of our economy more and more workers from agriculture?" The answer is yes. This process has been going on since we founded the country. We have constantly released workers from producing the bare essentials of life as we improved our efficiency so that they could start producing the luxuries or the new inventions.

Yes; but you may argue "Won't we get too much of everything, industrial products and services?" Yes; this is possible and likely, if we get the economy unbalanced. But this can happen with 40 million industrial and service workers just as well as with 60 million. Man's wants are insatiable. When you men get 10 percent more things and services than your wives want, then I will talk to you about getting too much.

Whenever we learn to produce anything more efficiently, there are two major outlets; either we all have more goods and services or we have more leisure. At given periods society is always arguing which we want most. As we gain in efficiency in the future we will take some of it in more leisure. If we are able to avoid war, I expect to see the 36-hour week and perhaps the 4-day week in my lifetime. This gives us time to use and need more things. We may take it in the form of longer vacations or more coffee breaks, but we will take part of the advantage of greater efficiency in more free time.

I mention this at this point because in thinking of our solution for improving agricultural income we have to recognize some of these items and keep them in our minds. I know that growth and progress are one of the cherished goals in our society. One of the broader issues of the world today is the demonstration of Western civilization as exemplified by the United States, that it has more to offer man than collective socialism. With this background let us come back to the 1956 price situation. The problem is to get annual agricultural production and demand back into a more satisfactory balance and then keep them moving up together as population grows.

Some propose doing this by expanding markets, others by adjusting output. Expanding the market takes the form of increased exports or increased consumption at home. Careful examination in both of these areas indicates that they are worthy goals and should be pursued. However, they are long-run propositions. You cannot get quick short-run changes. Even in giving food away abroad you run into the same problems of disrupting the established markets that you do at home, except where there may be a crop disaster in some country.

Reducing marketing margins falls into the same category. Opportunities are here but they are long-run gains when considered from the standpoint of total agricultural income.

Thus, the real drive now centers around adjusting production. Here three alternatives take the spotlight: (1) let lower prices shrink production, (2) use production controls across the board or (3) shift the unemployed or excessive harvested crops into grass. Some might want to add a fourth of making some direct or transfer payments to agriculture to ease the situation while prices are allowed to adjust the production. If such was done, the payments would have to be kept relatively low or they would defeat the purpose of allowing prices to bring about the adjustment.

Low prices will adjust agricultural production in the long run, but is a slow process in agriculture. We know that when a supply of one commodity is large the price is low relative to others and the farmer will adjust rather quickly. This is the problem of shifting resources in agriculture. However, where all commodities are in large supply and there is no commodity to shift to, there is a problem of shifting resources out of agriculture. This is a much more difficult shift and requires a much longer time. Some marginal land and some farms must shift out of crops, as a result of unprofitable returns. It requires several years. Whether agriculture and society want to go through the price and income hardships of this course of action compared to others is the question.

If the second alternative or the crop control route is taken and it is effective, then it means controls that do limit production. It also means controls on all major harvested crops. We have now seen the effect of controls on selected crops. We know that as we control certain crops the problem is shifted to other crops. We have had enough experience with controls so that we know the problems of setting up individual farm bases. Nevertheless, it is an alternative that some propose. Does agriculture and society want to take this route?

The third alternative is to take certain crop acres out of production and shift them to grass through rental or grass incentive payments on them. The grass may or may not be used depending on the plan. If a flat percent were taken out on each farm it would adjust production, but like a control program it would not correct the long-time production. A voluntary incentive program would tend to take the marginal cropland out as would happen under low prices. Once it was out of grass much of it would probably stay out of crops unless prices rose substantially. Under such plans agricultural production would be free except for the acres in grass. Prices would also be free except to the extent that support levels might be coupled with such programs.

Which course we follow depends upon the decisions of this organization and other groups in our society. Individuals may honestly differ in which course they may favor depending upon their economic status, previous experiences and varying values. It has not been my purpose as an educator to inflict my personal values upon you, but rather to lay out the situation, the courses of action that may be taken and some of the consequences of such action.

WARSAW, IND., *December 20, 1955.*

Hon. HOMER E. CAPEHART,
United States Senate,
Washington, D. C.

DEAR SENATOR CAPEHART: It seems to me that in your 8-point program you have considered the problems which face our agriculture today—too much on hand and too much still coming. Agricultural incomes must be kept on good levels, yet inefficiency must not be encouraged. Plans to distribute surpluses should be set up in such a way that present or future world markets will not be disrupted.

Soil conservation should definitely be considered in any program, and methods which will increase the demand or utilization of farm products should be encouraged.

Cordially yours,

PAUL E. JACKSON,
County Agricultural Agent.

BLOOMINGTON, IND., *December 13, 1955.*

Senator HOMER E. CAPEHART,
United States Senate,
Washington, D. C.

DEAR SENATOR: You are to be commended for your interest in the present farm price

situation and the thought that you have given in preparing your 8-point program.

I am sure—that with everybody trying—this situation can be whipped on a sound economic basis.

Sincerely,

CORRY A. ALCORN,
County Agricultural Agent.

THE FIVE YEARS MEETING OF FRIENDS,
Richmond, Ind., December 15, 1955.

The Honorable HOMER E. CAPEHART,
Senate Office Building,
Washington, D. C.

DEAR FRIEND: I am glad for the interest that you are showing in aiding the farm program, one provision of which is to make use of our surplus in helping out friends around the world who are in rather desperate need.

It seems to me this is one way of kindling friendship for America as well as responding to the noble impulse of service.

Sincerely,

ERROL T. ELLIOTT,
General Secretary.

LA PORTE, IND., *December 21, 1955.*

Senator HOMER E. CAPEHART,
United States Senate,
Washington, D. C.

DEAR SENATOR CAPEHART: I want to thank you for your thoughtfulness in sending me your outline of suggestions toward the solution of the farm problem that we are all experiencing today. It strikes me that your suggestions are concrete, that they face up to the problem, and best of all that you propose quick action. I believe that everyone agrees that we have waited too long to begin to attack the problem of removing the tremendous surpluses which are hanging over the markets of the various farm commodities.

As to the matter of rigid production controls, we all come back to the realization that the supply of commodities is the result of acreage times production. We also realize that the amount we are producing is only a few years ahead of consumption. If we are to attempt to bring production and consumption into a reasonable balance, certainly some type of rigid controls will be needed. Along this line, I hope it will be possible to make some provision that improved market prices will not bring into production marginal land that would not otherwise be used for cropping purposes. Assuming that the desired results can be secured, I hope that we can anticipate some provision being made for removing such controls, if and when the problem is solved. I hate to think about the situation developing where allotments of the various crops on a particular farm becomes a part of the appraisal value of a farm. I also recognize that the age of the owner or operator, family labor supply, personal likes and dislikes of certain crop and livestock enterprises all enter into the organization of a farm. For these reasons I hope that rigid controls will not always be necessary.

Concerning item 8, I am only raising a question as to the overall problem of Government finance. I am basing my judgment largely on the situation that exists in our county at the Kingsbury Ordnance plant. I realize that considerable farm crops are produced in this particular area. However, I am thinking in terms of costs of maintaining the area in a desirable state of cover of plant growth, if it was not used for pasture and cultivated crops. If this were not the case, it would grow up to brush, weeds, etc., which under an ordnance plant situation would have to be maintained or mowed at Government expense. Perhaps the areas in question could be seeded as a pasture rather than cultivated.

I wish to take this opportunity to wish you complete success in your efforts to cope with the current farm problem.

Sincerely yours,

E. L. HARTMAN,
County Agricultural Agent.

LIBERTY, IND., *December 21, 1955.*

Hon. HOMER E. CAPEHART,
United States Senate,
Washington, D. C.

DEAR SENATOR CAPEHART: I appreciated very much receiving a copy of your proposed farm program, and the opportunity you have given to me for extending comments on it.

I feel that you have made honorable proposals not only for the immediate future of farmers and agriculture, but also steps that should help this segment of society retain its dignity for years to come. I, too, feel that not one but a combination of steps are necessary to lead us toward this objective.

Your letter indicated that you would like to have some comments. I have only these to offer:

1. Step No. 1 should help us get rid of the surplus hanging over our markets. If the present surplus of food is distributed to the needy I feel that some device will be needed to help curtail food production or our agricultural machine will continue to produce surpluses.

2. In regard to step No. 2, the establishment of an international food community fund seems like a good proposal. Since this agency would distribute food to the needy peoples of the world, I am wondering if excess surplus from all friendly countries could be placed in the fund. It seems to me that this would make other countries feel that we have interest in them and that food distributed through the fund would not be termed "dumping." Such an agency would probably have to be administered accordingly.

3. In connection with step No. 3, since it seems that the American farmer is expecting the Government to lead him out of the surplus situation, I do believe production controls will be necessary to serve as a brake on our agricultural-production machine.

4. In regard to step No. 4, since the farmers' soil holds elements that are the key to our material necessities of life that is food, clothing, and shelter, it is of interest to the entire population of the United States to use and conserve these elements with care. Through the soil bank every taxpayer is investing for his and his descendants future.

In the establishment of a soil bank, in view of present technology, farmers could, it seems to me, produce more food on fewer tilled acres. Your proposals 6 and 7 would aid in taking up this production of extra food.

5. Step No. 5: I feel that food producers, food processors, manufacturers, and distributors all deserve their fair share of the consumers dollar and that no one of these groups should exploit the other. I feel that a study as proposed by your item 5 would help increase understanding among these groups and the American public.

Recently in a meeting of a group of our farmers, a farmer made the remark "that the American farmer is in a position that he must raise himself by his bootstraps" and "that our American people themselves are going to have to help themselves." I believe that with this kind of thinking coupled with guidance through such things as you have proposed, the American farmer will keep a respectable position in our economy and society.

Very truly yours,

JOSEPH J. ROBINSON,
County Agricultural Agent.

SULLIVAN, IND., *December 14, 1955.*

Hon. HOMER E. CAPEHART,
Senator From Indiana,
Washington, D. C.

DEAR MR. CAPEHART: Your letter concerning the proposed farm program was missent to Angola, Ind., but was forwarded on to my office.

In looking over the 8-point program, it seems that if all of the 8 points could be put into effect it would do much to assist the farmers for the years ahead. The farm program is certainly one of the biggest problems confronting us today. What should be the greatest blessing seems to be the farmers' greatest curse and that is surpluses. My personal opinion leads me to state that I think the old-fashioned law of supply and demand is the main force in relieving the farmers' plight. I do feel, however, there is no one best solution, but it will take the combination of a lot of different ideas and programs. It seems to me that this is no reflection on either political party. One of the main problems is due to the fact that many programs would work out more satisfactorily if they don't have to be changed every 2, 4, 6, or 8 years.

It certainly is gratifying that one of our own State men in Washington is taking an interest in the farm program and I hope some kind of relief will be brought about by the next session of Congress.

Yours very truly,

O. K. ANDERSON,
Agricultural Agent, Sullivan County.

FORT WAYNE, IND., *December 14, 1955.*

Senator HOMER E. CAPEHART,
Washington, D. C.

DEAR SENATOR CAPEHART: We were very happy to receive a copy of your proposed farm program. You are to be congratulated on your initiative and good intentions in attempting to assist our rural people.

Many thanks for the copy.

Yours very truly,

C. V. KIMMELL,
County Agricultural Agent.

TIPTON, IND., *December 12, 1955.*

Senator HOMER CAPEHART,
United States Senate,
Washington, D. C.

DEAR SENATOR: I have read your suggested agricultural program that you plan to present to the Joint Agricultural Committees.

Your number one proposal of eliminating the great agricultural surplus certainly is a number one agricultural problem today. However, it undoubtedly will be advisable to maintain a small surplus. The abnormally high surpluses are a detriment to agriculture. Your method of eliminating the surplus through the hungry people throughout the world is undoubtedly the best manner of lowering the surplus.

Your point three suggests the establishment of rigid production controls. One kind or another of production controls have been tried, off and on, for many years, and have not been very successful. The idea of production controls has always been a negative approach to the problem, as I see it. I believe a positive approach of paying the farmer for doing something to improve his fertility would be better, which in the end would decrease production by taking land out of production of crops that create surpluses. In other words, pay the farmer for the establishment of soilbuilding crops, rather than limiting his acreage of crops that create surpluses.

Item 5, which suggests a conference of food producers, processors, manufacturers, and distributors, sounds good. However, actual results may be hard to secure.

Item 6, the possibility of findiing new and improved uses for farm products in industry has been and will be in the future a sound program for agriculture.

The encouragement of producers of farm products to advertise their products to promote increased consumption will undoubtedly be valuable in eliminating some of the farm surpluses.

I wish to thank you very much for receiving your program, and your letter re-

questing suggestions for the present farm problems.

Yours truly,

W. M. CLARY,
County Agricultural Agent.

MARTINSVILLE, IND.,
December 12, 1955.

Senator HOMER E. CAPEHART,
Senate Building, Washington, D. C.

DEAR SENATOR CAPEHART: We are in receipt of your 8-point program to increase present farm prices and bolster the Nation's agricultural economy.

Reporting to you as a county extension worker, we have observed and collected the following observations from people in Morgan County in recent weeks.

1. Many are of the opinion that the surpluses should go to the hungry people of the world including those in the United States.

2. The soil-bank program would be effective only if production controls are included since more intensive efforts would be used to increase production of crops on land not in the soil bank.

3. Very often the question has been asked as to why Government-owned land should be made available for agricultural purposes.

We hope these comments will be useful to you in the presentation of your suggested program.

Sincerely,

R. J. HAWORTH, *County Agent.*

RUSHVILLE, IND., *December 12, 1955.*

Senator HOMER CAPEHART,
United States Senate,
Washington, D. C.

DEAR SENATOR: Thanks for your letter of December 5 and your suggested farm program.

Your interest in the farm problem is certainly commendable.

Many solutions to problems have come from conferences of leaders and people interested in the problems. This should be an excellent approach.

Anything that can be done to increase research to find new and improved uses of farm products should be very helpful, and increased consumption of agricultural products would also help to correct the situations.

Thanks for your inquiry.

Sincerely,

C. L. SPULLER,
County Agricultural Agent.

MADISON, IND., *December 17, 1955.*

Senator HOMER E. CAPEHART.

DEAR SIR: I read and discussed this program with about 100 Farmers' Union members, and am sending you the results. We have taken this paragraph by paragraph and voted on them, and you can see the results.

I remember you told me you were going to see this thing through and we are looking forward to a program like this and we glory in your spunk and luck to you.

W. F. BUTLER,
Chairman, Farmers' Union, Jefferson County.

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a chart issued by the Commodity Stabilization Service of the Commodity Credit Corporation, showing the quantity and value of commodities pledged for outstanding loans, commodities in price support inventory as of September 30, 1955, and total investment as of September 30, 1954.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

Quantity and value of commodities pledged for outstanding loans and commodities in price support inventory as of Sept. 30, 1955, and total investment as of Sept. 30, 1954

[All figures in thousands]

Commodity	Unit of measure	Investment as of Sept. 30, 1955 [1]						Total investment as of Sept. 30, 1954 [1]	
		Pledged for loans		In inventory		Total			
		Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value
Basic commodities:

[1] Book value before deduction of reserve for losses.
[2] Less than a thousand.

Mr. CAPEHART. For the information of the Senate, I might say that the total involved is $7,336,491,000. Of course, the surpluses have been accumulating all the time, and at the present moment, I understand the total is approximately $8,000,000,000.

It might interest the Senate to know that the largest single commodity among the surpluses is wheat. The value of the surplus is $2,745,135,000. The Federal Government owns and is in possession of today of more than 1 billion bushels of wheat, which is enough to furnish all the needs of the United

States for 2 years if not another bushel is grown in the next 2 years.

The next largest commodity in the surpluses is cotton. The amount is $1,478,827,000.

The third largest commodity is corn. The total amount is $1,426,278,000.

In other words, the total of the six so-called basic crops—corn, cotton, peanuts, rice, tobacco, and wheat—was $6,355,303,000. The so-called nonbasic commodities, such as milk, butterfat, dried milk, and whey, totaled about $452,000,000. The total, as of September 30, 1955, was $7,336,491,000.

I noticed during the reading of the President's state of the Union message that he referred a number of times to the so-called surpluses. I should like to read one paragraph from the President's message:

> Basic to this program will be a new attack on the surplus problem, for even the best-conceived farm program cannot work under a multi-billion-dollar weight of accumulated stocks.
>
> I shall urge measures to strengthen our surplus disposal.

Mr. President, we might just as well be realistic about this matter. There is no use trying to make political hay out of it. I am not doing so, and I do not know of anyone who is. I am not accusing anyone of so doing.

I wish Senators would forget the language of the bill which we have just introduced and think about the humanitarian and economic aspects of it. I know that when the bill is referred to the committee changes will have to be made in it. I know from 12 years' experience in the Senate that no man can write a bill which is immediately satisfactory. There must be hearings, and the gathering of the thoughts of many serious persons on the subject.

I repeat, I wish Senators would keep in mind the economic and humanitarian aspects of the bill.

If we do not get farm prices and other prices closer together we will become involved in economic difficulty. That is why I say that this is not entirely the farmer's problem. It is everyone's problem.

Every wage earner in the United States should be interested in the subject. Why? Because they make the things which the farmer buys. If farm prices get too low and remain low too long, the farmers will not have any money with which to buy the products they need. That means that the wage earner who makes the things the farmer normally buys, such as tractors, automobiles, refrigerators, radios, furniture, fertilizer, and all kinds of farm implements, will be thrown out of employment. The farmers are the chief buyers of so-called consumer goods. But they cannot buy them now because they have no money with which to pay for them.

This problem is not one for the so-called farm bloc. It is not one exclusively for the Senators from the farm States. It is the problem of everyone.

Mr. President, it is a sort of disgrace that when all other prices in America are very high the farmer's prices are low. There is today in the United States full employment and high wages. I am not objecting to that; I am glad of it. Businessmen are making greater profits than they ever made before. The statistics prove it. The General Motors Co. made more than a billion dollars profit last year, after paying 52 percent in taxes. I am not criticizing them, for they gave employment to many thousands of persons. Today bank balances are larger than ever before, savings are greater, more people are buying new homes and automobiles; indeed, prosperity is "running out of our ears," not only in the United States but in most of the nations of the world, at least all the Western European nations. If, in the face of that situation, farm prices are low, how do we expect to get them back where they belong? What are we going to do to get them back?

The huge surpluses are to blame for the present condition. We had better do something about them, because they are not going to evaporate.

Mr. President, there is another thing about which we may as well be thinking, namely, that many of the commodities which are in surplus are deteriorating in quality; they are reaching such a point that they will soon have no value. Why should we have all these surpluses and see them deteriorating when there are hungry people in the United States and in the rest of the world? Particularly, why should we do it when we know we cannot solve the farm problem and get farm prices where they belong until we get rid of the surpluses?

So we are faced with this problem. I am saying that farm prices are too low in comparison with the prices which the farmer is required to pay for that which he buys. They would not necessarily be too low if the price of the things the farmer had to buy were in the proper relationship. We do not necessarily wish to see prices come down. We do not wish to see wages decrease. We wish everyone to have a higher standard of living, not a lower one. But such a situation cannot prevail in the United States if we are going to permit the farmers to be faced with low prices for what they produce.

There are approximately 6 million farmers, with their wives and families, and we must think about the fact that there are hundreds of small towns in the United States which are dependent upon the farmers' business.

There are wage earners by the million who are making things for the farmers. If the farmers cannot buy them, are we going to sit back and say, as some persons have already said to me, "I am against giving anything away. We should never have had a farm program in the first place." Others say that we cannot give the surpluses away.

Are we going to take a defeatist attitude, or are we going to face the issue and be realistic about it? Are we going to view the situation as it actually exists rather than to talk about the way we should like to have it exist?

I wish we did not have any surplus. I wish farm prices were in line with tractor prices and the prices of all the other products which the farmer buys. I am not arguing the point that it was or was not necessary to have any kind of a farm program. Possibly we would be better off if we did not have any farm program at all from now on. I am not saying that would be the case, but I have heard people make that statement. But even if Congress should today repeal the parity law and all the other farm laws, the Government would still hold approximately $8 billion worth of farm surpluses which are in Government warehouses, costing us a million dollars a day.

Mr. President, the problem is facing us. Do we have enough courage and intelligence to adopt effective policies? Are we willing to say to the President of the United States, "We want you to establish a commission, and we want you to say to that commission, under rules and regulations which we are going to write into the law, 'We want you to get rid of the surpluses at the earliest possible moment. We want you to do it in behalf of the economy of the United States and in behalf of the farmers and wage earners, and we want you at the same time to help the poor people in the United States and in the world'."

We should be able to give away a few billion dollars' worth of the surplus in lieu of cash.

Since the end of World War II—and I do not bring this up in criticism; I am simply trying to be factual—we have given away at least $50 billion worth of goods. I would be willing to wager that we have provided, in the form of automobiles, trucks, tanks, and other material which the automobile manufacturers make in the United States, business which those manufacturers would not have had, if Congress had not appropriated the money and passed laws to give those products away. I am not criticizing anyone for that. I am not saying that it was not a good thing to do. I am not saying that it ought not to have been done. I am simply saying that Congress has appropriated, in my opinion, at least $10 billion for so-called foreign aid, money which came back to the United States and was spent with the automobile manufacturers alone. Yet we hesitate to give away 2, 3, or 4 billion dollars' worth of foodstuffs to the starving peoples of the United States and the rest of the world.

Oh, we hear it said that to give away these surpluses would be in the nature of a subsidy. But what was the money which we gave away to foreign countries, and which came back to help the businessmen of the United States? Every time Congress has appropriated or the Government has spent a dollar anywhere in the world, that dollar has come back to the United States eventually and has been spent in this country. So there are many things to think about.

I hear it said that we have subsidized the farmer. We have not subsidized the farmer nearly so much as we have subsidized business in the form of orders for goods which the manufacturers have made in the United States, and for which they have been paid, because Congress appropriated the money to be given to foreign countries. That money then came back to the United States and was spent here.

I do not criticize anyone for this. I am not saying it was not a good thing

to do. That is not the purpose of my bringing up the matter today. My purpose is simply to show that we have a problem facing us. Farm prices are low, and they may become lower. Farm prices are low because there is a large surplus of farm commodities. Only the Government of the United States can do anything about that condition.

If the farmers themselves still owned the surpluses, if the surpluses were still in their own granaries or warehouses, the farmers could give them away or otherwise dispose of them. But, it is the Government of the United States which is holding $8 billion worth of their products.

The farmers are waiting for the Government to act. The Government is holding about $8 billion worth of the farmers' products, and this is keeping the farmers from receiving a fair price in the open market place today.

I, together with other Senators, am offering a bill which we think will be helpful. We are not saying that it will, of itself, solve the problem. It will probably be necessary to do other things. We are not saying that the language of the bill ought not to be changed, because it might well be changed.

We are not criticizing the administration. We are not criticizing either Democrats or Republicans. I am making a plea to the Senate to be realistic about the matter. I am making a plea to the American people—to the city folks and the country folks. We have a problem facing us. A grave situation is confronting us. Let us try to solve the problem, and do it quickly.

One of the reasons why I have remained in the Chamber today to introduce the bill is that it is important that quick action be had in the matter. We cannot spend all the time we would like to spend on a long-range program, providing for soil banks. I favor some kind of soil-bank program. I do not know exactly how it should be worked out. But I am in favor of many such projects.

One of the things I should like Congress to do is to appropriate more money for research, to help find new ways and means to grow farm products and new uses for them.

I should like to see the Government spend more money in advertising so that the farmer could get a larger percentage of the American public's dollar, because the percentage of the food dollar which the farmer is receiving is going down. I would like to see it go up.

There are a number of things which Congress can do, and all of them are good. I am not criticizing any proposal. I am simply saying that none of them will work very well until we can get rid of the surplus we now have.

It is 100 percent the responsibility of Congress to get rid of the surplus. No one else can do it except ourselves.

I am certain the President of the United States and the Secretary of Agriculture, Mr. Benson, would like to have an expression from Congress that we, who represent the people, would like to have the administration dispose of the surpluses, or at least get rid of a sufficient amount of them so that farm prices will go up again to the point where they should be in the free market place in the United States.

Mr. President, if any other Senators wish to join with me and the other cosponsors in the introduction of the bill, we shall be very happy to have them do so.

Mr. LANGER. Mr. President, I have waited very patiently because I was very much interested to hear what the distinguished Senator from Indiana would say about the farm problem. He says he does not criticize anyone. Why does he not? I am not criticizing Mr. Benson, because Mr. Benson is the hired man of the President of the United States. I do not know where my friend, the Senator from Indiana, has been for the past two years, when Senator after Senator has stood upon the floor begging and pleading with the Republican Party to take some action which would relieve the farm situation. Did we get aid? No.

When we were talking about surpluses, what was the President of the United States doing? He was allowing wheat to be imported from Canada. I do not know whether rye is raised in Indiana. In the United States we raise approximately 23 million bushels of rye a year. Believe it or not, in spite of all we could do, the President of the United States, Dwight Eisenhower, permitted the importation of millions and millions of bushels of rye. What did we do about it? We took up the matter before the Committee on the Judiciary. In that committee we considered the matter under the subject of monopoly, to determine whether or not there had been a monopoly in the grain trade. We subpenaed representatives from the Department of Agriculture. Did we get any help from them? It is like pulling teeth, when one is in a dentist's chair, to get even one suggestion from the Department of Agriculture.

Then we had before the committee records showing that millions upon millions of bushels of rye were coming into the United States. The testimony was that the price of rye in the United States had been lowered from $1.80 a bushel, because of the importation of Canadian rye, to less than 80 cents a bushel. Still the Government was piling up surpluses, and was paying the guaranteed price, whatever the support price was at that particular time, to pile it up.

Still the imports came in—millions of bushels of oats, millions of bushels of rye, millions of bushels of wheat. We pleaded with the Department of Agriculture for help. We did not get it.

But that is not all. My distinguished friend from Indiana today has said that only the Congress can provide such help. Well, what does the record show? In the next campaign, if the Senator from North Dakota lives, that record is going to be exhibited in every single farm State in America.

Hearings were held with respect to imports. There was talk about monopolies. Finally the Committee on the Judiciary, of which I was then chairman, by unanimous vote—mind you, Mr. President, by unanimous vote—recommended an appropriation of $75,000 to investigate monopolies.

My distinguished friend from Indiana says today that perhaps the price of tractors is not too high. Well, what is the record? There was an effort to adopt a resolution providing for $75,000 to investigate monopolies. The Republicans were in control. The distinguished chairman of the Republican Policy Committee, Homer Ferguson, of Michigan, sat at the desk behind me. What I am saying now I said to that former distinguished Senator at that time, and I placed it in the RECORD on this floor. We could not get approval for the expenditure of $75,000. We could not get $60,000. We could not get $50,000. We could not get $37,500. The distinguished Senator from Minnesota tried to help me get the resolution adopted, but we were not given a dollar. I say to my friend from Indiana today that the responsibility for that lies on the Republican Policy Committee of that Republican Congress, which had charge of Congress and was in control of the leadership at that time.

What did they do, Mr. President? Twice I appeared before that Republican Policy Committee. First I pleaded for $75,000. Then I pleaded for $37,500. The Committee on Rules and Administration held up the request for months. A man was hired by the name of William Ziff, who twice appeared before the Republican Policy Committee. Well, we did not get the money. We made an investigation of farm prices. We had to do it by hiring Sidney A. Davis, of New York City.

(At this point Mr. LANGER yielded to Mr. JOHNSON of Texas, whose remarks appear in the RECORD at the conclusion of Mr. LANGER's speech.)

Mr. LANGER. Mr. President, I recur to the question of refusal of the Republican Policy Committee to recommend the making of an appropriation for an investigation of monopolies in the United States. I particularly call the attention of the Senate to the fact that upon several occasions I have mentioned the situation relating to farm machinery. I have mentioned that subject because today if a young veteran wishes to begin farming, if he wishes to buy farm machinery, he must spend anywhere from $15,000 to $20,000 to obtain equipment with which to farm from 320 to 400 or 480 acres. If a young veteran wishes to purchase a combine, he has to purchase it from one of six companies; and the price quoted by each of them is almost the same, no matter to which one of the six companies he may go. As every Member of this body who has investigated the situation knows, in a short period of time, the price of combines has almost doubled. Harrows, which used to be obtainable for almost nothing—for $17 or $18—today are away up in price, to the point that a poor man can scarcely afford to buy one.

So we wished to have an investigation made of the monopoly in connection with the manufacture of farm machinery. Although we did not have any money for the investigation, Mr. Sidney A. Davis gave us help, and we made some investigation.

Within a very short time, when we come to discuss the farm problem, as

it is called, I intend to have considerable to say about the price of farm machinery. But I suggest to anyone who is interested, and especially to my Republican colleagues who are present at this time in such great numbers on this side of the aisle, that when we are discussing the farm problem, a problem in which all my colleagues are so greatly interested, it would be well for all of us to examine the issues of the Wall Street Journal of several years ago, and to notice the quotations for the stock of the Allis-Chalmers Manufacturing Co., the International Harvester Co., the Oliver Machinery Co., the J. I. Case Co., and the John Deere Co., and to compare the quotations for the stock of those companies at that time with the quotations for the stock of those companies as of today. Those who make such a comparison will find that the prices of those stocks have doubled or tripled.

Mr. Sidney A. Davis, one of the committee investigators, and several members of the Antimonopoly Subcommittee of the Committee on the Judiciary, including myself, wanted to go into the question of oil. I suggest that Senators do the same thing with respect to oil stocks that I have suggested with respect to the stocks of farm-machinery concerns. Look at the value of the stocks of the Standard Oil Company of New Jersey, the Standard Oil Company of California, the Standard Oil Company of Ohio, the Houston Oil Co., the Union Oil Co., or the Pure Oil Co. I ask Senators to find out at what prices those stocks were listed at the time when I pleaded with my Republican colleagues to give me $75,000 so that we could make this investigation for the farmers, the laborers, and small-business men. Compare the prices then with prices of the same stocks today.

I am sure my distinguished friend from Oregon [Mr. MORSE] will remember that I had a colloquy with him on the floor of the Senate. A lady from North Dakota, Mrs. Edgar Randall, of Lake Williams, wrote me a letter saying that eggs were selling at 6 cents a dozen to the farmer. I placed that letter in the RECORD. That was 18 months ago.

Today we find the distinguished Senator from Indiana [Mr. CAPEHART] very much exercised over the fact that farm prices have gone down. I placed in the RECORD today a letter from a family living at McKenzie, N. Dak. They dressed some chickens and hauled them to Bismarck, the capital of North Dakota, and to Mandan, and peddled them. The best offer they received was 7 cents a pound. The letter says that they took the chickens back home.

When we talk about chickens, I remind Senators that they have come home to roost with the Republican Party. It is not with my sanction, because, thank God, I belong to the Abraham Lincoln-Theodore Roosevelt-Robert La Follette, Sr.-George Norris branch of the Republican Party, and I am proud of it.

Let the Republican Party in this campaign face the fact that they would not give a dollar to a committee headed by a Republican, to a committee dominated by Republicans, to investigate monopoly. Why? Were they angry because we had dug up the Dixon-Yates deal?

Mr. President, I do not intend to say very much today, but when the farm bill debate begins, I shall read the record on the floor of the Senate, showing which Senators voted nay and which Senators voted yea, unless I am stopped. I do not know of any way I could be stopped from doing so.

I do not propose for a moment to allow anyone to fool the farmers in the hills and valleys of the great Northwest, extending out to the Pacific Ocean, or to farmers in the Southwest, by any messages coming from anyone, saying what it is proposed to do in the future. The Republican Party had a great opportunity. All some of us asked was justice for the farmers. The Republican Party is not going to escape responsibility by talking about surpluses. We intend to present the facts.

I know that my distinguished friend from Minnesota [Mr. HUMPHREY], who now occupies the chair of the majority leader on the other side of the aisle, knows all about the so-called surpluses. He attended the convention of the Farmers Union Grain Terminal Association, held 2 or 3 weeks ago. It was attended by more than a thousand farmers from the State of North Dakota alone. I assure the Senate that those farmers are not fooled. They know what this problem is all about, and they know where the responsibility lies. They know that campaign promises were not kept.

As I stated a few moments ago, when the proper time comes and the farm bills come before the Senate for consideration, I intend to take a major part in the debates.

I call attention to the fact that time and time again some Members of the Senate Committee on Agriculture and Forestry joined me in bringing the plight of the farmers to the attention of this body. Nothing was done about it.

The Democrats are entitled to their share of the responsibility also. After all, in a way I am nonpartisan.

I well remember that on May 16 the House, by a majority of 6, passed the rigid price support bill, carrying out President Eisenhower's promises, which he made in the State of Minnesota at Plowville. I see my distinguished colleague from Minnesota nodding his head.

President Eisenhower also made similar promises on October 4, 1952, at Fargo, N. Dak., speaking at the agricultural college. The House carried out that promise, and the bill came to the Senate.

I wrote a letter to the Chairman of the Committee on Agriculture and Forestry, the senior Senator from Louisiana [Mr. ELLENDER], and I have his reply. I wrote a letter to the distinguished majority leader [Mr. JOHNSON of Texas], and I have his reply. I intend to read them when the farm bill comes before us for consideration.

I want to know why all of May went by, and all of June, the Congress not adjourning until midnight of August 2, and the farm bill was not brought up. I want to know why the request of the distinguished Senator from Oregon [Mr. MORSE], who upon two different occasions rose and said that we should not adjourn, but should remain in session during August and September to deal with some of the other questions, including the farm problem, was not heeded. Nevertheless, although we had raised our salaries from $15,000 to $22,500, the Democratic Congress allowed the farmers in the hills and valleys to go unaided, notwithstanding the protests of the Senator from Oregon and myself.

As I recall, the House passed the bill on the 16th of May last. The leaders had all of May, June, and July to bring the bill to the floor of the Senate.

The Senator from North Dakota has an unusually good memory. When the debate on the farm bill begins, I intend once more to go into the question of importations of wheat, rye, barley, and oats. We raised a crop of 23 million bushels of rye, and then the Government imported more than 12 million bushels, nearly half the domestic crop, before we could stop the importations. Of course the Commodity Credit Corporation had to buy the grains, and price supports had been placed on them.

Today we hear the distinguished Senator from Indiana [Mr. CAPEHART] speak about surpluses. The occupant of the White House did nothing, in spite of the fact that we had the head of the Department of Agriculture before our committee, to stop the importation of the rye, until months after the Committee on the Judiciary had undertaken its investigation.

Therefore, Mr. President, I am delighted that in a few weeks we shall have an opportunity to debate the whole farm problem on the floor of the Senate. I believe it will be a very interesting debate.

I say to my Republican colleagues, who refused to grant our subcommittee—and this was after the unanimous vote of all members of the subcommittee, Republicans and Democrats alike—$75,000 to investigate monopolies, that it comes with poor grace for them to talk about the high price the farmer must pay for the things he buys and the meager return he gets for his products.

It comes with poor grace for them to talk about surpluses, when under a Republican President, rye, oats, barley, and wheat were imported from Canada.

As I said before, I look forward with pleasure to the time when the debate on this issue will take place. It will be interesting to the agriculturists of this country. We have more than 6 million farmers, the number my friend from Indiana stated. One-fourth the population of the United States is made up of those directly or indirectly interested in farming.

On the facade of the Union Station there is an inscription: "Agriculture is the basis of the economy of the United States." Apparently that fact has received little attention from my Republican colleagues during the time a Republican President has been in office.

I say that with good grace, because I have tried time and time again to help the President. I am anxious to help him. I am a Republican. However, what more can we do than bring the

matter to the attention of the Republican policy committee? We did that time and time again. We did that, Mr. President. We went to the Republican policy committee, and we spoke about it on the floor of the Senate. I made repeated speeches on the subject.

I might add, in closing, that when we get to the point of discussing monopoly in the debate on agriculture, I shall have some very interesting things to say about what happened to the antimonopoly subcommittee when the Democrats took over.

LEGISLATIVE PROGRAM

During the delivery of Mr. LANGER'S speech,

Mr. JOHNSON of Texas. Mr. President, will the Senator from North Dakota yield very briefly?

Mr. LANGER. I yield.

Mr. JOHNSON of Texas. I dislike very much to interrupt the distinguished Senator, but I should like to make a statement which will take less than a minute so that I may leave the floor.

Mr. LANGER. I am always delighted to yield to the Senator, provided his remarks appear at the conclusion of my address.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that my remarks follow those which are being made by the distinguished Senator from North Dakota, and that he may yield to me temporarily without losing his right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I should like to say, for the benefit of Senators, that the majority policy committee met in session today and cleared for Senate action certain bills. I should like to list them so they may appear in the RECORD and so that Senators may be informed of the schedule which is ahead. There are about 20 bills appearing on the calendar which were reported from standing committees last session.

The majority policy committee cleared the following bills:

Calendar No. 361, S. 51, to amend the act entitled "To confer jurisdiction on the States of California, Minnesota, Nebraska, Oregon, and Wisconsin, with respect to criminal offenses and civil causes of action committed or arising on Indian reservations within such States, and for other purposes," introduced by the Senator from Montana [Mr. MURRAY].

Calendar No. 1175, S. 2286, to amend the Merchant Marine Act of 1936 so as to provide for the utilization of privately owned shipping services in connection with the transportation of privately owned motor vehicles of certain personnel of the Department of Defense, introduced by the Senator from Washington [Mr. MAGNUSON].

Calendar No. 1184, Senate Joint Resolution 97, to amend certain laws providing for membership and participation by the United States in the Food and Agriculture Organization and International Labor Organization and authorizing appropriations therefor introduced by the Senator from Georgia [Mr. GEORGE].

I have conferred with the chairmen of the committees and with the respective Senators handling the proposed legislation.

In the particular case of Calendar No. 1184, Senate Joint Resolution 97, the Senator from Georgia [Mr. GEORGE] does not desire to bring the joint resolution before the Senate prior to January 10. Certainly the leadership will be guided by his wishes.

The unfinished business is Calendar No. 1210, H. R. 2889, to provide for the conveyance of certain lands in Necedah, Wis., to the village of Necedah.

Calendar No. 1234, S. 1853, to amend the Natural Gas Act, introduced by the Senator from Arkansas [Mr. FULBRIGHT] and reported by the Senator from Oklahoma [Mr. MONRONEY].

I shall have some further comments to make about that bill, so far as procedure is concerned.

Calendar No. 1246, H. R. 5614, to amend the Communications Act of 1934 in regard to protests of grants of instruments of authorization without hearing, reported by the Senator from Rhode Island [Mr. PASTORE].

Calendar No. 1296, H. R. 6857, to authorize the Administrator of the General Services Administration to convey certain land to the city of Milwaukee, Wis., reported by the Senator from Wisconsin [Mr. MCCARTHY].

Mr. President, I now desire to make a unanimous consent request.

Mr. LANGER. I yield to the Senator from Texas.

ORDER FOR ADJOURNMENT TO MONDAY—THE NATURAL GAS BILL

Mr. JOHNSON of Texas. Mr. President, it is not planned to have any more sessions of the Senate this week.

I ask unanimous consent that when the Senate concludes its business today, it stand in adjournment until Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. On Monday next there will probably be a brief session, and perhaps there will be one other session next week.

The leadership will feel at liberty to ask Senators to consider next week all the bills I have enumerated, with the exception of Calendar No. 1234, S. 1853, to amend the Natural Gas Act. I should like to have the Senate have due, adequate, and full notice that that bill is going to be discussed. I am sure it will be discussed thoroughly and at length, so I wish to serve notice that it will not be motioned this week and will not be motioned next week, but perhaps may be motioned in the early part of the following week, assuming that the Senate has disposed of a considerable number of other matters.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I shall yield very shortly, but I wish to complete a very brief statement. As the Senator may be aware, there have been requests made of the majority leader, and perhaps indirectly of the minority leader, to bottle up the Natural Gas bill and refuse to permit it to be acted upon by the Senate. That bill was reported by a standing committee of this body, and it was ordered reported on June 29 by a vote of 11 to 4. At that time the bill had not passed the House, and it was the position of the majority leader, the senior Senator from Texas—and all of this was concurred in by the minority leader—that in view of the controversy, and in view of the desire of the House of Representatives to act soon, the Senate should not bring up the bill before action by the House, because if it were defeated in the House there would be no necessity to consider the bill in the Senate.

For 5 weeks that bill, which was ordered reported, was not placed on the program, although practically every other bill reported from committee was. When the House passed the bill, the Senate was then a week away from the time it had planned to adjourn. The acting majority leader and the majority policy committee, after conferring with both opponents and proponents, concluded it would be in the best interests of the Senate not to delay the adjournment of the Senate, since Senators had plans to go abroad and other plans, but to take it up in the early part of this present session. It will not be the first bill to be brought up.

Every bill which is ready to be brought up, and which can be cleared by the policy committee, and which has passed the House, and can be placed on the calendar, we shall clear up during the remainder of this week and next week.

However, I wish the Senate to be on notice that it is not the purpose of the majority leader to attempt to subvert the will of an almost 3-to-1 majority of a committee of the Senate.

Today, I invited some of the proponents and some of the stated opponents on my side of the aisle to state their views on the bill. That was done, and the measure was then cleared by the policy committee, without an objection.

Now I shall yield, first to my friend, the Senator from Indiana, and then to my friend from West Virginia.

Mr. CAPEHART. Mr. President, I wish to ask a question, only: Is it the plan of the majority leader to have the Senate in session on Monday and thereafter on Thursday?

Mr. JOHNSON of Texas. Perhaps; but I have first to confer with the minority leader. He has not approved these bills. I shall not program them until I have gone into them with him. But it is our plan to have the Senate meet on Monday and on Thursday, and perhaps on other days next week.

Mr. CAPEHART. Not to exceed three days next week, perhaps?

Mr. KILGORE. Mr. President, will the Senator from Texas yield to me?

Mr. JOHNSON of Texas. I yield.

Mr. KILGORE. Is the bill to which the Senator from Texas refers as the Natural Gas Act, the so-called Harris bill; or is it the Fulbright bill?

Mr. JOHNSON of Texas. The author of the bill is the Senator from Arkansas [Mr. FULBRIGHT]. There may be some minor differences between the two bills.

Mr. KILGORE. I understand there are two very similar bills—one introduced, I believe, in the House of Representatives by Representative HARRIS, and the other introduced in the Senate by the Senator from Arkansas [Mr. FULBRIGHT]. I wonder which bill the Senator from Texas has in mind.

Mr. JOHNSON of Texas. It is my intention to move that the Senate proceed to the consideration of the bill introduced by the Senator from Arkansas [Mr. FULBRIGHT], which the Senator from West Virginia will see on the sixth page of the calendar; it is Calendar No. 1234, Senate bill 1853.

Mr. KILGORE. I thank the Senator from Texas for the information, which is all I wished to obtain.

Mr. JOHNSON of Texas. Mr. President, I hope every Member of the Senate will take notice of the action of the policy committee. I may say that I shall review each of these bills with the minority leader and they will not be taken up until he has had due and adequate notice.

Mr. LONG. Mr. President, will the Senator from Texas yield to me?

Mr. JOHNSON of Texas. I yield to my friend, the Senator from Louisiana.

Mr. LONG. I have been very pleased to hear the Senator from Texas make the statement he has made. I am sure he knows that I was one of those who felt that the bill should be brought up as early as possible. However, I recognized the futility of bringing it up in the dying days of the last session. When a bill is brought up at such a time, prolonged debate by one or two Senators can make it impossible for the bill to be considered and acted upon.

I should like to call the attention of the Senator from Texas to the fact that there is a bill which is important to a great number of States; I refer to the bill relating to the amendments to the Sugar Act. That measure must be passed this year. It also has been carried over from last year; that occurred because there was some objection to the consideration of the bill at that time.

I believe the bill will be reported by the Finance Committee sometime during next week or the following week; and I hope the Senator from Texas will find it possible to see that the bill is considered by the policy committee.

Mr. JOHNSON of Texas. Mr. President, I will say to the distinguished junior Senator from Louisiana, my devoted friend, that it has been the policy of the Democratic leadership under my administration—and I hope with the cooperation of the minority—to do everything possible to clear with the policy committees every bill on the calendar. Many times that was done with my support because I have felt that Members were entitled to be heard and to express themselves.

I have talked with the minority leader and with the Finance Committee about the amendments to the Sugar Act and about other proposed legislation pending before the Finance Committee—proposed legislation in which the Senator from Louisiana has, as I know, great interest. It is my belief that the committee will meet on Friday, and that then it will determine the order of business. But it is my belief, and, I may say, my hope that the amendments to the Sugar Act will be scheduled for prompt attention by that committee, and that very shortly that measure can be reported to the floor.

I assure the Senator from Louisiana that there is no disposition on the part of the Senator from Texas to delay action. As a matter of fact, our calendar is so clean at this time—with hardly 20 bills on it—that we shall have to urge the committees to act promptly, in order that the Senate may have measures on which to act; and I know the Senator from Louisiana will want that done.

Mr. LONG. I thank the Senator from Texas.

Mr. JOHNSON of Texas. Mr. President, I express my gratitude to the distinguished Senator from North Dakota [Mr. LANGER] for yielding.

Mr. LANGER. As I said before, my distinguished friend, the Senator from Texas, is always welcome.

Mr. JOHNSON of Texas. I thank the Senator from North Dakota for his usual courtesy.

Mr. President, let me say that when the Senate adjourns today, it is planned to adjourn out of respect to the memory of several of our deceased colleagues in the House of Representatives, and therefore resolutions will be offered, later on, when I will not be here, and a motion will be made that when the Senate adjourns today, it adjourn out of respect for them.

I again thank the Senator from North Dakota for his courtesy.

THE AGRICULTURAL SITUATION

Mr. HUMPHREY. Mr. President, first I wish to commend the distinguished senior Senator from North Dakota [Mr. LANGER] not only for his remarks today, but for his life of devotion and dedication to the welfare of the farm people of this country.

He is known throughout America—not only in his native State of North Dakota, but also in the State of Minnesota—as a fighter and champion of the family farmer. They know him also as the champion of the farm economy and of the independent businessman up and down our Main Streets.

His efforts to expose some of the continuing abuses of monopoly and to give equality of treatment to agriculture have earned for him the plaudits and commendations and gratitude of people all over the country.

The Senator from North Dakota today has again demonstrated his fearlessness and courage, which have earned for him the very splendid reputation of a political leader and of a political battler.

I remember his fight for funds for the Antimonopoly Subcommittee. He knows that I joined him in that fight as did the senior Senator from Oregon [Mr. MORSE] and other Senators, in the effort to obtain funds for the subcommittee.

He is to be congratulated and commended for his personal sacrifice in that connection, particularly in holding the hearings, literally because of his sheer personal energy and intellect and knowledge of the problem.

Mr. President, I have a brief statement which I wish to make, and then I shall ask that the Senate conclude its session today.

It is welcome to me indeed, as I am sure it is to the Presiding Officer and other Senators, to hear today that the administration now agrees that agriculture is in trouble and that something must be done about it. It is reassuring to know that the administration is finally aware of the seriousness of the problem, after all the criticisms that were heaped upon those of us who have been warning for the past 3 years where agriculture was headed.

I digress to say that day after day and week after week and month after month the junior Senator from Minnesota stood on the floor of the Senate and pointed out, with statistical evidence, what was happening to agriculture.

I take certain pride in the fact that I travel back to my State very often. I spend the summer and fall, whenever Congress is not in session, visiting the people in the State of Minnesota. I can assure Senators that the farm people in Minnesota are aware of the difficulties they face today, and that their representatives have been trying to bring this picture to the attention of Congress and to the attention of the administration, with little or no result, and to little avail.

I am pleased, also, to note that the administration, which has complained so much about surpluses, now admits that the farmer should not be blamed for producing abundantly in response to wartime needs during the Korean conflict.

Mr. President, I have stated that fact throughout the length and breadth of our land. I recall being in Oregon and addressing a large group at Klamath Falls, in the presence of the senior Senator from Oregon [Mr. MORSE]. Klamath Falls is a fine community.

(At this point Mr. HUMPHREY yielded to Mr. MORSE for a statement, which, by unanimous consent, appears at the conclusion of Mr. HUMPHREY's speech.)

Mr. HUMPHREY. Mr. President, I am rather amazed to see the President of the United States echo Secretary Benson's now familiar line that agriculture's troubles partly stem from "laws that were too long continued." I presume he is referring to 90-percent price supports, as Secretary Benson has done.

If President Eisenhower feels that 90-percent supports were continued too long, why, may I ask, did he approve support at that level in his 1952 campaign, and promise to continue it at least another year?

Why, if that was the trouble with agriculture, did he wait until 1954 to pull the rug out from under an effective support program?

The truth is that in 1952 our administration friends loudly proclaimed great

bipartisan support for the 90-percent level.

I digress to say that in Minnesota they advocated 100 percent in the enthusiasm of the political occasion. They did not talk then about the support program being "too long continued." It appears rather inconsistent to do so at this late date.

However, I welcome the President calling a many-sided assault on the stubborn problems of surpluses, prices, costs, and markets. I am glad to see he wants a steady, persistent, imaginative advance in the relationship between farmers and their Government.

But he hardly need wait for further messages. All the legislation needed for this many-sided assault is now in the hopper, going begging for any administration help in achieving its enactment. All the steady, persistent, imaginative advance he could hope for has been pressed vigorously upon Secretary Benson by many of us for several years, with little results. I am sure even Mr. Benson will agree I have been persistent. I am sure the RECORD will show that my suggestions have been more imaginative than his, when he has felt compelled to "borrow" a few.

I was interested to note in the President's message the liberal amount of borrowing recommended—sort of lend-lease on the home front by the administration in the farm programs which have been placed before the Congress.

If the President really wants to do something about agriculture, all he needs to do is to tell Ezra Taft Benson to quit opposing constructive legislation already pending before the Senate that would give us an effective and workable farm program.

Some of us did not wait this long to learn that agriculture was in trouble. Some of us have been trying to do something about it for quite a while, with nothing but obstruction from the Secretary of Agriculture and his associates.

I should like to call to the attention of this body a group of measures already pending, which, combined together, would form a comprehensive and effective farm program holding far more promise of results than anything the administration has had to offer.

I point out in particular that the soil bank program, the acreage conservation reserve program, which is the "new" gimmick, supposedly, of the administration, has been before the Senate of the United States for more than 3 years. I ought to know. I am the sponsor of it. I do not mind the Secretary of Agriculture borrowing it, but I should like to have him remember occasionally where he got it.

I should like to point out for the RECORD that as late as September 30, 1955, his Department and the Bureau of the Budget unalterably opposed the soil-bank program, as indicated by the records in the Committee on Agriculture and Forestry. A copy of the letter from the Department, dated September 30, 1955, is in my possession. But, once we started our farm hearings, once we started going around the Nation, and once the people heard of the soil bank idea, there was almost unanimous support for it from the grassroots. After there had been tremendous and overwhelming public opinion in support of it, the Secretary, as if it were the product of his own imagination, supports it and offers it as his very own.

Just yesterday I urged our Senate committee to write and adopt a comprehensive omnibus farm bill, a farm program attacking the numerous problems confronting American agriculture. As the Senator from North Dakota has said, it has been debated for several years.

Mr. President, on the 16th of December I spoke before the Farmers' Union Grain Terminal Association. There were present almost 7,000 delegates from western States. I have in my hand a copy of that address, and I am going to place it in the RECORD at the conclusion of my remarks.

Before we hear any more from Senators and from the press about surpluses, I want them to read that speech and look at the statistical record as to surpluses. I will stand on the floor and debate the issue, because this is a question concerning which I feel well fortified. I know the issue and I intend to have my say in the debate, when it comes about, on the bill which will come from the Department of Agriculture.

Mr. President, I ask unanimous consent to have inserted in the RECORD at this point the proposed legislation now pending to carry out the program which I have either sponsored or cosponsored with some of my colleagues.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

Instead of a piecemeal approach that may tend to give more emphasis to one part of a farm program than another, it is time we take an overall look at what is needed and present the Congress with an omnibus bill covering all the improvements presently necessary in our farm program.

All phases of our farm program are interrelated, each dependent upon others for effective results. For that reason, it seems to make good, practical sense to approach our agricultural problems broadly and in a comprehensive manner.

1. Restoration of 90-percent support on basic commodities, but with a cutoff on any support loans on production valued in excess of $25,000 from any one farm.

2. Inclusion of perishables such as beef, hogs, milk, chickens, and eggs under the same level of support as basics, but providing discretionary authority for use of a broader range of methods of support such as production payments, direct purchases geared to reflect price protection to farmers instead of letting the benefits go to processors, and loans or purchase agreements, either individually or in combination with each other.

3. Extension of mandatory price-support protection to other feed grains at a feed-value equivalent ratio to the support level for corn.

(All 3 of these objectives in items 1, 2, and 3 are covered in S. 1991.)

4. A conservation acreage-reserve program on a voluntary signup basis, providing for a soil, water, and timber bank to encourage retiring land from crop production and building its future fertility by expanding grasslands, preserving more wetlands, and stimulating planting of brush and timber cover, with adequate protection against expanding commercial production of livestock and dairy products (S. 1396).

5. A comprehensive Federal yardstick family farm credit program providing direct and guaranteed Federal loans to meet all needs of family farmers unable to obtain such credit at reasonable rates from cooperative and other private sources (S. 2106).

6. Extending authority for and expanding the Agricultural Trade and Development Act for overseas disposition of agricultural surpluses (S. 2253).

7. A food stamp plan to stimulate domestic consumption among low-income families (S. 627 and S. 45).

8. Specifically provide for administration of farm programs by farmer-elected committees at the community, county, and State levels (S. 544).

9. Extend and expand special school-lunch milk program, to include provisions for milk distribution among child-care centers, settlement houses, and other nonprofit children's institutions and camps; extend authorization for brucellosis eradication indemnities; and fix by law formula for milk equivalent parity ratio for manufactured dairy products (S. 2121).

10. Forest marketing guidance through authorizing price reporting on forest products and further research into forest products marketing problems (S. 2105).

11. Loan authorization to finance improved terminal marketing facilities for handling fresh produce, aimed at eliminating inefficiency costs now passed along to consumers (S. 1075).

12. Revitalizing crop insurance program by turning administration back to farmer-committees and expanding to more counties and more crops (S. 1852).

Mr. HUMPHREY. Mr. President, instead of a piecemeal approach which will tend to give emphasis to one part of the program more than another, it is time we presented an omnibus bill, an overall bill covering all the questions involved in our farm program. All phases of our farm program are interrelated, each depending upon the others, and for that reason it seems sensible to me that a practical approach must be one that is presented in a broad and comprehensive manner.

Let me cite the facts. We have heard the Secretary speak a number of times about improving the price-support program by imposing a limitation on how much the Government will permit with reference to particular price-support loans, as if it were new.

Mr. President, I introduced Senate bill 191 which has been pending for 3 years.

Mr. President, the soil conservation acreage reserve bill which the administration now heralds and which the President pointed out in his message is Senate bill 1396, sponsored by the junior Senator from Minnesota. A similar bill was sponsored in the House of Representatives by Representative MARSHALL and Representative KNUTSON, of Minnesota.

Then we hear the President say a new program covering family farm credit is needed. We have Senate bill 2106 covering that subject.

Then we have heard about the necessity of a greater disposal of agricultural surpluses. We heard quite a speech on that subject today.

I would call the Senate's attention to S. 2253, of which I am a co-sponsor. It has been before the Senate for 2½ or 3 years. It was also before the 83d Congress.

We hear, further, about the necessity of helping to feed our own hungry and

needy persons. The senior Senator from Vermont [Mr. AIKEN] and I have had a bill before the Senate on that subject for years, S. 267, and I have a separate bill of my own, S. 45.

The Department of Agriculture has resisted the food stamp plan as if it were a plague. The Department of Agriculture resisted for 3 years any attempt to get our surplus food into the hands of church groups such as Lutheran Welfare and Catholic Welfare, CARE, and other organizations, so as to get the food overseas. Only about 3 weeks ago the Secretary of Agriculture, in desperation, announced that he would release surplus food for those fine religious and charitable organizations.

I have in my office a file eight inches thick containing an exchange of letters with the Department of Agriculture, urging that this be done.

The closer we get to the election, the closer we get to the ballot box, the greater the enthusiasm seems to be for an agricultural program. Mr. President, I heard a lot of enthusiasm in Minnesota, at Plowville, about an agricultural program. I will say frankly, as I have said on the floor of the Senate many times before, that the candidate of the Republican Party in 1952 literally swept the decks. He promised more in a shorter period of time to more people than any candidate ever promised before, and he delivered less. He did it in the State of Minnesota.

Then, as if to add insult to injury, he went to North Dakota and redid it.

He then went to South Dakota, where he did it all over again. Then he went to Nebraska and Iowa, where he compounded the whole injury.

Those things are not going to be forgotten. Some of us feel that the farmer-elected committees should be farmer run. So S. 544 has been introduced to strengthen the farmer-elected committee system. To use up the domestic surpluses for school-lunch programs, for child care, for camps and settlement houses, and to help dispose of the dairy product surpluses, we have S. 2121.

For marketing services, we have S. 2105.

To help in the marketing of fresh fruits and produce, we have S. 1075.

For crop insurance, we have S. 1852.

Lest anyone think I have been talking about bills which are not truly in existence, I call Senators who are present to act as my witnesses as I display the bills. There are 12 of them here before me.

Mr. BENDER. Mr. President, will the Senator yield?

Mr. HUMPHREY. I will yield in a moment.

Those are the bills which the junior Senator from Minnesota has either sponsored or cosponsored with Senators who have a brilliant, long-time leadership in the field of agriculture. So while I welcome most sincerely the message of the President, and I am really looking forward to his more detailed message on agricultural problems, I think the first message the President had better deliver is one to Mr. Benson. The Secretary of Agriculture is the first man to whom the President should say whatever he has to say.

If Mr. Eisenhower will be as specific with Mr. Benson as he was with the people of Minnesota in 1952, I will have no complaint. All I ask the President to do is to remember the speech he delivered at Plowville, Minn., which covered cereal grains and livestock, including hogs, and all perishable commodities—a total comprehensive farm program—the speech he delivered on soil conservation on an occasion in Plowville and also the speech on farmer-elected committees.

Mr. President, while you are in Key West, getting a much-needed rest—and God bless you in your rest and recovery—I say this in all sincerity—in one-half hour's or 1 hour's time off from your official work, or whatever period of time you take off, will you do one thing? Will you get out the speech you made at Kasson, possibly the speech at Fargo, N. Dak., and also the one at Brookings, S. Dak.—those three speeches—give them to Mr. Benson, and tell Mr. Benson that he must conform with those speeches in terms of performance, or else resign, so as to enable you to get someone else who will do it?

If that were to be done, the junior Senator from Minnesota would say that it was politics with honor; that it was a promise with performance, with the possibility of positive results.

Now I yield to the Senator from Ohio.

Mr. BENDER. I wish to ask the distinguished junior Senator from Minnesota when he introduced the bills to which he has referred.

Mr. HUMPHREY. Those bills were all introduced in the 83d Congress, to no avail. Many of the bills were reintroduced last year in the 84th Congress.

Mr. BENDER. I think the junior Senator from Minnesota will understand that I am being serious when I say that certainly this has not been a Republican Congress. The Senate has been controlled by the Democrats, by a majority of two votes. In the last preceding Congress, when Senator Taft was alive, the Republicans had a majority of one in the Senate. Upon the death of Senator Taft, instead of having appointed a man with the point of view of Senator Taft, a New Dealer was appointed in his place, so obviously it was a Democratic-controlled Congress which had the responsibility.

Obviously, the Senator from Minnesota, with his great influence—and I am sure he has influence; I know that every Member of the Senate, on both sides of the aisle, respects him—was not able to have one of those bills brought up for consideration on the floor of the Senate. I had no opportunity to vote on any of the bills. The Democratic-controlled Congress did absolutely nothing about them, even in the face of what was happening.

I have sent to my office for a record of what the present administration has done about the farm problem and the farm program. It certainly has endeavored to work sincerely on behalf of the farmers, recognizing the need for relief, and understanding the plight which confronted the American farmer.

Under the circumstances, I do not believe the Senator from Minnesota should condemn the President of the United States for not having considered the Senator's bills, when the Congress controlled by his own party failed to consider them and failed to give all of us an opportunity to debate them and vote on them.

Mr. HUMPHREY. I thank the Senator from Ohio for his observation. I know that he speaks with sincerity. I know that as the years go by, he will find that legislation is seldom considered in committee until a Bureau of the Budget recommendation is received either for or against a bill.

Mr. BENDER. Mr. President, will the Senator yield?

Mr. HUMPHREY. Not at this moment.

I say most respectfully that the Bureau of the Budget, which is an executive agency of the Office of the President of the United States, and the clearinghouse for all department views, either drags its feet, and apparently drags them with a load of cement in each shoe, or it rejects and opposes. Some Senators have been trying for 2 years to get a statement of the views of the Bureau of the Budget on the soil-bank program. Finally, on September 30, 1955, we got it.

Mr. KNOWLAND. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. KNOWLAND. Does the distinguished Senator from Minnesota not agree that while it may be nice to have the views of the Bureau of the Budget, certainly it is not the Senator's contention that we have surrendered our legislative power, which under the Constitution is vested in Congress, to any agency of the executive branch of the Government?

The Senator would not hold, would he, that Congress was paralyzed, or that the Senate under the control of the distinguished Senator's party was prevented from reporting proposed legislation, merely because a report had not been received from the Bureau of the Budget?

Mr. HUMPHREY. No, I say most respectfully to the distinguished minority leader, I would not say that Congress is paralyzed; but I certainly say it is not energized.

Let us not "kid" ourselves for a moment by thinking that when the President, the executive branch of the Government, the Cabinet, or the executive agencies say "No," or when they stand in mute silence, or when they use their propaganda to fight against the bills, it does not have its effect.

One of the reasons why we have campaigns for the Presidency is so that policy may be developed. The administration has sent a message to Congress. This is an administration program. There are Members on the other side of the aisle who will say, "I will wait to see what the administration's program is." All Democrats are not in accord on these matters. I think it is fair to say that the overwhelming majority of the Democrats have been in accord on agricultural matters. There are those who hold different opinions.

That means that there is no working majority in the Senate of the United

States, but I may say that if Executive help is secured, a working majority will be obtained. That is the way foreign-aid bills are passed. How many times have I heard some distinguished Members of the body say, "I have some doubts about this foreign-aid bill. I have some doubts about this treaty. But in this case the President asked for it, and I will resolve my doubts in his behalf." I have said that to myself. Others have said that equally as definite and even more often.

Mr. BENDER. Mr. President, will the Senator yield?

Mr. HUMPHREY. Before I yield, I wish to say at this point, since I mentioned an address, I feel that there is considerable statistical information in it. Since I know this RECORD will be read by our colleagues, and I hope it will be read by members of the administrative government—there is some good reading in it—I shall read a statement which was broadcast over 7 States by a combined radio program, which was listened to by 8,500 in the auditorium in St. Paul, at which there were 700 farm delegates, which speech I think states the case for a farm program.

I ask unanimous consent that the address be printed in the RECORD at this point.

The PRESIDING OFFICER. Is there objection?

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR HUMPHREY AT ANNUAL MEETING OF FARMERS UNION GRAIN TERMINAL ASSOCIATION, ST. PAUL, MINN., DECEMBER 13, 1955.

TIME OF DECISION

It is good to be back with the GTA. You always renew my faith in America and its democracy. Sometimes that faith needs renewing, when you are in Washington long these days.

You renew my faith because you are America, and your cooperative efforts exemplify democracy in action. You are the vigorous backbone of this great heartland of America.

Your pocketbooks and bank accounts may be flatter, but I am glad to see that your spirit—and your determination—is still unbroken.

It has been my privilege to address this inspiring gathering for each of the past 2 years. Recalling my talks to you in 1953 and 1954, it is mighty tempting to indulge tonight in a few "I told you so's." But I am going to restrain myself from that temptation.

The situation now confronting us is too serious to be satisfied with pointing to the stubborn blindness of others. You want action. You want results. We want to help provide it for you.

We are now approaching the time of decision on agricultural policy. The great debate has gone on long enough—in fact, too long. We are going to try to make that decision in this coming session of the Congress. If we are unable to do it then—if the President is misguided and his short-sighted and stubborn Secretary of Agriculture block us from doing what needs to be done—the decision must be taken to the American people in the elections of 1956.

I'm not talking about politics for politics' sake. No one in good conscience can take delight in exploiting farm hardship for sheer political advantage. No one has tried harder than I have to halt the downhill trend in our agricultural economy before we entered a political year, regardless of its political consequences. Time after time I have warned that when farmers go broke it makes little difference whether they are Democrats or Republicans—they are just as broke. It's not partisan politics I'm talking about, in pointing to 1956 as a year of decision. It's legitimate farm politics—the fight of American agriculture for survival, through the processes provided in our democracy for translating the will of the people into action. It's the insistence by farmers to be heard in the ballot box, if they can't be heard anywhere else. There is no other course we can safely take. The welfare and economic well-being of our agricultural economy is so vital to the long-range prosperity and progress of this Nation, and the ability and capacity of our country to give effective international leadership, that this issue can no longer be ignored or dealt with in indecisive or uncertain terms or policies.

We would be foolish indeed to forget the lessons of our history. American agriculture still maintains a pivotal role in the total national economy. It is the keystone of our economic structure. That keystone is crumbling, while men in high places in Washington utter pious phrases and slogans to hide their inadequacy—or stubborn unwillingness—to meet the realistic needs of our time.

Let's squarely face the cold, harsh real facts of our agricultural economy. Farmers' total net income is down 29 percent since 1952. Family farm purchasing power is down 25 percent since 1952. Farm population has been squeezed down 9 percent since 1952. The number of farms has been forced down 7 percent. Yet the average per person income from farming in our population is down 19 percent. Farm income and farm prices are still going down. Farm net income and purchasing power is down 12 percent this year from last year. Prices received by farmers for corn during the third quarter of 1955 were down 14 percent from the same quarter in 1954. Hogs are down 22 percent for the same period. Wheat was down 5 percent. Soybeans were down 30 percent.

Our parity index—the accepted standard of fairness in the relationship between prices farmers received and the prices farmers must pay—was down to 81 at the start of this month. This is 7 percent under a year ago—the lowest ratio recorded since October 1940. The outlook is for more of the same for 1956, according to official forecasts at the Department of Agriculture's recent outlook conference. Farm prices are going to be still lower, they admit. Farm income is to drop even further.

I could go on reviewing such depressing statistics for the next hour. There's plenty more of them—and they are all bad. They are not just my estimates. They are official statistics of the Agricultural Marketing Service in the Department of Agriculture, and from Economic Indicators published by the President's Council of Economic Advisers.

They are available for Ezra Taft Benson to read and study, just as much as they are available to me or anyone else. The simple truth is that every valid economic indicator confirms the fact that agriculture is in trouble—serious trouble. I know I need not prove this to you. Your own personal farm experiences provide all the depressing statistics you need. Yet I'm recounting them for the record tonight, for the sake of those skeptics who have stubbornly refused to demonstrate any concern as to what is happening to the foundation of our economy—the very bloodstream of our economic life, here in the great Midwest.

When some of us tried to warn the country 2 years ago where agriculture was headed, we were scoffed at. We were called prophets of doom. We were assured everything was all right; it was just a "temporary adjustment," they kept saying.

When we became even more alarmed at trends a year ago, some people in high places still scoffed. We were already at the bottom of the decline, they said; everything was going to be rosy from here on out. It was all just politics, according to them—just an attempt to create a statistical depression. It wasn't real.

Well, I ask you tonight—has your loss of income in the past year been real, or just "statistical"? It's real enough for the thousands of farmers who have been forced to the wall. It's real enough for the small town businessman who has felt the decline of farm purchasing power. And, at long last, it appears real enough to scare some previously unconcerned politicians who now see another election around the corner. How did we get into this fix? How did the Republican administration let agriculture drift aimlessly into depression while the rest of the economy was booming? Too many people in Washington turned their backs on the fundamental importance of agriculture to our economy. Too many people in Washington—and, yes, even too many people out on the farms—were deceived into rejecting sound, time-tested agricultural policies—policies and programs that helped bring American agriculture out of the depths of depression, strengthen its economy to where it withstood every challenge of World War II, the readjustment afterwards, and the Korean conflict.

Too little concern was shown when our highest public officials relegated agriculture to a minor role of importance in their considerations and counsels. Too many people let themselves be brainwashed by propaganda and slogans designed to conceal a deliberate intent to reverse agriculture's progress toward full and just equality in our economy.

If only half the energy and effort used by those in high places of our Government to distort historical facts—as part of a brazen, partisan, political attempt to divert responsibility for the fix we are in today—had been devoted to aggressive, constructive attempts to stem the tide of agricultural recession, American agriculture would be in far better shape today regardless of any laws on the statute books.

We are more interested in the present, and the future, than the past. I'd rather talk about what can be done now, than argue over what was done in years gone by—and I intend doing so before I conclude. It would be far better if the Secretary of Agriculture would do the same. But Secretary Benson has so distorted history in his stubborn partisanship that it's time to call him to account, before his unfounded dogma is preached further as fact by great segments of the misguided press in this country. Let's set the record straight tonight, once and for all.

Where did our temporary surplus of food and fiber come from? Were price support loans at 90 percent of parity really responsible for the excess abundance that has created such concern? Turn back, for a moment, to 1951. We, as a Nation, were involved in a deadly serious attempt to halt Communist aggression in Korea, with grave fears that world war III might result. We had learned a lesson from World War II, a lesson that could not be forgotten. Food and fiber are urgently needed to win a war, a greatly expanded supply of food and fiber.

Our top policymakers of Government charged with the Nation's security determined upon goals that had to be met for the Nation's safety. These goals were not the product of any Secretary of Agriculture's guess alone. They were the studied needs outlined by our defense officials, our State Department, our Munitions Board, our Security Council.

During 1951, we had consumed as feed, more feed grain than we produced. We ate

into our reserves. Looking ahead, the only safe answer was to increase production—or risk a shortage in time of national emergency. The Department of Agriculture was asked, in the Nation's interest, to call upon America's farmers to increase production of feed grains, or cotton, and of other commodities for which potential demand was soaring. Secretary of Agriculture Brannan was called before the Senate Agriculture Committee in the spring of 1952, to be questioned about whether these national security goals could be met.

No one then, Republican or Democrat, challenged the need for such increased production. Not a voice was raised against the goals. The only question was whether 90 percent price supports was high enough to get the production we needed. Secretary Brannan promised the Senate an all-out campaign to achieve the production needed, regardless of price. He had faith in America's farmers, faith they would respond to the Nation's needs. However, he expressed a hope farmers could, in return, have faith in their Government not to let them down afterwards, if they produced more than was needed.

His faith in America's farmers was justified. His hope that farmers could have the same kind of faith in their Government, apparently, was not. America's farmers responded to the Nation's needs, when they were called upon to respond. Ninety percent price supports didn't do it. An organized campaign was required. Mass meetings were held all over the country, calling on farmers to produce more, with less manpower to help them, less machinery to work with.

The record of agriculture's response is a glorious one in our Nation's history. We met our goals in 1952. Agriculture did its full part in preparing for whatever might come.

That's the so-called "mess" Secretary of Agriculture Benson talks about inheriting, when he took over at the start of 1953. We were still at war in Korea, and we needed our maximum production. Farmers had geared their production to the security needs of America. Yet farm prices averaged 100 percent of parity in 1952.

The total carryover of major farm commodities at the beginning of the 1953 marketing year under Secretary Benson was neither unmanageable nor a serious problem. Rather, the carryover supply was the safety reserve required in a time of national emergency. Carryover of wheat was only 562 million bushels. Of corn, 769 million bushels. Of total feed grain, carryover was only 27 million tons.

At the start of the 1955 marketing year, after 2 years of Bensonism, carryover of wheat was 1,021 million bushels. Carryover of corn was 1,050 million bushels. Carryover of feed grain was 29.5 million tons. And we've added recorded production on top of it.

My friends, if surpluses have become unmanageable, and are to be blamed for depressed prices in agriculture, they are surpluses created by this administration, through price-depressing, income-reducing policies. Our surpluses are not the result of 90 percent of parity.

Secretary Benson has deliberately persisted in deceiving the American people on this false premise—and is still publicly blaming agriculture's plight on what he calls the mistakes of past Democratic leadership. But he confessed the truth once, when few Americans were around to hear him. When he spoke before the FAO in Rome, he told the rest of the world that America had increased production to protect the free world from the threat of shortage and scarcity, and that as a result, the free world had an obligation to help absorb that increased abundance. Why doesn't he admit that to the American people?

If the free world has a moral obligation toward our farmers for their all-out emergency production, so, indeed, must our own Government have such a moral obligation. If no satisfactory program has been evolved to wisely use our abundance, the responsibility rests upon the shoulders of Secretary Benson and President Eisenhower.

If no satisfactory program has been devised to protect farmers' income while adjusting production to world conditions that changed after 1952, the responsibility rests again upon the shoulders of those who asked the American people to trust their leadership in 1952.

Oh, I know some people say Secretary Benson's lower support prices haven't had a fair trial, and that his sliding-scale program hasn't been in effect until this year. The truth is, that Secretary Benson's attempt to control production by lowering farm prices has been in effect and force since the day he took office. His intentions to bring down support levels were made clear right from the outset. He wasted no time in lowering support levels over which he had discretion, and started a vigorous campaign to change the law so he could bring the rest down.

The time that future price prospects may have a bearing on a farmer's intention is at planting time, not at harvest time. When farmers planted in 1953, they knew support levels would be lowered on some commodities and likely go down in the future on others. When they planted in 1954 they knew the pressure was still downward, with a greater slide ahead. When they planted this year, they knew the squeeze of lower prices are really on.

Yet production has gone up consistently, just as many of us warned it would. It has gone up the most on commodities where support levels were cut the most.

The earliest and most drastic price-support cut Secretary Benson made were on feed grains, for which the law gave him full discretion. Yet today the total supply of feed grains and other concentrates has increased to a new high of 197 million tons for the 1955-56 season, and about 14 percent higher than the 1948–53 average.

Let me say right now it has been Secretary Benson's philosophy of cheap feed that had brought on cheap hogs and cheap beef, and thrown the greatest income-producing segments of our agricultural economy into a tailspin. And let me hasten to add that it is cheap hogs and cheap beef to the producer, not to the consumer. While farmers suffer hardship, meat packers' profits have soared tremendously. They attempt to blame consumer meat prices on higher labor costs, yet the truth is that labor cost per pound of meat coming out of our packing plants today is lower than a year ago. Any increases in wage rates have been more than absorbed in increased productivity, letting packers reap a windfall of profit at the expense of both livestock producers and consumers.

Secretary Benson's farm program stands today condemned as an utter failure, a proven failure. And no wonder. It was born in a spirit of preconceived political prejudice and partisanship. It has increased surpluses, rather than reducing them. It has reduced income, rather than increasing income. It has driven prices down, rather than push them up. It has resulted in the liquidation of billions of dollars of farm assets. It has spread fear and uncertainty throughout farms and ranches of the Nation, and demoralized farm markets. Even the much-vaunted business-like efficiency of Republicans is absent from the Benson farm program.

It is a monument of mismanagement. It is a horrible example of confusion. And it is being administered by stubborn and willful men unwilling to admit the error of their ways, more interested now in saving face than in saving the agricultural economy.

Farmers can no longer look to the Department of Agriculture as their friend in Government. The great farm committee system of freely-elected farmer committee members, so essential to the successful operation of any farm program, has been demoralized and become the victim of political manipulation.

Farmers no longer run their own farm programs. Republican Agricrats are in the saddle. The Department of Agriculture has become a privileged sanctuary for processors, speculators, and financiers.

Just as Republican policies are driving the farmers off the land, they have long ago driven farmers out of the Department of Agriculture. I'm sorry to sound partisan. But the hour for righteous indignation is at hand. It's amazing that people are still gullible enough to accept the Benson brainwashing process. He bemoans the surplus, which his policies have created and are aggravating. He bemoans farm program costs, which have soared to unbelievingly new highs under his bungling administration—with less results to show for it.

He talks about freedom from regimentation, then invokes stricter controls than agriculture has ever before had to endure, plus the worst regimentation of all—the regimentation of poverty.

He talks about bipartisanship, while injecting more partisan politics into administration of our farm programs than ever before in history. The sad and tragic thing about this administration is that it has now become a victim of its own propaganda. It has tried to scare the daylights out of the American people on this issue of farm surpluses. In the process of so doing, it has frightened itself.

In order to meet this so-called monstrous problem, it has embraced again a falacious economic philosophy—the same economic practices that were tried and failed, in the days of mass unemployment in the early thirties.

The idea that by reducing prices you will reduce production and thereby solve agriculture's income problems is a throwback to a repudiated political-economic formula that was tried on other surpluses a generation ago.

If mass unemployment—a labor surplus—developed, the supposed cure was to let wages fall until reemployment became profitable, or until hunger-driven men would accept jobs at any wage. That's real regimentation.

If prices were falling, the cure was to let them fall until they hit bottom. If production exceeded consumption, the cure was to let enough surplus small-business men fail. Thus, these short-sighted people rationalized, every depression would ultimately end.

The great progress of our general economy during the past quarter of a century, from boom-and-bust to stability and progress, from inhumanity to social conscience, has rejected this false economic doctrine for most segments of our economy. Yet the Republicans are doing today to the American farmer just what they did to the American workingman 25 years ago. It's time these Republican Rip Van Winkles woke up, and learned some lessons from the past.

Our society has found that decent wage and living standards for workers required collective bargaining—another term for orderly marketing of labor—and unemployment compensation, another term for price supports for workers' income. Our society has accepted pegging of interest rates by the Federal Reserve System to assure solvency of our banks, tariffs to protect our industry, and assurance of fair returns on investments for our transportation and utility systems. Your Government provides and protects these standards by law.

It's about time, then, that we accept orderly marketing and price protection for farmers, as a legitimate function of Government. Please don't misunderstand me. I'm not in any sense saying that legislation alone can solve everything for the farmer, or that the farmer should put his sole reliance in legislation.

What I am saying is that Government has just as much responsibility to promote the welfare of farmers, as it does the welfare of any other segment of our economy. It is failing in that responsibility today.

Last week I spoke before the National Association of Manufacturers in New York. The subject of their panel, when I appeared, was Political Requirements for Prosperity. Business and industry exerts its influence to have legislation enacted and policies adopted which it feels will be beneficial to business. There's nothing wrong with that—and there's certainly nothing wrong with the farmer asking to be remembered too.

Why should he be told to go home and take care of his own problems, and to quit looking to his Government for help? We need men in Washington today who understand that agriculture is a truly competitive industry, made up of independent enterprises that are the trademark of the American economic system. This competitive economy needs built-in economic safeguards, and a climate of Government cooperation for its preservation.

The central issue is more than an argument over level of price supports, or, for that matter, the details of any farm legislation. It is the basic attitude of our Government toward American agriculture. No law is any better than the spirit and intent of those who administer it.

Do we really believe in the concept of equality for agriculture? Do we really desire to maintain and promote the traditional American social-economic pattern of family farming? If we really believe in equality of agriculture and continuation of the family farm tradition, then Government must so design its programs and policies as to achieve and sustain these objectives.

Farmers are tired of being looked upon as statistics. They want to be looked upon as people, as human beings, as first-class citizens, as individuals of equal importance to anyone else in the national social and economic picture. They justly deserve all of this.

How can any farmer believe this administration really wants to see 100 percent of parity for farmers in the market place, as they profess, when its own spokesmen insist, out of the other side of their mouths, that crop loans at 90 percent of parity are too high because they price products out of the market, and invite foreign competition?

Yet that's the kind of doubletalk Mr. Stassen dished out to another group of Minnesota farmers recently—and captured newspaper headlines doing it.

How can any farmer believe this administration really wants agriculture to achieve equality of income, when one of its spokesmen says farmers were living in a "dream world" back in 1951, and shouldn't expect to get such prices again? Yet even in this "dream world" of 1951, the average net income of farmers was only half the per capita income of others. How brazen can they get? How ridiculous can they get? Why should farmers, alone, be expected to take a downhill skid they call "adjustment," while the rest of the economy reaps profits far beyond their own "dream world" wartime highs?

We've mentioned what has happened to agriculture since 1952. What has happened to the rest of our economy? Corporation profits, after taxes, are up 36 percent since 1952. Interest collections are up 22 percent since 1952. Does this administration tell business and industry it should quit expecting such a dream world, and start adjusting downward? Of course not. That kind of talk is reserved for farmers. How long do you think a Secretary of Commerce would last if he persisted in publicly telling business and industry their profits were too high, and that they should expect less for their products next year? Yet that's the way the Secretary of Agriculture has talked, ever since he's been in office. Is it any wonder farm prices have gone down, when the Government's official spokesman for agriculture keeps telling the public and the trade that prices are too high, and must be brought down?

We've had enough of such negative leadership. It's time to call a halt. It's time to move ahead toward full prosperity for agriculture. It's time to demand equality for farmers. Yes, the issue before us involves more than price supports.

It is the entire question of fair income—fair not only to the farmer in meeting his living and operating costs, but fair in terms of relationship to the total national economy.

Any sound prosperity in our country must be built upon a firm foundation of balance in the economy, of maximum production, maximum employment, and maximum purchasing power. Our Government is committed to that concept in the Employment Act of 1946. That's why we have a Council of Economic Advisers for the President, to guide our economy toward that objective.

We appraise the health of our economy every year, to see what needs being done to maintain that objective of balance between the triple goals of full employment, full production, and full purchasing power. We are constantly adopting and adapting policies and programs for the rest of the economy to implement that objective.

Why must agriculture be lost in the shuffle? How can we possibly achieve the goals for our total economy, if one major segment is left to drift aimlessly out of balance with the rest?

We cannot forget the tragic lessons of the early 1920's. Then, too, we heard the political hucksters sing the sweet words of "peace and prosperity." The stock market was at an all-time high. Corporate profits were going up and up. Then came the collapse that brought in its wake depression, unemployment, bankruptcy, and war.

A balanced economy is as vital to prosperity as a balance of power is to peace. We cannot and must not close our eyes to the dangers present in a farm recession. The solvency and security of the Nation is at stake. The farm problem is everybody's problem.

We can and must seek to bring agricultural income and purchasing power back into balance. We can and must seek to keep it in balance, so that farmers can share in rising living standards along with everyone else in our country. We must do it before agriculture's imbalance topples the rest of our economy. We can and must seek to realize fair income standards for agriculture through every means at our command—through a variety of means, not by price supports alone.

Many of us have been calling for new and broader approaches to our farm program, and offering concrete proposals to achieve our objects. We haven't been just critics and obstructionists. We have continually matched our objections to what was going on with constructive suggestions of what could and should be done.

Two years ago, and last year, before this same organization, were outlined many of these new and constructive suggestions for improving our farm program. We have insisted upon, and still insist upon, more adequate income protection for agriculture. We have not wavered from our conviction that to be effective, such protection must be based upon 90 percent of parity—and cover more commodities.

We have insisted that the relationship between our various feed grains must be kept in better balance, by support levels based upon a feed value ratio equivalent to corn. We have repeatedly recognized that an effective farm program must offer protection to producers of end-products like beef and hogs, and eggs and milk, as well as to the producers of feed that goes into such products.

Our goal has been, and still is, broader income protection for a broader segment of agriculture. But we have sought more workable methods of achieving it, including combinations of compensatory payments along with crop loans and purchases. The need for such alternative methods of income protection is more apparent than ever today. It is flexibility of methods we need in our farm program, not flexibility of income levels and flexibility of prices.

We have sought and will still seek to eliminate excessive aid to mass producers least needing it, through limiting income and price assistance to some fair family farm standard. We have sought to support and encourage cooperative action by farmers themselves, for more orderly marketing and improved marketing facilities. We cannot permit undermining of our great system of service, supply and marketing cooperatives, as a bona fide extension of the free enterprise system.

We have sought, and still seek, expanded foreign trade—and greater use of our food and fiber abundance as a constructive arm of our foreign policy. We have urged and supported greater participation of voluntary agencies such as CARE, Church World Service, and other religious groups in overseas distribution of food. We have proposed that the United States take the initiative toward establishment of an International Food and Raw Materials Reserve, under the United Nations.

We have sought, and still seek, expanded domestic consumption of food—through stepping up our school lunch program, expanding the special milk program, and establishing a food stamp program to supplement the food purchasing power of our aged and underprivileged low income groups.

We have sought, and still seek, an expansion and liberalization of farm credit geared to modern agricultural production. We have sought, and still seek, a more realistic way of obtaining production adjustments through creation of a Conservation Acreage Reserve, with incentives for taking land out of production and diverting it to soil-building practices to preserve its fertility.

America's rural economy must not be expected to absorb alone the hardship and loss of any production adjustments required for the good of the entire Nation's economy.

Just as the entire Nation shared in the financial burden of converting industry from wartime to peacetime production, and then again back into defense production, the entire Nation has a moral obligation to aid agriculture in achieving adjustments from excessive production resulting from the Nation's wartime and defense needs.

We did not penalize munitions manufacturers for the production of shells we did not have to fire. Neither should we penalize farmers for the production of food the world might have urgently needed if the war in Korea had burst into the threatened world-wide struggle.

Instead of trying to achieve production balance by deliberately putting a price and income squeeze on farmers, it's time we give more thought to achieving better production balance by making it possible for farmers to make a decent living out of less acres, and less production.

I'm proud to be sponsoring the Conservation Acreage Reserve bill now before the

Senate, and to have my Minnesota colleagues FRED MARSHALL and COYA KNUTSON sponsoring similar legislation in the House.

Secretary Benson has consistently opposed this measure, and others like it, for several years. Now, belatedly, he seems to be changing his mind—as election year nears on the horizon.

Let me voice a word of caution, a note of warning. Some people are suddenly seizing upon his soil-bank idea as a cure-all, a way out by itself from failures of the present farm program. It would be wrong to be deceived into such assumptions. As author of the bill, I know it was never intended as such. It was never intended to be more than part of a comprehensive farm program. It was intended to supplement other phases of that program, not in any sense be a substitute for them.

I think the Conservation Acreage Reserve makes sense, it can further our necessary consideration adjustments, and encourage wiser land use. But it cannot, and will not alone solve all of our farm price and income problems.

A successful farm program must include many interlocking programs, each contributing toward the total objective. That has always been my approach to farm legislation, and will continue to be. All the objectives I have outlined tonight are spelled out in legislation now before the Congress. These are the objectives I will fight for in Congress next month, both in the Senate committee and on the Senate floor.

We have a full farm program, ready to go. That farm program could have been passed long ago, had we been able to get help, instead of hindrance, from those temporarily responsible for administration of our agricultural department.

Certainly, it costs money for an effective farm program. But lack of an effective program can cost our economy more. Actually, public expenditures to bring agriculture into proper balance with the rest of the economy are an investment—not a loss. Such expenditures would be an investment in the greatest potential market available for our entire economy today.

Restoring the present 25-percent loss in farm purchasing power could and should be only the start toward developing the untapped markets for the products of American industry right at our own rural back door.

We expend vast sums for economic development of underdeveloped and underprivileged areas of the world, in the hope of creating new future markets for expansion of American business and industry.

Yet we are overlooking a far greater potential market among our own people in lower income brackets, who would more rapidly put increased purchasing power back into the economic stream of our own Nation.

Before American industry and business alines itself against effective action for economic recovery in agriculture, whatever the temporary price may seem to be, let it weigh carefully the vast potential contribution a prospering agriculture can and will make to the future of business and industry itself.

There's no need to wait for more study commissions. There's no need to appeal to the public for new ideas, such as Secretary Benson is now doing after rejecting every new idea offered him. There's no need to wait for any belated, politically inspired recommendations of this Administration.

We know what agriculture needs, and what the American economy needs. Our Senate Committee on Agriculture is going right ahead on its own, to give farmers a more effective, realistic, farm program.

We've toured the country ourselves, because we preferred listening to farmers instead of to Secretary Benson's processor-dominated advisors.

We're going after results, instead of after new slogans.

We think we're going to get it.

Unfortunately, we may be confronted with a Presidential veto.

If that happens, the answer is up to you.

My intention is not to be partisan tonight, but decisions in a democracy must be made at the ballot box.

Many of my Republican colleagues from the great agricultural areas have stood firm in the fight for agriculture. But their voices have been lost crying in the wilderness of the Republican administration we have in Washington today.

What this country needs is a Government that has as much interest in the farm market, as it has in the New York stock market.

We need men in Government today who are as interested in a calf on the farm, as they are in the "golden calf" on Wall Street.

It will take more than new laws to rescue American agriculture.

It will take an entirely new attitude, at the highest counsels of our Government.

If you can't change the attitudes of the men now participating in those counsels, you can always change the men.

Mr. HUMPHREY. Mr. President, no matter what kind of law is enacted, the law itself is no better than the spirit in which it is administered. There is a lack of will in the Department of Agriculture today to make this farm program work. Maybe there is honest disagreement over public policy, but I submit there seems to be a lack of will to make it work.

Mr. President, I also ask unanimous consent to have printed in the RECORD a statement of mine commenting upon the President's message.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HUMPHREY

Few could disagree with many of the broad, general objectives outlined, even though little of it is new. We will be more interested in seeing the specific recommendations spelled out in future special messages which have been promised.

I am pleased to see what appears to be such general acceptance of Democratic objectives in the Congress, as well as concurrence in major emphasis upon practically the same program already outlined for us by our Democratic majority leader. I hope it means more than lip service to such objectives, as has happened too often in the past. Legislation to accomplish most of these objectives has already been introduced in the Congress under Democratic sponsorship, and could likely have already been enacted if administration support had been forthcoming.

Perhaps the President realizes the climate has changed—for the better. Perhaps he realizes there is more chance of gaining the domestic program improvements he suggests under our Democratic Congress than he could ever hope to achieve during majority control of his own party. At least he seems to be going further down the road of our liberal objectives than has ever been acceptable to his own party in the past. Of course, the approaching election year, and the many indications that the people are turning back to the Democrats, has likely had considerable influence on the message.

Naturally, I am quite pleased to see Presidential approval for so many objectives for which I already have bills of my own pending in the Senate. I will be happy to call his attention to them, so all he will have to do is give the green light. For example, I will be happy to have his support for measures I have sponsored or cosponsored to establish a Civil Rights Commission, to extend aid to depressed areas, to provide for school construction, to safeguard union health and welfare funds, to provide improved medical research and training facilities (to improve our social-security program, to remove flaws from our immigration laws, to amend the Refugee Act, to provide a soil bank for agriculture and make better use of our farm abundance, and quite a few others. I am glad to see the President thinks they are constructive steps forward. It is too bad his administration has dragged its feet this long in support of such action.

However, I do not want to be interpreted as agreeing with all the President says by any means. Much of his review of his administration's accomplishments is open to challenge. I doubt if it will stand up to the test of objective analysis. He makes some assumptions some of us will find hard to agree with. And I certainly do not agree with his blanket endorsement of the Weeks' transportation report.

Mr. HUMPHREY. Mr. President, I say in that statement, in part:

I am pleased to see what appears to be such general acceptance of democratic objectives in the Congress, as well as concurrence in major emphasis upon practically the same program already outlined for us by our Democratic majority leader.

Then the statement goes on and calls to the attention of our colleagues some of the items which I feel have been pressed forward and introduced. Again, since I do not believe in merely making charges, I have in my possession some of the points I made, after having gone through the Presidential message and noting some of the particular requests and suggestions, many of which are very constructive.

I may say I hope the follow-through will be as brilliant as are the words. I hope that the action will be as thrilling as is the rhetoric. And I hope that the Republican Party in the Senate and the House of Representatives will make it their business to see that much of the program is forthcoming. Then when they do I should like to have them compare it with their platform of 1952.

I cannot help but say in good humor that the President's message of today is an interesting document, because it surely puts to rest and gives the lie to everything that has been said about the social welfare program.

I wish to say the President has been most generous in defense of social-welfare programs. His statements have some of the, should I say, if not the precise notes, perhaps some of the undertones of the New Deal. I hope that will not shock some of my Republican friends, but I gather there is a feeling that the Executive may expect that there is enough opposition on the Republican side so that there will not be unanimous support.

Mr. KNOWLAND. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. KNOWLAND. I regret that I missed part of the Senator's remarks, but I should like to inquire whether, in the sum total of his speech, he is commending President Eisenhower and accepting and endorsing his state of the Union message, or whether he is at-

tempting to claim credit for it on behalf of the party across the aisle.

Mr. HUMPHREY. I shall be glad to clarify that point.

Mr. KNOWLAND. I would be glad if the Senator were commending and endorsing the President's program. I think it would be very generous for him to do so on behalf of the Members on the other side of the aisle, and I hope the other Members likewise might follow his example.

Mr. HUMPHREY. I am not one of those who see all bad or all good in any one person. I like to be objective. I commend the words. I commend the rhetoric. I commend the organization of the message. Maybe I should read from the statement which I issued today:

> Few could disagree with many of the broad, general objectives outlined, even though little of it is new. We will be more interested in seeing the specific recommendations spelled out in future special messages which have been promised.
>
> I am pleased to see what appears to be such general acceptance of Democratic objectives in the Congress, as well as concurrence in major emphasis upon practically the same program already outlined for us by our Democratic majority leader. I hope it means more than lipservice to such objectives, as has happened too often in the past. Legislation to accomplish most of these objectives has already been introduced in the Congress under Democratic sponsorship, and could likely have already been enacted if administration support had been forthcoming.
>
> Perhaps the President realizes the climate has changed—for the better. Perhaps he realizes there is more chance of gaining the domestic program improvements he suggests under our Democratic Congress than he could ever hope to achieve during majority control of his own party. At least he seems to be going further down the road of our liberal objectives than has ever been acceptable to his own party in the past. Of course, the approaching election year, and the many indications that the people are turning back to the Democrats, has likely had considerable influence on the message.
>
> Naturally, I am quite pleased to see Presidential approval for so many objectives for which I already have bills of my own pending in the Senate. I will be happy to call his attention to them, so all he will have to do is give the green light.

He could well call upon the office concerned and say, "There is a bill already prepared on this subject. There is no use getting the attorneys in the Department of Agriculture or the Department of Commerce. The bill is already there. Why do you not support the Humphrey bill, the Morse bill, the Douglas bill, or the Langer bill?"

I continue to read from my statement:

> For example, I will be happy to have his support for measures I have sponsored or cosponsored to establish a Civil Rights Commission.

The President calls for a Civil Rights Commission. That is as new as last year's calendar. Civil rights legislation has been pending in this Congress and other Congresses since 1949. President Truman endorsed it. President Eisenhower has endorsed it. I hope now, with his able leadership on the Republican side, and with such fine devotion to the President's program, that Congress will be able to put through such legislation, despite the fact that some Senators on our side may not go along with it.

Mr. KNOWLAND. I was going to ask the distinguished Senator, who is acting majority leader, whether he was speaking in his capacity as acting majority leader for the 49 Senators on his side of the aisle, or whether he was speaking as an individual, the Senator from Minnesota, because there might be a slight difference in the votes on his side of the aisle.

Mr. HUMPHREY. I was going to say that, as the Senator knows, it is difficult for him to speak for his whole side on substantive matters. He may do so on procedural matters. On procedural matters, we will have concurrence on this side of the aisle. The minority leader is very experienced in getting along with several parties within one party. That has been one of his burdens, and it is to his credit that he has done as well as he has. I sincerely compliment him for what he has been able to do.

For example, in referring to the Civil Rights Commission, I said we shall be happy to have the President's support.

Furthermore, I know that my friend, the Senator from Illinois [Mr. DOUGLAS], will be delighted to have the President's support, at long last, for his bill for depressed areas. Mr. President, is it not interesting? That bill has never had the support of the executive agencies, until just now. The Senator from Illinois and 16 other Senators, I believe, are cosponsors of the bill. I am privileged to be one of the cosponsors.

It will also be very good, as the President has indicated, to have his support of the bill for school construction. The Senator from Alabama [Mr. HILL] has his bill for that purpose. The Senator from Michigan [Mr. MCNAMARA] is a cosponsor of the bill, as am I.

Mr. President, I have not had from the White House or from the Department of Health, Education, and Welfare, or even from one of the staff members, a letter saying that was a good idea. But we are a part of the Government, too, Mr. President.

I was pleased to see that the President wants to have enacted legislation to safeguard union health and welfare funds. Mr. President, I should like to suggest, most respectfully, that in the stack of bills which I have before me—and I also have the releases along with them—I have such a bill; and the Senator from Illinois [Mr. DOUGLAS] has been holding hearings on that particular bill and on other measures which were placed before his committee by other Senators.

Then we see, for example, that the President indicates support for improved medical research and training facilities, for improvements in our social-security program, for the elimination of flaws in our immigration laws, and for amendments to the Refugee Act. I am sure the Senator from New York [Mr. LEHMAN] will be delighted to know that at long last he can count on the support of the President to back up his amendments to the Immigration Act.

Mr. LEHMAN. I certainly will be.

Mr. HUMPHREY. The Senator from New York has been a champion in that entire field.

Mr. President, elections are wonderful things. It beats everything what an election sometimes will do to get people to recognize the seriousness of problems and to advance programs to meet them.

We also learn that the President favors measures to provide a soil bank for agriculture, and to make better use of our farm abundance, and quite a few others. I am glad to see that the President thinks they, too, are constructive steps forward. It is too bad that his administration has dragged its feet this long, instead of giving support to the action the President now recommends.

I sense that there is a problem in the administration, and I say this most respectfully. The President has his views, and every Cabinet officer seems to have his own individual views. Sometimes one wonders whether this is one Government or as many governments as there are agencies and offices. However, it is delightful to get a message, once a year, indicating a coordinated, comprehensive program.

Mr. BENDER. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I shall yield in a moment.

However, Mr. President, I do not want my statement to be interpreted as indicating agreement by me with all the President says, by any means. For instance, in the case of foreign policy matters, let me say that the reassuring statements by the President in regard to foreign policy are not in agreement with the facts, I believe. Much of his review of the administration's accomplishments is open to challenge. I doubt if it will stand up to the test of objective analysis. He makes some assumptions with which some of us will find it hard to agree. I certainly do not agree with his blanket endorsement, for example, of the transportation report of Secretary of Commerce Weeks. I think that is a highly controversial matter, and undoubtedly there will be debate about it in the Congress.

Just to document the RECORD, Mr. President, let me say that some of the bills to which I have referred are known as S. 1, S. 5, S. 49, S. 67, S. 480, S. 669, and Senate Concurrent Resolution 8.

Mr. KNOWLAND. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. In a moment I shall be delighted to yield.

In the field of civil rights, Senate bill 899, Senate bill 900, Senate bill 901, Senate bill 902, S. 903, S. 904, S. 905, S. 906, S. 907. Those are the areas, let me say most respectfully, that I wish to call to the attention of the executive branch.

In the field of voluntary health plans, S. 1076.

In the field of immigration, S. 1315, the so-called Short bill for using unused quotas.

And in the field of medical facilities and research facilities, S. 1323.

In the field of amending the National Labor Relations Act, particularly as it relates to subversion, S. 1557.

In regard to union health and welfare funds, S. 1717.

In regard to the Refugee Act, S. 1794, sponsored by the Senator from New York [Mr. LEHMAN]—a bill of which I am proud to be a cosponsor.

In regard to social security for dentists and lawyers, S. 1841, broadening the act.

In regard to the broad outline of social-security improvements, S. 2382, S. 2383, S. 2384, S. 2385, S. 2386, S. 2387, S. 2388, and S. 2389.

When it comes to conservation—and in the President's message there was an expression of interest in conservation—S. 2101.

When it comes to amending the Refugee Relief Act, S. 2450 and S. 2451. There are those two bills.

When it comes to alleviating the conditions in depressed areas, I call the President's attention to S. 2663, the Douglas bill, sponsored by the Senator from Illinois [Mr. DOUGLAS], the Senator from West Virginia [Mr. KILGORE], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Michigan [Mr. MCNAMARA], the Senator from West Virginia [Mr. NEELY], the Senator from Montana [Mr. MURRAY], the Senator from Massachusetts [Mr. KENNEDY], and myself.

When it comes to the matter of civil defense, I would certainly like to call the attention of the executive branch to Senate Concurrent Resolution 11.

When it comes to the subject of mental illness, I should like to call the attention of the executive branch to Senate Concurrent Resolution 18.

Mr. President, I say in all sincerity that I am sure the President of the United States would like to see these measures enacted into law. I am afraid that some of his agents and Cabinet officers have not told him that these legislative proposals are before us. The President is a busy man. His Cabinet officers are supposed to keep their President and our President informed. I hope that today's CONGRESSIONAL RECORD will be scanned very quickly by the President and his officers. I would be delighted at any time to send a copy of these bills to any of the executive officers, if they would like to examine them. I am sure my colleagues stand ready to cooperate with any Cabinet officer or any Assistant Secretary in explaining the bills. If we can get help, for example, from the Department of the Interior in regard to the matter of preservation of our national parks from exploitation of the resources there, we shall be delighted to get their help, and they will have our help.

Mr. President, I say most kindly and sympathetically that the job of government is big enough to require the cooperation of everyone. Parties do not always have unanimity. We try to have unity, which is a respect for one another's point of view. I surely want my friend, the minority leader, to know that I will welcome his support of any of these measures; and in the case of some that he has sponsored, I shall be glad to give him my support.

Now I yield.

Mr. KNOWLAND. I do not wish to draw an incorrect conclusion from the remarks of the Senator from Minnesota, or perhaps an inference which would not be warranted. But it seemed to me that, among other things, there was one item quite conspicuous by its absence, unless I missed it in the earlier remarks of the Senator from Minnesota, and that was whether he had commended the President for bringing our budget into balance, and for the program of starting to reduce the national debt of some $280 billion—in which case the minority leader would not only be agreeing with his President, but also with the chairman of the Finance Committee, the Senator from Virginia [Mr. BYRD], as regards putting the Government into sound fiscal condition.

Mr. HUMPHREY. Mr. President, I wish to say to the Senator from California that the Republican Party has promised, every year since it has been in power, that it would balance the budget. But it has not gotten around to doing it, and there is no promise that it will do so next year. The President says that in fiscal 1957 he will have a balanced budget, but there is great question as to who will be President in the fiscal year 1957.

Furthermore, let me say in all kindliness that I am becoming a little weary of a Government financed by mirrors. I now notice that the Government will need $4 billion for foreign aid. Why? Because they used up all the reserves. They used up all the inheritance, so to speak; they are like the son of the old rich man, the son who spent all the old man's money. Now, by golly, they have to go to work.

The administration was able to come here last year with a reduced budget for defense. However, there was a little story which appeared in the metropolitan press, a little Associated Press dispatch to the effect that Charles Wilson stated before the Appropriations Committee—of which I believe the Senator from California is a member—that "next year we shall have to come back and ask for more, because we have used up our reserves."

We of the 81st and 82d Congresses—the minority leader was a Member—had to put the money in the till. We had to put the money in the bank. We had to appropriate the money. The goods had not yet come off the line, but the money was there to be paid out.

After they had used up the money, used up the unobligated balances and the obligated balances, they ran short. Can the administration say it is going to give us a bigger foreign-aid program with $4 billion this year than it gave us with $3 billion last year? No. It can only say that it needs the money to take up the slack. Can the administration successfully claim that it is going to give us a bigger defense program than it gave us last year? No. It is merely using up the reserves.

The administration has talked for a long time about a balanced budget. It is still unbalanced. I should like to make my friend a little side wager, if it were not contrary to the ethics and rules of this body, that before the administration can come forward with a balanced budget, it will be asking the Finance Committee for another resolution to increase the debt ceiling. The minority leader knows that as well as I do. It is a good thing in campaign years to talk about a balanced budget. But the people have not had a balanced budget in a long time. The last time the budget was balanced was when Truman was President.

Mr. KNOWLAND. Under the Republican 80th Congress.

Mr. HUMPHREY. It was when Truman was President. I have an idea that the President has something to say about the fiscal policy of the country.

Mr. KNOWLAND. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. KNOWLAND. I think it is a little amusing for an administration which, for 18 of the 20 years it was in power, had consistently an unbalanced budget and ran the national debt up to the point of some $278 billion, to be raising a question because, in 3 years, the present administration has not brought the budget completely into balance and brought about a reduction in the national debt. If the Senator will take the trouble to read the platform again, he will find that the party platform stated that the budget would be brought into balance——

Mr. HUMPHREY. When?

Mr. KNOWLAND. In my judgment, it will be brought into balance during the first term of President Eisenhower's administration.

I will say to the Senator that I believe that if he will examine the record, he will find that the administration cut more than $10 billion from the budget presented by the last administration, and $14 billion from the figure submitted to the Congress before the last administration went out of office. The Senator is skating on very thin ice when he speaks of lack of fiscal responsibility on the part of this administration, and contends that it is like a wasteful son, so to speak, in spending the resources of the people, when the cold, hard record shows that vast expenditures and unbalanced budgets occurred under the previous administration.

Mr. HUMPHREY. Let me say most respectfully to my friend, who has always been a man of veracity, a great patriot, and a great Senator, that he knows that those unbalanced budgets were due to a worldwide depression the like of which no civilization had ever experienced, a depression which was left on our doorsteps by the Great Engineer, who ditched, dammed, and drained the country.

The Senator knows that that debt was caused by World War II. He knows that the time any payment was made on the debt was during Democratic administrations. He knows that the only time there has been a balanced budget since the postwar period was under a Democratic administration.

Furthermore, the Senator is the one who brought up the question of fiscal responsibility. My good friend from California raised that question. The Democratic Party has not promised the people a balanced budget when it was unable to see the necessary revenues, in the light of international demands and

international necessities. This administration and the Republican leadership have had a balanced budget as an article of faith. It is the 11th commandment in their political commandments. I trust we all agree on the first 10.

This administration has talked about a balanced budget, and about fiscal responsibility. This administration has come to Congress twice in 3 years with a request to increase the debt limit. This administration is not going to balance the budget this year with this Presidential message, if there is any intention to carry it out.

How does the administration intend to carry out a balanced budget program when it is asking for more money for highways, more money for schools, more money for medical research, and more money for agriculture? The agricultural program which is being laid out is rather expensive. How does the administration expect to balance the budget when it asks for more for defense, more for foreign aid, more for water resources control, and more for everything else? No politician dares make such a claim. One can fool some of the American people part of the time, and all of them some of the time, but he cannot fool all of them all the time, as one great Republican, Mr. Lincoln, once said.

How many people really believe that there is to be a balanced budget this year? I am sure there is not a Senator who really believes that if we were to carry out the President's recommendations we would even come close to a balanced budget.

The 83d Congress and the 84th Congress both cut the President's budgets. The Republican leadership says that a Republican administration cut the Truman budget. It is an old habit of Congress to cut budgets. Why are we here? That is one of our real prerogatives.

Let me say also that some of the cuts which were made were untimely cuts. I refer to the Air Force cuts, and the Foreign Aid cuts, which must now be restored. A few months ago we were told that these programs were to be tapered off. I do not have to be told that. I have been in support of foreign aid, and I intend to continue to support necessary foreign aid. But in order to placate some of the voters in Republican ranks, they were told, "It is not going to last much longer. Stay with us another year. We are cutting it down all the time." Now the administration is coming forward with a 10-year plan for Asia.

The President talks in terms of a long-term foreign aid program. I am not saying that we do not need it. He will have to convince Members of his own party more than he will have to convince Members on this side of the aisle. But I do not call that responsibility. I call that trying to get people to go along, step by step, with promises that cannot be fulfilled.

Mr. President, I shall not continue this argument. We shall return later to this issue, and it will be fully discussed in the Senate. We hope to arrive at some conclusions.

Mr. BENDER. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. BENDER. I appreciate the kindly way and sweet manner in which the Senator from Minnesota approaches this entire problem. I appreciate all the pleasant things he has to say about his colleagues, and particularly with respect to Republicans. He pays tribute to them. I know that this session will be a very kindly session. It is only two days old, and we are going at it at a late hour.

However, there is one thing to which attention should be invited. In response to my first question the Senator from Minnesota said that I had not been here very long. This is only my second year as a Member of the Senate. However, I was a Member of the other body for 14 years. This is my 26th year as a legislator.

I know something about the Bureau of the Budget. I know something about its influence and power. I know that this is a legislative body, and that we have certain power.

I recall when my distinguished colleague from North Dakota [Mr. LANGER], on this side of the aisle, was making his comments. He castigated the Democratic majority for not having had a better batting average regarding agricultural problems. As I recall, he indicated that their batting average was zero.

I happen to be a member of the Committee on Labor and Public Welfare. I know that the education bill was about to be reported, but the minute desegregation was mentioned it was dropped like a hot potato.

We are the minority party. The administration is Republican, but the Congress is Democratic.

I say this in the same kindly vein in which my distinguished colleague from Minnesota has approached this subject. Responsibility for legislation is principally in the hands of the Democratic majority.

Regarding the agricultural problem, it was not my privilege to vote on very much agricultural legislation last year. I was most eager to do so, but the Democratic majority did not come forward with a program. The problem which this administration faces in agriculture was inherited from previous administrations which were not Republican.

Of course, the budget was balanced only once by the 80th Congress, under great protest from the Democratic Members in both Houses.

Let me say further, regarding welfare, that our party has not been callous in the matter of problems of human welfare. We were born to make men free; and during our lifetime I think we have made a fine record of performance in behalf of human rights.

For 20 years I heard talk about civil rights, but the present administration, without new legislation on the subject, has done more for civil rights in 3 years than previous administrations had done in 20 years.

Along that line, the American people, on the basis of every poll which has been taken, approve of the Eisenhower administration.

More than 65 million people are employed. I will never forget that in 1946, when I was coauthor in the House of Representatives of the full employment bill, we hoped that sometime we would have 45 million people gainfully employed. Today more than 65 million people are gainfully employed. We have peace and we have prosperity. Certainly the administration is being realistic in conducting its foreign policy and in following every other program. It is facing its problems in a forthright manner. It is not trying to cover up anything. If anything is going on that is not right, the administration wants it revealed. No effort has been made by the administration to cover up anything. I am a member of the subcommittee headed by the Senator from Arkansas [Mr. MCCLELLAN], and no one has approached me on behalf of the administration and suggested not to reveal anything that has been going on about which the people ought to know. The President of the United States is the first advocate of that kind of policy. The administration is not afraid of any probes. I know some Senators are planning to probe every day. I say to them, "God bless you. Go to it." I say that because as the result of many Democratic Congresses we have inherited a great many hangers-on, who have been around Washington for many years. They are on the payroll. About 98 percent of the people the President has had to work with he inherited from previous administrations. He has not been playing politics with them. He has asked them to do a good job, and he has been trying to raise their salaries and to improve their standard of living and their working conditions.

Therefore, I say the administration will give a good account of its stewardship. This is an election year. Inasmuch as the campaign is on—as obviously it is, as of an hour ago—we will certainly be very glad to have the issues discussed, and we will be glad in this timely way to have all the issues presented to the people of our country.

Mr. HUMPHREY. Mr. President, I thank the Senator from Ohio for the assertions and statements he would like to have credited as facts. We will come to the factual emphasis a little later. The campaign did not start an hour ago. I believe it started about 12:35 today, when the program was laid down. I invite the help of our Republican friends in the fulfillment of the program along the social objectives which have been outlined. We shall await the details.

During the delivery of Mr. HUMPHREY's speech,

Mr. MORSE. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. MORSE. The Senator from Minnesota delivered a great speech on agriculture at Klamath Falls in Oregon, and the speech he made on the same subject at Prineville, Oreg., on the following evening is still being discussed in my State. In my judgment, it was the clearest statement on the failure of the Eisenhower administration to keep its pledges to the American farmer that I have ever heard.

I wish to commend the Senator from Minnesota for the great work he has done, as a member of the Committee on

Agriculture and Forestry, in behalf of American agriculture.

While I am on my feet, Mr. President, with the Senator's permission, I wish to pay my very high respect to the senior Senator from North Dakota [Mr. LANGER], who is now presiding over the Senate. I wish to join the junior Senator from Minnesota in his remarks about the Senator from North Dakota.

I do not know of any other person in American public life—and I speak advisedly—who has such a glorious record of dedicated service to American agriculture as BILL LANGER, of North Dakota, the distinguished senior Senator from that State.

I like to say good things about people at the time they are deserved. I believe this is the appropriate time to express in the RECORD my opinion of the public service BILL LANGER has rendered to American agriculture.

I shall sit here at his feet, as I have so many times during my 11 years in the Senate, and listen to his discussion in the historic debate which is about to unfold in the Senate in the weeks ahead on the American agricultural program. The American farmer today is in a deep depression. American farmers are going broke by the thousands, and our mail is already beginning to show demands for farm mortage moratoriums. One would think we were back in 1929 under another Republican administration.

The great statesman now presiding over the Senate has never allowed partisanship to prevent him from telling the American people the facts that should be told about our agricultural economy. Had we listened to him years ago, we would not now be in the crisis in which we find ourselves today.

I am glad to pay my respects to these two great defenders of American agriculture, the Senator from North Dakota and the Senator from Minnesota.

Mr. HUMPHREY. I thank the Senator from Oregon.

TRIBUTE TO EDWARD B. WILBER

Mr. KILGORE. Mr. President, I was terribly shocked by the death of one of the members of the official family of the State Department, the late Ed Wilber. I had intended to pay a tribute to him on the floor of the Senate; and at this time I ask unanimous consent that the statement I had prepared may be printed in the body of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KILGORE

In the past few years, much has been said about the strains imposed on those in public office. I am confident that no Member of the Senate would take issue with me if I described the burden of our work here, as well as elsewhere in the Government, as severe. Nor do I think I would be challenged if I stated that in recent years the demands of office and the strains attendant on them had steadily increased.

We cannot dismiss this development as merely a fact of public life. It is a problem with which, sooner or later, we must contend. The complexities and the responsibilities of Government will continue to expand for the foreseeable future, and the need for able legislators and capable and experienced administrators will, in direct ratio, become the more urgent. Such officers are ever in short supply and eventually we shall have to take steps to husband this vital human resource.

This question, for me, is brought into tragic focus by the sudden death of a friend and coworker—an officer of the State Department. I refer to Edward Bacon Wilber, Deputy Assistant Secretary and Budget Officer of that agency who, without warning, suffered a fatal heart attack. Mr. Wilber was known to many Members of the Senate, and the House as well. And a number of us are beholden to him, as I have been, for his unfailing generosity with his time and counsel on problems relating to the fiscal affairs of the Department of State.

Like the other members of the Appropriations Committee, it was my privilege to work with Mr. Wilber over a period of years. He was a highly competent and efficient executive who had elected to devote his considerable abilities to the service of his Government and his country. He was uncommonly diligent in the discharge of his duties and displayed, on frequent occasions, the judgment and wisdom so gravely needed in reaching sound decisions on the financing of our foreign affairs.

Along with many of us here, I have lost a good friend. Thus, I wish to pay him the tribute that a man pays to a friend who has died. But more than that, the Department of State, the United States Government, and the people of this country are the poorer for the passing of a topflight career officer, literally in midcareer, for Mr. Wilber was 53 at the time he was stricken. The responsibility for this loss—and it is a very real loss, for officials of Mr. Wilber's caliber and experience are not easily replaced—can be laid at the door of the workload we have allowed to pile up on the top administrators of the Government as well as on ourselves. I wonder how many more times we shall have to be saddened by an untimely death before being moved to action.

Until such time, I can only do full honor to a fine public servant—one to whom we owe a considerable debt. He will be greatly missed.

DEATH OF REPRESENTATIVE VERA D. BUCHANAN, OF PENNSYLVANIA

Mr. MARTIN of Pennsylvania. Mr. President, it becomes my sad duty to announce to the Senate the death of a distinguished Representative in Congress from Pennsylvania, Mrs. VERA D. BUCHANAN, who represented the 30th District.

Mrs. BUCHANAN died on November 26, 1955, following a severe illness which kept her in a hospital since last June.

She was the wife of the late Representative Frank Buchanan, who achieved a distinguished record in the House of Representatives. She was sent to Congress to fill the vacancy caused by the death of her husband.

Mrs. BUCHANAN had been a member of the House since August 1951. She was reelected in 1952 and again in 1954, serving with great competence on the Committee on Merchant Marine and Fisheries, the Public Works Committee, and the Committee on Banking and Currency.

Mrs. BUCHANAN enjoyed the respect, esteem, and affection of her constituents. She made her home in McKeesport, Pa. She was a beloved wife to her late husband, and a devoted mother to her twin daughters, Joan and Jane.

To the members of her fine family, relatives and friends, we extend our deepest personal sympathy.

The PRESIDING OFFICER (Mr. MCNAMARA in the chair). The Chair lays before the Senate a resolution coming from the House of Representatives, which will be read.

The resolution (H. Res. 348) was read, as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. VERA BUCHANAN, a Representative from the State of Pennsylvania.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect the House do now adjourn.

Mr. KNOWLAND. Mr. President, on behalf of the senior Senator from Pennsylvania [Mr. MARTIN], who was called away from the Chamber, and the junior Senator from Pennsylvania [Mr. DUFF], I send to the desk a resolution, which I ask to have read, and for which I ask present consideration.

The PRESIDING OFFICER. The resolution will be read.

The resolution (S. Res. 157) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. VERA BUCHANAN, late a Representative from the State of Pennsylvania.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

DEATH OF REPRESENTATIVE DINGELL, OF MICHIGAN

The PRESIDING OFFICER (Mr. MORSE in the chair). The Chair lays before the Senate a resolution coming from the House of Representatives, which will be read.

The resolution (H. Res. 347) was read, as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. JOHN D. DINGELL, a Representative from the State of Michigan.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect the House do now adjourn.

Mr. MCNAMARA. Mr. President, I send to the desk a resolution which I ask to have read, and for which I ask present consideration.

The PRESIDING OFFICER. The resolution will be read.

The resolution (S. Res. 158) was read, and considered by unanimous consent, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. JOHN D. DINGELL, late a Representative from the State of Michigan.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Mr. McNAMARA. Mr. President, the passing of this distinguished and courageous Member of the House of Representatives is not only a great loss to his district and to the State of Michigan, but also to the common man everywhere.

Personally, I feel a great void has been left in my world. JOHN DINGELL was my friend and adviser. The taking of my seat in the Senate was made easier for me because I knew I could rely on this great American for guidance and advice whenever I needed them.

I again extend my sincere sympathies to his widow Grace, and to his children, John Jr., James, and Jule.

In the Senate Chamber we are honored by the presence of the newest Member of the 84th Congress, JOHN DINGELL, JR., who I am certain will carry on in the great traditions of his noble and distinguished father.

Mr. BENDER. Mr. President, I join with my colleague from Michigan in praising the fine work of Representative JOHN DINGELL. It was my privilege to know him very well during my service in the House of Representatives. No member of the Committee on Ways and Means was more diligent, more painstaking, and more devoted to his job than JOHN DINGELL, and certainly citizens of Polish extraction never had a better friend in Congress.

Mr. McNAMARA. I thank the Senator from Ohio.

Mr. HUMPHREY. Mr. President, I should like to associate myself with the tribute expressed by the Senator from Michigan on behalf of his late friend, the distinguished Representative from Michigan, Mr. JOHN DINGELL.

I knew Mr. DINGELL during my service in Congress and even before I came to Congress. I have the privilege of knowing his son, who has succeeded his very fine father as a Member of the House of Representatives.

Recently I had the great privilege of serving with the late Representative DINGELL on the President's Commission on Intergovernmental Relations. On that Commission he served very ably and with high devotion and dedication to his responsibilities.

Representative DINGELL could be called a true liberal. He fought the liberal fight. He was very proud to be a friend of the workingman. He was proud to work in behalf of social legislation in the field of education, health, and welfare. He has left his mark on the public laws of this land. His fine work will live on in the lives of many people, who will have a better life because of what Representative DINGELL did for them.

I know that his son will follow in the footsteps of his very fine father and continue the record his father has made.

Mr. McNAMARA. I thank the Senator from Minnesota for his very kind remarks.

Mr. LEHMAN. Mr. President, I deem it a very great privilege to speak briefly this afternoon in eulogy of the late Representative DINGELL, of Michigan. He was a great liberal and a great American. I had the privilege of working with him very closely in many activities which involved matters of interest not only to the Congress but to the entire Nation. He represented a truly cosmopolitan district in Michigan. I am told that in his district 32 different nationalities were represented. The Senator from Ohio [Mr. BENDER] spoke about Representative DINGELL's fine representation of the Polish constitutency. I know from what I have learned from his intimate associates that he represented equally well every nationality in his district.

It was a great privilege to work closely with him on social security. I think I am safe in saying that we saw eye to eye on all matters which were of common interest. No man was more deeply interested in or more completely convinced of the necessity for fair, humane, just, and workable immigration laws. He was a tower of strength in the fight which we have waged in the Congress for several years to obtain a more equitable and a less brutal and cruel immigration policy.

He was a strong proponent of and always a fighter for fair and progressive taxation. He felt that taxation should be spread fairly and equitably in its demand on all the people, not upon any one class or group. What impressed me most, however, in my long association with Representative DINGELL was the fact that his concern was always for the little fellow. He protected the interests of all his constitutents, large and small.

Deep down in his heart I know that he was moved most by the needs and aspirations and ideals of the little fellows, and he always went to bat for them, and usually with great success.

I mourn the loss of a very dear friend and associate. I think his passing has been a great loss not only to the community in which he lived and which he served so faithfully, but to the entire Nation which felt the imprint of his idealism, his hopes, and his determination.

It is a consolation to me to know that he has been followed in the House of Representatives by his son. I did not have the pleasure of knowing his son until a few days ago, when I first met him, but I have heard many excellent and fine things about him. I am very confident that he will be a very worthy successor to his great father, and I wish him success.

The PRESIDING OFFICER. The question is on agreeing to the resolution with reference to the deceased Representative DINGELL, of Michigan.

The resolution was unanimously agreed to.

Mr. HUMPHREY. Mr. President, as a further mark of respect to the memory of the deceased Representatives, I move that the Senate do now adjourn until Monday next.

The motion was unanimously agreed to; and (at 5 o'clock and 46 minutes p. m.) the Senate adjourned, the adjournment being under the order previously entered, until Monday, January 9, 1956, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

THURSDAY, JANUARY 5, 1956

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

God of wisdom and understanding, Thou alone art the guiding intelligence and the supreme source of insight and inspiration when men assemble in their council chambers for deliberation and decision.

May all the legislation that shall be proposed and enacted by this session of Congress redound to Thy glory and help to bring to fulfillment our longings for peace on earth and good will among men.

Fill us with generous impulses and sympathetic attitudes toward one another and may we never become weary in seeking the well-being and welfare of all mankind.

Help us to live and labor together courageously and cheerfully, confident that nothing can ever impede the triumph of righteousness and justice and freedom.

Inspire our minds and hearts with the moral strength of humility and hope, of patience and perseverance and may all be done for the glory of God.

Hear us in Christ's name. Amen.

The Journal of the proceedings of Tuesday, January 3, 1956, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Tribbe, one of his secretaries.

THE STATE OF THE UNION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 241)

The SPEAKER laid before the House the following message from the President of the United States:

To the Congress of the United States:

The opening of this new year must arouse in us all grateful thanks to a kind providence whose protection has been ever present and whose bounty has been manifold and abundant. The state of the Union today demonstrates what can be accomplished under God by a free people; by their vision, their understanding of national problems, their initiative, their self-reliance, their capacity for work—and by their willingness to sacrifice whenever sacrifice is needed.

In the past 3 years, responding to what our people want their Government to do, the Congress and the Executive have done much in building a stronger, better America. There has been broad progress in fostering the energies of our people, in providing greater opportunity for the satisfaction of their needs, and in fulfilling their demands for the strength and security of the Republic.

Our country is at peace. Our security posture commands respect. A spiritual vigor marks our national life. Our economy, approaching the $400 billion mark, is at an unparalleled level of prosperity. The national income is more widely and fairly distributed than ever before. The number of Americans at work has reached an all-time high. As a people, we are achieving ever higher standards of living—earning more, producing more, consuming more, building more and investing more than ever before.

Virtually all sectors of our society are sharing in these good times. Our farm families, if we act wisely, imaginatively and promptly to strengthen our present farm programs, can also look forward to sharing equitably in the prosperity they have helped to create.

War in Korea ended 2½ years ago. The collective-security system has been powerfully strengthened. Our defenses have been reinforced at sharply reduced costs. Programs to expand world trade and to harness the atom for the betterment of mankind have been carried forward. Our economy has been freed from governmental wage and price controls. Inflation has been halted; the cost of living stabilized.

Government spending has been cut by more than $10 billion. Nearly 300,000 positions have been eliminated from the Federal payroll. Taxes have been substantially reduced. A balanced budget is in prospect. Social security has been extended to 10 million more Americans and unemployment insurance to 4 million more. Unprecedented advances in civil rights have been made. The long-standing and deep-seated problems of agriculture have been forthrightly attacked.

This record of progress has been accomplished with a self-imposed caution against unnecessary and unwise interference in the private affairs of our people, of their communities, and of the several States.

If we of the executive and legislative branches, keeping this caution ever in mind, address ourselves to the business of the year before us—and to the unfinished business of last year—with resolution, the outlook is bright with promise.

Many measures of great national importance recommended last year to the Congress still demand immediate attention—legislation for school and highway construction; health and immigration legislation; water resources legislation; legislation to complete the implementation of our foreign economic policy; such labor legislation as amendments of the Labor-Management Relations Act, extension of the Fair Labor Standards Act to additional groups not now covered, and occupational safety legislation; and legislation for construction of an atomic-powered exhibit vessel.

Many new items of business likewise require our attention—measures that will further promote the release of the energies of our people; that will broaden opportunity for all of them; that will advance the Republic in its leadership toward a just peace; measures, in short, that are essential to the building of an ever-stronger, ever-better America.

Every political and economic guide supports a valid confidence that wise effort will be rewarded by an even more plentiful harvest of human benefit than we now enjoy. Our resources are too many, our principles too dynamic, our purposes too worthy, and the issues at stake too immense for us to entertain doubt or fear. But our responsibilities require that we approach this year's business with a sober humility.

A heedless pride in our present strength and position would blind us to the facts of the past, to the pitfalls of the future. We must walk ever in the knowledge that we are enriched by a heritage earned in the labor and sacrifice of our forebears; that, for our children's children, we are trustees of a great Republic and a time-tested political system; that we prosper as a cooperating member of the family of nations.

In this light, the administration has continued work on its program for the Republic, begun 3 years ago. Because the vast spread of national and human interests is involved within it, I shall not in this message attempt its detailed delineation. Instead, from time to time during this session, there will be submitted to the Congress specific recommendations within specific fields. In the comprehensive survey required for their preparation, the administration is guided by enduring objectives. The first is:

THE DISCHARGE OF OUR WORLD RESPONSIBILITY

Our world policy and our actions are dedicated to the achievement of peace with justice for all nations.

With this purpose, we move in a wide variety of ways and through many agencies to remove the pall of fear; to strengthen the ties with our partners and to improve the cooperative cohesion of the free world; to reduce the burden of armaments, and to stimulate and inspire action among all nations for a world of justice and prosperity and peace. These national objectives are fully supported by both our political parties.

In the past year, our search for a more stable and just peace has taken varied forms. Among the most important were the two conferences at Geneva, in July and in the fall of last year. We explored the possibilities of agreement on critical issues that jeopardize the peace.

The July meeting of heads of government held out promise to the world of moderation in the bitterness, of word and action, which tends to generate conflict and war. All were in agreement that a nuclear war would be an intolerable disaster which must not be permitted to occur. But in October, when the Foreign Ministers met again, the results demonstrated conclusively that the Soviet leaders are not yet willing to create the indispensable conditions for a secure and lasting peace.

Nevertheless, it is clear that the conflict between international communism and freedom has taken on a new complexion.

We know the Communist leaders have often practiced the tactics of retreat and zigzag. We know that Soviet and Chinese communism still poses a serious threat to the free world. And in the Middle East recent Soviet moves are hardly compatible with the reduction of international tension.

Yet Communist tactics against the free nations have shifted in emphasis from reliance on violence and the threat of violence to reliance on division, enticement, and duplicity. We must be well prepared to meet the current tactics which pose a dangerous though less obvious threat. At the same time, our policy must be dynamic as well as flexible, designed primarily to forward the achievement of our own objectives rather than to meet each shift and change on the Communist front. We must act in the firm assurance that the fruits of freedom are more attractive and desirable to mankind in the pursuit of happiness than the record of communism.

In the face of Communist military power, we must, of course, continue to maintain an effective system of collective security. This involves two things—a system which gives clear warning that armed aggression will be met by joint action of the free nations, and deterrent military power to make that warning effective. Moreover, the awesome power of the atom must be made to serve as a guardian of the free community and of the peace.

In the last year, the free world has seen major gains for the system of collective security: The accession to the North Atlantic Treaty Organization and Western European Union of the sovereign Federal German Republic; the developing cooperation under the Southeast Asia Collective Defense Treaty; and the formation in the Middle East of the Baghdad Pact among Turkey, Iraq, Iran, Pakistan, and the United Kingdom. In our own hemisphere, the inter-American system has continued to show its vitality in maintaining peace and a common approach to world problems. We now have security pacts with more than 40 other nations.

In the pursuit of our national purposes, we have been steadfast in our support of the United Nations, now entering its second decade with a wider membership and ever-increasing influence and usefulness. In the release of our 15 fliers from Communist China, an essential prelude was the world opinion mobilized by the General Assembly which condemned their imprisonment and demanded their liberation. The successful Atomic Energy Conference held in Geneva under United Nations auspices and our atoms-for-peace program have been practical steps toward the worldwide use of this new energy source. Our sponsorship of such use has benefited our relations with other countries. Active negotiations are now in progress to create an international agency to foster peaceful uses of atomic energy.

During the past year the crucial problem of disarmament has moved to the forefront of practical political endeavor. At Geneva, I declared the readiness of the United States to exchange blueprints of the military establishments of our Nation and the U. S. S. R., to be confirmed by reciprocal aerial reconnaissance. By this means, I felt mutual suspicions could be allayed and an atmosphere developed in which negotiations

looking toward limitation of arms would have improved chances of success.

In the United Nations Subcommittee on Disarmament last fall, this proposal was explored and the United States also declared itself willing to include reciprocal ground inspection of key points. By the overwhelming vote of 56 to 7, the United Nations on December 16 endorsed these proposals and gave them a top priority. Thereby, the issue is placed squarely before the bar of world opinion. We shall persevere in seeking a general reduction of armaments under effective inspection and control which are essential safeguards to insure reciprocity and protect the security of all.

In the coming year much remains to be done.

While maintaining our military deterrent, we must intensify our efforts to achieve a just peace. In Asia we shall continue to give help to nations struggling to maintain their freedom against the threat of Communist coercion or subversion. In Europe, we shall endeavor to increase not only the military strength of the North Atlantic Alliance but also its political cohesion and unity of purpose. We shall give such assistance as is feasible to the recently renewed effort of Western European nations to achieve a greater measure of integration, such as in the field of peaceful uses of atomic energy.

In the Near East we shall spare no effort in seeking to promote a fair solution of the tragic dispute between the Arab States and Israel, all of whom we want as our friends. The United States is ready to do its part to assure enduring peace in that area. We hope that both sides will make the contributions necessary to achieve that purpose. In Latin America, we shall continue to cooperate vigorously in trade and other measures designed to assist economic progress in the area.

Strong economic ties are an essential element in our free world partnership. Increasing trade and investment help all of us prosper together. Gratifying progress has been made in this direction, most recently by the 3-year extension of our trade agreements legislation.

I most earnestly request that the Congress approve our membership in the Organization for Trade Cooperation which would assist the carrying out of the General Agreement on Tariffs and Trade to which we have been a party since 1948. Our membership in the OTC will provide the most effective and expeditious means for removing discriminations and restrictions against American exports and in making our trade agreements truly reciprocal. United States membership in the Organization will evidence our continuing desire to cooperate in promoting an expanded trade among the free nations. Thus the Organization, as proposed, is admirably suited to our own interests and to those of like-minded nations in working for steady expansion of trade and closer economic cooperation. Being strictly an administrative entity, the Organization for Trade Cooperation cannot, of course, alter the control by Congress of the tariff, import, and customs policies of the United States.

We need to encourage investment overseas by avoiding unfair tax duplications, and to foster foreign trade by further simplification and improvement of our customs legislation.

We must sustain and fortify our mutual-security program. Because the conditions of poverty and unrest in less developed areas make their people a special target of international communism, there is a need to help them achieve the economic growth and stability necessary to preserve their independence against Communist threats and enticements.

In order that our friends may better achieve the greater strength that is our common goal, they need assurance of continuity in economic assistance for development projects and programs which we approve and which require a period of years for planning and completion. Accordingly, I ask Congress to grant limited authority to make longer term commitments for assistance to such projects, to be fulfilled from appropriations to be made in future fiscal years.

These various steps will powerfully strengthen the economic foundation of our foreign policy. Together with constructive action abroad, they will maintain the present momentum toward general economic progress and vitality of the free world.

In all things, change is the inexorable law of life. In much of the world the ferment of change is working strongly; but grave injustices are still uncorrected. We must not, by any sanction of ours, help to perpetuate these wrongs. I have particularly in mind the oppressive division of the German people, the bondage of millions elsewhere, and the exclusion of Japan from United Nations membership.

We shall keep these injustices in the forefront of human consciousness and seek to maintain the pressure of world opinion to right these vast wrongs in the interest both of justice and secure peace.

Injustice thrives on ignorance. Because an understanding of the truth about America is one of our most powerful forces, I am recommending a substantial increase in budgetary support of the United States Information Agency.

The sum of our international effort should be this: The waging of peace, with as much resourcefulness, with as great a sense of dedication and urgency, as we have ever mustered in defense of our country in time of war. In this effort, our weapon is not force. Our weapons are the principles and ideas embodied in our historic traditions, applied with the same vigor that in the past made America a living promise of freedom for all mankind.

To accomplish these vital tasks, all of us should be concerned with the strength, effectiveness, and morale of our State Department and our Foreign Service.

Another guide in the preparation of the administration's program is:

THE CONSTANT IMPROVEMENT OF OUR NATIONAL SECURITY

Because peace is the keystone of our national policy, our defense program emphasizes an effective flexible type of power calculated to deter or repulse any aggression and to preserve the peace. Short of war, we have never had military strength better adapted to our needs with improved readiness for emergency use. The maintenance of this strong military capability for the indefinite future will continue to call for a large share of our national budget. Our military programs must meet the needs of today. To build less would expose the Nation to aggression. To build excessively, under the influence of fear, could defeat our purposes and impair or destroy the very freedom and economic system our military defenses are designed to protect.

We have improved the effectiveness and combat readiness of our forces by developing and making operational new weapons and by integrating the latest scientific developments, including new atomic weapons, into our military plans. We continue to push the production of the most modern military aircraft. The development of long-range missiles has been on an accelerated basis for some time. We are moving as rapidly as practicable toward nuclear-powered aircraft and ships. Combat capability, especially in terms of firepower, has been substantially increased. We have made the adjustments in personnel permitted by the cessation of the Korean war, the buildup of our allies and the introduction of new weapons. The services are all planning realistically on a long-term basis.

To strengthen our continental defenses the United States and Canada, in the closest cooperation, have substantially augmented early warning networks. Great progress is being made in extending surveillance of the Arctic, the Atlantic, and the Pacific approaches to North America.

In the last analysis our real strength lies in the caliber of the men and women in our Armed Forces, Active and Reserve. Much has been done to attract and hold capable military personnel, but more needs to be done. This year, I renew my request of last year for legislation to provide proper medical care for military dependents and a more equitable survivors' benefit program. The administration will prepare additional recommendations designed to achieve the same objectives, including career incentives for medical and dental officers and nurses, and increases in the proportion of Regular officers.

Closely related to the mission of the Defense Department is the task of the Federal Civil Defense Administration. A particular point of relationship arises from the fact that the key to civil defense is the expanded continental defense program, including the distant early warning system. Our Federal civil-defense authorities have made progress in their program, and now comprehensive studies are being conducted jointly by the Federal Civil Defense Administration, the States, and critical target cities to determine the best procedures that can be adopted in case of an atomic attack. We must strengthen Federal assistance to the States and cities in devising the most effective common defense.

We have a broad and diversified mobilization base. We have the facilities, materials, skills, and knowledge rapidly to expand the production of things we need for our defense whenever they are required. But mobilization base requirements change with changing technology and strategy. We must maintain flexibility to meet new requirements. I am requesting, therefore, that the Congress once again extend the Defense Production Act.

Of great importance to our Nation's security is a continuing alertness to internal subversive activity within or without our Government. This administration will not relax its efforts to deal forthrightly and vigorously in protection of this Government and its citizens against subversion, at the same time fully protecting the constitutional rights of all citizens.

A third objective of the administration is:

FISCAL INTEGRITY

A public office is, indeed, a public trust. None of its aspects is more demanding than the proper management of the public finances. I refer now not only to the indispensable virtues of plain honesty and trustworthiness but also to the prudent, effective, and conscientious use of tax money. I refer also to the attitude of mind that makes efficient and economical service to the people a watchword in our Government.

Over the long term, a balanced budget is a sure index to thrifty management—in a home, in a business, or in the Federal Government. When achievement of a balanced budget is for long put off in a business or home, bankruptcy is the result. But in similar circumstances a Government resorts to inflation of the money supply. This inevitably results in depreciation of the value of the money, and an increase in the cost of living. Every investment in personal security is threatened by this process of inflation, and the real values of the people's savings whether in the form of insurance, bonds, pension and retirement funds, or savings accounts are thereby shriveled.

We have made long strides these past 3 years in bringing our Federal finances under control. The deficit for fiscal year 1953 was almost 9½ billion dollars. Larger deficits seemed certain—deficits which would have depreciated the value of the dollar and pushed the cost of living still higher. But Government waste and extravagance were searched out. Nonessential activities were dropped. Government expenses were carefully scrutinized. Total spending was cut by $14 billion below the amount planned by the previous administration for the fiscal year 1954.

This made possible—and it was appropriate in the existing circumstances of transition to a peacetime economy—the largest tax cut in any year in our history. Almost 7½ billion dollars were released and every taxpayer in the country benefited. Almost two-thirds of the savings went directly to individuals. This tax cut also helped to build up the economy, to make jobs in industry, and to increase the production of the many things desired to improve the scale of living for the great majority of Americans.

The strong expansion of the economy, coupled with a constant care for efficiency in Government operations and an alert guard against waste and duplication, has brought us to a prospective balance between income and expenditure. This is being done while we continue to strengthen our military security.

I expect the budget to be in balance during the fiscal year ending June 30, 1956.

I shall propose a balanced budget for the next fiscal year ending June 30, 1957.

But the balance we are seeking cannot be accomplished without the continuing everyday effort of the executive and legislative branches to keep expenditures under control. It will also be necessary to continue all of the present excise taxes without any reduction and the corporation income taxes at their present rates for another year beyond next April 1.

It is unquestionably true that our present tax level is very burdensome and, in the interest of long-term and continuous economic growth, should be reduced when we prudently can. It is essential, in the sound management of the Government's finances, that we be mindful of our enormous national debt and of the obligation we have toward future Americans to reduce that debt whenever we can appropriately do so. Under conditions of high peacetime prosperity, such as now exist, we can never justify going further into debt to give ourselves a tax cut at the expense of our children. So, in the present state of our financial affairs, I earnestly believe that a tax cut can be deemed justifiable only when it will not unbalance the budget, a budget which makes provision for some reduction, even though modest, in our national debt. In this way we can best maintain fiscal integrity.

A fourth aim of our program is:

TO FOSTER A STRONG ECONOMY

Our competitive-enterprise system depends on the energy of free human beings, limited by prudent restraints in law, using free markets to plan, organize, and distribute production, and spurred by the prospect of reward for successful effort. This system has developed our resources. It has marvelously expanded our productive capacity. Against the record of all other economic systems devised through the ages, this competitive system has proved the most creative user of human skills in the development of physical resources, and the richest rewarder of human effort.

This is still true in this era when improved living standards and rising national requirements are accompanied by swift advances in technology and rapid obsolescence in machines and methods. Typical of these are the strides made in construction of plants to produce electrical energy from atomic power and of laboratories and installations for the application of this new force in industry, agriculture, and the healing arts. These developments make it imperative—to assure effective functioning of our enterprise system—that the Federal Government concern itself with certain broad areas of our economic life. Most important of these is:

AGRICULTURE

Our farm people are not sharing as they should in the general prosperity. They alone of all major groups have seen their incomes decline rather than rise. They are caught between two millstones—rising production costs and declining prices. Such harm to a part of the national economy so vitally important to everyone is of great concern to us all. No other resource is so indispensable as the land that feeds and clothes us. No group is more fundamental to our national life than our farmers.

In successful prosecution of the war, the Nation called for the utmost effort of its farmers. Their response was superb, their contribution unsurpassed. Farmers are not now to be blamed for the mountainous, price-depressing surpluses produced in response to wartime policies and laws that were too long continued. War markets are not the markets of peacetime. Failure to recognize that basic fact by a timely adjustment of wartime legislation brought its inevitable result in peacetime—surpluses, lower prices, and lower incomes for our farmers.

The dimensions of Government responsibility are as broad and complex as the farm problem itself. We are here concerned not only with our essential continuing supplies of food and fiber, but also with a way of life. Both are indispensable to the well-being and strength of the Nation. Consideration of these matters must be above and beyond politics. Our national farm policy, so vital to the welfare of farm people and all of us, must not become a field for political warfare. Too much is at stake.

Our farm people expect of us, who have responsibility for their Government, understanding of their problems and the will to help solve them. Our objective must be to help bring production into balance with existing and new markets, at prices that yield farmers a return for their work in line with what other Americans get.

To reach this goal, deep-seated problems must be subjected to a stepped-up attack. There is no single easy solution. Rather, there must be a many-sided assault on the stubborn problems of surpluses, prices, costs, and markets; and a steady, persistent, imaginative advance in the relationship between farmers and their Government.

In a few days, by special message, I shall lay before the Congress my detailed recommendations for new steps that should be taken promptly to speed the transition in agriculture and thus assist our farmers to achieve their fair share of the national income.

Basic to this program will be a new attack on the surplus problem, for even the best-conceived farm program cannot work under a multi-billion-dollar weight of accumulated stocks.

I shall urge authorization of a soil bank program to alleviate the problem of diverted acres and an overexpanded

agricultural plant. This will include an acreage reserve to reduce current and accumulated surpluses of crops in most serious difficulty, and a conservation reserve to achieve other needed adjustments in the use of agricultural resources. I shall urge measures to strengthen our surplus disposal activities.

I shall propose measures to strengthen individual commodity programs, to remove controls where possible, to reduce carryovers, and to stop further accumulations of surpluses. I shall ask the Congress to provide substantial new funds for an expanded drive on the research front, to develop new markets, new crops, and new uses. The rural development program to better the lot of low-income farm families deserves full congressional support. The Great Plains program must go forward vigorously. Advances on these and other fronts will pull down the price-depressing surpluses and raise farm income.

In this time of testing in agriculture, we should, all together, regardless of party, carry forward resolutely with a sound and forward-looking program on which farm people may confidently depend, now and for years to come.

I shall briefly mention four other subjects directly related to the well-being of the economy, preliminary to their fuller discussion in the economic report and later communications.

RESOURCES CONSERVATION

I wish to reemphasize the critical importance of the wise use and conservation of our great natural resources of land, forests, minerals, and water, and their long-range development consistent with our agricultural policy. Water in particular now plays an increasing role in industrial processes, in the irrigation of land, in electric power, as well as in domestic uses. At the same time, it has the potential of damage and disaster.

A comprehensive legislative program for water conservation will be submitted to the Congress during the session. The development of our water resources cannot be accomplished overnight. The need is such that we must make faster progress and without delay. Therefore, I strongly recommend that action be taken at this session on such wholly Federal projects as the Colorado River storage project and the Fryingpan-Arkansas project, on the John Day partnership project, and other projects which provide for cooperative action between the Federal Government and non-Federal interests, and on legislation which makes provision for Federal participation in small projects under the primary sponsorship of agencies of State and local government.

During the past year the areas of our national parks have been expanded, and new wildlife refuges have been created. The visits of our people to the parks have increased much more rapidly than have the facilities to care for them. The administration will submit recommendations to provide more adequate facilities to keep abreast of the increasing interest of our people in the great outdoors.

DISASTER ASSISTANCE

A modern community is a complex combination of skills, specialized buildings, machines, communications and homes. Most importantly it involves human lives. Disaster in many forms—by flood, frost, high winds, for instance—can destroy on a massive scale in a few hours the labor of many years.

Through the past 3 years the administration has repeatedly moved into action wherever disaster struck. The extent of State participation in relief activities, however, has been far from uniform and, in many cases, has been either inadequate or nonexistent. Disaster assistance legislation requires overhauling and an experimental program of flood-damage indemnities should be undertaken. The administration will make detailed recommendations on these subjects.

AREA REDEVELOPMENT

We must help deal with the pockets of chronic unemployment that here and there mar the Nation's general industrial prosperity. Economic changes in recent years have been often so rapid and far-reaching that areas committed to a single local resource or industrial activity have found themselves temporarily deprived of their markets and their livelihood.

Such conditions mean severe hardship for thousands of people as the slow process of adaptation to new circumstances goes on. This process can be speeded up. Last year I authorized a major study of the problem to find additional steps to supplement existing programs for the redevelopment of areas of chronic unemployment. Recommendations will be submitted, designed to supplement with Federal technical and loan assistance local efforts to get on with this vital job. Improving such communities must, of course, remain the primary responsibility of the people living there and of their States. But a soundly conceived Federal partnership program can be of real assistance to them in their efforts.

HIGHWAY LEGISLATION

Legislation to provide a modern, interstate highway system is even more urgent this year than last, for 12 months have now passed in which we have fallen further behind in road construction needed for the personal safety, the general prosperity, the national security of the American people. During the year, the number of motor vehicles has increased from 58 to 61 million. During the past year over 38,000 persons lost their lives in highway accidents, while the fearful toll of injuries and property damages has gone on unabated.

In my message of February 22, 1955, I urged that measures be taken to complete the vital 40,000 mile interstate system over a period of 10 years at an estimated Federal cost of approximately $25 billion. No program was adopted.

If we are ever to solve our mounting traffic problem, the whole interstate system must be authorized as one project, to be completed approximately within the specified time. Only in this way can industry efficiently gear itself to the job ahead. Only in this way can the required planning and engineering be accomplished without the confusion and waste unavoidable in a piecemeal approach. Furthermore, as I pointed out last year, the pressing nature of this problem must not lead us to solutions outside the bounds of sound fiscal management. As in the case of other pressing problems, there must be an adequate plan of financing. To continue the drastically needed improvement in other national highway systems, I recommend the continuation of the Federal-aid highway program.

Aside from agriculture and the four subjects specifically mentioned, an integral part of our efforts to foster a strong and expanding free economy is keeping open the door of opportunity to new and small enterprises, checking monopoly, and preserving a competitive environment. In this past year the steady improvement in the economic health of small business has reinforced the vitality of our competitive economy. We shall continue to help small-business concerns to obtain access to adequate financing and to competent counsel on management, production, and marketing problems.

Through measures already taken, opportunities for small-business participation in Government-procurement programs, including military procurement, are greatly improved. The effectiveness of these measures will become increasingly apparent. We shall continue to make certain that small business has a fair opportunity to compete and has an economic environment in which it may prosper.

In my message last year, I referred to the appointment of an advisory committee to appraise and report to me on the deficiencies as well as the effectiveness of existing Federal transportation policies. I have commended the fundamental purposes and objectives of the committee's report. I earnestly recommended that the Congress give prompt attention to the committee's proposals.

Essential to a prosperous economic environment for all business, small and large—for agriculture and industry and commerce—is efficiency in Government. To that end, exhaustive studies of the entire governmental structure were made by the Commission on Intergovernmental Relations and the Commission on the Organization of the Executive Branch of the Government—the reports of these Commissions are now under intensive review and already in the process of implementation in important areas.

One specific and most vital governmental function merits study and action by the Congress. As part of our program of promoting efficiency in Government and getting the fiscal situation in hand, the Post Office Department in the past 3 years has been overhauled. Nearly one thousand new post offices have been provided. Financial practices have been modernized and transportation and operating methods are being constantly improved. A new wage and incentive plan for the half million postal employees has been established. Never before has the postal system handled so much mail so quickly and so economically.

The Post Office Department faces two serious problems. First, much of its physical plant—post offices and other buildings—is obsolete and inadequate.

Many new buildings and the modernization of present ones are essential if we are to have improved mail service. The second problem is the Department's fiscal plight. It now faces an annual deficit of one-half billion dollars.

Recommendations on postal facilities and on additional postal revenues will be submitted to the Congress.

A final consideration in our program planning is:

THE RESPONSE TO HUMAN CONCERNS

A fundamental belief shines forth in this Republic. We believe in the worth and dignity of the individual. We know that if we are to govern ourselves wisely—in the tradition of America—we must have the opportunity to develop our individual capacities to the utmost.

To fulfill the individual's aspirations in the American way of life, good education is fundamental. Good education is the outgrowth of good homes, good communities, good churches, and good schools. Today our schools face pressing problems—problems which will not yield to swift and easy solutions, or to any single action. They will yield only to a continuing, active, informed effort by the people toward achieving better schools.

This kind of effort has been spurred by the thousands of conferences held in recent months by half a million citizens and educators in all parts of the country, culminating in the White House Conference on Education. In that Conference, some two thousand delegates, broadly representative of the Nation, studied together the problems of the Nation's schools.

They concluded that the people of the United States must make a greater effort through their local, State, and Federal Governments to improve the education of our youth. This expression from the people must now be translated into action at all levels of Government.

So far as the Federal share of responsibility is concerned, I urge that the Congress move promptly to enact an effective program of Federal assistance to help erase the existing deficit of school classrooms. Such a program, which should be limited to a 5-year period, must operate to increase rather than decrease local and State support of schools and to give the greatest help to the States and localities with the least financial resources. Federal aid should in no way jeopardize the freedom of local school systems. There will be presented to the Congress a recommended program of Federal assistance for school construction.

Such a program should be accompanied by action to increase services to the Nation's schools by the Office of Education and by legislation to provide continuation of payments to school districts where Federal activities have impaired the ability of those districts to provide adequate schools.

Under the 1954 amendments to the old-age and survivors' insurance program, protection was extended to some 10 million additional workers and benefits were increased. The system now helps protect 9 out of 10 American workers and their families against loss of income in old age or on the death of the breadwinner. The system is sound. It must be kept so. In developing improvements in the system, we must give the most careful consideration to population and social trends, and to fiscal requirements. With these considerations in mind, the administration will present its recommendations for further expansion of coverage and other steps which can be taken wisely at this time.

Other needs in the area of social welfare include increased child-welfare services, extension of the program of aid to dependent children, intensified attack on juvenile delinquency, and special attention to the problems of mentally retarded children. The training of more skilled workers for these fields and the quest for new knowledge through research in social welfare are essential. Similarly the problems of our aged people need our attention.

The Nation has made dramatic progress in conquering disease—progress of profound human significance which can be greatly accelerated by an intensified effort in medical research. A well-supported, well-balanced program of research, including basic research, can open new frontiers of knowledge, prevent and relieve suffering, and prolong life. Accordingly I shall recommend a substantial increase in Federal funds for the support of such a program. As an integral part of this effort, I shall recommend a new plan to aid construction of non-Federal medical research and teaching facilities and to help provide more adequate support for the training of medical research manpower.

Finally, we must aid in cushioning the heavy and rising costs of illness and hospitalization to individuals and families. Provision should be made, by Federal reinsurance or otherwise, to foster extension of voluntary health insurance coverage to many more persons, especially older persons and those in rural areas. Plans should be evolved to improve protection against the costs of prolonged or severe illness. These measures will help reduce the dollar barrier between many Americans and the benefits of modern medical care.

The administration health program will be submitted to the Congress in detail.

The response of Government to human concerns embraces, of course, other measures of broad public interest, and of special interest to our working men and women. The need still exists for improvement of the Labor Management Relations Act. The recommendations I submitted to the Congress last year take into account not only the interests of labor and management but also the public welfare. The needed amendments should be enacted without further delay.

We must also carry forward the job of improving the wage-hour law. Last year I requested the Congress to broaden the coverage of the minimum wage. I repeat that recommendation and I pledge the full resources of the executive branch to assist the Congress in finding ways to attain this goal. Moreover, as requested last year, legislation should be passed to clarify and strengthen the 8-hour laws for the benefit of workers who are subject to Federal wage standards on Federal and federally assisted construction and other public works.

The administration will shortly propose legislation to assure adequate disclosure of the financial affairs of each employee pension and welfare plan and to afford substantial protection to their beneficiaries in accordance with the objectives outlined in my message of January 11, 1954. Occupational safety still demands attention, as I pointed out last year, and legislation to improve the Longshoremen's and Harbor Workers' Compensation Act is still needed. The improvement of the District of Columbia unemployment-insurance law and legislation to provide employees in the District with non-occupational-disability insurance are no less necessary now than 12 months ago. Legislation to apply the principle of equal pay for equal work without discrimination because of sex is a matter of simple justice. I earnestly urge the Congress to move swiftly to implement these needed labor measures.

In the field of human needs, we must carry forward the housing program which is contributing so greatly to the well-being of our people and the prosperity of our economy. Homeownership is now advanced to the point where almost 3 of every 5 families in our cities, towns, and suburbs own the houses they live in.

For the housing program, most of the legislative authority already exists. However, a firm program of public housing is essential until the private building industry has found ways to provide more adequate housing for low-income families. The administration will propose authority to contract for 35,000 additional public-housing units in each of the next 2 fiscal years for communities which will participate in an integrated attack on slums and blight.

To meet the needs of the growing number of older people, several amendments to the National Housing Act will be proposed to assist the private home-building industry as well as charitable and nonprofit organizations.

With so large a number of the American people desiring to modernize and improve existing dwellings, I recommend that the title I program for permanent improvements in the home be liberalized.

I recommend increases in the general FHA mortgage insurance authority; the extension of the FHA military housing program; an increase in the authorization for urban planning grants; in the special assistance authority of the Federal National Mortgage Association; and continued support of the college housing program in a way that will not discourage private capital from helping to meet the needs of our colleges.

The legislation I have recommended for workers in private industry should be accompanied by a parallel effort for the welfare of Government employees. We have accomplished much in this field, including a contributory life-insurance program; equitable pay increases and a fringe-benefits program, covering many needed personnel policy changes, from improved premium pay to a meaningful incentive awards program.

Additional personnel-management legislation is needed in this session. As I stated last year, an executive pay increase is essential to efficient governmental management. Such an increase, together with needed adjustments in the pay for the top career positions, is also necessary to the equitable completion of the Federal pay program initiated last year. Other legislation will be proposed, including legislation for prepaid group health insurance for employees and their dependents and to effect major improvements in the civil-service retirement system.

All of us share a continuing concern for those who have served this Nation in the Armed Forces. The Commission on Veterans' Pensions is at this time conducting a study of the entire field of veterans' benefits and will soon submit proposed improvements.

We are proud of the progress our people have made in the field of civil rights. In executive-branch operations throughout the Nation, elimination of discrimination and segregation is all but completed. Progress is also being made among contractors engaged in furnishing Government services and requirements. Every citizen now has the opportunity to fit himself for and to hold a position of responsibility in the service of his country. In the District of Columbia, through the voluntary cooperation of the people, discrimination and segregation are disappearing from hotels, theaters, restaurants, and other facilities.

It is disturbing that in some localities allegations persist that Negro citizens are being deprived of their right to vote and are likewise being subjected to unwarranted economic pressures. I recommend that the substance of these charges be thoroughly examined by a bipartisan commission created by the Congress. It is hoped that such a commission will be established promptly so that it may arrive at findings which can receive early consideration.

The stature of our leadership in the free world has increased through the past 3 years because we have made more progress than ever before in a similar period to assure our citizens equality in justice, in opportunity, and in civil rights. We must expand this effort on every front. We must strive to have every person judged and measured by what he is, rather than by his color, race, or religion. There will soon be recommended to the Congress a program further to advance the efforts of the Government, within the area of Federal responsibility, to accomplish these objectives.

One particular challenge confronts us. In the Hawaiian Islands, East meets West. To the islands, Asia, and Europe, and the Western Hemisphere, all the continents have contributed their peoples and their cultures to display a unique example of a community that is a successful laboratory in human brotherhood.

Statehood, supported by the repeatedly expressed desire of the islands' people and by our traditions, would be a shining example of the American way to the entire earth. Consequently, I urgently request this Congress to grant statehood for Hawaii. Also, in harmony with the provisions I last year communicated to the Senate and House Committees on Interior and Insular Affairs, I trust that progress toward statehood for Alaska can be made in this session.

Progress is constant toward full integration of our Indian citizens into normal community life. During the past 2 years the administration has provided school facilities for thousands of Indian children previously denied this opportunity. We must continue to meet the needs of increased numbers of Indian children. Provision should also be made for the education of adult Indians whose schooling in earlier years was neglected.

In keeping with our responsibility of world leadership and in our own self-interest, I again point out to the Congress the urgent need for revision of the immigration and nationality laws. Our Nation has always welcomed immigrants to our shores. The wisdom of such a policy is clearly shown by the fact that America has been built by immigrants and the descendants of immigrants. That policy must be continued realistically with present-day conditions in mind.

I recommend that the number of persons admitted to this country annually be based not on the 1920 census but on the latest, the 1950 census. Provision should be made to allow for greater flexibility in the use of quotas so if one country does not use its share, the vacancies may be made available for the use of qualified individuals from other countries.

The law should be amended to permit the Secretary of State and the Attorney General to waive the requirements of fingerprinting on a reciprocal basis for persons coming to this country for temporary visits. This and other changes in the law are long overdue and should be taken care of promptly. Detailed recommendations for revision of the immigration laws will be submitted to the Congress.

I am happy to report substantial progress in the flow of immigrants under the Refugee Relief Act of 1953. However, I again request this Congress to approve without further delay the urgently needed amendments to that act which I submitted in the last session. Because of the high prosperity in Germany and Austria, the number of immigrants from those countries will be reduced. This will make available thousands of unfilled openings which I recommend be distributed to Greece and Italy and to escapees from behind the Iron Curtain.

Once again I ask the Congress to join with me in demonstrating our belief in the right of suffrage. I renew my request that the principle of self-government be extended and the right of suffrage granted to the citizens of the District of Columbia.

To conclude: The vista before us is bright. The march of science, the expanding economy, the advance in collective security toward a just peace—in this threefold movement our people are creating new standards by which the future of the Republic may be judged.

Progress, however, will be realized only as it is more than matched by a continuing growth in the spiritual strength of the Nation. Our dedication to moral values must be complete in our dealings abroad and in our relationships among ourselves. We have single-minded devotion to the common good of America. Never must we forget that this means the well-being, the prosperity, the security of all Americans in every walk of life.

To the attainment of these objectives I pledge full energies of the administration as in the session ahead it works on a program for submission to you, the Congress of the United States.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *January 5, 1956.*

Mr. McCORMACK. Mr. Speaker, I move that the message of the President of the United States be referred to the Whole House on the State of the Union and that it be ordered printed.

The motion was agreed to.

THE LATE HARRY SANDAGER

Mr. FOGARTY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. FOGARTY. Mr. Speaker, I have an unhappy mission to perform. I have to acquaint the Members of the House with the fact that a former colleague of many Members has passed away. My predecessor in representation of the Second Rhode Island District, Harry Sandager, has gone to his eternal reward. Harry Sandager died on Christmas eve after suffering a heart attack.

One of the most overworked words in our language is the word, "friend." But, I want to say that in the passing of one of Rhode Island's most distinguished citizens I feel that I have lost a genuine friend. His sudden death cast a pall over the Christmas Day festivities in my home—and in the homes of a great many Rhode Islanders.

Harry Sandager was a grand person—and a gentleman in every sense of the word. Harry Sandager and I were political opponents during two vigorously fought campaigns. Harry Sandager fought hard, but he fought honorably. I have always been proud of the fact that our friendship became stronger as a result of these two contests.

Harry has been a prominent businessman in Rhode Island for the past 25 years. In his earlier years, he held down the desk of sports editor for the Pawtucket Times and he always evidenced a strong interest in newspaper work.

Mr. Sandager came to Washington first in 1919 as secretary to the late Congressman Walter R. Stiness with whom he was associated for 4 years. While working on Capitol Hill, he attended Georgetown University and George Washington University, receiving degrees from both institutions.

He was a member of Georgetown's first class in the Foreign Service school

and, in 1921, he was awarded the James A. Farrell prize for the highest general average in that school which has become so famous.

Mr. Sandager served for 8 years as a member of Rhode Island's House of Representatives and, in 1936, was elected Republican floor leader in that body. In 1938, he was elected to the United States House of Representatives to serve in the 76th Congress and represented the 2d District of Rhode Island in Congress until January 1, 1941. He was always very active in Republican Party affairs in Rhode Island and served for a time as Republican National Committeeman from my State. He enjoyed the honor of having represented his party at national conventions and, for many years, Harry Sandager was always consulted in considerations of Republican Party policy in Rhode Island.

At one time, Harry was president of the Southern New England Football Association and also of the National Roller-Polo League. He was an active member of the Doric Lodge, A. F. & M., in the Providence Lodge of Elks, the Providence Aerie of Eagles, and the Lions' Club of his hometown, the city of Cranston.

I wish to take this opportunity, and I know many of my colleagues join me, in extending to his widow heartfelt sympathy on the passing of such a gentleman. He was a credit to his background, his community, his State and the American way of life.

It has been said of another great man that nothing in his life became him more—than the manner of his passing from this mortal sphere. Harry Sandager suffered a heart attack while he was in the midst of a vigorous round of activity delivering Christmas presents to many of his friends, and to many less fortunate than himself—for whom he always wished the merriest of Christmasses. May the Good Lord have mercy on his soul.

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. FOGARTY. I yield to the gentleman from Massachusetts.

Mr. MARTIN. Mr. Speaker, I would like to join with my good friend from Rhode Island in expressing my deep regret at the passing of former Congressman Sandager. It was my privilege to know intimately and well for many years the former Member from Rhode Island. I knew him when he was engaged in newspaper work and also as a Member of the Congress. He was a man of fine ability and a stalwart champion of Americanism. He was a devoted and loyal friend. His death will be genuinely regretted by all who were privileged to know him. My sincere sympathy is extended to his wife and family.

Mr. KILDAY. Mr. Speaker, will the gentleman yield?

Mr. FOGARTY. I yield to the gentleman from Texas.

Mr. KILDAY. Mr. Speaker, I came to the Congress with Harry Sandager. As two freshmen members we occupied offices just across the hall from each other. While he remained here only two years the friendship we then formed continued throughout the years. I am very much aggrieved to hear of his passing. It was typical, however, that he should pass away while engaged in activities he enjoyed most, expressing friendship and Christmas greetings to his friends and to the less fortunate. I extend to his widow my sincere sympathy.

Mr. FOGARTY. Mr. Speaker, I yield to the gentleman from Rhode Island [Mr. FORAND].

Mr. FORAND. Mr. Speaker, I join with my colleague in paying this tribute to Harry Sandager. Although we were of different political faiths, we always worked together for the good and the welfare not only of our State but of the Federal Government, and in the passing of Harry Sandager not only the State of Rhode Island, not only his family, but the country has lost a great citizen.

Mr. FORAND. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. WIGGLESWORTH. Mr. Speaker, I have learned with deep regret of the passing of our former friend and colleague, Harry Sandager, of Rhode Island.

Born in 1887, he played an active part in public life in the field of journalism; as a Representative in the Rhode Island General Assembly for 8 years; as a Member of the 76th Congress, and as Republican national committeeman for the State of Rhode Island.

He had a very wide circle of friends, among whom I have been happy to be included. I have valued his friendship ever since the days of our service here together in this House.

I join in heartfelt sympathy to Mrs. Sandager and to all those close to him.

SPECIAL ORDER GRANTED

Mr. JONES of Missouri asked and was given permission to address the House for 1 hour on Monday next, following any special orders heretofore entered.

Mr. SMITH of Mississippi asked and was given permission to address the House for 30 minutes on Thursday next, following any special orders heretofore entered.

Mr. TUMULTY (at the request of Mr. MURRAY of Illinois) was given permission to address the House for 15 minutes on Thursday next, following any special orders heretofore entered.

THE LATE CHARLES FRANKLIN WEST

Mr. McGREGOR. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. McGREGOR. Mr. Speaker, I regret to inform you of the passing of a former Member of this House, the Honorable Charles Franklin West. Mr. West represented the 17th Congressional District of Ohio for two terms, the 72d and 73d Congresses.

Before coming to Congress, Charles West was a teacher of political science at Denison University, the College of Wooster, and Tufts College. He attended Ohio Wesleyan University and completed his work for a bachelor's degree at Harvard. After his service in the House of Representatives, Mr. West, who was a member of the Democrat Party, served in the capacity of personal contact man for President Roosevelt. He was Under Secretary of the Interior and had served as vice consul at Naples, Italy, under President Wilson.

I am sure my colleagues here assembled join with me in extending our sincere sympathy to his wife, his brother, his two sisters, and his many friends.

Mr. JENKINS. Mr. Speaker, will the gentleman yield?

Mr. McGREGOR. I yield to the gentleman from Ohio.

Mr. JENKINS. Mr. Speaker, I had the privilege of knowing Charley West. He served with me on the Ways and Means Committee and in that service he showed that he was a very well-educated man. He readily digested most of the very complicated matters that came before us. He frequently discussed these complicated matters with a fair attitude. I extend to his family my most sincere sympathy.

NATIONAL FLOOD INDEMNITY ACT OF 1956

Mr. WILCOTT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. WOLCOTT. Mr. Speaker, at the request of the administration, I have today introduced a bill to provide for an experimental national flood indemnity and reinsurance program and for other purposes.

The bill, entitled "National Flood Indemnity Act of 1956," provides for an experimental 5-year program of indemnity and reinsurance to help alleviate the economic hardship which our people suffer as a result of floods. It makes provision for a voluntary Federal-State program of indemnities and a Federal program of reinsurance of flood risks. Both programs would be administered by the Federal Government, utilizing private insurance facilities to the fullest extent possible. States participating in the indemnity program, however, would make certain financial contributions which would be matched by the Federal Government.

The total annual loss from floods in the United States is roughly estimated to be $225 million. However, the proposed legislation does not attempt to cover all of this loss. A substantial portion of flood loss relates to types of personal property for which insurance from private companies is already available, and losses on growing crops covered by the Federal Crop Insurance program. Also, as will be explained, there are lim-

itations in the bill on the indemnity coverage available to any one person, and requirements for coinsurance.

Because of the novel and complex problems involved and the lack of experience by the Federal Government and private industry in the field, the programs should be experimental in nature and flexible. Consequently, the authorities proposed in this bill are more limited in scope and broader in methods of operation than would perhaps be desirable if records of past experience in flood insurance existed.

Under the terms of this bill the Housing and Home Finance Administrator would be authorized, upon the payment of a fee by the property owner, to issue indemnity contracts protecting the owner against losses due to floods. Such contracts may cover real property, business inventories, stored agricultural commodities, household effects, and such other personal property as the Administrator may determine.

The bill would require that the fee paid by the property owner equal at least 60 percent of an estimated rate, which would be the rate necessary to cover all losses, except administrative expenses, over a reasonable period of years. The amount of the difference between the fee charged the property owner and the estimated rate would be shared equally by the individual State in which the property covered is located and the Federal Government. The fees charged plus the Federal and State contributions would be placed in a Federal flood indemnity fund from which all losses would be paid.

The provision for Federal and State contributions is made in recognition of the fact that the fees to be charged owners of property may otherwise be so high as to defeat the purposes of the bill. The fee required by the bill, however, is a minimum amount which can be adjusted after a creditable experience is developed under the indemnity program. To the extent this can be done, Federal and State contributions might be reduced. This affords the means of gradually eliminating subsidies, as experience is gained, and placing the program in a position to be taken over by private insurance companies.

The maximum coverage under this bill is limited to $250,000 for any one corporation, individual, State, or municipality. The purpose of the limitation is to spread the risk until greater experience is gained. This bill also contains coinsurance provisions which reduce the amount of approved claims by $300 plus 10 percent of the remainder. This amount and percentage may be increased by the Administrator. The purpose of this provision is, first, to eliminate small nuisance claims, and, secondly, to encourage people to protect their property against flood risks and assume a portion of the risk involved.

The Administrator is authorized to issue indemnity contracts in an aggregate amount of $1,900,000,000. With the consent of the President this authorization may be increased by $1 billion.

The Administrator would be authorized to make an equitable distribution of these amounts throughout the United States.

This bill also authorizes the Administrator to reinsure private insurance companies under any plan of reinsurance which he believes would best effectuate the purposes of the act, against losses on insurance policies issued by such companies covering flood risks. He is required to charge a premium for such reinsurance which, in his judgment, would be adequate to cover all claims for losses. The reinsurance authorization is limited to $100 million because it is anticipated that private insurance companies generally will not be willing to participate in the program until the Federal Government has developed actuarial experience covering flood risks. It is recognized, however, that the reinsurance program can serve as a convenient vehicle for transferring these programs back to private enterprise. The Administrator therefore is required by the bill to consult with representatives of the insurance industry and make continuing surveys and studies to determine methods to expand the reinsurance program.

In the administration of these programs the Administrator is required to make the maximum use of private facilities such as private insurance companies, established insurance agents, and brokers and established insurance adjustment organizations where consistent with providing protection at minimum cost. The bill contains adequate safeguards against competition with private enterprise in the insurance business. No operation could be started or continued by the Government under the bill if private companies are prepared to handle it.

FLOOD RELIEF, REHABILITATION AND PROTECTION, AND FOR DISASTER INSURANCE

Mr. PHILBIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PHILBIN. Mr. Speaker, I introduced, on Tuesday, January 3, several bills pertaining to flood relief, rehabilitation and protection, and for disaster insurance.

Some of these measures I have introduced in previous sessions of Congress. All of them are presently urgently needed in order to repair the tremendous damage done by recent floods in the Northeast or to protect against recurrence of these great natural disasters.

I would like to emphasize that I have introduced a bill to appropriate immediate funds for expedited preliminary planning and construction of necessary flood-control works in Massachusetts, which is designed to minimize delays in getting some vitally needed projects under way without waiting for the regular 1956–57 appropriation bill for flood control.

It is my personal belief that many, and I hope all of the projects mentioned in this bill, will be covered by the report of the Bureau of the Budget, which should be filed with Congress in the near future for supplemental 1955–56 Army engineer funds. However, in order to clarify the situation and to make sure that all necessary projects of this kind shall be promptly before the Appropriations Committee, I felt that it was highly desirable to file this bill and request that it and the other bills designed to cope with the great problems posed by past and prospective floods in our Northeast area be expeditiously considered and acted upon.

In another speech, I will detail the scope and intensity of the great disaster which befell my district and other sections of the Northeast last August 19, and also the work of our Massachusetts delegation, and our special committee on flood prevention and relief, of which I am chairman.

It is hardly necessary, because of the widespread knowledge of the effects of this holocaust and other recent storms of devastating character, for me to elaborate at any great length or in voluminous detail the loss of life which was suffered and the damage which was done. I feel that Members of Congress, being well informed about these terrible disasters, and in addition the one which recently struck parts of the west coast with such devastating force, will be very anxious to cooperate in taking every possible expeditious action which Congress can take to alleviate the effects and to forestall the recurrence of the effects of these terrible visitations of nature.

In this connection, the report of our committee is very comprehensive and descriptive and I hope it will be illuminating to Members of Congress as covering the situation in Massachusetts. Let me state, however, that several other States were grievously affected and the question is of such scope and seriousness that it requires action by the Congress on an emergency basis if we are to forestall the devastating effects of future natural disasters of this character.

Among these measures is a bill to provide disaster insurance modeled largely after the principle of the War Damage Corporation program, a bill to expand and improve the weather service by providing more extensive and more effective forecasting of great storms through an accelerated weather-research program, general relief measures, so-called, to deal with problems of ordinary men and women who suffer serious losses, in some cases of all their property and belongings, in these storms and floods by providing direct relief for all sufferers of natural disasters.

Liberalization of restrictions on the operation of the Federal disaster relief program is urgently required, and to this end I introduced two bills so as to permit the responsible Government agency to make disbursements of Federal money in providing direct relief to sufferers of a major disaster. The first bill would permit permanent replacement and repair of public facilities destroyed in a natural disaster—not temporary repairs as now provided by law—and also make available such sums as are required to carry out needed relief. The second bill to liberalize Federal disaster relief laws

would establish a $50-million fund to be disbursed without regard to present limitations in the Disaster Relief Act. This fund would be used for the furnishing of services, materials, and payments for relief work in the flood-stricken areas of the Northeast and California or elsewhere in the Nation as the need may arise.

I also introduced a series of tax-relief bills and earnestly hope they will have the sympathetic study and consideration of our Committee on Ways and Means. The first measure establishes new depreciation credits for property restored after a natural disaster. The second would permit individuals and corporations to obtain full tax credits over and above the present deduction rates for charitable gifts when these contributions are made to disaster relief funds such as the American Red Cross or to local relief organizations.

The third tax bill seeks to channel corporation profits into employee welfare and rehabilitation work. Thus, the bill would permit a corporation to disburse its profits into the repairing or rebuilding a home of an employee damaged or destroyed in a natural disaster.

In view of the lack of direct aid from the Federal Government in time of disaster I introduced a bill to establish a Federal Disaster Claims Commission to be implemented with an appropriation of $100 million to extend adequate relief to individuals stricken by disaster.

I hope that these sound, well-considered and most desirable measures, which I am sponsoring in cooperation with my colleagues, will have the early, vigorous attention and support of the Congress. I am not concerned with pride of authorship in these measures and if other similar bills are proposed containing the principle of my bills, I will enthusiastically and vigorously support them. The important thing is to get action—planning, construction, rehabilitation, relief, insurance, and protection as soon as possible. The situation is urgent.

I respectfully urge and plead for immediate consideration of the entire disaster problem. It must be promptly solved by Congress within the framework of the Government and in line with needs as well as the rights of the States and local communities.

The texts of my bills follow:

House Joint Resolution 450

Joint resolution making additional appropriations for disaster relief for the fiscal year 1956, and for other purposes

Resolved, etc., That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending June 30, 1956, the following sum:

For an additional amount for "Disaster relief," $50,000,000, to remain available until June 30, 1957, to be expended without regard to the limitation in section 8 of the act of September 30, 1950 (Public Law 875), to carry out assistance and rehabilitation, including the furnishing of services, materials, and payments for relief work in the areas in the Northeast and California, stricken by floods in 1955.

H. R. 7944

A bill creating a Government-owned corporation to insure against certain disasters

Be it enacted, etc., That this act may be cited as the "National Disaster Relief Corporation Charter Act."

SEC. 2. There is hereby created a body corporate to be known as the "National Disaster Relief Corporation" (referred to in this act as the "Corporation" which shall be an agency and instrumentality of the United States.

SEC. 3. The Corporation shall have its principal office in the District of Columbia and may establish offices in such other places as it may deem appropriate in the conduct of its business.

SEC. 4. (a) The objects and purposes of the Corporation shall be to provide through insurance, reinsurance, or otherwise, reasonable protection to all persons against loss of or damage to property, real or personal, which may result from a catastrophe determined by the President to be a major disaster for the purposes of the act entitled "An act to authorize Federal assistance to States and local governments in major disasters, and for other purposes," approved September 30, 1950, as amended (42 U. S. C. secs. 1855–1855g).

(b) The Corporation shall establish, from time to time, uniform rates for each type of property with respect to which protection is made available under this act, and, in order to establish a basis for such rates, the Corporation shall establish the average risk of loss on all property of such type in the United States. Such protection shall be available only to such property situated in the United States (including the District of Columbia), Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

(c) The Corporation may insure or reinsure in whole or in part any company authorized to do insurance business in any State of the United States which will directly insure any person against loss of or damage to property resulting from any catastrophe of the type which may be determined by the President to be a major disaster for the purposes of such act of September 30, 1950, as amended, whenever in the opinion of the Corporation such insurance or reinsurance is required to protect property which it is authorized to protect, and such insurance or reinsurance cannot be obtained at reasonable rates or upon reasonable conditions from approved companies authorized to do insurance business in any State of the United States.

SEC. 5. The Corporation shall have the following general powers in carrying out the objects and purposes set forth in section 4 of this act—

(1) to have succession until June 30, 1964, unless sooner dissolved by act of Congress;

(2) to adopt, alter, and use a corporate seal, which shall be judicially noticed;

(3) to adopt, amend, and repeal bylaws governing the conduct of its business, and the performance of the powers granted to it by law;

(4) to sue and be sued in its corporate name in any court of competent jurisdiction;

(5) to determine the character of and the necessity for its obligations and expenditures and the manner in which they shall be incurred, allowed, and paid, subject to the laws applicable specifically to Government corporations;

(6) to acquire, in any lawful manner, any property—real, personal, or mixed, tangible or intangible—to hold, maintain, use, and operate such property; and to sell, lease, or otherwise dispose of such property, whenever any of the foregoing transactions are deemed necessary or appropriate to the conduct of the activities authorized by this act, and on such terms as may be prescribed by the Corporation;

(7) to execute all instruments necessary or appropriate in the exercise of any of its functions;

(8) to use the United States mails in the same manner and under the same conditions as the executive departments of the Federal Government;

(9) to settle and adjust claims held by it against other persons or parties and by other persons or parties against the Corporation;

(10) to appoint such officers, agents, attorneys, and employees as may be necessary for the conduct of the business of the Corporation; and to delegate to them such powers and to prescribe for them such duties as may be deemed appropriate by the Corporation; and,

(11) to take such actions as may be necessary or appropriate to carry out the powers and duties herein or hereafter specifically granted to or imposed upon it.

SEC. 6. The Corporation, including its franchise, its capital, reserves, surplus, and income, shall be exempt from all taxation (which shall, for all purposes, be deemed to include sales, use, storage, and purchase taxes) imposed by the United States, or any Territory, dependency or possession thereof, or by any State, county, municipality, or local taxing authority, except that any real property (or buildings which are considered by the laws of any State to be personal property for taxation purposes) of the Corporation shall be subject to State, Territorial, county, municipal, or local taxation to the same extent according to its value as other real property is taxed.

SEC. 7. The Corporation shall be managed by a board of directors of the Corporation to be appointed by the President, by and with the advice and consent of the Senate, and to consist of five directors. The term of office of each member of the board of directors shall be five years except that the terms of office of the directors first taking office after the date of the enactment of this Act shall expire, as designated by the President at the time of appointment, one at the end of one year, one at the end of two years, one at the end of three years, one at the end of four years, and one at the end of five years; and whenever a vacancy shall occur in the office of director other than by expiration of term, the person appointed to fill such vacancy shall hold office for the unexpired portion of the term of the director whose place he is selected to fill. Any director may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. Each director shall receive compensation at the rate of $17,500. No director shall engage in any business, vocation, or employment other than that of serving as a member of the board of directors.

SEC. 8. (a) There is hereby created the "National Disaster Relief Fund" (referred to in this Act as the "Fund") which shall be used by the Corporation as a revolving fund in the performance of the powers and duties granted to or imposed upon it by law. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $5,000,000 to be allocated to such Fund.

(b) Insurance premiums and any other revenues derived by the Corporation from its operations shall be deposited in the Treasury of the United States to the credit of the Fund, and all moneys in the Fund not needed by the Corporation for its current operations shall be invested in bonds or other obligations of the United States guaranteed as to principal and interest by the United States.

SEC. 9. Section 101 of the Government Corporation Control Act is amended by inserting

after "Tennessee Valley Authority;" the following: "National Disaster Relief Corporation."

H. R. 7945

A bill for the relief of sufferers in designated disaster areas for losses of real and personal property

Be it enacted, etc., That there is hereby created a Federal Disaster Claims Commission, hereinafter referred to as the Commission, to be composed of the Director of Defense Mobilization, the Administrator of the Reconstruction Finance Corporation, the Administrator of the Housing and Home Finance Agency, and the Administrator of the Federal Civil Defense Administration, to direct and supervise, under such regulations as it may adopt, the payment of claims for losses of real and personal property suffered by individuals whose property is damaged in areas designated by the President as disaster areas; and local Federal disaster claim boards in each county in such designated disaster areas, to receive and process such claims.

SEC. 2. The said Commission shall have an Executive Director, who shall be selected by the Commission from an existing Federal agency, and whose duties shall be in addition to those presently exercised by him.

SEC. 3. The President is hereby authorized to request the Governors of States in which disaster areas exist to name a Federal disaster claims board in each county within the designated disaster area of their respective States, to consist of not more than 5 members, to be selected from each of the 2 major political parties, said board members to serve as a civic duty and without compensation.

SEC. 4. The Executive Director of the Commission is authorized to requisition from existing Federal agencies, on behalf of the Commission, and to assign such clerical staffs as may be deemed necessary for both the office of the Commission and of the board offices in the several counties.

SEC. 5. No claim shall be considered for a minimum of less than $300, and the maximum allowable to any one claimant shall be $5,000 for personal property and $10,000 for real property; no claim shall be entertained from individuals found to be eligible for relief under any other provisions of existing law; and there shall be deducted from the total amount found to be allowable the amount of any cash relief benefits and/or insurance already received by the claimant from any agency, public or private, on account of actual loss suffered. All claims must be filed with the appropriate local county board within 6 months from the date of the designation of the area as a disaster area by the President.

SEC. 6. The local board in each county shall receive and process claims; shall, according to rules and regulations of the Commission, require the submission of proof of loss and of the actual value of property lost; and shall determine the fact and the extent of loss suffered. Upon a finding that a claim is allowable, the board shall certify the claim and the amount allowed to the Commission, which shall review the claim and thereupon make payment direct to the claimant.

SEC. 7. The right to claim shall vest only in the person who suffered the loss, or (1) the widow or widower, or (2), if there be no surviving widow or widower, then the surviving children.

SEC. 8. For the implementation of this act there is hereby authorized to be appropriated the sum of not more than $100 million.

SEC. 9. (a) Any person found guilty of making a false or fraudulent claim, or assisting in the presentation of false or fraudulent claims, shall be deemed guilty of a felony and shall, upon conviction thereof, be fined not to exceed $10,000 or be imprisoned not more than 3 years in a Federal penitentiary, or both.

(b) No part of any amount allowed under this act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with claims hereunder, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating this provision shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

H. R. 7946

A bill for the relief of sufferers of casualty losses, and for other purposes

Be it enacted, etc., That section 23 (a) (1) of the Internal Revenue Code, title 26, United States Code, be amended by adding a new subparagraph numbered (D), to read as follows:

"(D) Casualty losses: All sums paid or incurred, not recoverable from insurance or otherwise, to restore property to its former condition of usefulness because of damage incurred by fire, storm, shipwreck, flood, or other casualty, or an equivalent amount if replaced with similar or like property of greater cost."

SEC. 2. Amend section 23 (e) of this title by rewriting subparagraph (3) to read as follows:

"(3) of property not connected with trade or business, if the loss arises from fires, storms, shipwreck, flood, or other casualty, or from theft, the deduction allowed under this section shall be the amount paid or incurred, not recoverable from insurance or otherwise, to restore the property to its former condition of usefulness, or an equivalent amount if replaced with similar or like property of greater cost. No loss shall be allowed as a deduction under this paragraph if at the time of the filing of the return such loss has been claimed as a deduction for estate tax purposes in the estate tax return."

SEC. 3. Amend section 122 (a) of this title to read as follows:

"(a) Definition of net operating loss: As used in this section, the term 'net operating loss' means the excess of the deductions allowed by this chapter and by section 23 (e) (3) over the gross income, with the exceptions, additions, and limitations as provided in subsection (d)."

H. R. 7947

A bill to provide that all gifts made to aid a disaster area shall be allowed as deductions for income tax purposes.

Be it enacted, etc., That section 23 of the Internal Revenue Code (relating to deductions from gross income) is hereby amended by adding at the end thereof the following new subsection:

"(gg) Contributions for disaster relief: Contributions or gifts payment of which (1) is made within the taxable year to or for the use of any organization exempt from income tax under section 101 (6), and (2) is conditioned upon its use exclusively for charitable purposes within an area stricken by a catastrophe which has been declared by the President to be a major disaster within the meaning of the Act entitled 'An Act to authorize Federal assistance to States and local governments in major disasters, and for other purposes', approved September 30, 1950, as amended (42 U. S. C., secs. 1855–1855g). Amounts deductible under this subsection for any taxable year shall not be treated (except for purposes of section 120) as contributions or gifts to which subsection (o) or (q) applies."

SEC. 2. Section 23 (q) (4) of the Internal Revenue Code (relating to deductions from gross income from charitable and other contributions by corporations) is hereby amended by adding after "computed without the benefits of this subsection" the following: "or subsection (gg)."

SEC. 3. The amendments made by this Act shall apply to taxable years ending after the date of enactment of this Act, but only in respect of contributions and gifts to be used for catastrophes occurring after December 31, 1952.

H. R. 7948

A bill authorizing the President to make permanent replacements of public facilities and public and private school buildings, damaged or destroyed in a major disaster, and for other purposes

Be it enacted, etc., That subsection (d) of section 3 of the act entitled "An Act to authorize Federal assistance to States and local governments in major disasters, and for other purposes," approved September 30, 1950, as amended (42 U. S. C. secs. 1855–1855g), is amended to read as follows:

"(d) by performing on public or private lands protective and other work essential to the preservation of life and property, clearing debris and wreckage on public or private lands, making emergency repairs to and temporary replacements of public facilities of local governments damaged or destroyed in such major disaster, making permanent repairs to and permanent replacement of public facilities of local governments, including public and private school buildings, damaged or destroyed in such major disaster, providing temporary housing and other emergency shelter for families who, as a result of such major disaster, require temporary housing or other emergency shelter, and making contributions to States and local governments for purposes stated in this subsection."

SEC. 2. The first sentence of section 8 of the act entitled "An act to authorize Federal assistance to States and local governments in major disasters, and for other purposes," approved September 30, 1950, as amended (42 U. S. C. secs 1855–1855g), is amended by striking out "a sum or sums, not exceeding $5 million in the aggregate,", and by inserting in lieu thereof the following: "such sums as may be necessary."

H. R. 7949

A bill to provide that the expense to an employer of repairing or rebuilding the home of an employee damaged or destroyed in a major disaster shall be considered a business expense for income-tax purposes

Be it enacted, etc., That section 23 (a) (1) of the Internal Revenue Code (relating to deductions for trade or business expenses) is hereby amended by adding at the end thereof the following new subparagraph:

"(D) Expenditures for replacing employees' homes: Amounts paid or incurred by an employer for ordinary and necessary repairs to residential property damaged by a catastrophe, or the replacement of residential property destroyed by a catastrophe to the extent that such replacement property does not exceed in value the property so destroyed, but only if (i) such catastrophe is determined to be a major disaster by the President for the purposes of the act entitled 'An act to authorize Federal assistance to States and local governments in major disasters, and for other purposes,' approved September 30, 1950, as amended (42 U. S. C., secs. 1855–1855g), shall be considered as ordinary and necessary expenses paid or incurred in carrying on any trade or business, (ii) such amounts are paid or incurred within 1 year after the date of the enactment of this subparagraph, or the date on which the President determines that such catastrophe is a major disaster, whichever is later, (iii) prior to such catastrophe

such property was owned by, and used as the principal residence of, an employee of such employer, (iv) such property is to be owned and so used by such employee subsequent to such repairing or replacing, and (v) the policy followed by such employer in repairing or replacing his employees' property does not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees."

SEC. 2. Section 22 (b) of the Internal Revenue Code (relating to exclusions from gross income) is amended by adding at the end thereof the following new paragraph:

"(17) Certain amounts received by employees: Amounts received by an employer which are treated as ordinary and necessary business expenses by reason of section 23 (a) (1) (D)."

SEC. 3. The amendments made by this act shall apply with respect to taxable years ending after the date of the enactment but only as to amounts paid or incurred after December 31, 1952.

H. R. 7950

A bill to appropriate funds for preliminary planning and for construction of necessary flood-control measures in Massachusetts

Be it enacted, etc., That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for expenditure by the Chief of Engineers under the supervision of the Secretary of the Army, for the prosecution of river and harbor, flood control, and related projects authorized by law, and for detailed studies, and plans and specifications, of projects authorized by law, to remain available until expended:

COSTRUCTION OF FLOOD-CONTROL MEASURES

In the Connecticut River Basin, $300,000 for Barre Falls Dam.

In the Thames River Basin, $100,000 for Buffumville Dam.

PLANNING OF FLOOD CONTROL AND LOCAL PROTECTION WORKS, SURVEYS AND RESURVEYS

In the Connecticut River Basin, $50,000 for a resurvey of the Quaboag River to Palmer, Mass.

In the Thames River Basin, $140,000 for planning of Hodges Village Dam; $140,000 for planning of East Brimfield Dam; $100,000 for planning of Westville Dam.

In the Blackstone River Basin, $60,000 for planning of the Worcester Diversion Tunnel; $100,000 for planning of West Hill Dam; and $60,000 for planning in the Blackstone River Basin.

In the Merrimac River Basin, $50,000 for planning of local protection works at Fitchburg and Leominster, Mass., and for a new survey of the Nashua River; $50,000 for planning of local protection works at North Andover and Lawrence, Mass., and for a new survey of the Merrimac and Shawsheen Rivers; $50,000 for planning of local protection works at Haverhill, Mass., and for a new survey of the Merrimac and Little Rivers; and $50,000 for planning of local protection works at Lowell, Mass., and for a new survey of the Merrimac River.

H. R. 7951

A bill to create a Federal Disaster Research Commission to offer adequate protection for the Nation against hurricanes, floods, tornadoes, and other meteorological disasters through an accelerated program of research and development

Be it enacted, etc., That there is hereby created a Federal Disaster Research Commission, hereinafter referred to as the Commission, to be composed of the Chief of the United States Weather Bureau, the Secretary of Defense, the Director of Defense Mobilization, the Administrator of Civil Defense, the Director of the Office of Scientific Research and Development, the Chairman of the Federal Communications Commission, the president of the American Red Cross, the Chairman of the National Science Foundation and the president of the American Meteorological Society, to direct and supervise, under such regulations as it may adopt, a program of research to provide maximum possible protection for the Nation against hurricanes, floods, tornadoes, and other meterological and natural disasters.

SEC. 2. (a) The Commission shall institute an immediate program of basic research involving the determination of all the physical attributes of hurricanes and tornadoes, their behavior, development of scientific theories and their proof, and the collection and use of data already obtained by various Federal agencies.

(b) The Commission further shall institute a program of applied and development research to provide methods of forecasting, detection, and tracking of tornadoes and hurricanes.

(c) The Commission shall study the development and utilization of an effective, early warning system to function in the case of hurricanes, tornadoes, or any type of situation with disastrous possibilities. The Commission shall further study the feasibility of integrating such warning systems into existing national and civil defense warning networks to forecast approaching atomic air attack.

SEC. 3. The said Commission shall have an executive director, who shall be selected by the Commission. The Executive Director of the Commission shall receive compensation at the rate of $20,000 per annum and shall be a recognized meteorological authority.

SEC. 4. The Executive Director of the Commission is authorized to requisition from existing Federal agencies, on behalf of the Commission, and to assign such professional and clerical staffs as may be deemed necessary and practicable.

SEC. 5. For the implementation of this act, there is hereby authorized to be appropriated the sum of not more than $5 million.

GRANTS TO STATES FOR FLUSHING OF MINE VOIDS

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Speaker, I introduced in the House on January 3 a bill authorizing the Federal Government to make grants to States to assist them in planning and carrying out State programs for the flushing of mine voids underlying residential and business areas to protect the public from detriment and danger to its health and safety. Such grants are to be made only on the basis of State plans submitted by the States and approved by the Secretary of the Interior. The Secretary of the Interior is to prescribe the matters which shall be required to be set forth in the plan of the respective State, including requirements for the expenditure of $1 of the funds of the State for each dollar of Federal funds granted under this act.

The act is titled "To provide Federal assistance to States to augment their efforts to prevent surface damage resulting from mine cave-ins."

My bill does not provide any specific sum because of the fact that this is a national legislation and the sums vary from State to State, depending upon the requirements and conditions of the respective State. The immediate object of my bill, however, is to authorize the Federal Government to match the $5 million provided in legislation of a like nature, which is currently in the Appropriations Committee of the Pennsylvania State House.

It is the considered judgment of the best mine authorities acquainted particularly with the circumstances of the anthracite fields that a program for the flushing of existing mine voids is the most practical and effective method of surface protection.

Obviously, such a program would of necessity be continued over a period of years, and will call for the expenditure of considerable sums of money by both the State and Federal Governments. I have not been able to obtain from the mining authorities either State or Federal, an exact projection of the number of years or the amount of dollars such a program will demand. It must be kept in mind, of course, that the initial target of such a project will be the flushing of existing mine voids. The problems of the surface subsidence in the hard coal area resulting from present and future mining must of necessity be considered in separate legislation. Naturally, this jurisdiction will rest almost exclusively under the authority of the Pennsylvania State Legislature since this is a matter of regulations of the mining industry within the Commonwealth of Pennsylvania. In this regard, I am preparing a bill to provide for the control of coal mine cave-ins to prevent damage to property and danger to the public health and safety.

Insofar as the Federal Government may have jurisdiction this bill will provide for surveys, investigations, and research relating to the causes and extent of coal mine cave-ins which cause damage to residential and business property overlying such mines and endanger the public health and safety.

SPECIAL ORDERS GRANTED

Mr. LANHAM asked and was given permission to address the House for 40 minutes today, following the legislative program and any special orders heretofore entered.

Mr. BROWN of Georgia (at the request of Mr. LANHAM) asked and was given permission to address the House for 10 minutes today, following the legislative program and any special orders heretofore entered.

FLEXIBLE IMPORT QUOTAS

Mr. LANHAM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LANHAM. Mr. Speaker, I have introduced a bill that would authorize

the use of flexible import quotas by the United States under carefully prescribed conditions laid down in the bill.

It may seem strange that legislation should be necessary to authorize action that under the Constitution is clearly among the enumerated powers of the Congress.

Unfortunately, under the trade agreements program the regulation of our foreign commerce has gravitated more and more into the hands of the executive branch of the Government, more particularly the Department of State.

So far has this exercise of power been taken from the hands of Congress that we now find ourselves in the position of having renounced the use of import quotas in the General Agreement on Tariffs and Trade, known as GATT, negotiated by the State Department under a presumed delegation of power. Obviously, Congress cannot renounce its responsibility in this way and certainly the Department of State cannot deprive us in this roundabout or any other way of our legislative authority.

It is proposed even now that Congress ratify the OTC—Organization for Trade Cooperation—by approval of United States membership in that international trade body. This would put the approval by Congress on the surrender of its own constitutional authority and responsibility.

It is also necessary to point out that this proposed quota legislation has become essential for the proper protection of American industry and agriculture because the remedy against serious injury provided under the escape clause of the Trade Agreements Act has been all but nullified by the Executive veto, on advice of the State Department. The record is clear. Less than 10 percent of the cases brought before the Tariff Commission have been afforded relief.

I should remind the Members of this body that such import quotas as we now have under section 22 of the Agricultural Adjustment Act, such as those on wheat, wheat flour, raw cotton, peanuts, dairy products, and so forth, have been held by GATT to be in conflict with its general ban on quotas and do not fit its exceptions. These exceptions are tailormade to fit other countries, not us.

While GATT has graciously waived action to obtain compliance from us we have promised to eliminate all existing quotas as soon as possible. Our agricultural quotas will be reviewed once a year by GATT as a reminder that we are pledged to eliminate them.

Congress, which has the duty of regulating our foreign commerce, is not consulted in these matters. Quotas on industrial products, such as textiles, glassware, tuna, bicycles, watches, and so forth, are outlawed so far as the United States is concerned, by GATT. The one exception is the escape clause. That route is too long and in any case, as I have already said, has been all but closed by Executive action.

The quota bill that I have introduced would reassert the power of Congress to legislate its will in this field of its undoubted authority.

The bill itself is moderate. Except where an unreasonably large share of the market had already fallen to imports, the volume of foreign sales here would not be cut back. Imports would be assured a fair share of the domestic market but domestic producers would be relieved by quotas of the fear and uncertainty that comes from untrammeled import competition, which as certainly ruins the market for imports themselves as for our own producers.

Flexibility is built into the proposed system by providing a percentage participation in the domestic market by imports and by other special provisions designed to prevent a freezing of a particular import pattern.

Finally the bill would accord more favorable treatment to imports from the higher-wage-standard areas of the world than to low-wage-standard areas and thus provide some incentive to raise such standards.

It is my firm conviction that the quotas authorized in the bill for establishment by the Tariff Commission after hearings afford a sounder and more effective protection of the domestic producer under many existing circumstances than the tariff and yet offer other countries a more liberal participation in our market.

ADJOURNMENT TO MONDAY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

SPECIAL ORDER GRANTED

Mr. RIVERS. Mr. Speaker, I ask unanimous consent that today, following the legislative program and any special orders heretofore entered, I may address the House for 20 minutes and include as part of my remarks an article that is estimated by the Public Printer to cost $240.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

COMMITTEE ON BANKING AND CURRENCY

Mr. SPENCE. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency may have until midnight Friday to file a report on H. R. 7871.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. SPENCE. Mr. Speaker, I ask unanimous consent that H. R. 7541 be laid on the table. A similar Senate bill has passed.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

OUR NATIONAL PARKS DESERVE INCREASED ATTENTION

Mr. BENNETT of Florida. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BENNETT of Florida. Mr. Speaker, one item mentioned in the President's message which is of special interest to me is his reference to the need for more and better facilities in the National Park System, in view of the increasing interest of the people in the great outdoors. Action with respect to this matter is overdue. Citizens have voiced their concern over inadequate and obsolete facilities and increasingly crowded conditions in the parks, both through the press and by letters to their congressional representatives.

Everyone interested in the conservation and proper use of the Nation's assets in scenic and historic spots should be concerned. Those areas comprising the National Park System were the objective of 50 million visits last year. It is estimated that this will increase to 80 million visits within a decade. Healthful and proper use of leisure time is a national necessity. Our parks play a starring role in providing this.

I have learned that the National Park Service has had an intensive study made of the needs for adequate provision for this present and expected visitation, and of the related conservation measures to protect the areas unspoiled for the enjoyment and inspiration of future America. A program known as Mission 66 has resulted from that study. When it is submitted to the Congress it will certainly meet with wide acceptance throughout the entire country. I am glad to lend my full support to this program.

SPECIAL ORDER GRANTED

Mr. CHRISTOPHER asked and was given permission to address the House for 40 minutes on Thursday next, following the legislative program and any special orders heretofore entered.

THE FARM PROGRAM

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. ABERNETHY. Mr. Speaker, yesterday was black Wednesday for the farmers of America.

For this was the day that Secretary of Agriculture Ezra Taft Benson took steps to deliver the future and the fortunes of the farmers of America to the whims and the fates of Republican Party politics.

In a haze of deep secrecy he called only the Republican Congressmen of the House Agriculture Committee around

him to disrobe his farm program and expose it for scrutiny and appraisal of political expedience before he let the Democratic majority members of the committee, the farmers and all the people know what it was all about.

Mr. Speaker, we hear that the so-called farm program will see the light of day for the first time on next Monday, in a special message to this Congress.

I want to say here that I regret deeply, in view of the suffering of our farmers, that anything Mr. Benson submits must now appear here in the gaudy garb of partisan politics.

I want to say to my colleagues that the House Committee on Agriculture, of which I have the honor of membership, has sought strenuously to make the farmers' pressing problems the concern of the whole Nation and not merely a pawn in the fortunes of a political party.

Our chairman, Hon. HAROLD D. COOLEY, of North Carolina, telegraphed Mr. Benson early last fall advising him that, because of the threatened disaster in agriculture, he was prepared to call the Committee on Agriculture into session immediately, although Congress then was in recess, to consider any suggestions the Secretary might have to stop a headlong collapse of farm prices. The reply our chairman received shocked all of us who have an interest in the farmers' welfare. He flippantly cast the suggestion aside and told our chairman he would have nothing until 1956.

Now, Mr. Speaker, we all know that this so-called new program, conceived in secrecy and now being birthed in partisan politics—whatever form it takes, it will be Mr. Benson's unwanted child.

Mr. Benson wants little, if any, more than the flexible, or lowered, price-support mechanism to remedy the troubles of the farmers of America. Our committee was formally informed of this in February of 1955, although it was then evident that the flexible program was a complete failure and that it was actually pushing farmers to the brink of disaster. I want to quote to you from the hearings of our committee of February 18, 1955, in which I interrogated Mr. True Morse, who is Under Secretary and Mr. Benson's principal officer in the Department of Agriculture. This is from the record:

Mr. ABERNETHY. You stated a moment ago that you did not have any material recommendations to make now and you would not have during this Congress which materially change the basic price support law. That is the way I understood your answer.

Mr. MORSE. As of now.

Mr. ABERNETHY. As of now?

Mr. MORSE. Yes.

Mr. ABERNETHY. In other words for the last 2 years or more you have been working on this problem, the freeing of agriculture, and 100 percent of parity at the marketplace. And so we can now assume, in view of his answers and the fact that you have nothing else, no recommendations to make, after more than 2 years, we can now assume that we now have a program which the administration feels is a program which frees agriculture and which gives them 100 percent of parity at the marketplace—we have it now?

Mr. MORSE. We have the program passed by the Congress, the 1954 act, and other legislation we recommended, and into which Congress injected its judgment, of course. As the President said in his state of the Union message, "We are headed in the right direction now."

* * * * *

Mr. ABERNETHY. Will you answer this question: American farmers were promised by this administration that they would be "freed" and get 100 percent parity in the market place. Do we now have the program to get that? That certainly ought to be answered either "yes" or "no," and you might be able to say that we will get it later. If we haven't got it, when will we get it?

Mr. MORSE. The 1954 act (the act supplanting the firm 90-percent supports by flexible or lower supports), if allowed to go into effect and operate as we believe——

Mr. ABERNETHY. Will get it?

Mr. MORSE. Will largely accomplish that.

* * * * *

Mr. ABERNETHY. What do you intend to bring up then during this Congress after 2 years of study to free agriculture and give us 100 percent of parity at the market place?

Mr. MORSE. With the action which Congress took last year, except for refinements—as of now, we are not here with what you might term major legislation.

Now, Mr. Speaker, things have changed since February in 1955. Mr. Benson still sticks by the flexible sliding scale low-price farm program. It is discredited among the farmers of America but it is still Mr. Benson's chosen child. That which is now being put together, whatever it may be, is his also, but he does not want full responsibility for it. Thus, on yesterday, he had its political pulse tested, gave it a political burp and on Monday he will put it on the political doorsteps of Congress.

In all seriousness, Mr. Speaker, this will be a child of political expedience. The whole Nation must be aware of this. We deeply regret what we have seen. But I want to end here by pledging the farmers of America that if there is any merit in it our Committee on Agriculture will sift it out. I pray, however, we may find a better means of serving agriculture than through a program written to get votes for those who already, on notable occasions have disdained and condemned purposes and methods they are now about to advocate.

AMERICAN MERCHANT MARINE

Mr. BONNER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. BONNER. Mr. Speaker, during the 1st session of the 84th Congress, the Committee on Merchant Marine and Fisheries, of which I have the honor to serve as chairman, undertook the study of problems in many phases of the American merchant marine. Some of the matters into which we inquired were extremely complex and presented issues which will not easily be resolved. It will be our purpose in the present session, however, to delve deeper into these difficult situations with the hope that before this Congress adjourns some real evident progress will be made toward the establishment of a strong and vigorous merchant marine—the kind envisioned by the Merchant Marine Act of 1936 and the only kind this historically maritime Nation of ours deserves.

But my remarks today are principally directed to one particular aspect of the merchant marine problem—that having to do with the 50–50 legislation. As you know, there was enacted by the 83d Congress Public Law 664, which provides, among other things, that at least 50 percent of all cargoes given away or sold for foreign currencies must be transported overseas on privately owned United States-flag vessels, provided such vessels are available at fair and reasonable rates. This was not new legislation, actually, since it merely enacted into permanent law provisions of similar nature which had theretofore appeared in numerous appropriation and mutual aid statutes and which had become recognized by the Congress as the national shipping policy of the United States Government.

Shortly after the opening of the 84th Congress certain press stories appeared alleging that the administration's program for selling farm surpluses abroad were—to quote them—"running into a bottleneck" because of the 50–50 law.

The specific charge was that a lack of American bottoms was delaying the shipments.

In view of the fact that Public Law 664 was reported to this body by the Merchant Marine Committee after careful and thorough consideration and particularly in view of the obligations imposed upon our committee by section 136 of the Legislation Reorganization Act of 1946, hearings were immediately called to inquire into the substance of these press stories and allegations and into all other phases of the administration of the law by the agencies concerned. Deficiencies of administration were found and pointed out in the committee's report, all with recommendations designed to improve operations under the statute. But one thing was abundantly clear—there was not developed one scintilla of evidence to support the charge that shipments abroad were being, or in fact could ever be, delayed or impeded by the lack of American-flag privately owned vessels. The law itself took care of that by authorizing shipments without regard to the 50-percent limitation whenever American-flag vessels were not available at fair and reasonable rates.

I believe this prompt and effective action by our committee has forever set to rest the particular line of allegations with which we dealt at that time. But, as anyone close to the merchant marine picture knows, the rumors and invectives have not stopped. The principal source seems to be certain foreign maritime nations who contend that they should have the right to carry in their own ships not 50 percent of these Government aid cargoes, but 100 percent. That position strikes me as utterly lacking in logic and so obviously prompted by greed and selfishness as not to warrant serious concern by any of us.

However, there is another source of contention with this law which does give me concern—and I might add—serious concern. I refer to certain agricultural groups and interest.

As you know, I represent a district in North Carolina where the welfare of a great majority of my constituents is integrally tied to farming. My friends and neighbors are farmers. In fact, one of my dearest friends here in Congress is the chairman of the Committee on Agriculture, HAROLD D. COOLEY, who likewise represents a farming district of North Carolina.

Some of these people have been told that the program for the disposal of surplus farm products to the needy countries of the world can never be successful so long as the 50–50 law remains applicable to it. Now, while I am personally devoted to the principle that our country must have a strong merchant marine, both from the standpoint of national defense and from the standpoint of a sound industrial economy, I am likewise devoted both by heritage and by what I conceive to be the obligations of my office to the welfare of the American farmer. I do not intend to permit any legislation or administrative action over which I have the slightest degree of responsibility or control to stand in the way of the farming interests of this country.

I fully realize the great importance of the 50–50 legislation to the American merchant marine. But I wish to state here and now that within the next few weeks I intend to schedule hearings before the Merchant Marine Committee to which I will invite representatives of all groups involved with this problem. The purpose of these hearings will be to explore fully the overall effect of the 50–50 law and its administration upon the national economy with particular reference to the American farmer. I realize that some may hesitate to express opposition to the law before the Merchant Marine Committee, but I promise every witness a full and fair opportunity to present his views regardless of what they may be. I myself will be the first to propose some alternative method of assisting the American merchant marine if the facts warrant the conclusion that the provision of Public Law 664 are inimical to the interests of the American farmer and the American public.

DISASTER AND INDUSTRIAL RELIEF IN NEW ENGLAND

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, as our beloved President's message was read, I am sure that every Member of the House felt as I did, that we shared a rejoicing that he has returned to health. His message was very fine and promises assistance for everyone—and, Mr. Speaker, we must make sure that his recommendations are carried out.

Mr. Speaker, since the President's illness, I believe that his recommendations insofar as help for disaster areas is concerned and in the distribution of orders for our national defense have not been carried out. Our arsenals are being scrapped because they are being reduced to the point where there will be almost no production at all in a short time. Massachusetts has been discriminated against in arsenal production at Watertown and Springfield. Legislation passed by the Congress has been disregarded as contracts have been awarded to certain companies that might have been given to the arsenals and provided work for our highest skilled defense employees. If these skills are lost, it will be tragic for us in an emergency. That has proved desperately true in the past, I need not remind the House. I want to speak also of the humanitarian side of this problem—the suffering caused by the displacement of workers and their families, many of them of long standing and most highly skilled. Watertown production has not been equaled anywhere else, and its research work has been outstanding. I am supremely proud and grateful to have it in my congressional district.

There is another distressing matter that has come to my attention—the following letter from General Hauck speaks for itself. The Congress saw fit to appropriate funds to keep the Murphy General Hospital in operation for the benefit of the servicemen and women. Now, apparently, the War Department wants to close it. It must be prevented if possible. It is base ingratitude.

The letter follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE
SECRETARY OF THE ARMY,
Washington, D. C., January 4, 1956.

Hon. EDITH NOURSE ROGERS,
House of Representatives.

DEAR MRS. ROGERS: This is to inform you of the Department of the Army's plans for the future utilization of Murphy Army Hospital at Waltham, Mass.

The Department of the Army plans to request that the Congress, early in this session, modify title III of the Appropriation Act of 1956 to permit the discontinuance of the operation of the Murphy Army Hospital and effect the utilization of the installation for other than medical purposes as outlined in the attached information sheet.

Your interest in this installation is appreciated and I trust this plan meets with your approval.

Sincerely,

C. J. HAUCK, Jr.,
Brigadier General,
GS Chief of Legislative Liaison.

[Enclosure.]

Murphy Army Hospital is now being operated in accordance with the provisions of Public Law 157, 84th Congress which requires the operation of the installation during fiscal year 1956. In addition, the Department of the Air Force is utilizing 50,000 square feet of space at the installation as offices for approximately 300 contractor personnel engaged in electronic research activities.

In response to the request contained in the Senate Committee Appropriations Report No. 545, the Department of the Army has restudied the requirements for Murphy Army Hospital. This study has determined that the Army, Navy, Air Force, the Veterans' Administration, and the Public Health Service do not have a requirement for the installation as a medical facility.

The Department of the Army does have a requirement for approximately half of the installation for use as the offices of the New England Division, Corps of Engineers, which are now located at 857 Commonwealth Avenue, Boston, Mass. The space now occupied by the New England Division is under a General Services Administration lease which expires on March 23, 1956. The owner of the property, Boston University, has informed the General Services Administration that the university requires the property for its own use and will not renew the lease. The Murphy Army Hospital contains a gross usable area of 270,000 square feet and can accommodate the New England Division which requires approximately 135,000 square feet of space. The Department of the Air Force will have a requirement for an additional 85,000 square feet of space commencing on or about June 1, 1956, and continuing for approximately a 2-year period to support an electronic training program.

The Department of the Army considers that the proposal outlined above will fully utilize the facilities at the Murphy Army Hospital and also will be of some economic benefit to the local civilian community in that the proposed utilization would involve approximately 1,400 military and civilian personnel compared to approximately 680 personnel now at the hospital.

TAX RELIEF AT HOME OR TAX RELIEF ABROAD

Mr. MASON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MASON. Mr. Speaker, tax relief at home or tax relief abroad is the choice facing this Congress today. It is not—as many of our leaders would have us believe—a choice between a balanced budget and tax relief. A balanced budget has already been achieved. A balanced budget was assured when we revised the Federal Tax Code to provide a favorable tax climate for American business and American industry so they might grow and expand. As a result of the expansion and growth that has already taken place, we now have achieved the greatest national productive capacity, the greatest number of jobs available, the greatest amount of take-home pay for American workers, and the most productive tax base that this Nation has ever experienced. Not even during wartime have we reached the peak of prosperity we now enjoy. As a result of all this the Federal Treasury collected almost $2 billion more than our budget makers anticipated at the beginning of this year. So a balanced budget has already been achieved.

On the other hand, during the past 7 years the Congress has given away in foreign aid of one kind or another a little more than $40 billion, and Uncle Sam has gone in the red during those 7 years some $40 billion, almost exactly the same amount that we have given away in foreign aid. If it had not been for our foreign-aid program we would have had a balanced budget every year during the past 7 years.

Mr. Speaker, today most European countries have balanced budgets. England, France, and Western Germany have balanced budgets. Today our European neighbors produce more goods of

every kind than they ever produced in prewar days. They do this largely because of the rebuilt factories and the modern American machinery we have furnished them at the expense of the American taxpayer.

Today Europe also has a $14 billion favorable balance of trade, a greater dollar balance to buy American goods with than Europe has ever had at any one time in her entire history. The Secretary of State, Mr. Dulles, under questioning before the Ways and Means Committee, acknowledged this fact. Yet we continue to pour out foreign aid—American taxpayers' dollars—to further bolster the economy of European nations. Every dollar of foreign aid we provide, whether economic aid or military aid, is a dollar less for the European taxpayer to pay. Is it not about time for the European taxpayer to stand upon his own feet and provide for his own needs? Is it not about time for this Congress to think more about the American taxpayer and less about the foreign taxpayer? Is this foreign-aid program to be like Tennyson's brook, "to run on forever"?

Mr. Speaker, American foreign aid today is being used to balance European budgets and to reduce European national debts; while Uncle Sam's budget has been kept unbalanced, and Uncle Sam's debt has kept on increasing. Does this make sense? Foreign aid today is a failure and a fraud. It should be cut off entirely. Today we have $10 billion appropriated for foreign aid, most of which is unspent and unobligated. This amount will provide for 2 more years of foreign aid. Why appropriate $1 more for such a program? It is time to give our American taxpayers a break.

TAX RELIEF

Mr. FINO. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FINO. Mr. Speaker, one of the most important issues confronting the 84th Congress at this time is the question of tax relief for the American taxpayer.

One school of thought proposes that tax cuts be deferred until we have achieved a balanced budget.

Another group suggests that we cut the cost of Government operation and pass on the savings to the taxpayers.

Still another group would want to reduce the national debt before we cut taxes. I am sure that these groups are sincere in their proposals and have the best interests of the people of this country at heart.

But why can we not accomplish all three objectives—why can we not balance our budget—start liquidating our national debt—and at the same time give tax relief to our people?

For the past 3 years I have urged this Congress to set up a national lottery which would conservatively bring in $10 billion a year in revenue. This added revenue can well accomplish our goal—a tax cut for all, a balanced budget, and a part payment in reducing our national debt.

The New York Daily News, in an editorial in the issue of Monday, January 2, 1956, supports my position. I hope and trust that every Member of Congress will take time to read it and realize that hypocrisy is cheating our people and Government of a tremendous revenue.

The said editorial follows:

How Advanced Are We?

Most Americans pride themselves on being citizens of the world's most advanced nation—more automobiles, telephones, and television sets than any other country has, more soap and detergents used per person per year, higher literacy percentages, religious and cultural activities flourishing, and all the rest of it.

Far be it from us to snoot any of these achievements and signs of progress, or to deny that the United States is the greatest, finest, and most livable country in today's world.

However, there is at least one field in which we are a backward people, and a hidebound people.

The United Press the other day took a look around the civilized world, and came up with the following findings:

On the sunny side of the Iron Curtain, the great majority of governments either operate or permit lotteries, allow gambling in virtually all forms, and get millions yearly from taxes on these activities.

About 10 million Britons each week sink small sums in the football pools. A few citizens win; but the British Government always wins, to the tune of about $47 million a year in taxes on the pools.

Of government lotteries, Ireland's Hospital Sweepstakes is the best known. But it is far from the only one. France, Denmark, Japan, Sweden, and even our organized dependency of Puerto Rico have them. Gambling is permitted and fairly taxed in the Philippines, Holland, Hong Kong, Austria, and Switzerland. In Italy, you can buy a chance to win a top prize of $320,000 in a football pool.

When the UP's reportorial spotlight swung around to the United States it lit up two facts which, when you put them together, spell hardship with a capital H for the American taxpayer.

Lot of Betting; Little Revenue

Fact 1: The American people by and large are the most enthusiastic and open-handed bettors in the world. Most of them will bet on virtually anything. For example, the total parimutuel turnover at United States racetracks in 1955 was $2,066,302,588, while harness racing accounted for an additional $476,728,009.

Fact 2: With the exception of horse racing, dog racing, and bingo games in some States, the American fondness for gambling is not hooked into the revenue-raising systems of government (save in Nevada, which is wide open as regards gambling). On the huge 1955 track turnover mentioned above, governments got only $178,015,822. Of this, the Federal Government got not a red cent.

How big is the total gambling turnover per year in this country? Well an authority on gambling in all forms has estimated the turnover at approximately $30 billion, or more than we spend on education, religion, medicine or automobiles.

This authority is Representative Paul A. Fino, Republican, New York, who for some years has been trying to induce Congress to set up a national lottery.

Painless Taxation

Such a lottery would be operated by the Government, under rules designed, and by citizens picked with a view to keeping racketeers from moving in on it. Tickets would be cheap, drawings frequent, prizes numerous; and the Government would take an appropriate cut from the proceeds.

How much revenue would be raised is a matter for educated guessing. Mr. Fino's guess, based on his education in other countries' gambling revenues and the annual gambling turnover in the United States, is that an American lottery could conservatively be expected to get up $10 billion a year in revenue, after prizes and overhead.

Such a lottery would have other virtues. It would in effect be painless taxation, with the revenues taking the place of some of the extremely painful taxes all of us now pay. It should freeze a lot of criminals out of the gambling industry, just as repeal of prohibition froze a lot of rascals out of the liquor business. And it should keep at home the estimated $4 to $6 billion a year which now goes into foreign lotteries.

Really, isn't it about time for the United States to get progressive in this matter of making gambling yield the revenues it should? Isn't it time for us to catch up with Britain, Ireland, Japan, France, and Puerto Rico?

PRESIDENT ENDORSES PRINCIPLES OF THE SOIL BANK OF FERTILITY

Mr. CARL H. ANDERSEN. Mr. Speaker, I ask unanimous consent to extend my remarks in the body of the Record and to include a letter to the Secretary of Agriculture, Mr. Benson, relative to the soil bank of fertility.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. H. CARL ANDERSEN. Mr. Speaker, the references made by President Dwight D. Eisenhower in his message today to the need for a soil bank program has brought new hope to the 22 million people living on our farms throughout the land. As the Congress takes action on this recommendation, and I have every confidence that it will approve the basic principles of the proposal, it will in my judgment do much for the benefit of American agriculture and our rural business communities. The enactment of authority for a soil bank of fertility program will provide the means for our farmers, in concert with their Government, to bring supplies and market demands into a reasonable balance and at the same time conserve our most precious asset—the soil itself—and pass on to future generations a better land than they found.

If I had learned nothing else in almost 18 years as a Member of the House, I have learned this day that faith in an idea and perseverance in its advancement can eventually produce the desired results if the cause is just and the legislative proposal is sound in principle. Today, the acceptance by the President of my proposal is very gratifying to me.

A brief recitation of the history of the Andersen soil bank of fertility idea may well be worth the time of some of our newer colleagues, as it offers the best reason I know why a Member of Congress should stay with an idea he believes in, despite the seemingly insurmountable obstacles in its way.

I stood virtually alone just a few years ago in the advocacy of what I termed a "soil bank of fertility," and now we see

it endorsed in principle by the great farm organizations, thousands of farmers, our distinguished colleagues on both sides of the Capitol, and now today by the President of the United States.

For many years it had seemed obvious to me that the most significant need in agriculture was a way or a means to keep production on our 5 million farms in reasonable balance with market demands. If our farmers were to receive a fair return for their investments, labor, and technological know-how, they must somehow be protected from the merciless fluctuations of a market over which they exercise no control.

American industry has long followed the practice of maintaining careful balances between supply and demand for manufactured goods. If a factory finds its supply lines choking up with consumer goods, it simply closes down an assembly line or even a whole plant until the balance is restored. But it is one thing to close down an assembly line for a few days, and another to close down a field of corn, a litter of pigs, or a part of a dairy. Farming is on an annual basis at the very least.

After several years of patient but sometimes discouraging effort to gain acceptance of what I termed in the beginning a soil bank of fertility, I finally saw a quickening of interest just this past year on the part of farm organizations, conservationists, sportsmen, and others interested in American agriculture and conservation of our soil and water resources. After a statement last fall that he had "an open mind on the subject," I sent the following letter to Secretary of Agriculture Benson on September 17, 1955:

CONGRESS OF THE UNITED STATES,
Washington, D. C., September 17, 1955.

Hon. EZRA BENSON,
Secretary of Agriculture,
Washington, D. C.

DEAR MR. SECRETARY: For a number of years it has seemed obvious to me that a program of price supports and acreage allotments would not by itself meet entirely the farm-price problems facing us in American agriculture since the close of World War II.

I have consistently maintained the conviction that price supports on basic, storable commodities should be held at 90 percent of parity. I have also consistently agreed that surpluses of some commodities would undoubtedly result from either firm or flexible supports. As a matter of fact, I have often said that reducing the support level would result in greater rather than lesser surpluses. Farmers are simply forced to produce more at lower prices so as to meet uncontrolled living and operating expenses. Recent experience has confirmed this and many former advocates of your program of flexible price supports now admit that fact.

I have not been persuaded by advocates of flexible price supports to believe that reducing farm prices would effect comparable price reductions at the consumer level and thus act as a stimulant to consumption. Again, recent experience has confirmed my judgment. Although farm prices have fallen to 84 percent of parity, we have seen no appreciable reduction in prices of foods to consumers. From this we are led to the conclusion that reducing farm prices to any level, even to a level representing disastrous ruination for many farmers, would not necessarily benefit consumers nor reduce surpluses.

In recognition of the direct relationship between production and conservation, and the impact each has upon the other, I have in recent years advanced the proposal that certain acreages now in production of commodities surplus to our domestic and foreign market needs be diverted to what I have termed a "bank of fertility." My general premise advanced then was that if our agricultural plant produced more than needed we should temporarily, and on a voluntary basis, retire into a "bank of fertility" these unneeded acres. It is my thought that by the application of conservation practices to land so diverted we would at the same time meet a vital need for greater conservation of soil and water resources. My proposal thus helps to solve two basic problems facing agriculture.

Since you have been Secretary of Agriculture, I have discussed this plan with you on at least two occasions. On January 28, 1954, when you appeared before my committee in connection with your request for appropriations, I outlined this plan to you. May I recall the following excerpt taken from my comments, pages 23–24 of the official report of those hearings: "Let us take the unnecessary acres out of production if we produce too much, but let us not, on the other hand, do anything that will destroy the prices of what we produce. * * * What is wrong with cutting down production and giving an incentive to the farmers to keep the acres out of production, and at the same time placing these acres into soil-conserving banks, so to speak? * * * Why not, instead of paying storage charges on something we do not need, prevent the production of this surplus and beyond everything else, make our soil more valuable for the future?"

Having also discussed this plan with many farmers, farm leaders, other Members of Congress, etc., and received a favorable response, on February 2, 1954, I introduced H. R. 7663 to authorize such a program. The 83d Congress having taken no action on my bill, it was reintroduced in the 84th Congress (H. R. 2370). It is now before the House Committee on Agriculture and the same basic principles contained in that bill are the subject of this letter to you today.

The members of that committee are familiar with the principles of my plan. On May 10, 1955, I appeared before that committee to outline, in some detail, what I had proposed. My testimony said, in part: "I propose that the Government lease from the farmers of our Nation on a voluntary basis approximately 30 million acres of land for such time as it is necessary to meet this problem. I propose, Mr. Chairman, that this land under lease be placed in a soil-fertility bank, and estimate that in order to achieve the required reduction in farm acreage, it will be necessary to pay the individual farmer approximately $10 on an average per acre per year for the rent of his land. By not producing wheat, corn, and cotton we do not need, and by making that 30 million acres of farm land more valuable to future generations, the price-support program, in my opinion, would not be a burden."

Although in the beginning I stood virtually alone in advancing the basic principles of the bank of fertility, this past year I have gained the interest and support of Members of Congress, farm organizations, conservationists, farmers and sportsmen. Although different groups and individuals have developed their own plans or proposals on this subject, I am happy to note that while they understandably differ in some details, they all embody the fundamental principles of my plan; and that is to retire unneeded acreage into a bank of fertility.

In the best interests not only of American agriculture but of all of our people I urgently request your careful reconsideration of my plan with the thought in mind that it be incorporated in the over-all farm program at the earliest possible date.

Unless the severe decline in farm prices is reversed and the accumulation of unneeded commodities reduced, we are faced with serious consequences not only in our farm economy but, in my judgment, in the national economy. Your announcement of the acceptance of the basic principles of this plan as a cornerstone for your announced attack upon the economic ills of agriculture would, in my opinion, bring great hope and encouragement to the farm community. I firmly believe the enactment of legislation to divert unneeded acreage on a voluntary basis from production to conservation will do more than anything else now proposed to solve the problems immediately before us. You will remember that I have suggested that an average rental of at least $10 per acre, based upon the local lease rates, would on a voluntary basis bring millions of acres of cropland into the bank of fertility. The overall cost would scarcely equal the storage charges of today.

I understand that this proposal will be considered by your Agricultural Advisory Committee at its forthcoming meeting. I hope that you will acquaint them with my position as well as the growing tide of support for this plan. Moreover, I hope that you will wholeheartedly support my plan in its basic principles.

American farmers are of one voice in their demand for a more proportionate share of our booming economy. They may differ individually and collectively as to the detailed means of accomplishing this, but please make no mistake about it—they know that they are on the bottom rung of the economic ladder and they insist on moving up. This, I am sure we are agreed, they cannot accomplish by themselves under the present program.

Your statement of yesterday that you have an open mind on this bank of fertility proposal has encouraged me to write you this letter. As this subject is a matter of national interest, I am making this letter public.

Sincerely,

H. CARL ANDERSEN,
Member of Congress.

In recent months, there has been a rising tide of popular support for the soil bank idea, culminating in the President's message today.

It is not, or should not be, necessary for me to remind anyone of the difficulties our farmers are facing in a falling commodity price market. It is generally agreed that their present problem of high production costs and low commodity prices may be attributed primarily to two things over which they had no control. First, the tremendous and patriotic productive effort of our farmers in World War II and the Korean conflict created a temporary margin of production above consumption which has piled up some stocks and depressed the markets. Second, our otherwise booming national economy has resulted in the labor, equipment, and other production costs going up at the same time gross farm return has gone down. The resulting price-cost squeeze has hurt our farm economy and has hurt our farm people.

Net farm income has dropped one-third since 1948, while total national income has risen 50 percent. Farm mortgage debt has increased 60 percent in that short time, and farmers have seen their share of the total national income decline from 9.4 percent in 1948 to less than 5 percent today.

Now I do not believe that any one has intended that this happen to 22 million of our people simply because they live on farms. On the contrary, I believe that my colleagues from the big cities are just as concerned—maybe not as directly, but in equal measure—as I am about these conditions in our agricultural economy.

No section of our country, no political party or economic group, and no individual to my knowledge has by deliberate or purposeful intent set about to depress farm commodity prices. We in the farm communities are glad to see the rest of the economy booming, but we want our fair share of that prosperity and we believe you want us to have it.

No one can successfully claim that any political party or political leadership is responsible for this, because the decline in farm income has persisted under 2 different administrations of the 2 great political parties, 11 parity points from 1948 through 1952, and now an additional 14 points to date.

It is not fair and it is not honest to blame any one administration or any one program such as the 90 percent of parity price supports for these conditions, for it has been a combination of many things which brought about the decline in farm commodity prices.

I would be the first to say that not everything has been done in recent years which, in my judgment, would have reversed this trend. I could honestly and confidently say that if the 83d Congress had approved my bill proposing the authorization of a soil bank of fertility, or even if the 1st session of the 84th had acted on it, we might well be working our way out of it by now. The enactment of flexible price supports was a grave mistake.

But I think the time has come for us to set aside our differences of opinion, political arguments, and other minor considerations, in the best interests of American agriculture and the national good.

The people we represent grow impatient in times of stress and demand action by their Government to relieve them of adversity which they cannot by themselves overcome. Action to reverse this downward trend in farm prices is long overdue, but I am encouraged today to believe that this session of Congress will write the necessary farm legislation to accomplish this reversal.

The President, in his message, has recognized one of the basic ills of agriculture and has proposed a remedy for which I have long campaigned. Although the Andersen soil bank idea the President has endorsed does not by itself offer the entire solution to this price-squeeze problem, it will in my judgment, make a major contribution when accompanied by the other necessary programs to bolster prices, expand markets, and bring about the distribution of surplus stocks to needy and deserving people.

Speaking personally and also in behalf of the people of the Seventh District of Minnesota which I have the honor to represent, may I say that we are deeply grateful to the President for the forthright manner in which he has brought the basic principles of the Andersen soil bank of fertility before the Congress for action.

CAMBRIDGE, OHIO: ALL-AMERICA CITY

Mr. HENDERSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. HENDERSON. Mr. Speaker, Cambridge, in the 15th District of Ohio, has recently received recognition as an All-America City. This designation has been given it by Look magazine and the National Municipal League. It is an award which is richly merited and the honor has come to my home city because of the valiant efforts of civic leaders and organizations of residents to make it the city which it now is.

At one time Cambridge was a prosperous community, depending upon coal mines, steel mills, pottery and glass industry, for its prosperity. In the twenties, the coal resources became submarginal through depletion of the most accessible stores. The steel mills were moved to other areas and consolidated with others in keeping with the trend of the times. The wave of importations of products from low-wage countries cut heavily into glass and pottery industries. The depression which all America sustained, was even more intensely felt in Cambridge. People began moving away to seek employment elsewhere, and the mines, factories, and houses stood idle. Cambridge was on the skids.

There were men with determination and with ideas who felt sincerely that the city could come back. It would be impossible for me to name them all, for the idea once initiated was seized by many who worked individually and collectively to attract industry, to restore faith, and to rebuild a city which a changing America had made a ghost city. Today, many new plants are in operation, are expanding and are offering employment to the people of Cambridge. Radio Corporation of America, the Vanadium Corporation of America, Champion Spark Plug, Hoffman-La-Roche, Hoover Co., and many other industries have found a home there. The Cambridge Glass Co. was reorganized and many of the employees purchased shares in the company in order to keep it going and to keep alive the name, Cambridge glass.

Indeed, this recognition of All-America City for Cambridge, Ohio, is justly deserved, and the city and its leaders in government, industry, labor, education, and religion, as well as all of the residents who have played an important part in its growth, are to be congratulated.

The Cambridge story is being told throughout America, and it serves as an inspiration for other communities which fell out of step with the times.

An editorial in the Marietta (Ohio) Times tells the story as follows:

CAMBRIDGE EARNS HONOR

Cambridge, our neighbor city, has won high honor and national recognition by being named an all-America city by the National Municipal League. Its distinction is no gift, but was earned the hard way by its citizens and their leaders in a 20-year battle to restore industry to a municipality that was in danger of becoming a "ghost town." It is rather a reward for united and persistent effort that has brought results.

Depression began in Cambridge and Guernsey County in the 1930's with the closing of coal mines and steel mills. A promotion fund was raised by subscription among community leaders, businessmen, and displaced employees. The money was used to take over abandoned buildings and rebuild or remodel them. The structures were then sold to industries at bargain insurance rates and on easy terms. This brought in a number of new concerns that employed local labor.

Another blow fell in 1954 when the Cambridge Glass Co. was forced to discontinue operation because of financial trouble. Businessmen and employees rallied again and bought $250,000 worth of stock. The plant was improved and modernized and work was resumed in it last spring. The company is now showing a profit.

Ten other cities are included on the all-America list for successful municipal endeavor to improve their condition. Three are cited for suppressing gangsterism, corruption, and machine rule, by which they had been ridden. Three others are given recognition for initiating modernization of rundown and obsolete city facilities; 2 for long-range programs for providing for the needs of their growing populations; 1 each for solving pressing school problems and for providing for proper sewage disposal.

Cambridge has good reason for being proud and happy over the distinction that the city has been given. It has been successful in the highly competitive field of increasing and retaining industry, largely through the initiative and consistent effort of its citizens.

The Cambridge Daily Jeffersonian contained an editorial by way of acknowledgment of the honor:

CAMBRIDGE SHINES

Cambridge's impressive story of industrial recovery, tagged Operation Bootstrap, has won for the community the All-America City award and national recognition.

It is the greatest honor ever to come to Cambridge, an honor that a community could receive only by showing noteworthy accomplishments through alert, continuing citizen participation. Our story was studied carefully by the jury in charge of selecting the winners of the awards, which are cosponsored by the National Municipal League and Look magazine.

This community's long battle against becoming a ghost town because of the shutdown of coal mines and steel mills here is familiar to most of us. The manner in which the people of the community tackled the problem and licked it has given Cambridge the reputation of being a community of unusually resourceful and courageous people. Faced with a crisis the people of Cambridge through cooperative effort lifted themselves out of the doldrum—Operation Bootstrap.

Since then the community has faced other knotty problems. The story tells of the crisis last year when the Cambridge Glass Co. ran into financial difficulties. Again, the problem was licked.

Operation Bootstrap is designed to assure ourselves of greater security and contentment. It leads to things we consider most

essential to a more abundant American way of life.

The widespread favorable publicity that goes with receiving the award will prove advantageous to the community for many years to come. The city should and will celebrate, but in celebrating may we rededicate ourselves to the ever-growing tasks ahead.

We are proud of our accomplishments. By continuing to be generous in our contributions of time, effort and money we will be able to maintain the lofty position reserved only for an All-America community.

COMMUNIST DOUBLECROSS IN KOREA

Mr. SHORT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include an article with certain revisions requested by our military personnel.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SHORT. Mr. Speaker, one of my constituents, Mr. O. K. Armstrong, a former Member of this body, recently made a firsthand study of how the Communists are doublecrossing us and our allies in Korea. He has set forth his findings in an article of outstanding and lasting interest in this current issue of the Reader's Digest, entitled "The Communist Doublecross in Korea."

This article gives specific examples of how the Red Chinese and North Koreans, under their Soviet masters, and with the assistance of their stooges—the Poles and Czechs on the so-called Neutral Nations Supervisory Commission, have persistently violated the terms of the Korean armistice.

I wish to commend Maj. Gen. Harlan C. Parks, who was our chief of the U. N. Military Armistice Commission at the time of Mr. Armstrong's visit to Panmunjom, and other United States and allied officers, for their startling revelations of the danger we face in Korea. I include this article—with certain revisions requested by our military personnel—in the CONGESSIONAL RECORD.

THE COMMUNIST DOUBLECROSS IN KOREA

(By O. K. Armstrong)

On the night of July 27, 1953, the day the Korean armistice was signed, United States military forces detected by radar the track of planes entering North Korea from Manchuria and landing on the two airfields still usable.

"Enemy aircraft—jet propelled—numbers undetermined," the radar operators reported.

The Communist forces had no MIG planes in Korea when the fighting stopped. Under the armistice terms both the United Nations and the Communist commands agreed not to build up military strength.

U. N. officials were alarmed. If the Reds were breaking their word on the very day they gave it, what would they do in the future?

Two and a half years have given the answer: The leaders of Communist China and North Korea, backed by their Soviet masters, have proved that they never had any intention of observing the solemn agreement that brought an end to the fighting. While the U. N. forces in South Korea have strictly observed every item of the truce, the Red aggressors have constantly violated it.

"We face danger here," said Maj. Gen. Harlan C. Parks, senior U. N. representative on the Military Armistice Commission, as we sat in his headquarters near Panmunjom recently. "The Reds have persistently broken the truce in order to build up their combat forces, particularly their air force, whereas the military strength of the U. N. command, by virtue of scrupulous compliance with the armistice terms, has steadily declined in combat capability."

Spokesmen for the free world contemplating some agreement with Communist leaders for mutual inspection of military strength with a view to control of armaments should study what has happened in Korea. In the language of the Reds, inspection means a chance to observe unhindered everything in enemy territory while preventing any effective observation in their own.

Stripped to its fundamentals, the truce provided that neither side would increase its military strength. Military personnel could be rotated, man for man, and weapons could be replaced, item for item; but no additional strength could be brought in. Ten ports of entry, five for each area, were designated, through which all rotation and replacement would have to pass.

To enforce the truce, inspections were to be made by a Neutral Nations Supervisory Commission, made up of representatives of 2 countries named by the United Nations and 2 by the Communist side. The U. N. side named Sweden and Switzerland, both genuine neutrals. The Reds nominated Poland and Czechoslovakia, both as Red as Soviet control can make them and about as neutral as Premier Bulganin.

American military men in Korea put up a howl. They predicted that the inspection teams would not be allowed to see anything in the Communist area; even if they did, the two Red stooge members could veto any move toward corrective measures. But the armistice was a political decision; the warnings of the military men were ignored.

The U. N. side immediately set up a system of reporting and control, to insure that all incoming and outgoing personnel and materiel were shipped only through the designated ports. Complete, accurate, daily reports have been issued ever since.

Not one item of military equipment has come into South Korea that has not been duly entered upon the daily reports prepared for the inspection teams and given into the eager hands of the Reds. Every military person leaving or entering is carefully cataloged. At first all reports were made in triplicate. Soon the Reds demanded that they be made in quadruplicate. "One copy for Moscow," our military clerks say.

Meanwhile, the Communists have never set up a regular reporting system. They turned in no reports whatever until September 12, 1953, and then listed only 964 departures and zero arrivals for the one day preceding. Their first combat-materiel report was submitted October 6, listing an outgoing shipment of four antitank guns with 20 rounds of ammunition. It was not until February 9, 1954, that the Red joint command made another materiel report, showing an incoming shipment: one antiaircraft gun. All this time, of course, masses of Red Chinese troops were being rotated, and huge quantities of weapons and equipment were being brought into North Korea.

By every conceivable device, the Communists nullify the provisions for inspection of armaments. On last April 26, mobile team No. 6 attempted to inspect Uiji and Namsi airfields. The Swedish and Swiss members reported: "The team was not permitted to see the cockpits of any MIG aircraft; neither was the team permitted to note the serial numbers of the inspected aircraft. We were not in a position to ascertain whether any aircraft had been shown us more than once; it was impossible to see all the aircraft on the same day because the Polish and Czech members started long discussions, saying that they did not wish to check all the aircraft."

The Reds never permit the inspection teams to interrogate a person unless he has been coached on what to say. At Taechon on last March 10, the Swiss and Swedish members of team No. 7 picked a guard at random and asked that he be sent in for questioning. The North Korean liaison officer violently objected.

"But surely he could tell us from his own observation what he had seen here," persisted the neutral spokesman.

"Oh, no," was the reply. "He is a sick man. In fact, he is insane. He could tell you nothing." The Polish and Czech team members declared the soldier was indeed insane and must not be talked to.

One of the Neutral Nations Supervisory Commission members, an outstanding authority on international law who told me he was serving at the request of his government, gave me other examples of Red doubledealing.

"My team was given information that a large consignment of MIG's had reached a certain airfield in North Korea—entirely in violation of the truce, of course," he related. "We insisted that this field must be inspected. As usual, the Poles and Czechs declared there was nothing at the airfield. Our information, they said—they always say—was a rumor started by the warmongering Americans.

"We persisted, and finally got agreement to inspect the field—after a week for preparation. The team took off in a North Korean plane, which landed at the wrong airfield. 'Engine trouble,' said the Reds. So we lingered there for 2 days, while they tinkered with the engine. Next day we came out to leave; no pilot. He had been taken suddenly ill, they said. Another day's delay. When we got to the airfield, there was nothing there. 'Just as we told you,' said the Czechs and the Poles."

A Swiss inspection team member detailed how the Reds got around—literally—the use of prescribed ports of entry. He told how an associate stood with an inspection team in North Korea on a bridge across the Yalu. Beyond the bend in the river, less than 2 miles away, the Reds had constructed another bridge. Members of the inspection team could hear the rumble of a train crossing over it. But when the Swedish and Swiss inspectors insisted upon going to have a look, the Czech member consulted his papers and solemnly announced: "It says in my book there is no bridge there." And that ended the matter.

On February 23, 1954, Gen. Paul Wacker, then the senior Swiss member, declared in a report to the Commission: "In the South the teams control all materiel being brought into Korea, a control which is being carried out, thanks to the documents submitted by the local authorities, load manifests, ship manifests, as well as by inspections on the spot. In contrast, we find that in the North not more than 2 to 4 inspections of spare parts of war materiel have been carried out each month, and these only in 2 ports of entry."

On February 27, 1954, Capt. Lee Wan Bong, of the Chinese People's Volunteer Army, an interpreter for the North Korean delegates to the Military Armistice Commission, walked over to the U. N. side and stayed there. He confirmed what our intelligence already knew, that the activities of the Polish and Czech members of the inspection teams are directed by Soviet Russian officers. Lee gave the names of the Russian major general and other high-ranking officers in charge. He also brought proof that Russians frequently dress in Polish and Czech uniforms and take

their places on the inspection teams for first-hand observation of United States military installations in South Korea, getting information down to our last jeep.

On last February 5, a United States four-engine craft, flying over the open sea west of North Korea, was attacked by eight MIGs. United States Sabre jets moved in and gave battle. Two of the Red planes went down in flames and the others streaked back to their bases. The North Korean general on the Military Armistice Commission made a great show of protest at the next conference.

"Where were those planes based?" he was asked by the U. N. chief.

"They were planes from our side, peacefully based in the Korean People's Republic," said the general.

"Have you ever reported the importation of these MIGs?" demanded the U. N. spokesman. For once the Red leader was nonplused. He realized the admission was on record. But after a pause he shouted: "Your side tries to confuse the matter."

Every day brings to the desk of the Military Armistice Commission fresh evidence of Communist doublecrossing. One day a detail of Republic of Korea soldiers was dispatched to salvage a plane that had fallen in the demilitarized zone, an operation permitted under the armistice rules. Each was armed with a United States 45-caliber pistol and a carbine—weapons authorized for personnel performing such duties. Chinese Communist soldiers suddenly opened fire. Two of the ROK Army sergeants were shot in the back and instantly killed.

"I immediately sent an officer to make an on-the-spot investigation," related Parks. "Based upon the preliminary report, he called for a joint investigation with Communist representatives at the scene of the incident. When the joint team met the following morning, the bodies of the sergeants had been dragged across the military demarcation line into Communist territory. Rocks had been piled around the bodies. In the hand of each was his pistol—with empty chamber.

"In fabricating their evidence the Communists made one glaring mistake. They put the slides in the empty pistols in the forward position with the hammer cocked. Anyone familiar with the operation of that United States pistol knows that when the last round is fired the slide is automatically locked in a rearward position."

When Parks faced his Communist counterpart at the conference table at Panmunjom the Red general claimed that his soldiers had fired in self-defense. Parks retorted that it was a case of plain cold-blooded murder, and proved his point with indisputable evidence.

From Neutral Nations Supervisory Commission sources, and from United States and ROK officers, I heard ample evidence that the Communists could now move against the United Nations with overwhelming force. One of the best sources of information was Maj. Gen. Kim Chang-Yong, chief of ROK military counterintelligence.

General Kim dresses his agents as coolies or businessmen as occasion requires, and they form a tight network of observation all over North Korea. Accurate information also comes from Korean and Chinese defectors and from Communist spies arrested in South Korea.

Evidence from such sources establishes the following facts. At the time of the armistice, the Reds had 12 airfields. All had been pounded by U. N. bombers, and only two were usable. Today, they have 39 airfields, most of them capable of handling jets, all built under Soviet supervision.

At the signing of the armistice only a handful of Red planes and their mechanics—but no MIG's—were based in North Korea. Today there are 20,650 men in the combined air forces of North Korea and the Chinese "volunteers." According to General Kim's figures, they have 630 planes, of which 350 are MIG jets.

As for ground forces, there were approximately 1,200,000 troops in North Korea when the truce began. Many of the Chinese were "volunteered" down to Indochina to fight the French, but these were replaced to maintain about a constant strength. General Kim's figures show the Reds have reorganized into 17 corps of 46 divisions, with 596,756 North Koreans and 545,368 Chinese. In addition, three divisions of Russian troops are stationed at Pyongan, a division of Soviet Mongol troops is based at Jangjon, a battalion of Russian Air Force is based at Sinihju and a company of Russian engineers has headquarters at Musan.

More significant than manpower is the heavy increase in firepower. "All equipment, except for certain light parts assembled in Manchuria, is made in Russia," declares General Kim.

In contrast to this, the U. N. ground-force strength has deteriorated since the armistice. Its firepower remains about the same, which means it is not now nearly equal to that of the Reds. Its weapons cannot be replaced by improved equipment, as has been the case in the North. The ROK Air Force has the exact number of planes it had on July 27, 1953: 140, of which 5 are F-86 jet fighters.

There is no doubt that we face danger in Korea. The Red military power now holds a double threat. They can start shooting. Or they can negotiate from superior strength in some future conference, demanding that we sign on the dotted line—or else.

As one high-ranking United States commander of troops on the bleak armstice line expressed it: "From where I sit, one thing is certain: the enemy is still the enemy."

LITTLEVILLE (MASS.) RESERVOIR

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, I know that you, with every Member of this Congress, sympathizes with the thousands of people in New England, and much of the Northeast, who suffered so severely during the two disastrous floods in August and October of last year.

The results of these floods were thoroughly and conscientiously studied by the members of the New England delegation in Congress and recommendations were developed which either have been or will be submitted for consideration. I am certain that all Members of Congress will want to do everything within their power both to provide means of preventing any recurrence if that is humanly possible, and of furnishing adequate relief if any such disaster occurs again.

Portions of the First District of Massachusetts were among those areas which suffered extensively heavy damage. The Federal Government at the direction of the President, the Commonwealth of Massachusetts, the county and local governments as well as the American Red Cross and many other agencies and groups made magnificent contributions toward the relief of the suffering and the repair of the extensive damage. But it seemed obvious to me that remedial legislation to cover the possibility of any future disaster should be promptly considered at this session of Congress and I am confident that the whole subject matter will receive the earliest possible consideration by the congressional committees concerned and by Congress as a whole.

One of the most immediate and useful projects which can be considered is the matter of an adequate flood-control system for the New England area. This has been the subject of study by the Corps of Engineers and the results will be presented as soon as possible.

In the meantime, we do have the advantage of a comprehensive report after a survey of the New England-New York region. This was undertaken under the Flood Control Act of 1950—Public Law No. 516, 81st Congress. It consists of some 46 volumes, was completed by the New England-New York Inter-Agency Committee and submitted under date of March 15, 1955. Among other recommendations, it proposes a comprehensive plan for the Connecticut River Basin consisting of local protection works and the construction of 21 additional flood control reservoirs to supplement the five such reservoirs already completed and in operation.

One of these proposed reservoirs is known as the Littleville Reservoir and would be located on the Westfield River which is a tributary of the Connecticut River.

Communities, utilities, and individuals in both Massachusetts and Connecticut in the region affected by the flow of water from the Westfield River suffered substantial damage as a result of the floods of August and October 1955.

At my request, the New England Division of the United States Corps of Engineers furnished me with its estimate of the reduction of damages during these floods if the Littleville project had been constructed and in operation at that time.

Their report to me is as follows:

August 1955, along Westfield River in Massachusetts	$2,500,000
October 1955, along Westfield River at Westfield, Mass	115,000
Total	2,615,000
August 1955, along Connecticut River below entrance of Westfield River, in Massachusetts	1,735,000
October 1955, along Connecticut River below entrance of Westfield River, in Massachusetts	50,000
Total	1,785,000
August 1955, along Connecticut River in Connecticut	3,265,000
October 1955, along Connecticut River in Connecticut	415,000
Total	3,680,000

Or, a total estimated reduction—

In Massachusetts	$4,400,000
In Connecticut	3,680,000
Total	8,080,000

I have been advised that the estimated cost of this project at the 1955 price level is $5,500,000.

When these two factors of a cost of $5,500,000 and an estimated loss of $8,080,000 in these floods alone are

weighed, the urgency of this project is apparent beyond any question.

A considerable amount of other pertinent data is available and will be presented to the proper congressional committees in connection with the consideration of this project.

At this time, I have introduced a bill to authorize the appropriation of funds for the preparation of plans in order to construct this Littleville Reservoir. I believe that the basic facts which I am now submitting amply justify favorable action by the congressional committees and by Congress at the earliest possible date during this session.

I am glad to add that my colleague the gentleman from Massachusetts [Mr. BOLAND], portions of whose district would be clearly benefited by the construction of this reservoir, plans to introduce, subsequently, a similar resolution and that he has supported effectively every effort to provide this realistic means of immediate relief to western Massachusetts. I have also appreciated the generous and wholehearted support extended by the officers of the State and local governments in both Massachusetts and Connecticut.

I urge immediate consideration of this resolution as a practical, reasonable, and constructive action on the part of Congress, fully merited upon all the facts which have been developed.

I am now including a copy of this resolution:

H. R. 8132

A bill authorizing the preparation of detailed plans for the Littleville Reservoir on the Middle Branch of the Westfield River in Massachusetts

Be it enacted, etc., That the appropriation of funds for the preparation of detailed plans for the Littleville Dam and Reservoir on the Middle Branch of the Westfield River in Massachusetts, is hereby authorized; Provided, that the work shall be carried out substantially in accordance with the plan set forth in the report of the New England-New York Inter-Agency Committee, dated March 15, 1955, and on file in the Office of the Chief of Engineers; Provided further, that in the preparation of the detailed plans hereby authorized, the Chief of Engineers is authorized and directed to make such modifications as he may deem warranted as a result of the hurricane floods of 1955.

Mr. BOLAND. Mr. Speaker, I have today joined with my colleague from Massachusetts, Hon. JOHN W. HESELTON, in sponsoring a companion resolution authorizing the construction of the Littleville Dam and Reservoir on the Middle Branch of the Westfield River in Massachusetts. These resolutions are based on a survey conducted by the New England-New York Interagency Committee. In its report of March 15, 1955, the committee recommended the construction of the Littleville Reservoir and stated that the project was an essential to further protect from the devastating effects of floods the populous area through which the Westfield River runs. If this reservoir had been in being prior to the disastrous floods of last August and October, a reduction of damages would have resulted of some $2,500,000 along the Westfield River and $5 million along the Connecticut River. The studies made in connection with the NENYIAC report clearly indicate the economic justification for this project. Both Congressman HESELTON and I earnestly desire that the Committee on Public Works take early action on our resolutions and favorably report authorization for construction. If authorization is approved, it is our hope that some planning money be provided for fiscal 1957.

SPECIAL ORDER GRANTED

Mr. POWELL asked and was given permission to address the House for 1 hour on Thursday next, following the legislative business of the day and any special orders heretofore entered.

SEGREGATION

Mr. POWELL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POWELL. Mr. Speaker, the address of the President has in it many laudable things, but there is one item to which I would like to refer briefly now and more in detail on next Thursday under my special order to address the House for one hour.

I am referring to President Eisenhower's recommendation that we here in Congress establish a bipartisan commission to examine the allegations that Negro citizens are being deprived of their right to vote and meeting with economic pressures. This is sheer buckpassing. The executive branch of the Government including the Department of Justice and the FBI now have the power to do this and the inescapable duty of so performing that which the law charges them with.

We here in Congress have our responsibility too. We must in this Democratic-controlled body press with vigor for more civil rights for the American people.

I repeat, the Department of Justice and the FBI now can investigate and should be investigating any depriving of any citizens of due process of law and the right to vote.

Otherwise, I think President Eisenhower's statement is a Republican challenge to a Democratic Congress which up to now has done absolutely nothing in the field of civil rights.

THE LATE DANIEL J. TOBIN, 1872–1955

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, Daniel J. Tobin, one of the truly great leaders of the American labor movement, died on November 14, 1955, at the age of 83 years.

His life was an illustrious example of the contributions that immigrants make to our country. He came to Boston as a lad of 14 from his native Ireland and joined the Teamsters Union a few years thereafter. His great ability and devotion to his fellow workers was rapidly recognized, and in 1907 he was elected president of his union, a position which he filled for a period of 45 years. In 1952 he resigned from active leadership of the Teamsters Union and was elected president emeritus, a position he held at his death.

When Daniel Tobin became president of the Teamsters Union, its membership was limited to some 30,000 pioneers fighting for labor's rights. In many cases membership in the union meant prosecution and even loss of job. Under Tobin's leadership the membership of the union multiplied fortyfold, and the rights of union members to collective bargaining—despite Taft-Hartley and some objectionable laws enacted by several States after the passage of the Federal law—are protected. This enables unions to improve the economic conditions of their members under the ever rising standards of living made possible by our free enterprise system.

Possibly the best way to illustrate the benefits of unionism and the contributions that Daniel Tobin made to the members of his union is to compare the wages of teamsters in 1904, when Tobin held his last teamster job, and 1952 when he resigned from leadership of his union. During the latter year a teamster was making in 1 hour what Daniel Tobin made in a whole day 50 years earlier, and he had to work 10 hours, and more, to make that much without any fringe benefits such as paid holidays and vacations as well as hospitalization, medical care, and pensions.

Daniel Tobin was conscious of his public responsibilities as a citizen and labor leader. He took active part in politics and he was an admirer of our great Presidents, Woodrow Wilson and Franklin D. Roosevelt. He led the labor division of the Democratic National Party during the four Roosevelt campaigns. During the war he was drafted to act for the President on important missions.

Daniel Tobin was an active fighter against totalitarianism and took a leading position in combating communism in the United States. He advocated union responsibility and was proud of his union's record of industrial peace during the two World and Korean Wars. As president of the teamsters, he insisted that all locals adhere scrupulously to their contracts with employers.

He was opposed to the split in labor's ranks and as president of the largest A. F. of L. affiliate and vice president of the A. F. of L., was active in trying to bring the two great labor federations together. His early efforts almost materialized before his death.

I personally will miss him as a good friend and neighbor. I admired him greatly, and I valued his friendship. With other millions of Americans I mourn the passing of Daniel J. Tobin, a great American and an outstanding leader in the struggle for a better America.

TWO HUNDRED AND FIFTIETH ANNIVERSARY OF THE BIRTH OF BENJAMIN FRANKLIN

Mr. McCORMACK. Mr. Speaker, one of the greatest men in the history of our times, one of the great immortals of all time by reason of his life, his achievements, and his contributions not only to the establishment of the progress of America but also to the constructive progress of mankind everywhere is Benjamin Franklin.

January 17, 1956, will be the occasion of the 250th anniversary of his birth. On that day and in the few days preceding January 17 appropriate commemorative exercises will be held in both Boston, Mass., and Philadelphia, Pa., in connection with the 250th anniversary of the birth of this great man.

Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 199) and ask unanimous consent for its immediate consideration.

The Clerk read as follows:

Whereas January 17, 1956, marks the 250th anniversary of the birth of Benjamin Franklin in Boston, Mass. and

Whereas Benjamin Franklin, because of his dedication to the welfare of human society and the influence which he has exerted upon our material and spiritual development through his great and varied achievements as a statesman, diplomat, journalist, scientist, and philosopher, is universally recognized as one of the truly monumental figures of mankind; and

Whereas the contributions of Benjamin Franklin to the achievement of independence for the United States of America, to the formulation of our Constitution and the formation of the Government under which we live, and to our progress as a Nation over the years are unsurpassed by any individual in our history; and

Whereas Federal, State, and local officials of the Commonwealth of Massachusetts and the Commonwealth of Pennsylvania, respectively, will join with the Greater Boston Chamber of Commerce and the Franklin Foundation in commemorative ceremonies to be held in Boston in connection with such anniversary and also with The Franklin Institute of Philadelphia and cooperating organizations and the University of Pennsylvania to be held in Philadelphia; and

Whereas it is fitting that the Congress, as a mark of recognition and respect on behalf of all of the people of the United States, add its voice to the voices of those who are participating in these ceremonies: Therefore be it

Resolved by the House of Representatives (the Senate concurring), That the Congress extends its greetings and felicitations to all those who are participating in the commemorative ceremonies being held in Boston, Mass., and in Philadelphia, Pa., on the occasion of the 250th anniversary of the birth of Benjamin Franklin. The Congress joins with them and with all the people of the United States in expressing its appreciation of the great and indispensable part which Benjamin Franklin played, through his great and varied accomplishments in many fields, in the founding of our Nation and the establishment of a sound basis for the progress and development which our Nation has enjoyed over the years.

Mr. MARTIN of Massachusetts. Mr. Speaker, reserving the right to object, and of course I shall not object, I wish to associate myself with the distinguished gentleman from Massachusetts in the advocacy of this resolution. Franklin was deeply associated with part of my district. When a little town was trying to establish a library Ben Franklin was good enough to give them the books that made the effort successful. As a result the folks named their town after him. Franklin is a growing town in the county of Norfolk. This town gave to the country that great statesman, that great educator, Horace Mann, who really founded the public-school system.

I know they are delighted that the man who contributed so much to their welfare is to be honored.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. McCORMACK]?

There was no objection.

The concurrent resolution was agreed to, and a motion to reconsider was laid on the table.

THE LATE ALICE CAMPBELL GOOD

Mrs. KELLY of New York. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mrs. KELLY of New York. Mr. Speaker, with deep regret I learned last night of the death of Alice Campbell Good, one of Brooklyn's outstanding citizens. Mrs. Good was the daughter of Felix Campbell, a Member of Congress from New York, from 1883 to 1891. At the time of her death, Mrs. Good was the Democratic national committeewoman from New York State, in which capacity she served since 1936. Since 1933 she had been a member of the State Electoral College. Other posts in which she served were the New York State Reconstruction Commission, the New York State Roosevelt Memorial Commission, and the New York City Board of Higher Education. She held membership in the New York City Charter Commission, the Brooklyn Unemployment Relief Commission and the Brooklyn Women's Committee for the New York World's Fair. Mrs. Good founded the St. John's College Auxiliary and she was an active worker in the Girl Scouts, Army Relief, British War Relief, and many other civic and philanthropic organizations. She was on the board of directors of the Brooklyn Chapter of the American Red Cross, and was a trustee of the Brooklyn Museum and the Brooklyn Institute of Arts and Sciences. She belonged to the Cosmopolitan and Women's City Clubs.

For her outstanding contributions to the religious and civic affairs of Brooklyn, Mrs. Good was the recipient of many awards and honors. Among them were the medal pro ecclesia et pontifice bestowed by Pope Pius XII; the gold medal of the Downtown Brooklyn Association, and the medal of the Women's International Exposition.

Alice Campbell Good was indeed an excellent example of unselfish devotion to our community, State and Nation. Her many accomplishments in the interest of Brooklyn are a lasting tribute to her generous character and loyal spirit.

To her daughter, Mrs. Gerard S. Smith, and to her son, F. Campbell Good, I extend my deepest sympathy.

Mr. KEOGH. Mr. Speaker, all of Brooklyn has been saddened by the death of Mrs. William H. Good, Democratic national committeewoman from Brooklyn and a leader in the political and civic life of the community. The daughter of Felix Campbell, who represented Brooklyn in the Congress early in the century, she served as a national committeewoman from New York State since 1936 and had been a member of the State Electoral College since 1933. During all of her life she was active in the charitable and civic organizations of her community and in 1945 was awarded the gold medal of the Downtown Brooklyn Association for her civic work. In 1952 she won the medal of the Women's International Exposition and 2 years ago was awarded a medal by Pope Pius XII. Mrs. Good was a lovely, gracious lady and many will remember her best for the dignity with which she presided at the historic election eve rallies which have been held for so many years at the Brooklyn Academy of Music. A devoted and loyal spirit has left us and will be greatly missed by all who were privileged to know this gallant lady.

SUMMARY OF FTC ANTITRUST COMPLAINTS

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, for almost 3 years now the country has been bombarded with propaganda about what a wonderful and vigorous job the Federal Trade Commission has been doing to enforce the antitrust laws. We have been told that under the present administration, the FTC has been reorganized and revitalized and has been doing its job with such wondrous vigor and efficiency as could hardly have been dreamed of under the previous Democratic administration. By way of proof for these claims, we have been offered numbers. Thus the number of suits started—or the number of new complaints charging law violation—has been compared with the number of complaints issued under the previous administration to prove that antitrust enforcement under the present administration is bigger and better than ever before. What this boils down to is a bigger and better "numbers game" than we ever had before.

	33 months under Republicans	33 months under Democrats
Number of complaints	59	56
Number of companies charged	60	66
Average assets of companies charged	$32,500,000	$256,200,000

It has been obvious to any thoughtful victim of this propaganda that mere numbers of complaints issued is in no way a guide to either the quantity or the

quality of antitrust enforcement. Your Small Business Committee has, however, surveyed the antitrust complaints issued by FTC over the past 5½ years, and we have some facts which I think will interest the Members.

In collecting these facts we looked into a charge that the Small Business Committee frequently hears, which is that since the FTC was reorganized by Mr. Howrey, that the guardian of the public interest has trained its antitrust guns on small business.

The antitrust law which the Federal Trade Commission is charged with enforcing is the Clayton Antitrust Act, as amended by the Robinson-Patman Act. This act deals with monopolistic mergers, with monopolistic price discriminations and with foreclosure of markets through exclusive dealing contracts and tie-in sales agreements.

Here then are the facts: In the last 33 months—since Mr. Howrey was appointed to the chairmanship of the Federal Trade Commission on April 1, 1953, up until December 31, 1955—the FTC issued 59 new complaints charging violations of the Clayton Antitrust Act. In the 33 months immediately preceding, while the Federal Trade Commission was under the chairmanship of Senator Mead, a distinguished colleague of ours, the Federal Trade Commission issued 56 complaints charging violations of the Clayton Act. In other words, the new Commission issued three more complaints than the old Commission, in the same number of months.

In some instances a single complaint charged more than one company with violating the Clayton Act. In the past 33 months the FTC charged 60 companies with violating that act. In the previous 33 months under Senator Mead, the FTC charged 66 companies with violating that act. So there you have your numbers game. If the number of companies charged with violating the antitrust law were any index either as to quantity or quality of antitrust enforcement, then we could say that in 33 months under Chairman Mead, the FTC performed 10 percent more antitrust enforcement than it has performed in the 33 months just passed. But, of course, mere numbers of companies charged with violating the law do not mean any such thing.

But I come now to a comparison which does mean something.

During the 33 months under Senator Mead, the companies charged by the FTC with violating the Clayton Act were, on the average, approximately eight times as big as the companies charged with such law violations during the 33 months since the FTC was reorganized by Mr. Howrey. The average assets of the companies charged in Senator Mead's period were $256.2 million. This average for the past 33 months has dropped to $32.5 million.

In short, the antitrust weapon which Congress put in the hands of the FTC was used during the previous administration to hunt monopoly elephants, but during the present administration, it has been used to hunt monopoly rabbits.

I do not suggest that small business should be immune from antitrust prosecutions. On the other hand, we cannot avoid the observation that the acts and practices dealt with under the Clayton Act are not, for the most part, illegal per se. The effects of these acts and practices, and the substantiality of these effects, are the tests of illegality plainly specified in the law. We would normally expect, therefore, that the bad practices of a giant corporation have a clearer and more substantial impact upon the competitive system, and upon the public interest, than have the same practices engaged in by a small firm.

If this suggests different treatment under the law, it is because the great and the small have different effects upon the public interest. Indeed, the acts and practices dealt with in the Clayton Act, as amended by the Robinson-Patman Act, would not be matters of public concern under a more competitive structure of business; and in point of historical fact, legislation on these acts and practices became necessary only after, and only because, a number of industries came to be dominated by monopolistic or quasi-monopolistic firms. Yet the giant corporations occupying these dominant positions are those which appear to have become immune to antitrust prosecutions by the new Federal Trade Commission, in its search for smaller game.

The smallest company charged with violating the Clayton Act during the entire 5½-year period is a tiny company whose total assets are only $16,000. This company was made the subject of a complaint during the chairmanship of Mr. Howrey, which complaint charges that company with antitrust law violation in connection with the sale of citrus fruits. The company in question has reported to your Small Business Committee that its total income from the sale of citrus fruits in the year 1954 was only $460.

I know nothing of the merits of the suit against this tiny company, and I do not mean to prejudge the issue. I do have great difficulty, however, in reconciling the fact that while this tiny company is charged with violating the Robinson-Patman Act there have been at the same time hundreds and hundreds of complaints from small-business men about the price discrimination engaged in by several multi-billion-dollar corporations, and the Federal Trade Commission has been utterly unable to see any violation of the Robinson-Patman Act in these discriminations.

I also have great difficulty in reconciling the FTC's complaint against this tiny company when at the same time, the FTC has watched the ballooning of the greatest wave of corporate mergers and consolidations in history, without hardly batting an eye. According to FTC's own reports there had been, at the end of last year, some 522 mergers by corporations having individual assets in excess of $50 million. In all of the thousands of corporate mergers and consolidations which have taken place since the new antimerger law was passed, the FTC has issued only five complaints, and has not as yet actually stopped or unscrambled a single merger.

This is a serious matter. It cuts much deeper than the simple issue of false and misleading propaganda. When the Federal Trade Commission was reorganized by the Hoover Commission Reorganization Plan, its independence and bipartisan nature was destroyed and its antitrust enforcement brought under control of the White House. The result is that while the Federal Trade Commission hunts small game, thousands of small businesses are being squeezed out and destroyed by the monopolistic practices of certain big businesses, and these the FTC refuses to prosecute.

I hope that Congress will act during this session to return the Federal Trade Commission to the status of a bipartisan Commission, and as an arm of Congress.

INTERFERENCE OF FEDERAL GOVERNMENT IN ADMINISTRATION OF STATE CRIMINAL LAWS

The SPEAKER. Under previous order of the House, the gentleman from Georgia [Mr. LANHAM] is recognized for 40 minutes.

Mr. LANHAM. Mr. Speaker, during the 9 years that I have had the privilege of serving in this House I think I have established a reputation for moderation. After the recent Supreme Court decision on segregation I did not abuse that Court although I knew the decision was unsound and that it was based upon the sociological thinking of the members of that Court instead of upon the law and the Constitution. But, as I say, I did not abuse the Court for that decision. Frankly, I believed that the less said the better, so that our local school officials could go steadily on their ways maintaining the present segregated schools. Raving and ranting served only to stir the NAACP and other such groups to take action in the courts.

It is true that decision was purely an assumption of the legislative authority of the Congress. At a later date I shall have something to say about that because that is one of the dangerous trends of our time. In that decision the Court decided not what the law is, for they overturned a decision that had been standing for 75 years, but they decided the law as they thought it ought to be. As that great old judge of the circuit court of appeals, Samuel Sibley, now retired, wrote me recently, "that is legislation by whomever it is done and by whatever court."

However, I do not rise today to say anything about that decision. I rise to speak about an even more serious situation than that brought about by the decision referred to, which was wholly uncalled for, wholly without precedent to sustain it, and has wrought havoc for the colored people as well as the white people of the South. I want to call your attention to another matter, even more serious in its implications.

Mr. Speaker, in October 1953, Amos Reece, a Negro felon serving in the Georgia penitentiary on two counts of assault with intent to rape and on two counts of robbery, was assigned to the Cobb County public works camp. While

assigned to the duty of operating a road patrol or scrape, he went to the home of a young mother and housewife. He appealed to her for a glass of water and when she opened the door to hand him the glass, he grabbed her, dragged her into the living room and raped her in the presence of her young baby. Later he voluntarily confessed to the crime. The court appointed two able lawyers to represent him and he was given a fair trial. The jury found him guilty without recommendation and he was sentenced to death by electrocution.

After his conviction and after the court-appointed attorneys had entered an appeal, the National Association for the Advancement of Colored People retained Dan Duke, an attorney of Atlanta, Ga., who had represented them in other matters, to take over the appeal. Thereupon, the local counsel were dismissed. The Georgia Supreme Court in a decision reported in Two Hundred and Tenth Georgia Reports, page 578, reversed the trial court on a technical slip in charging on the question of insanity. The court in reversing the case, however, stated "the evidence was amply sufficient to authorize the verdict."

On June 22, 1954, the defendant was again tried, this time represented by the same Dan Duke. Reece again was found guilty without recommendation and the conviction was affirmed by the Supreme Court of Georgia in a decision reported in Two Hundred and Eleventh Georgia Reports, page 339.

The Supreme Court of the United States granted a writ of certiorari and reversed the Georgia Supreme Court in its affirmance of the conviction upon the ground that the judge of the Cobb superior court had not appointed counsel for the accused until after he had been indicted by the grand jury. It was suggested in the decision also that he might have been denied a fair trial in the absence of proof that there were Negroes on the panel which tried him.

I bring this matter to the attention of the Congress not because the United States Supreme Court reversed the Supreme Court of the State of Georgia on such flimsy grounds although any lawyer will readily see that to require a court to appoint counsel for all who may be indicted by a grand jury before such indictment is found is an absurd requirement. In no State of the Union, I believe, is there any such requirement. Until an indictment is found, there is no need for counsel since neither the person accused of the crime nor his attorney can appear before the grand jury. What I am bringing to your attention is the wholly unwarranted action of the Department of Justice in requesting the Federal Bureau of Investigation to make an investigation of the administration of the criminal laws by the duly elected and qualified officials of the State of Georgia. One Warren Olney III, acting under directions from Herbert Brownell, the Attorney General of the United States, directed that such an investigation be made without citing any authority for such investigation. The same was wholly unwarranted and a flagrant invasion of the right of a sovereign State to enforce its own criminal laws. The representatives of the FBI stated that they were to investigate the matter of the selection of jurors used by the officials of the Superior Court of Cobb County, Ga. The clerk of the superior court, the jury commissioners, and the solicitor general readily cooperated because they had nothing to hide in this respect but all of them deeply resented the unwarranted interference with the discharge of their duties by the Attorney General, Mr. Brownell, the third Olney, and representatives of the FBI though the latter, of course, were only discharging their duties as directed by Olney and Brownell. Incidentally, reporters for the Atlanta Constitution, one of the South's oldest and most reliable newspapers have reported that both the third Olney and Brownell refused to discuss the matter with them or say under what authority they were proceeding.

But the investigators went far beyond their inquiry as to how jurors were selected and whether or not there were Negroes on the list from which grand jurors and petit jurors were drawn. In an apparent effort to intimidate, they inquired of the solicitor general, the Honorable Luther Hames, Jr., an able, conscientious, fairminded and courageous public servant, whether or not he intended to again prosecute Amos Reece. There seemed to be a veiled suggestion in this question that it would be wiser if the solicitor general did not prosecute again. The judge of the superior court of Cobb County, the Honorable Jim Manning, a kindly, intelligent, and courageous man, refused to discuss the case with the nosy investigators because, as he stated to them, he feared he would be disqualified in any subsequent trial of the Negro, Reece.

Under the Georgia law relative to the selection of jurors, the names in the jury box are selected from the county tax lists and no discrimination is made in such selection because of race or previous condition of servitude. The solicitor general pointed out that 2 Negroes had served on the grand jury for October 1955, that 1 was called for service at the December term and at his request moved up for service on the February 1956 grand jury. The solicitor general pointed out also that 4 Negroes at the December term had served on the petit jury and that each of them was empaneled in cases tried at that term and that 1 jury had 3 Negroes on it. He explained also that on one occasion a Negro had been chosen as foreman of a petit jury.

The solicitor general who prosecuted Reece has pointed out that there are serious implications in the investigation. He says:

1. It can be used as a threat of prosecution in a civil-liberties action against local court officials.

2. That it came at a time when the local court was preparing further action in the case and was apparently initiated at a time when it was felt the court might be embarrassed in some manner by the investigation and deterred from taking further action in the case.

3. That they may attempt to use the information obtained as a matter of defense when the case is retried.

4. That there has been no race hatred or violence threatened at any time during the previous trial as the serious and dastardly nature of the crime was recognized by everybody in the community.

5. That it is a most serious violation of the right of the State to proceed in its own courts to punish criminal offenses against its own laws.

6. That this unwarranted interference is in the nature of a gestapo proceeding and that the police state operated out of Washington by political-minded officials is already in existence and freedom of action on the part of State officials is gone.

I rise today to express my indignation and to protest this unwarranted action on the part of the Attorney General acting through this man, Olney the Third, and the FBI. How deeply into politics is the Attorney General willing to drag the FBI, which has until Mr. Brownell became Attorney General been operated in a manner to win the approval of all the law-abiding citizens of America? It was not long after the present Attorney General took over that he began to prostitute the Federal Bureau of Investigation to political ends. I was distressed when the Director of the FBI, Mr. J. Edgar Hoover, bowed his neck to his political master, the Attorney General, and testified in the matter of Harry Dexter White, a man long dead, for the sole purpose of trying to besmirch the character of an ex-President of the United States and to make it appear that that great American and courageous man who had served in the United States Army with distinction was soft on Communists. Had Mr. Hoover had the courage to defy the edict of the Attorney General that he testify in this case, he would have stood in no danger of losing his job because his action in trying to maintain the high standards and political impartiality of his organization would have won such universal approval that Mr. Brownell would not have dared discharge him. Having bowed to the dictates of the Attorney General and having permitted his organization to be dragged into this political investigation, he has inevitably lowered the standing of the one organization that has stood between the people of the United States and the Communist conspiracy. If he continues to permit this organization to be used for political ends as is the case in the present investigation in Cobb County, he will inevitably destroy this great organization. The Attorney General must take a major portion of the blame for this prostitution and weakening of the organization which has, in the past, enjoyed the highest confidence of the people of America. But this confidence and respect cannot be expected to continue if the organization is to be used for political purposes and to try to garner the vote of the NAACP and its followers by interfering with the courts of a sovereign State in the administration of justice.

There are other serious implications and I warn the NAACP now and those who do its bidding, that if it continues its frantic and insane efforts to wipe out all racial lines in the South in the hope of seeing the blood of the two races mingled in a mongrel race, it will see the blood of the two races mixed, but not in

future generations, but rather in the gutters and streams of our land.

Your speaker has never been a member of the Ku Klux Klan; and the law-abiding and right-thinking citizens of my State and the Southland as a whole, have condemned such organizations and have succeeded in driving them out of existence and in putting an end to lynchings in the South. But if those who pose as the friend of the Negroes continue to try to interfere with the orderly process of the courts of the State in their efforts to protect the women of the South from the beasts who attack them, the white men of the South and even the good Negroes in the South will respond in a manner that will be surprising to the NAACP. If we cannot protect through the courts, because of interference by the Federal Government, our southern womanhood from the rapists, and if we cannot protect our citizens from the comparatively few Negro criminals, I will join with all the good people of my State and the Southland in finding a way to protect them. Again this is not a threat but a warning. The State of Georgia does not intend to submit passively to interference on the part of the Federal Government with the administration of its criminal laws. And those of you who are not from the South had best take warning that if it can happen to us in the South, it can happen to you, if a politically minded Department of Justice thinks it will promote its political welfare.

In conclusion, Mr. Speaker, I am proud of the State of Georgia's system of courts and its administration of justice. There has never been any real challenge to its fairness. I have been a solicitor general for 6 years myself. I was a prosecuting attorney when I was elected to this House. I know that the rights of the colored race are protected.

I have seen juries take the evidence of a Negro against a white man. I have seen them find a white man guilty of assault upon a Negro.

I heard one old colored man tell most graphically about how a white man had plunged a knife into him, and he described how that thing was twisted in his chest. The white man thought he had killed him and left him for dead. The jury convicted that white man, as it should have done.

In Georgia the rights of the defendant are really protected. Of course the defendant has two strikes for every one the prosecuting attorney has in striking a jury. In addition, he can make an unsworn statement on the stand and cannot be cross-examined, and the judge has to charge the jury that they may believe that unsworn statement in preference to the sworn testimony.

I, on one occasion, saw a colored man on trial for shooting at another. He was just as guilty as could be, but he made such an appeal to the jury, making a much better speech to the jury than his lawyer made, that they acquitted him. They took his unsworn statement because they were intrigued by his humor and his ability to express himself.

So, as I say, I am proud of the record of the State of Georgia in its administration of justice.

Mr. FLYNT. Mr. Speaker, will the gentleman yield?

Mr. LANHAM. I yield to the gentleman from Georgia.

Mr. FLYNT. Like my colleague from Georgia [Mr. LANHAM] and also my colleague from Georgia [Mr. FORRESTER], before being elected to the House of Representatives of the United States I served as a solicitor general of the State of Georgia. In fact 8 of the 10 Members of the House of Representatives from Georgia have served either as superior court judge, superior court solicitor general or as a member of the bar and as an officer of the courts of Georgia. I commend my colleague the gentleman from Georgia [Mr. LANHAM] for bringing the attention of this body to the unwarranted and unprecedented action by the United States Department of Justice, which he has so well and so ably referred to in his remarks.

Mr. Speaker, I support the position which has just been taken by my colleague, the gentleman from Georgia [Mr. LANHAM]. The Justice Department of the United States, by and at the direction of the Attorney General, Mr. Brownell, and an Assistant Attorney General, Mr. Olney, has brought about an action, referred to in detail by my colleague, the gentleman from Georgia [Mr. LANHAM], which is a direct invasion of the sovereignty of the State of Georgia and which is an affront and an insult to our system of jurisprudence, and a personal insult to the distinguished judge—Hon. James T. Manning— and solicitor general—Hon. Luther C. Hames, Jr.—of the superior court of Cobb County, Ga., both of whom I know well and for whom I have the very highest admiration and regard.

Recently, the Supreme Court of Georgia in the case of *Amos Reece* v. *The State* (211 Ga. 339) affirmed a death sentence imposed by a jury in the superior court of Cobb County. Upon writ of certiorari to the United States Supreme Court, this latter Court in an unprecedented procedure went wholly outside the record and transcript of the case and found imaginary procedural errors, not real errors which in fact existed and were shown to exist by the certified record in the case but imaginary errors which were conceived and born in the fragmentary imagination of one or more of the Justices. In that opinion of the United States Supreme Court, the Court said that an error might have been committed when such an allegation did not appear in the statement of the case nor in the assignments of error—and they could not have so appeared because they did not so exist.

Among other things the laws of the State of Georgia, on the question of jury selection, provide as follows:

59–101. (813 P. C.) Jury commissioners; appointment; number; qualifications; terms; removal: In each county there shall be a board of jury commissioners, composed of six discreet persons, who are not practicing attorneys at law nor county officers, who shall hold their appointment for 6 years, and who shall be appointed by the judge of the superior court. On the first appointment two shall be appointed for 2 years, 2 for 4 years, and 2 for 6 years, and their successors shall be appointed for 6 years. The judge shall have the right to remove said commissioners at any time, in his discretion, for cause, and appoint a successor. (Acts 1878–9, p. 27; 1887, p. 52; 1901, p. 43.)

59–103. (815 P. C.) Same; oath, entry on minutes of court of ordinary: Jury commissioners, before entering on the discharge of their duties, shall take and subscribe before the ordinary of their respective counties, the following oath which shall be entered on the minutes of the court of ordinary, viz: "You shall faithfully and impartially discharge the duty of jury commissioners for the county of ——— in accordance with the constitution of this State, to the best of your skill and knowledge; and the deliberations and counsel of the jury commissioners, while in the discharge of their duties, you shall forever keep secret and inviolate unless called upon to give evidence thereof in some court of justice of other legal tribunal of this State. So help you God." (Acts 1832–3, p. 101.)

59–104. (817 P. C.) Same; clerk of superior court as clerk of the board; oath, duties: The clerk of the superior court shall be the clerk of the board of commissioners, and shall perform all the clerical duties required by law. Before entering upon the performance of his duties as clerk of said board he shall take an oath, before the ordinary, to faithfully discharge his duties as required by law, and that he will never divulge, any of the proceedings and deliberations of the jury commissioners, unless compelled to testify thereof in some court in this State. (Acts 1878–9, p. 28; 1882–3, p. 101.)

59–201. (811 P. C.) Qualifications of grand jurors; incompetency of certain public officers to serve: All citizens of this State, above the age of 21 years, being neither idiots, lunatics, nor insane, who have resided in the county for six months preceding the time of serving, and who are the most experienced, intelligent, and upright persons, are qualified and liable to serve as grand jurors, unless exempted by law: *Provided, however,* That county commissioners, tax receivers, tax collectors, members of the county board of education, county school commissioners, ordinaries, and county treasurers shall be incompetent to serve as grand jurors during their respective terms of office. (Constitution, art. VI, sec. XVIII, par. II (sec. 2–4502), Acts 1887, p. 53.)

59–202. (812 P. C.) Number of grand jurors: A grand jury shall consist of not less than 18 nor more than 23 persons. (Cobb, 547. Acts 1869, p. 140.)

59–701. (856 P. C.) How drawn and summoned: Petit juries shall be selected, and their names placed in a box, as provided in sections 59–106 and 59–108. At the same time, and in the same manner, that grand juries are drawn, the judge of the superior court shall draw out of the same compartment of the jury box 36 names to serve as petit jurors for the trial of civil and criminal cases; and such petit jurors shall be summoned in the same manner as is provided in section 59–206 for summoning grand jurors. (Acts 1869, pp. 139, 140; 1878–9, p. 27.)

59–703. (857 P. C.) Panels, how made; procedure where parties do not agree on panel; striking jurors: The judges of the superior courts, at each term, shall, from the petit jurors, have made up 2 panels of 12 jurors each, which shall be known and distinguished as panels "number one" and "number two"; all cases in said courts shall be tried by one or the other of said panels if the parties shall agree upon a panel. If the parties shall not agree upon a panel, the clerk shall furnish the parties or their attorneys a list of both panels, from which the parties of their attorneys may strike alternately until there shall be but 12 left, which shall constitute the jury to try the case. In all cases the plaintiff shall have the first strike. (Acts 1869, p. 141.)

59–704. (858 P. C.) Parties entitled to full panels; filling panel with tales jurors: In civil cases and cases of misdemeanors in the superior court, each party may demand a full panel of 24 competent and impartial jurors from which to strike a jury, and when one or more of the regular panel of traverse jurors shall be absent or for any reason disqualified, the presiding judge, at the request of counsel for either party, shall cause the panel to be filled by tales jurors to the number of 24, before requiring the parties, or their counsel, to strike a jury. (Acts 1878–9, p. 145.)

59–706. (860 P. C.) Oath of panels of jury: Each panel of the petit jury shall take the following oath: "You shall well and truly try each cause submitted to you during the present term, and a true verdict give, according to the law as given you in charge, and the opinion you entertain of the evidence produced to you, to the best of your skill and knowledge, without favor or affection to either party, provided you are not discharged from the consideration of the case submitted. So help you God." (Acts 1869, p. 141.)

I regret to lengthen the record and belabor you who might be listening with an enumeration of these code sections, but I want them made a part of the record at this time so that anyone interested might know the statutory requirements and procedures which are provided for and followed in the courts of my State.

We are proud of our courts and the constitutional and statute provisions and system of jurisprudence under which the courts of Georgia are operated. I have practiced considerably in the courts of Georgia, other States, and in the district courts, circuit court of appeals, and Supreme Court of the United States since 1938, and I might add that I was quite active in both office and courtroom practice until my election to Congress—excepting, of course, the time I served in the Armed Forces of our country, and even then I performed my full share of duty as trial judge advocate, trial counsel, defense counsel, and member of many general and special courts-martial; and I believe that I am qualified to compare Georgia courts with not a few but with many others.

Of all the courts in which I have practiced, and all the others which I have seen in operation, there is none which more zealously protects and defends the rights of the accused and—and I emphasize—the rights of the victims, too, than do the courts of the State of Georgia, without fear of favor, and without regard to the race, creed, or color of either the accused or the victims.

I am devotedly proud of my State and its people, and I am equally proud and jealous of the courts of my State and our system of law and jurisprudence. They need no defense from me or anyone else, but I would be derelict in my duty as an American citizen, a Georgia citizen, and a Member of Congress from Georgia, if I did not here and now openly and without apology denounce the unprecedented arrogation of powers unto themselves by the Supreme Court of the United States in its recent decision in the Reece case and by the Department of Justice in its unwarranted encroachment upon the prerogatives and duties of the superior court of my State.

I denounce these actions, and I condemn them as usurpations of power by the Federal judiciary and Federal Justice Department which are more reminiscent of Germany under Hitler and Russia of today than they are of orderly procedure under the constitutional Government of the United States of America.

Mr. Speaker, I call upon you and upon every Member of this House to solemnly consider the full impact of what has happened in this case. If the Supreme Court and the Justice Department of the United States can drive a wedge into the court system of the State of Georgia, not on facts which really exist but upon pure figments of the imaginations in the minds of utopian dreamers, and thereby weaken or seek to destroy the judicial and court system and rules of law and procedure of our State to any degree, however small, and go unchallenged by us, then the next step by arrogant, power-mad groups, will be to seek to break down and destroy every last and remaining vestige of local self-government and local self-determination.

Never send to know for whom the bell tolls, it tolls for you.

Mr. FORRESTER. Mr. Speaker, will the gentleman yield?

Mr. LANHAM. I yield.

Mr. FORRESTER. Mr. Speaker, I wish every Member of the House of Representatives were here on this occasion—particularly do I regret that not more of the lawyer Members of this body, of whom there are so many, are not present at this time. I believe the Members of the House know the gentleman from Georgia [Mr. LANHAM] and I believe every one of them will agree that he is as even-tempered a man as there is in this distinguished body. Before coming to the Congress that gentleman was a prosecuting attorney in the State of Georgia, and, I believe, in fact, I know, Mr. Speaker, that he represents and typifies our courts in the State of Georgia. As a matter of fact, Mr. Speaker, I would like to put our Georgia delegation on trial before the bar of judgment of the Members of this House, and let the House say whether we are even-tempered and fair. Actually, when you see the Georgia delegation, what you are really seeing is a delegation which composed the courts of Georgia before coming to Congress. I was a prosecuting attorney for 27 years. The gentleman from Georgia [Mr. FLYNT] is also a veteran prosecuting officer. The gentleman, Mr. DAVIS is a veteran jurist, in fact, the Georgia delegation are almost all veteran lawyers. I gladly put each one of us on trial and ask all of them—at any time did we deny any prisoner before the bar his constitutional rights? Did we ever fail to give any defendant a fair trial? I throw that out to the entire NAACP and the Anti-Defamation League and the other busybodies and people who are engaged in destroying law and order in the United States of America. Mr. Speaker, this is one of the saddest days that has ever occurred since this country came into being because we now have the unfortunate situation where the Justice Department of the United States has become particeps criminis in an attempt to destroy all of our landmarks and all of our law and all of our order. I say that because of the fact I was a prosecuting attorney for 27 years and I make the charge and I dare them to deny it—the only purpose they could possibly have in interfering with our Georgia jury system is either to prejudice the case now pending before the court, and I say shame—shame, for never can they make the charge or point their finger at any prosecuting attorney or judge in the State of Georgia and say that that has ever occurred. We do not prejudice cases by conduct. Disgraceful—yes, disgraceful. If the attorneys for the Justice Department were running for office in our State, the people of Georgia would spew them out of their mouths—they would never win a single election. The only purpose they could possibly have in interfering here, is, as I have said, either to prejudice the case that is now pending before the courts or to free a confessed rapist who was already in the penitentiary for two other sexual offenses. There is no doubt about his guilt. It is only the appeasing of people in this country who have no interest whatsoever in the preservation of this country, and are concerned only with their selfish ends.

I think all of our Members from Georgia can maintain their equilibrium, and we are deserving of the support and assistance of all Members of this Congress. They should join with us and say to the Department of Justice, say even to the Supreme Court, "We simply will not tolerate a decision holding that a person must be granted a new trial because he had no attorney furnished him before the indictment."

Mr. Speaker, after 30 years in the practice of the law, I know it was not uncommon for defendants not to have an attorney until after they were indicted. If there was no indictment they hired no attorney. It is in contrast with the law, in contrast with order, and in contrast to public decency; and shame, shame it is how low the Supreme Court of the United States and the Department of Justice has fallen.

I love the law as a mother loves her first born. It was good to me, and I get down in sackcloth and ashes because I see a movement today that will destroy our courts, the only medium where the vicious and the meek can come together on equal terms—a sad thing, deplorable day in America.

Yes, I say to the gentleman from Georgia, we hope we can maintain our courts, and other States can maintain theirs. But—if rape is no longer a serious consequence to the Justice Department, and its concern is only to kowtow to groups having no regard for law and decency, we will not take it lying down.

Mr. DAVIS of Georgia. Mr. Speaker, will the gentleman yield?

Mr. LANHAM. I yield to my colleague.

Mr. DAVIS of Georgia. Mr. Speaker, I want to compliment the gentleman from Georgia [Mr. LANHAM] upon the manner in which he has presented the almost unbelievable set of facts which he has just called to the attention of the

House. This is just one more in a series of events which demonstrates beyond question that there are some people who still hate the South.

I remind the gentleman that some 3 years ago a case arose in Pennsylvania involving another Negro who had escaped from the penitentiary in the county where this prosecution occurred, Cobb County, Ga. In that particular instance there was no race question involved insofar as an offense being committed by a member of one race against a member of another race. In that case a Negro man had murdered his common-law wife and did not deny his guilt. He had come into court confessing his guilt, but under the procedure prevailing in the State of Georgia he had entered a plea of "not guilty," because the solicitor general and the judge had only one means of giving him a sentence of life imprisonment for the offense of murder. In the State of Georgia, if there is no recommendation for mercy, it is mandatory upon the judge to impose a sentence of death by electrocution. In that case they permitted the defendant to enter his plea of "not guilty," and the jury returned a verdict upon the facts, finding him guilty, with a recommendation for mercy. He was sentenced, and there was nothing irregular whatsoever about the trial. He went to the penitentiary to serve his sentence and he escaped and fled to Pennsylvania. In Pennsylvania he was apprehended, and the State courts of Pennsylvania, both the trial court and the superior court denied his application for habeas corpus, holding that he would have to return to Georgia to serve his sentence. He then filed a petition in the United States district court, and the trial judge in that court likewise held that there was no substance to his plea and that he must return to Georgia to serve his sentence under this valid court procedure. But it got up to the third circuit court of appeals, and one Judge Biggs wrote one of the most astounding, outrageous opinions which I have ever heard, holding that the State of Georgia was known to be so cruel to its prisoners that anyone who escaped was entitled to remain free. He handed down a decision holding that this defendant should be freed.

When that outrageous, unheard of, unspeakable decision was rendered in circuit court of appeals by this Judge Biggs I made a speech on the floor of this House on May 20, 1949, pointing out that such decision would become no precedent, because no court worthy of the name would ever have rendered it, and no court worthy of the name would ever follow it. The case went to the Supreme Court, and the Supreme Court reversed it and sent the defendant back to Georgia to serve his sentence.

This is simply one more instance to show that there is a concerted effort, particularly on the part of this Department of Justice to which the gentleman points eloquently, to ignore the law, to pander at any time and all times to this radical organization, the National Association for the Advancement of Colored People, many of whose officers have been shown time and time again to have been members of Communist-front or other subversive organizations. It is simply an attempt by cheap politicians to pander to that group and those whom it represents in the effort to secure votes. I do not think they would be successful—and that is one thing which makes it all the more disgraceful, as they go to such lengths to pander to these vocal minority pressure groups purely for political purposes.

Mr. Speaker, the South today is facing its second reconstruction period. The Supreme Court with its fraudulent attempts to usurp legislative powers and the White House with its dictatorial Executive orders are teaming up to destroy States' rights and local self-government. This is another instance of the use of that power.

We were successful in preserving our constitutional rights in the first reconstruction period; they are in the balance again. This instance which the gentleman has just given to us here in the House emphasizes the need for the people who believe in States' rights and local self-government to shake off lethargy and indifference to these attempts to destroy States' rights and local self-government, and to organize strongly, to organize closely, to defeat such attempts as this on the part of would-be Federal dictators to go into our States and our counties under such a fraudulent, disgraceful excuse as has been used in this case and to interfere with the orderly processes of our courts and the administration of justice.

I compliment the gentleman on bringing this matter to the attention of the House and the country, and I join him in the protest which he is making.

Mr. LANHAM. I thank the gentleman from Georgia for his contribution.

Mr. Speaker, I yield back the balance of my time.

SPECIAL ORDER GRANTED

Mr. BURLESON asked and was given permission to address the House for 5 minutes today, following the other special orders.

UNWARRANTED INTERFERENCE IN STATE AFFAIRS

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Georgia [Mr. BROWN] is recognized for 10 minutes.

Mr. BROWN of Georgia. Mr. Speaker, I want to congratulate the gentleman from Georgia [Mr. LANHAM] for his presentation of the matter which he has just spoken of.

The Atlanta Constitution has revealed in its January 3, 1956, issue that Mr. J. K. Mumford, special agent in charge of the Atlanta office of the FBI, has admitted that he is conducting an investigation of the methods of selecting jurors in a State court in Georgia under orders from the Department of Justice in Washington.

This unwarranted interference in State affairs is a reflection on every official and every citizen of the State of Georgia.

The exact statement of the FBI agent is that "Warren Olney III, Assistant United States Attorney General, ordered us to investigate all the facts surrounding the choosing of the jurors in Cobb County and we are carrying out his orders."

What purpose does the United States Department of Justice seek to serve in interfering with the legal processes and usurping the rights of the people of the State of Georgia? Never before has there been such interference in State affairs by an executive department of the Federal Government.

Are our local citizens to be allowed to live under their own State constitutions, to pass their own laws, to worship according to their own conscience, to educate their families, and to provide for an orderly community life by protecting the innocent against the violators of the laws?

Are we to profit nothing from the abuse of the police powers by the totalitarian governments, with the resulting enslavement of so much of the world population through their abuse of the police powers?

As a practicing attorney, I was closely associated with the State courts for many years. I had thought that our system of justice had worked well. I have always been proud of our jury system and of our courts in Georgia, which is not unlike the courts of the various States of my colleagues. It is a great public contribution when men leave their jobs and businesses to assume the obligation of public service through jury duty. There is no greater opportunity for community service, and no greater contribution to the preservation of law and order.

Our judges and lawyers have made great contributions to our judicial system, and I can think of no group of citizens who have devoted more of their time without compensation than our lawyers in order that every individual who appears before the bar of justice is adequately represented. There is no distinction between the persons who have appointed counsel. Every citizen is entitled to and receives legal representation without regard to his financial standing or ability to pay.

A court appointed jury commission makes up a list of jurors every 2 years from lists of taxpayers, some of which are put into the petit jury box and some of which are put into the grand jury box. Under this system, which is in accordance with the constitution and the laws of the State of Georgia, everyone who is brought to trial has the benefit of a fair and impartial jury. Those who live in Georgia know this to be true, and it is only through outside interference that any question of jury selection would arise in Georgia.

This incident should cause the Congress to once again reexamine the encroachment of the Federal Government into State affairs through judicial processes and by other means. Through heavy taxation by the Federal Government, leaving small sources of revenue to the States, the Federal Government is being placed in a position to restrict the States in the performance of functions which can best be performed at the local level.

Let us not forget that the Founding Fathers believed not only in a balance of powers between different branches of

the Federal Government, but also believed in a restriction on the abuse of Federal power through the exercise of certain governmental functions by the various States.

I happen to believe that local citizens in my State and every other State are quite capable of conducting their own local self government, and I further believe that the State courts should forever remain as a part of local government, and free of Federal control, as the best means of insuring that these courts mete out justice.

This would be an excellent time for our Federal courts to return to the practice of rendering judicial decisions, for our Federal courts to again follow judicial precedent in rendering decisions, and for our Federal courts to confine their activities to judicial decisions and leave to Congress the business of writing legislation, and to stop rendering sociological decisions as was done by the Supreme Court in the Segregation case. This would also be an excellent time for the Department of Justice to confine its activities to those functions which properly belong to the executive branch of the Federal Government, and to stop interfering with the judicial processes of the States. This interference in Georgia today, if allowed to continue will not be confined to any State or any section.

THE SOUTH'S CASE FOR SEGREGATION

The SPEAKER pro tempore. Under previous order of the House, the gentleman from South Carolina [Mr. RIVERS] is recognized for 20 minutes.

Mr. RIVERS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS. Mr. Speaker, some of the facts about desegregation—about integration, call it what you please—are just starting to come out. Until rather recently, the issue of desegregation, the issue of the Supreme Court of the United States living the daily lives of the people of our Southern States, has not been dealt with justly by the Nation's daily newspapers and by our news magazines. Only one side of this picture has been presented, with the Southern States of our land portrayed as the Simon Legrees of a modern era, a picture completely out of line, completely out of focus with the facts.

Today, Mr. Speaker, I wish to commend to the attention of all the Members of the Congress of the United States the great article entitled "The Southern Case Against Desegregation," written by Mr. Thomas R. Waring, editor of the Charleston News and Courier, and printed in the January issue of Harper's magazine.

The News and Courier is one of the oldest and greatest newspapers of our land, certainly one of the most forthright and plain spoken, certainly one of the last outposts of free journalism in an era when some of our publications print only their own viewpoint or the news as it fits in with their viewpoint.

The News and Courier is printed daily in my home city of Charleston, S. C., and it consistently every day, every week, prints the news and states the facts regardless of the consequences. In its forthrightness, this newspaper and Mr. Waring in particular, as its editor, consistently backs up the factual efforts of its reporters. In short, the courage of the News and Courier runs deep and it runs consistently and reporters who bring in the facts and whose facts are printed have the assurance the boss will never let them down.

Now we have before us another example of the forthrightness of this famous old daily newspaper, in the form of Mr. Waring's article in Harper's magazine.

Desegregation has become the prize political football of our time, motivated chiefly by political ax-grinding, by politicians seeking the votes of the Negroes of the North and West and East.

Mr. Waring gets right down to the facts when he tells why the parents of white children in the South object to integration with Negro children in the public schools.

Mr. Waring cites the low health standards of the Negroes, low despite increasing education and consistently higher expenditures for public health. On the side of health, Mr. Waring says:

> The incidence of venereal disease, for instance, is much greater among Negroes than among whites.

Next, Mr. Waring deals with home environment of the Negroes of the South and with their marital habits, and of these habits, he says:

> On the average, 1 southern Negro child in 5 is illegitimate.

The next reason Mr. Waring gives as to why white parents object to their children going to school with Negroes is because of Negro crime. And, he says:

> For many years crime in the South has been more prevalent among Negroes than among white people.

The final reason listed by our distinguished Charleston editor is intellectual development of the Negro. He pointed out that the United States News & World Report revealed that in Washington colored children are about two grades behind the whites in attainment. Mr. Waring says this discrepancy, he believes, "is about par for other communities."

But, Mr. Speaker, Mr. Waring does not stop here. He goes on to say that "some advocates of integration say the way to cure these differences is to let the children mingle so that the Negroes will learn from the whites. The trouble with this theory is that even if it works, a single generation of white children will bear the brunt of the load. While they are rubbing off white civilization onto the colored children, Negro culture will also run off onto the whites."

Mr. Speaker, I concur heartily with the statement of Mr. Waring that "slavery is so long in the past that nobody thinks of it any more" down South. I should add that nobody thinks of it any more but the professional troublemakers, the professional integrationist, the people who are pushing the Southern Negro ahead entirely too quickly and making it more difficult than ever for Southern States to accord the Negro the well reasoned consideration and the gradual improvement of his racial lot that brings him forward from his days of servitude.

Too little has been said, entirely too little written about the fine things that Southern States have been doing to help their Negroes, to improve their educational facilities, to raise their economic and cultural status, all within the framework of segregation that contributes to a peaceful society in the South.

I well recall from some years ago the article in the Saturday Evening Post by Mr. Jack Alexander, the well-known writer, who authored a series on life in American cities in all parts of the country. Mr. Alexander went to Raleigh, the capital city of our sister State of North Carolina, and there he was tremendously impressed by the freedom enjoyed by Negroes, by the opportunities there for them as well as elsewhere in the South.

In my own State of South Carolina our Negroes enjoy their freedom and their relations with the whites have been peaceful, constructive and forward-looking. At least, they were, until the Supreme Court of the United States nullified States' rights.

Mr. Speaker, I wish to commend Thomas Waring on his excellent article in Harper's Magazine, and to hold it up to Congress and the Nation as one of the few fact-finding articles thus far published anywhere in our country on the segregation issue.

Mr. Waring says that the attitude of the press in our great cities outside the South is almost entirely one-sided on the racial issue, that objective reporting has been abandoned, and that for facts it frequently substitutes propaganda.

And, the editors of Harper's Magazine are to be commended for printing Mr. Waring's revealing article. The editors of Harper's do not agree with Mr. Waring, but they accord him a hearing before the Nation. In an editorial in the same issue, the editors pointed out that "so far there has been almost no national discussion between the men of good will on each side of the issue. Until such a dialog can be stated, the angry men will dominate the field."

Certainly more light needs to be focused on the segregation issue, on the implications of the Supreme Court's willful wrecking of States rights. In Mr. Waring's article, the facts are there on why southern whites do not want their children to go to school with Negroes. Those facts are incontrovertible, and the Negroes know they are true. Yet, the troublemakers of both races, the leaders of the National Association for the Advancement of Colored People and the white vote-seeking advocates of desegregation are trying to lead us onward down the road to racial chaos and strife.

I say to these troublemakers, Mr. Speaker, that the white people of the South are not taking this situation lying down and that we have literally just begun to use our resourcefulness to fight for the privilege of still choosing our own associates, in schools and in our private

lives. These troublemakers have never told the Negroes that in the main they and all the people of other races can go only as far socially and in education as others are willing to accept them, and that the Negro still must strive to win acceptance on his own and not by the force of Federal judicial usurpation of the powers of local and State governments.

In conclusion, congratulations to a great newspaper editor, Thomas R. Waring, for his article in Harper's magazine, and may his first article on the issue of desegregation not be his last. I commend the reading of that article, carefully, by all men of good will. I thank you.

Mr. Speaker, under leave to extend my remarks, I include herewith the article appearing in Harper's magazine of this month:

THE SOUTHERN CASE AGAINST DESEGREGATION

(By Thomas R. Waring)

Although the Supreme Court has declared that separation of the races in public schools is unconstitutional, few white southerners are able to accept the prospect of mingling white and Negro pupils. Resistance to the Court decree is stiffening throughout the region.

Many white northerners are unable to understand the depth of feeling in the Southern States, whose area is about a sixth of the Nation and whose population is roughly a fourth of the total. The purpose of this article is to try to put before the open-minded readers of this magazine the point of view of the southerner—whom the rest of the United States apparently cannot believe to be open-minded at all on the subject of race.

At the outset it is only fair to warn the northern reader that he may be infuriated long before he reaches the end. This, I suspect, is just as inevitable as the outraged feelings of the southerners when he reads the northern press with its own interpretation of the American dilemma. Both sides have been shouting at each other so loudly that it is difficult any longer to hear facts through the din of name-calling. If, in the course of speaking for the South, I should raise blood pressure among some northerners, I apologize for causing pain—with the hope that I may be able to reach northern minds that are truly open so that some good may come along with the discomfort.

The reader outside the South may, unfortunately, react in still another way. He may find it difficult, if not impossible, to believe much of what I say. To this I can only reply that as editor of a South Carolina newspaper with a circulation of 56,000, with 28 years of journalistic experience in both the North and the South, I have had to be in possession of accurate information on this as on any other subject covered in my work. Across an editor's desk pass, day by day and year after year, reports, letters, statistics—in other words, facts. By means of these facts, plus personal conversations with people from all over the world, an editor manages to keep in touch with public opinion.

It is the public opinion of the South that I am about to report. That opinion is a fact. It exists, and can be demonstrated. What I am saying is documented by facts and statistics. If these should seem to the reader to add up merely to bias, bigotry, and even untruth, I shall regret it. Facts, however, remain facts.

One of the reasons these facts may be unfamiliar—and therefore incredible—is the almost unanimous attitude of the national press—daily and weekly—toward the subject of race. I read many newspapers and news magazines, and people send me clippings from others that I do not see regularly. From my observation, the testimony these publications print is almost entirely one-sided. While less violent than the Negro press—which understandably presents only the militant antisegregation case—the metropolitan press almost without exception has abandoned fair and objective reporting of the race story. For facts it frequently substitutes propaganda.

Furthermore, with the exception of a small coterie of southern writers whom northern editors regard as "enlightened," spokesmen for the southern view cannot gain access to northern ears. This article will be one of the few of its kind published in a magazine of national circulation. The South, alas, lacks a magazine or other organ with nationwide distribution.

Perhaps my first assertion of a seldom realized truth will be the most difficult to believe. This statement is that white southerners of good will—and the percentage of decency runs about the same in the South as anywhere else—favor uplift of the Negro, and that these white southerners are in the vast majority. If it is impossible to prove the percentage of decency among southerners, it is equally impossible to show that people in the North—or any other region—have a monopoly of it. But the South fears, and with reason, that the uplift is being forced at too fast a pace. The vagaries of custom and race taboos have many inconsistencies. The rules of segregation, both written and unwritten, change with conditions. And the sudden rewriting by the Supreme Court of regional laws and State constitutions has stirred as much resentment in southern breasts as would be aroused among northerners if suddenly their own freedom from race restrictions were denied by Federal fiat. (Do I hear a muffled cheer from one or two northerners who may take a dim view of mingling the races?)

Interference with sovereignty usually produces rage. In matters of education, the States long have been sovereign—until suddenly nine men have held otherwise.

Is it any wonder that the southerner is bitter over what he believes to be a flouting of the Constitution for political reasons?

Aside from legal questions—and they are deep and broad—the southerner believes that as a practical matter, he is better equipped by experience to cope with race problems than people from other regions, no matter what their intellectual or political attainments. One of the proofs that this belief is founded not merely on pride or emotional prejudice lies in the fact that northerners who spend some time in the South—not tourists or weekend visitors, but people who make their homes here—come rather sooner than later to agree that this is so. These transplanted northerners come to see that there are far more bonds of friendship and active, productive good will between the white southerner and his Negro neighbor than they had believed—or could believe until they became eye-witnesses and partakers of this relationship.

Although the South is both willing and eager to have the Negro earn greater acceptance on many levels—especially economic—it does not consider, for reasons that I shall submit, that mixed education is the way to achieve this acceptance—certainly not at this stage of affairs.

What may lie in the distant future is more than any of us can predict with accuracy. Southerners know that race problems are as old as history. While views and philosophies may change through the ages, some basic truths stand out like the Ten Commandments. Southerners are not yet ready to accept an eleventh, "Thou shalt not protect the purity of thy race."

THE CLASH OF CULTURES

Before going into the actual reasons for the southerner's objections to mixed education—before asking the burning question, how can the races best live together—let us examine for a moment the pattern of separation. It is a pattern that Thomas Jefferson, Abraham Lincoln, and at one time Dwight D. Eisenhower have favored as best for both races. In 1888, Henry W. Grady, Atlanta editor—described by Don Shoemaker of the Southern Education Reporting Service as a southern liberal of his time—summed up the situation as follows:

"Neither provincialism nor sectionalism holds the South together but something deeper than these and essential to our system. The problem is how to carry within her body politic two separate races, and nearly equal in numbers. [Since Grady spoke, the whites in the South have come to outnumber the Negroes 4 to 1, but the proportions vary greatly by neighborhoods.] She must carry these races in peace—for discord means ruin. She must carry them separately—for assimilation means debasement. She must carry them in equal justice—for to this she is pledged in honor and gratitude. She must carry them to the end, for in human probability she will never be quit of either."

While Grady's statements were made nearly 70 years ago and therefore are subject to the criticism that they do not reflect modern conditions, to many southerners they are true both now and for the future.

The presence of large numbers of Negroes—especially in the tidewater regions of Virginia, the Carolinas, and Georgia, and the plantation country of Alabama and Louisiana, Mississippi, and East Texas—means that the races necessarily live in intimate daily association. Why, then, should not the children of people who live in the same community—sometimes as close neighbors—attend the same schools

Southerners believe they have valid reasons, aside from prejudice about the color of skin, for their insistence on sending white children to exclusively white schools. Without debating superiority of either race, they are keenly aware of cultural differences. In some ways the standards of white people are none too high. The same economic conditions that have held back Negroes have worked against the whites. The increasing prosperity of the South is removing some of these disadvantages for both races, though not necessarily in precisely the same way.

Whether all the differences will eventually be removed, or enough of them to make mixed education acceptable to a substantial number of white people, the differences are too great at present to encourage white parents to permit their children to mingle freely in school. This has nothing to do with the frequent practice of children of both races of playing together when young, or with cordial relationships in many other contacts of ordinary life.

Volumes could be written on racial differences from many angles, including anthropology and sociology. I shall merely try to summarize five of the differences that most immediately come to the minds of white parents in the South. These are health; home environment; marital standards; crime; and a wide disparity in average intellectual development.

1. Health: Negro parents as a whole—for reasons that white people may sympathetically deplore but which nevertheless exist—are not so careful on the average as their white neighbors in looking after the health and cleanliness of their children. The incidence of venereal disease for instance is much greater among Negroes than among whites.

Statistics to document this statement are difficult to come by, though the statement itself would be generally accepted in the

South. The United States Public Health Service some years ago quietly stopped identifying statistics by races. South Carolina figures, available for 1952–53, give a clue to the situation in that State; it probably is much the same elsewhere in the South. Out of a population 60 percent white and 40 percent Negro, 6,315 cases of syphilis were reported, of which 89 percent were among Negroes. Infection with gonorrhea was found in 6 Negroes to 1 white person, but some physicians report that many cases of gonorrhea among Negroes go unrecorded.

During the same period—1952–53— a campaign against veneral disease was carried on, county by county. A spot check of four representative counties in different parts of South Carolina showed that cases of syphilis were found among 1.3 percent of the white persons examined. This was a fairly constant percentage. The percentage of infection among Negroes ranged in the same counties from 8.5 to 10.8 percent, averaging more than 9 percent.

Fastidious parents do not favor joint use of school washrooms when they would not permit it at home—and there's no use to tell them that it is unlikely that anyone will catch venereal disease from a toilet seat. They just don't want to take risks of any kind with their children.

2. Home environment: For most colored children in the South the cultural background is different in many ways from that of their white neighbors—and while these differences may have various explanations, they add up in the public's mind as racial. Slavery is so long in the past that nobody thinks about it any more, but the master and servant, or boss and laborer, relationship between whites and Negroes is still the rule rather than the exception. The emergence of a middle class among the Negroes has been extremely slow—again, the reasons count for less in the minds of white parents than the fact itself. Indeed, the professional and commercial class among Negroes is so small that its members are in perhaps the most unenviable position of all. They have progressed beyond the cultural level of the vast bulk of their own people, but are not accepted among whites, who fear to let down any dikes lest they be engulfed in a black flood.

Someone may suggest that here is an opening wedge for integration in the schools, by admitting a few well scrubbed and polished colored children of cultivated parents. In reply, let me say that this would be no more acceptable to the colored people than to the whites. The solution, perhaps—as it is among upper-bracket white people who do not send their children to public schools—might be private schools for prosperous Negroes as for prosperous whites. In any case, white people feel that cultural gaps on other levels should be filled in before discussing integrated schools.

3. Marital habits: Among many southern Negroes they are, to state it mildly, casual—even more so, in fact, than among the often-divorced personalities of northern cafe society. Many Negro couples—the statistics are not readily available, for obvious reasons—do not bother with divorce because there was no actual marriage in the first place. Statistics on the results of such casual unions, however, are available. On the average, 1 southern Negro child in 5 is illegitimate. It is possible the figure may be even higher, since illegitimate births are more likely to go unrecorded. Even among Negroes who observe marriage conventions, illegitimacy has little if any stigma.

Many white persons believe that morals among their own race are lax enough as it is, without exposing their children to an even more primitive view of sex habits. Moreover, while these parents do not believe there is any surge of desire among their offspring to mate with colored people, they abhor any steps that might encourage intermarriage. They believe that lifting the racial school barriers would be such a step. Miscegenation has been on the wane of recent years. Whatever mixing of blood may have occurred—and admittedly that was due largely to lustful white men seeking out acquiescent Negro women—has been without benefit of either law or custom. On some levels of society, breaking the racial barriers might lead to mixed marriages. The mixture of races which white southerners have observed in Latin American countries gives them a dim view of legalizing cohabitation with Negroes.

4. Crime: For many years, crime in the South has been more prevalent among Negroes than among white people. Though the northern press no longer identifies criminals by race, white southerners have reason to believe that much of the outbreak of crime and juvenile delinquency in northern cities is due to the influx of Negro population. They believe the North now is getting a taste of the same race troubles that the South fears would grow out of mixed schooling, on a much bigger scale. They want no "blackboard jungles" in the South.

Maintaining order is a first concern of southerners. What they have heard about the fruits of integration in the North does not encourage them to adopt the northern race pattern. In Chicago, 300 policemen have been assigned for a year or more to guard a nonsegregated housing project, with no bigger population than a southern village where a single constable keeps the peace. In the county of Charleston, S. C.—with 190,000 population, nearly half Negro—the total law-enforcement manpower of combined city and county forces is 175.

While the homicide rate in the South is high, it is due in large measure to knifings and shootings among the colored people. Interracial homicide is relatively rare. (One of the reasons why the ghastly killing of Emmett Till in Mississippi made hot news—and some of that news was superheated and garnished with prejudice for the northern press—was the very fact that it was unusual. No lynching, as even most northerners now realize, has occurred in years.)

With racial bars down and rowdies of both races daring one another to make something of the vast increase in daily contacts, opportunities for interracial strife are frightening. Conservative, law-abiding people—and believe it or not, they constitute the bulk of southern whites—are deeply fearful that hatred and bloodshed would increase without separation of the races.

And they know that, in the long run, if there is riotous bloodshed it will be for the most part Negroes' blood. The thin tolerance of the ruffian and lower elements of the white people could erupt into animosity and brutality if race pressure became unbearable. Schools would be a focal point for such disturbance, first among pupils themselves and later by enraged parents. Instead of learning out of books, the younger generation would be schooled in survival—as several northern sources have told me already is happening in some areas of New York, Philadelphia, and Washington, D. C.

5. Intellectual development: Again for whatever the reasons may be, southern Negroes usually are below the intellectual level of their white counterparts. U. S. News & World Report—the fairest nationally circulated publication I am acquainted with in its treatment of the race issue—has reported that in Washington, colored children are about two grades behind the whites in attainment. This discrepancy, I believe, is about par for other communities. In Washington it was found that there were even language difficulties to surmount. The children used different terms for some things.

Some advocates of integration say the way to cure these differences is to let the children mingle so that the Negroes will learn from the whites. The trouble with this theory is that even if it works, a single generation of white children will bear the brunt of the load. While they are rubbing off white civilization onto the colored children, Negro culture will also rub off onto the whites.

Few southern parents are willing to sacrifice their own offspring in order to level off intellectual differences in this fashion. They reason that their children will get along better in later life if they have, as youngsters, the best available cultural contacts. Such an attitude is not, I understand, altogether unknown in the North. Many parents in New York City, for example, make considerable financial sacrifices to send their children to private schools, to spare them the undesirable associations and the low-geared teaching standards of most public schools.

If this sounds snobbish to a northern reader, let me ask you to examine your own conscience. Can you honestly say that you are eager to send your own child to a classroom where the majority of other pupils will be considerably more backward in their studies, and extremely different in social background and cultural attainment? Which would you really put first: your theory of racial justice, or justice to your own child?

THE NEGROES' CRUSADE

In reply to objections to integration by white southerners, someone may ask: What about the Negroes? What do they think?

At the outset, let me say that as a person who has spent most of his life in the South, has known Negroes from earliest childhood, and as a newspaperman has been dealing with race matters every day for many years, I cannot say just what goes on in the minds of the Negroes. Nor do I believe that a white man can put himself in the place of a colored man any more than he can, by taking thought, add a cubit to his stature. Until the school question became agitated in recent years, however, race relations on the whole were good. Since the agitation, relations are not yet bad in a broad sense—but they are not improving by reason of the crusade for integration.

The leadership in that crusade comes from outside the South. It is sparked by the National Association for the Advancement of Colored People. Southerners have reason to believe this this organization has a very large measure of white influence among its leaders. They recognize that both major political parties are courting the Negro vote, which holds the balance of power in key cities of populous Northern States. They are bewildered by the array of power alined on the side of the NAACP in press, pulpit, and politics. The NAACP and its allies seem well supplied with money. They have won legal victories and they are not disposed to compromise on any front. In fact, the NAACP seems—to white southerners—more interested in forcing the Negro into the white man's company than in equipping the Negro to qualify fully for such association.

A small but pointed illustration occurred in Charleston when a white community theater group tried to produce Porgy (the original play, not the opera) with a Negro cast in the city where the story is laid. There was a grave question about how the community, in a time when racial agitation was so bitter, would accept a play performed almost exclusively by Negroes. Many difficulties had to be surmounted in casting and production. But the sponsoring group, in consultation with NAACP and other Negro spokesmen, decided to proceed, and spent a sizable amount of money getting the production under way.

One of the key questions was the seating of the audience. Under South Carolina law separate seating for the races is required. The chairman of the local NAACP chapter agreed in writing, I have been informed, to an arrangement for separate seating by means of a vertical line down the center aisle, whites on one side and Negroes on the

other. At the last moment, with the play already in rehearsal, the NAACP repudiated the agreement.

The Negro cast pleaded with the white sponsors to go through with the production in spite of the NAACP. By this time, however, it became obvious that the delicate circumstances had become too explosive and the production was canceled. A possible good-will gesture, opening a new line of communication, thus was halted because the NAACP would accept nothing less than complete integration—regardless of both State law and local custom.

Whether the NAACP really speaks for the rank and file of Negroes is debatable. Public expressions of opinion from Negroes in the South, other than the NAACP, are relatively few. Some white people feel that a Negro is so accustomed to telling a white man what he thinks the white wants to hear, that they put little stock in whatever the Negro says on race. It would not be hard to believe that, given a choice, a Negro naturally would prefer all restrictions to be removed. That does not mean, however, that all Negroes want to associate with white people. Far from it; many Negroes prefer their own churches and, it stands to reason should be equally satisfied with their own schools, so long as an equal allotment of public money is given them.

While the allotment has not always been equal—Negroes pay only a small fraction of taxes—the sums of money spent on Negro schooling have increased by leaps and bounds. On the average the South spends a greater percentage of its per capita income on schools than other regions, and nowadays the Negroes are getting their share in most areas. One thing is certain: if the schools were integrated, many a Negro school teacher would lose his or her job. Even if the white people would accept mixed pupils—and few apparently would do so—they would insist on white teachers.

Whenever a southern Negro does object to the drive for integration, he is subject to pressure from his own people. Two Negro clergymen—what are known as "local preachers"—recently wrote letters to newspapers in lower South Carolina opposing the mixing of schools. Both were disciplined by their church superiors. Many white people on friendly terms with Negroes are convinced that as a rule, the Negroes are not eager for mixed schools so long as the schools for Negroes are adequate.

BOOTLEG SEGREGATION?

This conviction leads them to hope that a voluntary approach eventually may help to solve the problem within the Supreme Court ruling. Judge John J. Parker, of Charlotte, N. C., senior judge of the Fourth Circuit Court of Appeals, has said:

"It is important that we point out exactly what the Supreme Court has decided and what it has not decided in this [the Clarendon County] case * * *. It has not decided that the States must mix persons of different races in the schools * * *. Nothing in the Constitution or in the decision of the Supreme Court takes away from the people freedom to choose the schools they attend. The Constitution, in other words, does not require integration. It does not forbid such segregation as occurs as the result of voluntary action. It merely forbids the use of governmental power to enforce segregation. The 14th amendment is a limitation upon the exercise of power by the State or State agencies, not a limitation upon the freedom of individuals."

The Alabama State Legislature has set up a new basis for assignment of pupils which does not mention race, though its provisions might tend to keep white and Negro pupils apart. In South Carolina, a committee of 52 representative citizens is circulating a resolution—already signed by many thousands—asking the State legislature to interpose its authority between the Federal Government and local school boards to maintain segregation. Such a move would be based on the 10th amendment to the United States Constitution, reserving to the States and the people all powers not specifically granted to the Federal Government.

These are only two of many tentative plans to get around the Supreme Court's decision by methods of law. Another proposal is revival of the principle of nullification, which States both in the North and South have used in years gone by. A recent example was the public disregard of prohibition. Segregation, perhaps, may be bootlegged in some regions. How that can be done is not immediately apparent—but the resourcefulness of the rum-runners and speakeasies was not foreseen by sponsors of the Volstead Act.

As in prohibition, there is danger that white hoodlums may enter the picture. Sporadic outbreaks of the Ku Klux Klan have been reported. To combat the lawless element, law-abiding white men—who are determined not to yield to pressures they still regard as contrary to the guaranties of the Constitution—have been forming protective organizations. These go under many names. In Mississippi, South Carolina, and some of the other States they are called Citizens Councils.

Much has been said about the adoption of economic pressure as a weapon by these white groups. In some instances Negroes have reported that their sharecropper contracts have not been renewed because they signed petitions to integrate schools. Other forms of pressure have been reported, and in some localities Negroes have retaliated with boycotts against white merchants who were active in the councils. White leaders of the resistance movements repeatedly have said they were not organizing boycotts and pressures against the Negroes and that they are determined there shall be no reign of terror as predicted by some of the Negro spokesmen.

Hodding Carter—one of a handful of southern writers granted access to the national magazines—has predicted that attempts to enforce integration in the public schools of Mississippi would be likely to create violence. White leaders are exploring many other avenues in hopes of preventing strong-arm methods from being tried. They fear also that the very existence of the public schools is in peril. Rather than accept mixed public schools, some white southerners may seek other means of educating their children.

Even if the schools are not abandoned, it seems unlikely that the white people will submit to heavy taxation to operate schools that many of them refuse to patronize. If they are not throttled outright, the public-school systems in some areas may be starved to death. The spread of resistance organizations, far from being the product of demagogs, is at the local level among ordinary people, without big-name leadership. School trustees and other officials are getting the message from the grassroots.

Acceptance of the Supreme Court's order in border States and lipservice in some other quarters have encouraged some advocates to believe that many southern communities soon will yield to integration. While the borders of the old Confederacy may narrow, the determination of white people in areas with heavy Negro population is not relaxing. Not only regions where Negroes predominate by 10 to 1 are rejecting the prospect of mixed schools. Pickens County in Piedmont, S. C., has the smallest number of Negroes (about 1 in 10) of any county in the State; its grand jury—most fundamental of all bodies safeguarding the people's liberty—has gone on record against mixed schools. On Edisto Island, at the opposite side of the State, where a white face looks out of place, insistence on mingling would be almost academic. If any attempt were made to force white children into Negro schools, the white people would move off the island, or find other means of educating their children.

Talk about segregation may promote migration of Negroes from the South. Already thousands have left the cotton fields and villages to seek jobs in northern cities. On the farms, machines have replaced them. With the minimum wage advancing to $1 an hour, southern employers will demand production from their laborers that not all Negroes will be able or willing to supply. These employers also may seek ways to mechanize or to employ white labor. As industries move South, more attractive opportunities for white people are opening.

If the North continues to appeal to Negroes as a land of integration and the South continues to attract white settlers, the racial proportions may grow more nearly equal. Then the North may become more tolerant of the southerners' view of race problems, and the South better able to handle its dwindling Negro problem. Southerners will gladly share the load.

Meanwhile, stripped of emotions, the race problem for both southern whites and Negroes is a practical matter of daily living. The problem has been recognized by thoughtful Americans from the early days of the Republic. It would be foolish to deny that any Negro pupils ever will enter southern white schools. (Some already have.) But it would be equally foolhardy to predict that their numbers will be significant at an early date.

Mr. DAVIS of Georgia. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the distinguished gentleman from Georgia.

Mr. DAVIS of Georgia. The gentleman is doing a great service in inserting the article in the CONGRESSIONAL RECORD. I wish to express my appreciation of that to the gentleman. I should like to ask one question of the gentleman from South Carolina. I believe he stated that the author of the article is a Mr. Waring.

Mr. RIVERS. I am glad the gentleman brought that question up.

Mr. DAVIS of Georgia. I want to ask the gentleman if he is by any chance related to a Federal judge which the gentleman's State had by the same name.

Mr. RIVERS. Yes; he is related. Of course, they do not speak, because they do not have anything to speak about. He is a nephew of that degenerate who has found out that he cannot live in my part of the world, with all of his cronies passing him on the other side of the street. He has gone to that haven, that refuge, New York, where peace, law, and order are the order of the day. They do not have any lynching there. They do not shoot you with machine guns, they do not stab you, they do not ill-treat the Puerto Ricans there. It is a great place.

Mr. DAVIS of Georgia. He can be unsegregated there to his heart's content.

Mr. RIVERS. To his heart's content, yes; because water seeks its own level. And may God have mercy on his miserable soul. This man is a nephew of that degenerate whose absence in my city is much better than his presence there.

Mr. LANDRUM. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield.

Mr. LANDRUM. I want to compliment the gentleman from South Carolina and also to join the gentleman in complimenting my distinguished colleagues from Georgia, Hon. PAUL BROWN and Hon. HENDERSON LANHAM, for the splendid and forceful manner in which they have brought to the attention of this body the invasion of States' rights by our Department of Justice. I would like it to be brought to the attention of this body that the judge of the superior court being investigated by the Department of Justice, under the direction of the Attorney General, is a former Assistant United States Attorney for the United States District Courts in the Northern District of Georgia, who spent many years of loyal and vigorous service in the prosecution of criminals brought into the Federal courts in the northern district of Georgia; and because of his long and outstanding service this gentleman, Hon. James T. Manning, was elected by his people to be judge of the Cobb superior courts. Now, for the Department of Justice of the United States Government to go in and investigate the activities of the State courts first, and this distinguished jurist second, is a reflection not only upon the State of Georgia but particularly upon those people in the superior court circuit who, because of their confidence in him, elevated Mr. Manning to this position he now holds as judge of the superior courts. I thank the gentleman from South Carolina for permitting me this time.

Mr. RIVERS. Let me say to the distinguished gentleman from Georgia that we people in South Carolina do not run from a fight. We will stand side by side with you in your fight to preserve the dignity and the sovereignty of your great commonwealth and when you need help, we are just across the border—we fought before and we killed as many of them as they did of us.

The SPEAKER pro tempore (Mr. PATMAN). The time of the gentleman has expired.

HON. SAM RAYBURN

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Texas [Mr. BURLESON] is recognized for 5 minutes.

Mr. BURLESON. Mr. Speaker, I ask unanimous consent that the special order granted me may be amended so that I may proceed for such time as may be necessary.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BURLESON. Mr. Speaker, as Chairman of the Texas delegation, it becomes my very happy privilege to direct the attention of the membership of the House of Representatives to an occasion tomorrow, which I know you will want to commemorate in some manner. Tomorrow is the birthday of a great American. It is the birthday of our beloved Speaker, SAM RAYBURN. Over the years the records of this House have become full of eulogies and beautiful remarks regarding our Speaker and colleague. From all over the country and from practically every Member of this body, that is every sitting Member as well as those who have pased through the portals of this Hall over the years, have come expressions of love and devotion they have for SAM RAYBURN since he became a Member of this body, and especially during his long tenure as Speaker of the House of Representatives. That feeling for our Speaker and that devotion to him is something we from Texas share with other parts of the country, and is something which people from other parts of the country, knowing him, join with us from Texas in paying tribute.

Throughout this great land SAM RAYBURN holds and deserves the respect of countless millions who recognize his able leadership; his high integrity and unexcelled statesmanship.

In my humble opinion the country should have long ago availed itself of this leadership by placing him in the highest office within the gift of the electorate. But the hour is not yet too late for the Nation to call upon SAM RAYBURN to occupy that great office, because men who know him trust him; they know his ability; they know his devotion to country; they respect his judgment; they feel safe in his leadership.

It is my wish, and I know all join me, in wishing for Speaker RAYBURN a happy birthday tomorrow and many more years of service to his country and his fellow man.

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I am happy to yield to the Minority Leader.

Mr. MARTIN. Mr. Speaker, I would like to join the gentleman from Texas in his tribute to our beloved Speaker. We on this side recognize him as one of the great parliamentarians of all times, a man with equal justice for all; a man who upholds dignity and justice; one who ably upholds the great institution of Congress. Upon his birthday I am happy to join his legion of friends in felicitations. May he be blessed with many more years of good health.

Mr. BURLESON. I am very grateful to the gentleman from Massachusetts.

Mr. COOPER. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Tennessee.

Mr. COOPER. Mr. Speaker, I feel confident that I express the true sentiment and feeling of all Members of the Tennessee delegation in Congress and all the people of the State of Tennessee in joining our distinguished colleague and others in extending our felicitations and hearty congratulations to our beloved Speaker. We take great pride in the fact that SAM RAYBURN was born in Tennessee. He has taken his place among the great of all Americans of all times, and we certainly wish him many happy returns of the occasion on his birthday tomorrow.

Mr. BURLESON. I thank the gentleman for his kind remarks.

Mr. PRESTON. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield to the distinguished gentleman from Georgia.

Mr. PRESTON. Mr. Speaker, I am delighted that I happened to be on the floor when the gentleman from Texas called to our attention the impending birthday of our great Speaker.

As I look back over the past 10 years I have been privileged to serve in the House, I think perhaps the greatest blessing that has come to me has been that I have been privileged to serve with the Honorable SAM RAYBURN, and to serve under him as Speaker. As a matter of fact, it has been my great privilege to serve under two great Speakers during those 10 years, two men who will go down in history as great Americans.

I have often said of our beloved Speaker, SAM RAYBURN, that of all the men I have known in my 47 years, he came nearer to having infallible judgment than any man I have ever known. I have seen him face difficult decisions, and without doubt he would come up with the correct answer with more readiness and inspire more confidence in those who were awaiting his judgment, than any person I have been privileged to know in my lifetime.

I am extremely happy on this day that he is with us for another year. I hope and pray that he may be privileged to be for many years to come; that he will remain strong in body and mind, and continue to shed his wisdom and his guidance among the Members of this great body.

Mr. BURLESON. I appreciate the remarks of the gentleman from Georgia.

Mr. BROWN of Georgia. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield to the distinguished gentleman from Georgia.

Mr. BROWN of Georgia. Mr. Speaker, SAM RAYBURN is one of the finest and greatest characters I have ever known. He is a great American, a true and wonderful statesman.

I hope the future will continue to bring the Speaker good health and much happiness and everything good in life.

Mr. BOYLE. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. BOYLE. Mr. Speaker, on behalf of the dean of the Illinois delegation the Honorable THOMAS J. O'BRIEN, who not later than last night while we were assembled, expressed his profound gratitude to have had the opportunity to associate with our beloved Speaker, I am privileged to say on the floor of the House today that he regards SAM RAYBURN as the No. 1 Mr. America and Mr. United States. As a freshman, watching the Honorable Speaker through last year, I am reminded of that admonition that my dad made to me. He said, "Walk among tall men." He did not mean men who were gifted by reason of stature. He meant men who thought nobly and thought best and thought tenderly. I think in our Speaker we have a man who meets all of those admonitions. I think he represents a real contribution to the United States, and I think he will go down in history as a man who has made

many wonderful accomplishments and contributions to a better world.

Mr. BURLESON. The gentleman's remarks are appreciated.

Mr. LONG. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. LONG. Inasmuch as I seem to be the only Louisianian on the floor at this particular time, I do not wish to let this opportunity pass without having something to say about our beloved Speaker, SAM RAYBURN.

I believe that I can truthfully say that I am joined by every member of the Louisiana Delegation in paying tribute to SAM RAYBURN, and wishing him many more happy birthdays.

I join my colleagues and the minority leader, Mr. MARTIN, in all the good things they have said. SAM RAYBURN is truthfully a great American and is recognized as such by all those who know him.

He has been helpful to many a young Congressman in his first days on this floor, and I for one wish to say that he was very helpful and kind indeed to me, not only as a freshman Member, but at all times.

Mr. RAYBURN has many warm friends in the great State of Louisiana and I join with them and his many friends throughout the Nation in wishing him many, many more happy birthdays, health and happiness.

Mr. BURLESON. I thank the gentleman from Louisiana very much for his remarks.

Mr. CANNON. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I shall be glad to yield to my colleague from Missouri.

Mr. CANNON. Mr. Speaker, SAM RAYBURN is not only one of the great Speakers of the House, not only one of the outstanding statesmen of his time, but he is also one of the most beloved men in public life today.

SAM RAYBURN has served longer as Speaker of the House than any of the long line of great and distinguished men who have preceded him in that high office. Henry Clay, who held the longest service as Speaker up to this time, came to the Speakership through a revolution in American politics brought about by the sudden determination of the Nation to go to war in order to reverse its international policies. Speaker RAYBURN came to the Speakership up through the ranks, slowly, on merit, and on the strength of his invaluable service to the Congress and to the Nation.

When the history of the United States is reviewed, a hundred years from now, Speaker RAYBURN will rank not only as one of the greatest parliamentarians who has ever presided over the House, but he will also rank as one of the men who has exerted a more profound influence in molding thought, legislation, and national policy than many men outside the Presidency of the United States.

We congratulate him that he has reached this eminent position in such excellent health with prospects of many years of service ahead of him, and we wish for him a continuation of the great affection in which he is today held by this Congress and the American people as a whole.

Mr. BURLESON. Mr. Speaker, I thank the gentleman very much for his remarks.

Mr. ROOSEVELT. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from California.

Mr. ROOSEVELT. Mr. Speaker, on behalf of those of us who are rather early in our service in the House I want to take this occasion to express to our beloved Speaker our congratulations.

I think there is probably no other body, legislative or otherwise, in the world where those who come with very little experience can perform their duty as well as we, because we have had the guidance and the benefit of the wisdom and experience of our beloved Speaker. We are deeply appreciative of him, and I hope that God will be very careful of him and keep him with us for many, many years to come.

Mr. BURLESON. I thank the gentleman for his statement.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. I thank the distinguished gentleman from Oklahoma for his courtesy, Mr. Speaker, as I would also like to extend my felicitations to Speaker RAYBURN. He comes second only in my heart and mind to our own Speaker, JOSEPH W. MARTIN.

I have enjoyed service with the Speaker all through the years I have been in Washington, and I have been in Washington for many years. Prior to my own incumbency in the House I always admired his great ability as a legislator, as a parliamentarian. I have enjoyed tremendously his humor. When things have been pretty hot, as they get sometimes in the House when feelings are running high, Speaker RAYBURN's humor has helped us over many a rough spot.

I want personally to express my own appreciation and also the appreciation of the people of my district for the help he has given us. He has helped us whenever he possibly could. I realize that I have often been insistent upon legislation and I appreciate the trials and tribulations he perhaps has gone through as a result of my insistence. It is very fortunate for the Members of the House to have two such great men among us as Speaker RAYBURN and the gentleman from Massachusetts [Mr. MARTIN]. It is a great tribute to both of them that they have served so long and well as Speakers of this great body and at the same time remain the best of friends, each admiring in the other the wonderful traits that they both possess.

May the gentleman from Texas [Mr. RAYBURN] have many, many happy years ahead of him. From the way he looks today I think he could live to be a hundred and easily remain with us as Speaker all of that time—if the Democrats remain in power.

Mr. BURLESON. I thank the gentlewoman from Massachusetts for her very beautiful remarks.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, in joining with my colleagues in extending felicitations to our beloved Speaker, I know that I represent my district in the truest sense of the word. Mr. RAYBURN lives within a few miles of my district. The people I represent know him well and love him. They refer to him affectionately as "Mr. Sam." They agree with me that he is the best qualified man in America to be President of the United States and are hopeful that the next Democratic convention will nominate him.

I love Mr. RAYBURN and I join my colleagues from Oklahoma in saying that we are always happy to have our constituents refer to him as that great Congressman at Large from Oklahoma. We wish him many more years of health, happiness, and outstanding service to this House and to our country.

Mr. BURLESON. I thank the gentleman.

Mr. DOYLE. Mr. Speaker, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from California.

Mr. DOYLE. Mr. Speaker, I am sure that the fact there are only three members of the California delegation on the floor at this time is only because we did not know in advance that this happy occasion was to occur at this hour so that we might have a more adequate opportunity to express our best wishes to the distinguished Speaker of this House, Mr. SAM RAYBURN on this birthday anniversary. So I take the liberty of saying on behalf of all of those from California who have not yet spoken and are not here that I am sure every Member from my great native State wishes our beloved Speaker a very long and happy life as Speaker as well as our beloved fellow American citizen.

We Californians appreciate his fairness and justice in all his relationships with us.

Mr. BURLESON. Mr. Speaker, the remarks of the gentleman from California are greatly appreciated.

Mr. Speaker, I ask unanimous consent that all Members may have the opportunity of extending their remarks at this point in the RECORD in reference to the birthday on tomorrow of our beloved Speaker, SAM RAYBURN.

The SPEAKER pro tempore (Mr. PATMAN). Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. McCORMACK. Mr. Speaker, one of the greatest Americans of all time is our beloved Speaker, the gentleman from Texas [Mr. RAYBURN]. What SAM RAYBURN has done as a Member of the Congress will always be a living part of the history of the United States. It is most fortunate for our country that we have men like SAM RAYBURN in the Congress of the United States during these trying days. His great ability, his years of experience, and his sound judgment have evidenced themselves on many occasions in steering the Ship of State. He is also one of the outstanding sound progressives of the great period of progress starting with the late President

Franklin D. Roosevelt and continuing under former President Harry S. Truman.

To me, SAM RAYBURN is also a close and valued friend. Between us during my years of service there has been a close friendship of a lasting nature. During the past 15 years we have occupied the position of leadership in the House of Representatives. The strong feeling of friendship and respect that I entertain for him is not only evidenced externally but is also possessed by me internally. On the occasion of his birthday anniversary this year, Mrs. McCormack and I extend to him our hearty congratulations and the hope that God will continue to shower upon him an abundance of his choicest blessings for many years to come.

Mr. THOMPSON of Texas. Mr. Speaker, it is a pleasure and honor to join in the felicitations which come on January 6 to our beloved Speaker. It is a time when members of the Texas delegation are almost shouldered to one side by the innumerable people who wish to express their happiness that our Speaker has reached another milestone in his full and fruitful life. While we would not begrudge these other friends their chance to congratulate Mr. SAM, we, of the Texas delegation, claim an especial privilege on his birthday because this great American is our own. He is our people and we claim him not only as our colleague but as our guide, philosopher, and friend of many years.

We take a moment on his birthday to express a prayer of thankfulness to Almighty God for giving us Mr. Sam and for giving to us and to our country the benefit of his wise leadership through the perilous days of the past and present.

We look forward to many more years when we may all be blessed by the guidance of his wise hand.

Mr. THOMAS. Mr. Speaker, our beloved Speaker will enjoy another birthday tomorrow. All of us wish that he will enjoy many, many more. And, of course, we Democrats hope that he will celebrate most of them in his present position.

Few men have wrought such a great influence on the Nation's problems as has Speaker RAYBURN. His influence dominated the Congress long before he became Speaker. Since he was elevated to that position of leadership, his good work has been even more outstanding. His judgment and his efforts have always been on the side of the people and for the best interests of the country.

May he enjoy good health for many years to come so that he may continue to train the younger Members and thus give to the country more good, sound, and patriotic men like Speaker SAM RAYBURN.

GREETINGS TO SPEAKER SAM RAYBURN

Mr. ANFUSO. Mr. Speaker, I am very happy to join with my colleagues in extending greetings to you on the occasion of your 74th birthday. With it go my sincerest wishes that the year ahead may prove to be a very happy one for you and may it mark the fulfillment of your choicest dreams.

We are indeed very fortunate to have a man of your vision and stature at the helm of this body at a crucial time such as this. Knowing you as we do, I feel certain that under your guidance and leadership we can look forward to a year of fruitful accomplishments for the welfare of our Nation and of the whole world.

May the good Lord bless you with many more years of health and may we be privileged to enjoy your leadership and your wise counsel for many years to come.

Mr. KEOGH. Mr. Speaker, it is with great pleasure that I join with my colleagues in extending fecilitations to you on your birthday and to wish for you many more years of good health and happiness. We in the House need the continued guidance and distingished leadership which you have given us for so many years and the country needs your continued loyal and devoted service. Many of us have profited by your gracious and wise council and all of us cherish your friendship. May the year ahead be a happy and fruitful one for you.

Mr. KILGORE. Mr. Speaker, it is a great pleasure to join in the flow of oratory that is being directed at you on the occasion of your 74th birthday. But let me emphasize that these are not mere words we speak. As a member of the delegation you lead, and as a Member of the House you head, let me express my gratitude that we have in you a real representative of the people—a leader who guides with judgment rather than prejudice and with compassion and understanding rather than rancor. As we say on the Texas border, Feliz cumpleaños—Happy birthday—and many more to come.

Mr. LANHAM. Mr. Speaker, I am happy to join with my colleagues in felicitating our beloved Speaker, SAM RAYBURN, on the 74th anniversary of his birth.

It has truly been a privilege for me to serve with and to know intimately this great American. Everyone loves, admires and respects Mr. Sam.

"Mr. Democrat," as he is so well and often called, has rendered a service to his country beyond our power to express. My hope and prayer is that he may be spared for many, many more years of faithful and fruitful service.

Mr. RAYBURN, my heartiest congratulations.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ENGLE, for next week, on account of official business.

Mrs. PFOST (at the request of Mr. ROGERS of Colorado), on account of illness in family.

Mr. LONG, for approximately 10 days, beginning Friday, January 6, 1956, on account of business.

Mr. GWINN of New York (at the request of Mr. MASON), for 10 days, on account of illness.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks was granted to:

Mr. PHILBIN in three instances and to include extraneous matter.

Mr. LANE and to include extraneous matter.

Mrs. KELLY of New York, in the body of the RECORD, on the passing of Mrs. William H. Good, national committeewoman from New York, and that all Members desiring to do so have the same privilege.

Mr. DOYLE and include related material.

Mr. THOMPSON of New Jersey (at the request of Mr. RODINO) in two instances.

Mr. FORRESTER and include extraneous matter.

Mr. METCALF and to include extraneous matter.

Mr. ANFUSO (at the request of Mr. MULTER) and to include extraneous matter.

Mr. ENGLE.

Mr. BEAMER (at the request of Mr. ARENDS) and to include extraneous matter.

Mr. MCDONOUGH and to include extraneous matter.

Mr. JENSEN in three instances and to include extraneous matter.

Mr. PELLY in two instances.

Mrs. ST. GEORGE and to include a speech by the Secretary of Agriculture, Mr. Ezra Taft Benson.

Mr. BECKER and to include a statement.

Mr. GAVIN on European observations.

Mr. LIPSCOMB and to include extraneous matter.

Mr. REES of Kansas and to include a statement by General Summerfield, Postmaster General.

Mr. HILL.

Mr. VANIK.

Mr. BOLAND to extend his remarks in the body of the RECORD in connection with a bill he has introduced.

Mr. GATHINGS (at the request of Mr. MCCORMACK) to extend and include a letter he sent to Secretary Benson.

Mr. MCCORMACK in two instances, in each to include extraneous matter.

Mr. CELLER (at the request of Mr. ALBERT) and to include extraneous matter.

Mr. FOGARTY.

Mr. RODINO.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 44 minutes p. m.), under its previous order, the House adjourned until Monday, January 9, 1956, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1323. A letter from the Director, Naval Petroleum Reserves, Department of the Navy, transmitting a report of agreements relating to operations in the Naval Petroleum Reserves for the calendar year 1955, pursuant

to the act of June 17, 1944 (58 Stat. 280); to the Committee on Armed Services.

1324. A letter from the Assistant Secretary of the Navy (Personnel and Reserve Forces), transmitting a draft of proposed legislation entitled, "A bill to provide for the appointment and promotion of the director and assistant directors of the band of the United States Marine Corps, and for other purposes"; to the Committee on Armed Services.

1325. A letter from the President, Board of Commissioners of the District of Columbia, transmitting a report of the official operations of the government of the District of Columbia for the fiscal year ended June 30, 1955, pursuant to section 12 of the act approved June 11, 1878 (20 Stat. 108); to the Committee on the District of Columbia.

1326. A letter from the Administrative Assistant Secretary, Department of Agriculture, transmitting a report of the activities of the Department of Agriculture for the fiscal year ended June 30, 1955, with regard to the disposal of foreign excess property, pursuant to section 404 (d) of the Federal Property and Administrative Services Act of 1949, Public Law 152, 81st Congress; to the Committee on Government Operations.

1327. A letter from the Archivist of the United States, relative to a report on records proposed for disposal and lists or schedules covering records proposed for disposal by certain Government agencies, pursuant to the act approved July 7, 1943 (57 Stat. 380), as amended by the act approved July 6, 1945 (59 Stat. 434); to the Committee on House Administration.

1328. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill to authorize partial payment of certain claims which are certified for consideration of the Congress by the Secretaries of the military departments"; to the Committee on the Judiciary.

1329. A letter from the Attorney General, transmitting a statement of the adjudications rendered during the year 1955, pursuant to the act of July 2, 1948 (50 U. S. C. App., secs. 1981–1987), amended by Public Law 116, 82d Congress; to the Committee on the Judiciary.

1330. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated September 9, 1955, submitting a letter, together with accompanying papers, on Ludington Harbor, Mich., requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted December 4, 1939; to the Committee on Public Works.

1331. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation entitled "A bill to provide revenue for the District of Columbia, and for other purposes"; to the Committee on the District of Columbia.

1332. A letter from the Librarian of Congress, transmitting a report of the affairs of the Library of Congress, including the copyright business, for the fiscal year ending June 30, 1955; to the Committee on House Administration.

1333. A letter from the Director, Administrative Office of the United States Courts, transmitting a report showing statistical tables reflecting the business transacted by the bankruptcy courts and other pertinent data for the fiscal year ending June 30, 1955, pursuant to section 53 of the Bankruptcy Act (11 U. S. C. 81); to the Committee on the Judiciary.

1334. A letter from the Chairman, United States Tariff Commission, transmitting the 39th Annual Report of the United States Tariff Commission, pursuant to section 332 of the Tariff Act of 1930; to the Committee on Ways and Means.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BAILEY:

H. R. 8098. A bill to amend the act providing for Federal aid for State veterans' homes to permit payments to homes not primarily furnishing domiciliary care; to the Committee on Veterans' Affairs.

H. R. 8099. A bill to regulate the foreign commerce of the United States by establishing import quotas under specified conditions and for other purposes; to the Committee on Ways and Means.

By Mr. DURHAM:

H. R. 8100. A bill to authorize the loan of two submarines to the Government of Brazil; to the Committee on Armed Services.

H. R. 8101. A bill to authorize the Secretary of the Army to give 25 World War II paintings to the Government of New Zealand; to the Committee on Armed Services.

H. R. 8102. A bill to provide for the disposition of moneys arising from deductions made from carriers on account of the loss of or damage to military or naval material in transit, and for other purposes; to the Committee on Armed Services.

By Mr. BAKER:

H. R. 8103. A bill maintaining the 1955 burley tobacco allotment quota; to the Committee on Agriculture.

By Mr. BENNETT of Florida:

H. R. 8104. A bill to authorize the transmission in the mails at the rate provided for books of cumulative folders containing individual school records of students in public elementary and secondary schools; to the Committee on Post Office and Civil Service.

By Mr. BENTLEY:

H. R. 8105. A bill to remove wheat for seeding purposes which has been treated with poisonous substances from the "unfit for human consumption" category for the purposes of section 22 of the Agricultural Adjustment Act of 1933; to the Committee on Agriculture.

By Mr. BOLAND:

H. R. 8106. A bill authorizing the construction of the Littleville Reservoir project, Massachusetts; to the Committee on Public Works.

By Mr. BROOKS of Louisiana:

H. R. 8107. A bill to amend the Armed Forces Reserve Act of 1952, as amended; to the Committee on Armed Services.

By Mr. BROYHILL:

H. R. 8108. A bill to provide for the development of a comprehensive master plan to abate and prevent water pollution in the District of Columbia and areas immediately adjacent thereto, and for other purposes; to the Committee on Public Works.

By Mr. BUCKLEY:

H. R. 8109. A bill to authorize the construction of certain works of improvement in the Niagara River for power and other purposes; to the Committee on Public Works.

By Mr. CELLER:

H. R. 8110. A bill to incorporate the National Music Council; to the Committee on the Judiciary.

By Mr. CHRISTOPHER:

H. R. 8111. A bill to liberalize the basis for, and increase the monthly rates of disability pension awards under Veterans Regulation No. 1 (a), part III; to the Committee on Veterans' Affairs.

By Mr. DAGUE:

H. R. 8112. A bill to amend the Small Business Act of 1953, as amended; to the Committee on Banking and Currency.

By Mr. DAWSON of Utah:

H. R. 8113. A bill to provide for an elective Governor and an elective Lieutenant Governor of the Territory of Alaska; to the Committee on Interior and Insular Affairs.

By Mr. DENTON:

H. R. 8114. A bill to establish an effective program to alleviate conditions of excessive unemployment in certain economically depressed areas; to the Committee on Ways and Means.

By Mr. DODD:

H. R. 8115. A bill to authorize an increase of emergency relief highway funds from $10 million to $30 million for the fiscal year ending June 30, 1956; to the Committee on Public Works.

H. R. 8116. A bill to amend the National Housing Act, as amended; to the Committee on Banking and Currency.

H. R. 8117. A bill to provide for Federal procurement of materials and supplies in major disaster areas, and for other purposes; to the Committee on Banking and Currency.

H. R. 8118. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

H. R. 8119. A bill to increase the amount of appropriations authorized for disaster loans, and for other purposes; to the Committee on Banking and Currency.

H. R. 8120. A bill to provide rent-free accommodations in certain federally aided housing for needy victims of major disasters, and for other purposes; to the Committee on Banking and Currency.

H. R. 8121. A bill to authorize the construction of additional flood-control reservoirs in the Connecticut River Basin; to the Committee on Public Works.

H. R. 8122. A bill to provide authority to stockpile temporary housing for disaster relief, and for other purposes; to the Committee on Banking and Currency.

By Mr. ELLSWORTH:

H. R. 8123. A bill authorizing the Administrator of Veterans' Affairs to convey certain property of the United States to the city of Roseburg, Oreg.; to the Committee on Veterans' Affairs.

H. R. 8124. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

By Mr. FENTON:

H. R. 8125. A bill to amend section 5051 (a) of the Internal Revenue Code of 1954 to aid small business and discourage continued concentration in the brewing industry; to the Committee on Ways and Means.

By Mr. FINO:

H. R. 8126. A bill to amend part III of Veterans Regulation No. 1 (a) to liberalize the basis for, and increase the monthly rates of, disability pension awards; to the Committee on Veterans' Affairs.

By Mr. FOGARTY:

H. R. 8127. A bill to increase the education and training allowances under the Veterans' Readjustment Assistance Act of 1952; to the Committee on Veterans' Affairs.

By Mr. GROSS:

H. R. 8128. A bill to regulate interstate and foreign commerce in agricultural products, to prevent unfair competition, to provide for the orderly marketing of such products, to promote the general welfare by assuring an abundant and permanent supply of such products by securing to the producers a minimum price of not less than cost of production, and for other purposes; to the Committee on Agriculture.

By Mr. HAND:

H. R. 8129. A bill to provide for national disaster insurance; to the Committee on Banking and Currency.

By Mr. HARRISON of Virginia:

H. R. 8130. A bill to designate the bridge to be constructed over the Potomac River in the vicinity of Jones Point, Va., as the Woodrow Wilson Memorial Bridge; to the Committee on the District of Columbia.

By Mr. HAYS of Ohio:

H. R. 8131. A bill to regulate the foreign commerce of the United States by establishing import quotas under specified conditions and for other purposes; to the Committee on Ways and Means.

By Mr. HESELTON:

H. R. 8132. A bill authorizing the preparation of detailed plans of the Littleville Reservoir on the middle branch of the Westfield River in Massachusetts; to the Committee on Public Works.

By Mr. HILLINGS:

H. R. 8133. A bill to amend title 18 of the United States Code to make the damage, disablement, or destruction of civil aircraft a criminal offense, with increased penalties in cases resulting in the death of passengers or other persons; to the Committee on the Judiciary.

H. R. 8134. A bill to amend title 18 of the United States Code so as to authorize the imposition of the death penalty for sabotage of aircraft; to the Committee on the Judiciary.

By Mr. IKARD:

H. R. 8135. A bill to amend title 18 of the United States Code to make the damage, disablement, or destruction of civil aircraft a criminal offense, with increased penalties in cases resulting in the death of passengers or other persons; to the Committee on the Judiciary.

By Mr. JOHNSON of California:

H. R. 8136. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

By Mr. JOHNSON of Wisconsin:

H. R. 8137. A bill to establish a conservation-acreage reserve, to promote conservation improvement of agricultural soil, water, and related resources, to stabilize farmers' income, to adjust total agricultural production to consumer and export needs, to maintain an abundant and even flow of farm commodities in interstate commerce, and for other purposes; to the Committee on Agriculture.

By Mr. KEARNS:

H. R. 8138. A bill making an appropriation to enable the District of Columbia Auditorium Commission to formulate plans for the construction of a civic auditorium in the District of Columbia; to the Committee on Appropriations.

H. R. 8139. A bill to amend title 28 of the United States Code, so as to provide for the appointment of one additional district judge for Erie of the western district of Pennsylvania; to the Committee on the Judiciary.

H. R. 8140. A bill to extend the time within which the District of Columbia Auditorium Commission may submit its report and recommendations with respect to the civic auditorium to be constructed in the District of Columbia, and to provide that such Commission shall continue in existence until the construction of such auditorium has been completed; to the Committee on the District of Columbia.

By Mr. KELLEY of Pennsylvania:

H. R. 8141. A bill to provide for a summer recess of the Congress in each year in which general elections are not held; to the Committee on Rules.

H. R. 8142. A bill to provide for national flood insurance and reinsurance, and for other purposes; to the Committee on Banking and Currency.

By Mr. KEOGH:

H. R. 8143. A bill to extend coverage under the Federal old-age and survivors insurance system, as self-employed individuals, to certain individuals who are employees of foreign governments and international organizations; to the Committee on Ways and Means.

H. R. 8144. A bill to amend section 3A of the Civil Service Retirement Act of May 29, 1930, to reduce from 6 years to 5 years the service requirement for entitlement to annuity thereunder; to the Committee on Post Office and Civil Service.

By Mr. LANE:

H. R. 8145. A bill to appropriate funds for flood control and navigation projects in New England, preliminary examinations, surveys, and studies in New England, and surveys of hurricane damages along the eastern seaboard of the United States; to the Committee on Appropriations.

H. R. 8146. A bill to appropriate funds for certain authorized flood control projects in Massachusetts; to the Committee on Appropriations.

By Mr. LESINSKI:

H. R. 8147. A bill to provide a more equitable system for the settlement of disputes arising from personnel actions in the classified civil service, and of grievances and complaints of all Government personnel, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. LIPSCOMB:

H. R. 8148. A bill to recognize naval service performed in sweeping the North Sea of mines in 1919 as service in World War I; to the Committee on Veterans' Affairs.

By Mr. McMILLAN:

H. R. 8149. A bill to amend the first sentence of paragraph (a) of section 756 of title 11 of the District of Columbia Code, 1951 edition (par. (a) of sec. 5 of the act of Apr. 1, 1942, c. 207, 56 Stat. 193), relating to the transfer of actions from the United States District Court for the District of Columbia to the municipal court for the District of Columbia; to the Committee on the District of Columbia.

H. R. 8150. A bill to provide for Federal disaster insurance and reinsurance; to the Committee on Banking and Currency.

By Mr. METCALF:

H. R. 8151. A bill to establish a conservation acreage reserve, to promote conservation improvement of agricultural soil, water, and related resources, to stabilize farmers' income, to adjust total agricultural production to consumer and export needs, to maintain an abundant and even flow of farm commodities in interstate commerce, and for other purposes; to the Committee on Agriculture.

By Mr. O'NEILL:

H. R. 8152. A bill to incorporate the National Society-Army of the Philippines; to the Committee on the Judiciary.

By Mr. PELLY:

H. R. 8153. A bill to repeal the cabaret tax; to the Committee on Ways and Means.

By Mr. PERKINS:

H. R. 8154. A bill to establish an effective program to alleviate conditions of excessive unemployment in certain economically depressed areas; to the Committee on Ways and Means.

H. R. 8155. A bill to increase the monthly rates of pension payable to widows and former widows of deceased veterans of the Spanish-American War, including the Boxer Rebellion and the Philippine Insurrection; to the Committee on Veterans' Affairs.

By Mr. POLK:

H. R. 8156. A bill to establish a conservation acreage reserve, to promote conservation and improvement of agricultural soil and water resources, to stabilize farmers' income, to adjust total agricultural production to consumer and export needs, to maintain an abundant and even flow of farm commodities in interstate commerce, and for other purposes; to the Committee on Agriculture.

By Mr. PRICE:

H. R. 8157. A bill to provide for the burial in the Memorial Amphitheater of the National Cemetery at Arlington, Va., of the remains of an unknown American who lost his life while serving overseas in the Armed Forces of the United States during the Korean conflict; to the Committee on Armed Services.

By Mr. REECE of Tennessee:

H. R. 8158. A bill maintaining the 1955 burley tobacco allotment quota; to the Committee on Agriculture.

By Mr. RHODES of Pennsylvania:

H. R. 8159. A bill to amend section 5051 (a) of the Internal Revenue Code of 1954 to aid small business and discourage continued concentration in the brewing industry; to the Committee on Ways and Means.

By Mr. RILEY:

H. R. 8160. A bill to deny tax-exempt status under the Internal Revenue Code of 1954 to any organization which engages in the promotion of litigation to which it is not a party; to the Committee on Ways and Means.

By Mr. RODINO:

H. R. 8161. A bill to establish a program of direct insurance of property by the Federal Government against risks and hazards incident to natural disasters; to the Committee on Banking and Currency.

By Mrs. ST. GEORGE:

H. R. 8162. A bill to amend the Small Business Act of 1953, as amended; to the Committee on Banking and Currency.

By Mr. SADLAK:

H. R. 8163. A bill to amend the Internal Revenue Code of 1954 to provide an amortization deduction for certain facilities constructed or acquired to replace facilities destroyed or damaged by a hurricane, flood, or other disaster; to the Committee on Ways and Means.

By Mr. SCUDDER:

H. R. 8164. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

H. R. 8165. A bill to provide for national flood insurance and reinsurance, and for other purposes; to the Committee on Banking and Currency.

By Mr. SEELY-BROWN:

H. R. 8166. A bill to amend the Small Business Act of 1953, as amended; to the Committee on Banking and Currency.

By Mr. SHELLEY:

H. R. 8167. A bill to amend the Japanese-American Evacuation Claims Act of 1948, as amended, to expedite the final determination of the claims, and for other purposes; to the Committee on the Judiciary.

By Mr. SMITH of Virginia (by request):

H. R. 8168. A bill to provide revenue for the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. THOMPSON of New Jersey:

H. R. 8169. A bill to authorize the construction of flood protection measures, with particular reference to areas where severe damages have recently occurred as the result of extraordinary floods; to the Committee on Public Works.

H. R. 8170. A bill making an appropriation to enable the District of Columbia Auditorium Commission to formulate plans for the construction of a civic auditorium in the District of Columbia; to the Committee on Appropriations.

H. R. 8171. A bill to extend the time within which the District of Columbia Auditorium Commission may submit its report and recommendations with respect to the civic auditorium to be constructed in the District of Columbia, and to provide that such Commission shall continue in existence until the construction of such auditorium has been completed; to the Committee on the District of Columbia.

By Mr. THOMPSON of Louisiana:

H. R. 8172. A bill to amend the marketing quota provisions of the Agriculture Adjustment Act of 1938, as amended; to the Committee on Agriculture.

By Mr. VAN PELT (by request):

H. R. 8173. A bill to amend section 5051 (a) of the Internal Revenue Code of 1954 to aid small business and discourage continued concentration in the brewing industry; to the Committee on Ways and Means.

H. R. 8174. A bill to readjust size and weight limits on fourth-class (parcel post) mail matter at the post office at Oshkosh, Wis.; to the Committee on Post Office and Civil Service.

By Mr. WIER:

H. R. 8175. A bill to amend the Longshoremen's and Harbor Worker's Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes; to the Committee on Education and Labor.

By Mr. WILSON of California:

H. R. 8176. A bill to regulate the foreign commerce of the United States by establishing import quotas under specified conditions and for other purposes; to the Committee on Ways and Means.

By Mr. WOLCOTT:

H. R. 8177. A bill to provide for an experimental national flood indemnity and reinsurance program and for other purposes; to the Committee on Banking and Currency.

By Mr. YOUNGER:

H. R. 8178. A bill to amend the Small Business Act of 1953, as amended; to the Committee on Banking and Currency.

By Mr. BURNSIDE:

H. J. Res. 458. Joint resolution relating to burley tobacco acreage allotments and marketing quotas; to the Committee on Agriculture.

By Mr. DODD:

H. J. Res. 459. Joint resolution to establish a Northeastern United States Watershed Development and Flood Protection Commission; to the Committee on Public Works.

By Mr. FRELINGHUYSEN:

H. J. Res. 460. Joint resolution, to authorize and request the President to issue a proclamation in connection with the centennial of the birth of Woodrow Wilson; to the Committee on the Judiciary.

H. J. Res. 461. Joint resolution to increase the appropriation authorization for the Woodrow Wilson Centennial Celebration Commission; to the Committee on the Judiciary.

By Mr. McCORMACK:

H. Con. Res. 199. Concurrent resolution relating to commemorative ceremonies in connection with the 250th anniversary of the birth of Benjamin Franklin.

By Mr. CELLER:

H. Con. Res. 200. Concurrent resolution to establish a Joint Committee on Central Intelligence; to the Committee on Rules.

By Mr. BURLESON:

H. Res. 353. Resolution to authorize the Committee on House Administration to conduct an investigation of campaign expenditures; to the Committee on Rules.

By Mr. CELLER:

H. Res. 354. Resolution authorizing the Committee on the Judiciary to conduct studies and investigations relating to certain matters within its jurisdiction; to the Committee on Rules.

H. Res. 355. Resolution to provide funds for the Committee on the Judiciary; to the Committee on House Administration.

By Mr. DAWSON of Illinois:

H. Res. 356. Resolution providing for further expenses of conducting the studies and investigations authorized by rule XI (1) (h) incurred by the Committee on Government Operations; to the Committee on House Administration.

By Mr. ROBERTS:

H. Res. 357. Resolution to authorize the Committee on Interstate and Foreign Commerce to investigate and study the causes of the large increase in traffic accidents in the United States during recent years; to the Committee on Rules.

By Mr. RODINO:

H. Res. 358. Resolution creating a select committee to conduct an investigation and study of the possibility of preventing hurricane damage by breaking up or diverting hurricanes before they strike populated areas; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHMORE:

H. R. 8179. A bill for the relief of Don-Chean Chu; to the Committee on the Judiciary.

By Mr. BAILEY:

H. R. 8180. A bill for the relief of Mrs. Drina Sinovcic and Vincence (Vincent) Sinovcic; to the Committee on the Judiciary.

By Mr. CELLER:

H. R. 8181. A bill for the relief of Elizabeth Lucie Leon (also known as Lucie Noel); to the Committee on the Judiciary.

By Mr. COLE:

H. R. 8182. A bill for the relief of Mrs. Rena Carmi; to the Committee on the Judiciary.

By Mr. COON:

H. R. 8183. A bill for the relief of Ong Di Way, Ong Kow Won, and Mrs. Huie May Yew; to the Committee on the Judiciary.

By Mr. DAVIDSON:

H. R. 8184. A bill for the relief of Kreis Krzysztof; to the Committee on the Judiciary.

By Mr. DEMPSEY:

H. R. 8185. A bill for the relief of Chuzo Tamotzu; to the Committee on the Judiciary.

By Mr. DOLLIVER:

H. R. 8186. A bill for the relief of Miss Betti O. Bollmann; to the Committee on the Judiciary.

By Mr. ENGLE:

H. R. 8187. A bill for the relief of Wright H. Huntley; to the Committee on the Judiciary.

By Mr. FEIGHAN:

H. R. 8188. A bill for the relief of Paolina Toscano; to the Committee on the Judiciary.

By Mr. FORD:

H. R. 8189. A bill for the relief of Liu Gun Cheung; to the Committee on the Judiciary.

By Mr. FRELINGHUYSEN:

H. R. 8190. A bill for the relief of Christa E. Holder; to the Committee on the Judiciary.

By Mr. HILLINGS (by request):

H. R. 8191. A bill for the relief of Anna Aldegonda Antoine Lescot; to the Committee on the Judiciary.

By Mr. HOSMER:

H. R. 8192. A bill for the relief of Charles Arnalz; to the Committee on the Judiciary.

By Mr. JAMES:

H. R. 8193. A bill for the relief of George Uhlig; to the Committee on the Judiciary.

By Mr. KELLEY of Pennsylvania:

H. R. 8194. A bill for the relief of Rose Mary Sproull; to the Committee on the Judiciary.

H. R. 8195. A bill for the relief of Filippo Pastore; to the Committee on the Judiciary.

By Mr. KEOGH:

H. R. 8196. A bill for the relief of De Lisle Madure Crawford; to the Committee on the Judiciary.

By Mr. KING of California:

H. R. 8197. A bill for the relief of Virendra K. Sondhi; to the Committee on the Judiciary.

By Mr. LATHAM:

H. R. 8198. A bill for the relief of Guiseppina Yolanda Dondero; to the Committee on the Judiciary.

H. R. 8199. A bill for the relief of Joaquin Barros Da Costa; to the Committee on the Judiciary.

By Mr. LIPSCOMB:

H. R. 8200. A bill for the relief of Jose Domingo Quintanar; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H. R. 8201. A bill for the relief of Clemencio Gumban Hechanova; to the Committee on the Judiciary.

By Mr. McDONOUGH (by request):

H. R. 8202. A bill for the relief of Basiliki Andre Giannoulias; to the Committee on the Judiciary.

By Mr. MORANO:

H. R. 8203. A bill for the relief of Gildo Nicolio; to the Committee on the Judiciary.

By Mr. O'KONSKI:

H. R. 8204. A bill for the relief of Yi Nyong Suk; to the Committee on the Judiciary.

By Mr. RODINO:

H. R. 8205. A bill for the relief of Fred Gordon Ralph; to the Committee on the Judiciary.

By Mr. RODINO (by request):

H. R. 8206. A bill for the relief of Eugenio Mancino; to the Committee on the Judiciary.

By Mr. SCHENCK:

H. R. 8207. A bill for the relief of Ella Takasey; to the Committee on the Judiciary.

By Mr. SMITH of Wisconsin:

H. R. 8208. A bill for the relief of Edith Kaspersky and her minor child, Christine Kaspersky; to the Committee on the Judiciary.

By Mr. VANIK:

H. R. 8209. A bill for the relief of Kurt Grossman and Mrs. Theresa Grossman; to the Committee on the Judiciary.

By Mr. WAINWRIGHT:

H. R. 8210. A bill for the relief of Olavi Kurko; to the Committee on the Judiciary.

By Mr. WILLIAMS of New Jersey:

H. R. 8211. A bill for the relief of Josephine Fan, Joseph Fan, and Joan Fan; to the Committee on the Judiciary.

By Mr. WILSON of California:

H. R. 8212. A bill for the relief of Mrs. Juana Gaytan de Gomez; to the Committee on the Judiciary.

H. R. 8213. A bill for the relief of Maria del Socorro Garcia Ballesteros; to the Committee on the Judiciary.

By Mr. WILSON of Indiana:

H. R. 8214. A bill for the relief of Mrs. Maria D. Herren and infant; to the Committee on the Judiciary.

By Mr. WOLVERTON:

H. R. 8215. A bill for the relief of Edward Kammauf; to the Committee on the Judiciary.

H. R. 8216. A bill for the relief of Mrs. Lidie Kammauf; to the Committee on the Judiciary.

By Mr. YOUNGER:

H. R. 8217. A bill for the relief of Ioannis Rousos; to the Committee on the Judiciary.

By Mr. WALTER:

H. Con. Res. 201. Concurrent resolution approving the granting of the status of permanent residence to certain aliens; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

406. By Mr. BUSH: Petition of residents of Canton and Bradford County, Pa., favoring passage of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

407. By Mr. CANFIELD: Resolutions passed by the New Jersey State League of Municipalities at the 40th annual league conference held in Atlantic City, N. J., concerning Federal surplus property, Federal taxation of municipal and public agency bond income, national highway program, limiting openings of Burlington County bridges, and Federal payments in lieu of

taxes; to the Committee on Government Operations.

408. By Mr. HOEVEN: Petition to prohibit the transportation of alcoholic beverage advertising in interstate commerce; to the Committee on Interstate and Foreign Commerce.

409. By Mr. LECOMPTE: Petition of numerous citizens of Oskaloosa, Fremont, and University Park, Iowa, favoring passage of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce and its broadcasting over radio and television; to the Committee on Interstate and Foreign Commerce.

410. Also, petition of numerous citizens of University Park, Iowa, favoring passage of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

411. By Mr. MASON: Petition of Mrs. Anna H. Russell and 323 other residents of De Kalb County, Ill., urging the enactment into law of H. R. 4627 and S. 923, bills to prohibit the advertising of alcoholic beverages over the radio and TV, and in magazines and newspapers; to the Committee on Interstate and Foreign Commerce.

412. By Mr. MUMMA: Petition of Mrs. R. C. Leitner and 20 other residents of Harrisburg, Pa., urging enactment of legislation prohibiting the transportation of alcoholic beverage advertising in interstate commerce, and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

413. Also petition of Margarette R. Mumma and 23 other residents of Harrisburg, Pa., urging enactment of legislation prohibiting the transportation of alcoholic beverage advertising in interstate commerce, and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

414. Also petition of Mrs. Harry K. Miller and 89 other residents of Hummelstown, Pa., urging the enactment of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

415. By Mr. SHORT: Petition of Rev. Ernest Hart and other citizens of Springfield, Mo.; to the Committee on Interstate and Foreign Commerce.

416. By Mr. SMITH of Wisconsin: Resolution adopted by the executive committee of the Wisconsin Federation of Young Republicans at its December meeting, urging that the principles of the McCarran-Walter Act be upheld; to the Committee on the Judiciary.

417. By the SPEAKER: Petition of Clifford Crail, Cincinnati, Ohio, with reference to a grievance and requesting a committee of Congress to investigate Hon. Frank J. Lausche, Governor of Ohio, and Hon. Dwight D. Eisenhower, President of the United States, etc., to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

The Farm Problem: Do We Need a New Approach?

EXTENSION OF REMARKS

OF

HON. CLINTON P. ANDERSON

OF NEW MEXICO

IN THE SENATE OF THE UNITED STATES

Thursday, January 5, 1956

Mr. ANDERSON. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an address entitled "Do We Need a New Approach?" which I delivered before the Texas Farm Bureau annual convention at Fort Worth, Tex., on November 8, 1955.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

When I tried to put a title to the things which I wanted to discuss with members of the Texas Farm Bureau, I jotted down many suggestions that strongly appealed to me. I would have enjoyed, for example, spending my whole time talking with you about the problems of cotton, the need for decisions on cotton acreage in old areas and in new ones. I would have been happy to have discussed price cycles in the cattle trade. And as you can well imagine, I could have spent most of an afternoon examining with you the history of our whole program of price supports, acreage limitations, and marketing quotas.

I still feel that before another year rolls around I will have tried to reduce to writing what I know of the history of the long battle over price-support programs and levels. This battle is not something that can be dealt with casually in a few minutes. On the contrary, it has roots which run back to the days of the Federal Farm Board in the early 1930's—yes, even to the 1920's and the fight for the McNary-Haugen bills.

Through the fabric of that whole experience, through the changing patterns of processing taxes, soil-conservation payments, limited price-support operations, production payments, high-incentive prices and flexible price-support programs, there runs like a red thread one constant question from farmers in time of economic strain and financial difficulty: Do we need a new approach?

So I have taken that as a title and will talk about it today.

The minister rises in his pulpit and announces his text. He may travel far from it, but it is always there in case he wishes to return and avail himself of that anchor. I, too, have a text, and it is this chart prepared by the Agricultural Marketing Service in the Department of Agriculture following the form and pattern of a pencil sketch which I sent to the Service months ago and requested a reproduction in exact graphic proportions. I present it with no apologies, because I have studied figures and tried to draw from them crude charts as a means of graphic presentation almost as long as I have been in business.

This chart that I use today attempts to trace the relationship between national income and farm income over the past 45 years. By it, we see that beginning in 1910, particularly through the 5 years 1910 through 1914 which became the parity base for our earliest endeavors toward equality for the farmer, farm income and national income rose and fell together. I do not refer to actual dollars and cents, because farm income is only a fraction of national income, usually about from one-twelfth to one-fifteenth; but, nonetheless, they travel in the same relative pattern.

Then came the period prior to our entrance into World War I when those European nations which had been drawn into the conflict required enormous quantities of American farm products. Wheat prices rose to unprecedented levels as the armies in Europe surged back and forth over the hundred battlefields, digging trenches, developing barbed wire entanglements, tearing up the soil.

This was the great American era for ripping up pastures and plowing up the plains. I lived in the Dakotas, and my high school and college years were spent in an atmosphere of fervid agricultural expansion. Every available piece of land was put into wheat or corn. The Iowa farmer could turn a bumper corn crop into fat cattle which could be sold at such record levels that the value of Iowa farmland jumped from $50 or $100 an acre to $400, $500, and in Black Hawk County to $600 or more. People bought and sold farmlands with the frenzy with which they now dabble in uranium.

There came, of course, a day of reckoning. The armistice was signed to end World War I. The pipelines of wheat and meat and dairy products no longer needed to be filled. The wheat farmer had no guaranty that his market would last forever and no umbrella to protect him in the day when his product was no longer needed. Within a year after the close of the war, the boom was over and within 2 years the panic was on. There were six banks in my hometown. Five of them closed. The sixth was kept open by brute strength, but the whole agricultural economy was shattered and torn. You see that picture on the chart.

Then from 1921 for a period of 26 years farm income stayed relatively below but proportionately close to national income. It was never up to what we might call parity or equality except in the years 1924 and 1934, but it came close in the early 1940's and only dropped off in 1943, 1944, and 1945 when price controls worked more effectively against farm production than against the output of other segments of our economy.

The Congress tried to recognize that situation. It passed the Steagall legislation promising the farmer that he would have high, rigid price supports as an incentive to production during the period of the war, and that in recognition and reward for his stimulated and expanded production under price controls during the war he would have 2 full years after the war during which the Government of the United States would guarantee him adequate prices for his enlarged production. During these 2 years, of course, he was expected to adjust his production, to shrink it back to more normal levels and to prepare once again for the period when farm income and national income might move along together.

Now I am speaking of things that are within the orbit of my own acquaintance, because I came into the Department midway between the ending of the European and Japanese phases of World War II.

You see next on the chart a rapid lift in the relationship of farm income to national income, because we moved as rapidly as we could to eliminate price controls from the farm commodities and to give them a chance to reach their more normal relationship to farm income, but there were some clouds overhanging the farm price horizon. We had on hand 7½ million bales of ragtag cotton, cheap cotton that had moved under the Government loan at standard prices but had been of such inferior quality that it had not been taken out of warehouses for manufacturing into textiles. We had enormous stockpiles of butter, wool, fish, dried skim-milk powder, and a host of other things. We had thousands of cases of canned vegetables, millions of pounds of canned meats.

The problem then, and perhaps the problem now, was to move those commodities into markets other than the normal mar-

ket of the American farmer. It is unnecessary to detail those now; but the surplus cotton, for example, went to China, Japan, Austria, and Germany in a fashion that did not interfere with the normal exports of American cotton to England, Belgium, Italy, and other large buyers. In 1945, 1946, and 1947, the release of these enormous stocks of surplus commodities did not drive down domestic agricultural prices because there was a world demand for our goods and we could find places to put away our food and fiber without disturbance to the normal American channels of domestic and international agricultural trade.

The separation of farm income from national income began in the year 1948 as you can see from the chart. Agricultural prices began to drop because agricultural production held up even after markets began to disappear. The people of Europe and Asia began to reestablish their wheat fields and their rice paddies. The rehabilitation work of UNRRA and other agencies had its effect. We moved from a period in which each year we had to scrape the bottom of the barrel for enough wheat for our needs at home and abroad to a time when we could remove all restrictions on the use of wheat and could be fairly generous with areas where shortage was the rule rather than the exception.

It was at the end of 1948 when the adjustment of agricultural production and consumption in the United States needed to be accomplished, but the Congress kept going through 1949 high, rigid 90-percent supports which had stimulated the production of agricultural commodities during and after World War II. The spread between national income and farm income continued downward to the end of 1949 and only lifted a little toward the end of 1950 because war started in Korea in the middle of 1950, and we could fill our military pipelines from our agricultural surpluses and thereby remove the strain from commodity purchasing.

There were those who had foreseen the possibility of a drastic reduction in farm income following the 2-year period of the Steagall guaranties. The Department of Agriculture had had a study committee looking steadily at this problem during World War II. In 1946 there was an intensive drive to bring together the lessons of that long study and attempt to congeal into new legislation our best knowledge of what would safeguard American farmers and perpetuate the favorable relationship between farm and national income.

I am sure you know the results of that study. We, in the Department, recommended a program of flexible price supports giving the Secretary of Agriculture discretion to establish such price levels between about 75 percent and 90 percent as would permit him to guide farmers in their planting and help them toward the balance between production and consumption which brings about a healthy active market and a good price for agricultural commodities in the market place. We recommended that the Secretary have broad discretions as to the level at which prices were to be fixed. We advocated no sliding scale by which the level of price supports was to be measured against the supply of each commodity but we did feel that the flexibility which had been written into the Agricultural Act of 1938 was a proper power for a Secretary of Agriculture to possess, even though the level recommended was substantially above the 52 to 75 percent adopted in the administration of President Roosevelt.

Now, if I may return to the chart, I must point out that Korea did great things for our agricultural situation. Had it not been for Korea, the farm problem in 1950, 1951, and 1952 would have been comparable to some of our problems today; but Korea required that this country stockpile enormous quantities of butter, meat, and cereals. Whatever quantities the farmer was able to produce the Government stood ready to buy.

There was a very substantial turndown in income during 1952. It has carried on through 1953 and 1954; and it will follow on through 1955.

If you want to know what this loss in farm income has done, take two quick statistical references:

1. Farm assets have dropped three billion from their peak; and

2. Farm debt is up two billion from 1953.

What I wish to point out particularly is that during all the time in 1948, 1949, 1950, 1951, 1952, 1953, and 1954, farmers of this country had whatever protection there is in high, rigid 90 percent price supports. This great gap which has opened up between national income and farm income opened and developed during the years when the price-support program was pegged to a rigid 90-percent standard. No farmer should ever forget that.

This is the first year that flexible price supports have been operative. The decline under 90-percent supports began at a time when we were relatively free from surpluses. When I left the Department of Agriculture in May 1948, I believe that all Commodity Credit loans totaled around $1¼ billion, and a great deal of that was current and quickly liquidated. Now our borrowing authority from Commodity Credit is $12½ billion and we are using the major portion of that amount with steadily increasing Commodity Credit stocks. So it is fair to say that 90-percent supports had their chance to work in a market relatively free from surpluses. If we are to be fair we should give flexible price supports a chance to work in a market not glutted with a billion extra bushels of wheat and 12 million extra bales of cotton and 20 million hundredweight of rice and so on down the roll call of surplus crops which today makes our whole farm problem difficult if not desperate.

On October 17, 1955, the New York Times said: "National Income Sets a New Peak. The national income attained a record annual rate of $321 billion during the second quarter of this year, the Government reported today." That is higher than the figures go on my chart, but the chart is prepared by statisticians and bears this footnote: "Department of Commerce estimates of national income have been adjusted to make them comparable with farm income estimates. I believe, however, that the 1955 national income mark will be up from the 1953 and 1954 level, but this I do know—the 1955 net income of farmers will be down. The last estimate I saw was that farm net income now was running at the rate of 10.6 billions for 1955, and you will find that figure on page 3 of a pamphlet called the Farm Income Situation issued by the Department of Agriculture on October 31, 8 days ago.

The point I am constantly trying to make to you is that in 1947 national income was at the level of about $199 billions, and that farm income was at the level of about $16¾ billions. During the next years, national income went up past $300 billions, but farm income in 1954, at the end of the period when rigid 90-percent price supports were in effect, had dropped to $12.3 billions. (Farm Income Situation, FIS 155, Department of Agriculture, Oct. 31, 1955, p. 3.)

If you will look at the chart and realize that if farm income had moved in normal relationship to national income as it mounted up to $300 billion, farm net income would now be about $27 billion, yet the latest Government publication puts it at the rate of $10.6 billion.

This is the farm problem. It is not important that we waste our energies in farm meetings debating whether we go back to the 90-percent supports which carried us from high farm prosperity and comparable high net farm income to the low figure of $12.3 billion for 1954, or whether we should try flexible price supports or two-price systems or export subsidies. The question is: What do we do now and do quickly to put the farmer in a safe spot economically and in a proper financial relationship to the businessmen, the doctors, lawyers, and engineers who live in the cities that our farm produce feeds.

I am going to talk about a few commodities, and then I am going to try to answer my own questions as to what we do now.

The Department of Agriculture, in its October reports, said that the 1955 harvest would be the second highest on record. Corn was estimated at 3,117,000,000 bushels. The wheat crop was 915 million bushels. Tobacco has been growing so well that a special story in the New York Times a month ago found the tobacco glut so bad that the Government owns now and has in storage about 425 million pounds of tobacco, acquired under the price-support system. In auction after auction the Government has been the biggest and at times the only bidder. Tobacco, you know, was the one crop that supposedly worked so perfectly under 90-percent supports that it has a special permanent status unlike any other crop, yet even tobacco isn't able to withstand the stimulation these rigid supports give it.

But I am talking in Texas to Texans. Maybe I better talk about cotton because Texas has 40 percent of the cotton acreage in the United States. The October crop report found the Department of Agriculture forced to raise its estimate of the 1955 crop to 13,920,000 bales, an outpouring of cotton that nullified the control measures which had been in effect and aggravated more than ever a surplus problem already severe. If that estimate holds up the 1955 crop is 232,000 bales above the 1954 harvest and nearly a million bales above the 10-year average from 1944 to 1953. Add that crop to the present surplus of 11,121,000 bales and you have a record supply of 25,049,000 bales which is greater than the previous record set in 1939. Next month the cotton producers will have to vote on a referendum to reduce acres below 18 million at a very time when legislation is pending in the Congress to raise the acreage to 21½ million.

Under our present supports, we have held an umbrella over cotton producers in Mexico, Brazil and many other Latin American countries until today they are able to move into our export markets at prices lower than our Secretary of Agriculture is authorized to sell under existing law. We have seen world production increase even when our production decreased. This year we will see a substantial increase even though your acreage has been cut down. If controls are continued, you can be reasonably sure that the 1957 acreage will have to be lower than the 1956 figure.

So what do you do? Do you plant more rice or wheat? Let's talk about rice.

Texas is a great producer of rice. We had a hearing in Washington last May dealing with rice programs, and these interesting facts developed.

In 1935 the United States produced 17,735,000 hundredweight of rough rice; in 1940, 24,495,000; in 1945, 30,668,000; in 1950, 37,971,000; and in 1954, 58,853,000. The Korean war had stimulated the production of rice and also stimulated the exportation of rice. Here are the figures on exportation: In 1935, 7½ percent of the United States crop was exported; in 1940, 25.3 percent; in 1945, 38.5 percent; in 1950, 40.9 percent; and in 1954, 43.8 percent.

No one need be told how important exports are to the American rice producer nor does any rice producer need to be told that exports are dropping rapidly. They are about half this year what they were last year and probably will be as low as 9 million hundredweight. Add that to a domestic consumption of only 24 million hundredweight, and

you have need for perhaps 33 million hundredweight with a production nearly 59 million hundredweight. What do you do with the balance? Do you continue to store it year after year?

That's why rice producers now face drastic acreage reductions just after they have purchased additional rice production machinery. How do they propose to solve it? By a two-price system or by export subsidies, anything except bringing production in line with consumption. How much better it would have been if controls had gone on right after 1950 and we had produced what the Government and the market needed.

I could go on through basic and nonbasic commodities tracing the same pattern of accumulation and price deterioration, but I have promised that I would try to make a suggestion of what might be done.

One of our national news magazines (U. S. News & World Report, September 30, 1954) had an article entitled "Wanted: Magic Formula for the Farm Problem. After 35 Years of Search No Really New Ideas."

I agree with that heading. There is no device that we can hastily concoct to cure our ills, no magic wand that we can wave to make them disappear. There is, however, hard work to be done, and your organization, along with the American Farm Bureau Federation of which it is a part, has earnestly tried to study farm problems and work steadfastly for their solution. So I do not hesitate to present to you my belief that we do need a new approach and my ideas as to what that new approach might be.

First, I think we need to quiet the fighting on several farm fronts. By that I mean that we must soon be able to bring all farm organizations to a common position in behalf of the farmer. We must try to find a program that can be acceptable to both political parties, Republican and Democratic, and that unifies the individuals within each party. I need not tell you that the opponents of Secretary Benson are not all within the Democratic Party. He has stern, harsh critics within the Republican Party, and they are Members of the Senate and Members of the House.

We need to find a basis for prompt action that can halt the decline in farm income. That basis must be able to enlist the 90 percenters like my good friends DICK RUSSELL and HAROLD COOLEY, as well as Senators who believe in flexible price supports like GEORGE AIKEN, SPESSARD HOLLAND, and me. I don't care how few things we agree on at first or how simple the early areas of agreement are, we need to take the farm program out of perpetual political strife, and substitute the bipartisan approach to farm problems which characterized the years when prosperity was being restored on the American farm.

I know that you will say at once that there is a wide gulf between the Farm Bureau and the Farmers' Union. I think I know the ground around that gulf and how deep it is. But I also recall two items:

1. In 1945, I named a special committee, with Milton Eisenhower as chairman, to work on the reorganization of the Department of Agriculture. When that group and I had finished our joint endeavors, we presented the plan of reorganization to leaders of the Congress and to all farm organizations. After a little overhauling and some slight modifications we got complete approval by representatives of both political parties and all farm organizations. The Production and Marketing Administration was established. Personally, I think it was the only organization in the Department of Agriculture that made much sense.

2. In 1946, after years of study we prepared the farm legislation to which I have previously referred, but before it was presented to the Congress, it was considered by farm organizations. Even though it involved flexible price supports and modernized parity, it was supported by the Farm Bureau, the Grange, the Farmers Union, and the National Council of Farm Cooperatives.

From these two experiences, I have decided that it is possible to bring farmers and the Congress together on farm programs and agricultural administration.

Second, we must clean the shelves of the Commodity Credit Corporation. I mean we must dispose of our surpluses. No farm program—rigid 90-percent supports, flexible-price supports, soil-fertility banks, production payments, or two-price plans—will work with the surpluses we now have on hand. We should not fool the American farmer by pretending that we think they will.

We must clean our shelves if we expect to see the line representing farm net income turn upward and if we expect to see national income stay high. Economically, this Nation would be in a far sounder position if we gave away about $6 billion worth of food and fiber than it will be if we continue to keep these stocks hanging over every commodity market. At the end of World War II we dumped enormous quantities of food on islands around the Pacific and while I do not advocate dumping commodity stocks now, I do advocate getting rid of them.

If no one else takes the lead, I intend on the first appropriate day of the next session of Congress to introduce a bill requiring the Commodity Credit Corporation to present to Congress within 30 days a program for the orderly but complete liquidation of surplus Commodity Credit stocks. I do not mean they must be liquidated in 1 month or 1 year but the mere announcement that they will be liquidated in 4 or 5 years will bring the buyers of commodities back into the market.

Why should a miller buy wheat or hedge his position when Commodity Credit has a billion bushels beyond our normal needs? Why should the manufacturer of cotton goods protect himself against a price rise when he knows that Commodity Credit has millions of bales that he can take out from under the loan any day he wants it? But once you earmark those surpluses for shipment abroad into markets not normally available to our farmers, the textile manufacturers will be frantically calling their agents to find some good cotton and tie it up.

When I took the oath of office as Secretary of Agriculture, I had to sign a receipt for 7½ million bales of cotton. It was sorry cotton at that but as long as it was hanging over the market there wasn't much trade in farm-produced cotton. We moved it all in a year or a year and a half; and the day we decided to move it outside of normal American trade zones, the cotton market stiffened and cotton prices went up and stayed up until cotton got it in a surplus situation again. I tell you, we can still move cotton when we want to.

A program to move these commodities may involve putting great quantities in the hands of people in other lands who could not otherwise afford to buy them. What is wrong with that? Our slogan in World War II proclaimed that food would win the war and write the peace. Well, it won the war, all right. Why not let it try to write the peace? These billions in food and fiber could implement our foreign policy far better than supplying arms to the Arabs or to the Israeli. Shooting irons placed in the hands of trigger-happy people lead to war; but food and fiber can lead to peace.

Food and fiber can help carry the spirit of Geneva at a time when that spirit seems to be mighty weak and when the foreign ministers find little on which to agree. When food and fiber lie in bins and pile up the storage, the accumulation only breaks our farmers. If they are sent abroad and removed from our economy, farm income will spurt upward, national income will stay at high levels, and in a few years we will have forgotten the cost of such a disposal program just as we forgot the cost of letting thousands of tanks, planes, and guns be captured by "General Rust" after World War II. We will have forgotten, but the heart of the world will not and it well might be that we would have created an atmosphere where the spirit of Geneva, the blessings of atomic power, and a host of other favoring circumstances might begin to work toward the achievement of peace.

Third, we must spend more on research and extension to build wider markets at home and abroad.

As I reflect on my years in the Department of Agriculture, I have many memories. Some relate to the problems of food rationing, shortages of essential supplies to farmers, reorganization of the Department to increase the emphasis on marketing; however, none is so satisfying as the fact that during this period the Research and Marketing Act of 1946 was enacted into law and a program for accentuating research in agriculture was set in motion.

For far too long we have been neglecting agricultural research and the task of bringing the results of research to farmers on the land. I regret that in the years immediately after 1946 we weren't able to get the program in "high gear" to the extent that should have been done. Therefore, it was gratifying to me that in the 1952 platforms of both political parties, there was a firm commitment to expand agricultural research.

The Democratic party platform pledged expanded research.

"We are justly proud of the outstanding achievements of our agricultural research. We favor a greatly expanded research and education program for American agriculture in order that both production and distribution may more effectively serve consumers and producers alike, and thus meet the needs of the modern world. We favor especial emphasis on the development of new crops and varieties, on crop and livestock disease and pest control, and on agricultural statistics and marketing services."

The Republican platform made a like promise.

"We recommend expanded agricultural research and education to promote new crops and uses, new markets, both foreign and domestic, more trustworthy crop and market estimates, a realistic trade program for agriculture aimed at restoring foreign markets and developing new outlets at home."

Progress has been made in getting more adequate funds for this important work. However, with the cost-price squeeze on in agriculture, it is more necessary than ever before that we bring to farmers the very best information on ways and means of cutting costs. This means that 1956 is no time to stop the accelerated program now under way. I shall be interested in the budget recommendations of the administration in this field. In the effort to balance the Federal budget, I hope that important programs like adequate research and education will not be victims of election-year political expediency.

To me nothing is more vital to a lasting solution of our farm problems than continued emphasis on research and extension. The route to newspaper headlines and publicity is to be for or against 90-percent price supports. The route of service to farmers is to be for increasing appropriations in our Federal budgets for the expansion of research and education in American agriculture.

Finally, my last words are not truly recommendations of programs, but I trust are words of hope.

Fourth in my program is to tell farmers to hold on until population catches up with the capacity of our agricultural plant. This is not too far in the future because of two circumstances: (1) We are losing farmland to

cities, roads, and airports; and (2) the great American baby boom is on.

A recent magazine article (Chemurgic Digest, September 1955, p. 16) estimates that we are using up 1 million acres of farmland a year for city expansion. The road program has an even greater appetite. The turnpike from Canton, Ohio, to Chicago will gobble up some 70,000 to 100,000 acres of excellent cropland, and the proposed program of turnpikes and toll roads runs into millions of acres.

I talked to the school teachers of my State a few days ago about the American baby boom. I do not intend to review those statistics other than to say that 37 million babies were born in this country in the last decade. They are starting now to have their effect upon our economy. They have begun to accelerate the expansions of our markets for all sorts of commodities—food, clothing, shelter, automobiles, candy, soft drinks, television sets, new houses, new schools. My estimate has been that probably by 1965 and surely by 1970 we will need 4 or 5 billion more pounds of meat annually, a billion dozen extra eggs, several billion extra quarts of milk, and 15 million tons of feed grain more than we will produce in the harvest of 1955, the second largest in our history.

Hold on for the good days that are sure to come. Long before the dawn of the new century this country will be searching for new ways to grow food or new areas in other lands from which our bread basket may be filled. That day will mean increased activity in world trade, new markets for the products of our factories, and new customers abroad to match the increased industrial activity at home.

The farm problem has been with us for most of this generation. The next generation will have to endure it only a little while until world population catches up. That's why I hope that those people who are sincerely the friends of the American farmer may quit fighting each other and join on a program that will clean the commodity shelves, that will bring to the American farmer an alert, active and aggressive market for his produce, and will at the same time give truth at last to our slogan that food may have a voice in the final pronouncement of peace.

Views of Senator Wiley on State of the Union Message

EXTENSION OF REMARKS
OF
HON. ALEXANDER WILEY
OF WISCONSIN
IN THE SENATE OF THE UNITED STATES

Thursday, January 5, 1956

Mr. WILEY. Mr. President, as I listened today to the state of the Union message of the President of the United States, I felt for Dwight D. Eisenhower a deeper sense of gratitude for the immeasurable service he has given our country, and a renewal of my profound respect for him as our national and world leader.

I am confident that with him at the helm of our Nation, progress toward our domestic and foreign goals will continue evenly and effectively.

The message is a reflection of the dynamic spirit of President Eisenhower. As I have supported him in the past, so do I now again pledge my wholehearted and continued support to the President, and to the praiseworthy and constructive measures highlighted in the state of the Union address.

Facing the United States Congress, there are additional measures that will affect millions of Americans. I refer to such important issues as the battle against decontrolling of natural gas, the battle for completion of the St. Lawrence Seaway, and others.

In a New Year's speech over Wisconsin radio stations, I had previously dealt with these significant matters. I feel that it would be useful, at this time, to bring these remarks to the attention of my colleagues.

I am pleased to point out that there is broad general agreement between the points I had presented in my talk and those set forth by the President today.

I request unanimous consent to have my New Year's speech printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SENATOR WILEY ANNOUNCES 20-POINT PROGRAM FOR 2D SESSION, 84TH CONGRESS—EMPHASIZES NEED FOR MAINTAINING UNITED STATES PROSPERITY AT PEAK LEVEL, THROUGH AN EXPANDING PEACEFUL ECONOMY

(Radio address by Hon. ALEXANDER WILEY, of Wisconsin, broadcast over Wisconsin radio stations on New Year's Day, 1956)

I am glad once more to speak to you through the courtesy of this station.

I would like to share with you some observations regarding Wisconsin's and America's bright future.

It is particularly appropriate to take stock of our national situation, as we head to what we believe will be a wonderful, peaceful, and prosperous 1956—with all its priceless abundance.

I am not simply referring to the great material resources which are ours—our wealth, our comforts, and conveniences. Rather, I refer principally to our spiritual blessings—the blessings from the source of all good, blessings which we enjoy as children of the all-knowing, all-seeing, all-present Creator. Yes; I refer to the heritage which the Wayshower said is ours—yours and mine—the Wayshower who came in order that we might "have life and have it more abundantly."

Let us look now at the overall picture in Wisconsin and in all America for 1956.

We will look, for example, at the prospects for peace. Then, we will turn to such varied subjects as roads, social security, taxes, housing, labor, agriculture, population, and the presidential elections of 1956.

FOUR GOALS: OUR GREATEST GOAL, PEACE

Question. First off, Senator, what would you say should be our principal aims for the New Year?

Answer. I believe that our aims as a people should be these:

First, to keep our country at peace.

Peace—no big wars, no little wars. Atoms for Peace and not for war.

But peace, how? How can we maintain and keep it?

Peace, through vigilance, against an atomic Pearl Harbor. That means vigilance against communism's plans to enslave the world.

Peace through strength, through a powerful modern defense, an Army, Navy, and Air Force, second to none, a guided missile and nuclear program superior to Russia's program. Such strength can serve as a continued deterrent to war.

How else, can we maintain peace?

Through understanding, understanding of historic differences, understanding the arguments among the nations and seeking to ease and erase them, seeking to remove frictions between ourselves and the peoples of Europe and Asia and Latin America.

And, lastly, we seek peace, through determination, through courage and God-given ingenuity, so as to banish bloodshed forever, if at all possible.

Preserving our freedom from attack

Question. That is our first objective, Senator. Now how about the second?

Answer. Secondly, our aim must be of course to preserve our heritage of freedom.

Nothing must imperil our traditional liberties, our freedoms of speech, press, assembly, worship, our freedom to own property, freedom to choose jobs, freedom to take our chances under the profit system. Nothing, neither big Government nor big anything else must regiment us Americans.

Our civil, economic and political rights, the rights of majority and minority, must be preserved, from all harm, from any quarter.

Maintaining and expanding our prosperity

Question. What should be our third objective?

Answer. Our third great objective must, of course, be to maintain our country's prosperity.

I need not tell you in detail, that fortunately, we are today enjoying the greatest national income which we have ever known, almost $330 billion per year. Sixty-five million Americans are fortunately employed. One-third of our workers are women. Our Nation's salaries, dividends and bonuses are at peak levels. We want to continue to enjoy this great prosperity and to expand it. We want to continue to have a sound, stable dollar, not a cheap, inflated, worthless dollar. We want a healthy, growing economy.

As a matter of fact, we must do so, in order to pay off our heavy national debt, as well as our personal and corporate debt. More than 23 million families owe payments on installment plans. That means that they must have continued, high income to pay off their obligations. Prosperity, therefore, is not a luxury, it is a necessity for all of us.

We cannot afford a recession. And we will not have a recession.

Fraternal bonds between all Americans

Question. And our fourth need, Senator WILEY?

Answer. Our fourth vital goal, while enjoying these three other goals, while keeping the peace, while maintaining freedom, while expanding our prosperity, is to increase the actual happiness of all of our people, the peace of mind, the feeling of friendship and well-being.

That means more than simply increasing our national wealth. It means continuing warm, fraternal bonds of cooperation and mutual respect in our land. It means avoiding class warfare, keeping labor and management together, as a working team. It means cutting down on frictions between North and South and other regions of our country, as well as between racial, religious, and minority groups. This, too, is a worthy goal, especially in the time of the birthday of the Nazarene.

AFL-CIO merger welcome

Question. Well, speaking of cooperation, How does the new AFL-CIO merger affect that situation, Senator WILEY?

Answer. Well, the big merger of the formerly rival organizations is now an accomplished fact.

It brings together 15 million organized workers, out of the total of 17 million such workers and out of our 65 million labor force.

The merger of AFL-CIO can be a great force for good. It can open a new era of responsible, efficient, unionism. That means sensible, orderly, collective bargaining. The merger can strike important blows at any racketeering influences. It can help end the senseless and often bitter jurisdictional squabbles which have cost labor and have cost the public dearly.

And so, we are looking forward to good things from the merged organizations. We are hoping, of course, that minority rights—political rights, economic rights, will be fully respected by it. Each laboring man must remain absolutely free in his political choices. No one must attempt to dictate to him what he does inside the ballot booth.

Badger State's bright outlook

Question. Well, Senator, those are four splendid objectives for 1956.

Now, how does the outlook for Wisconsin look to you?

Answer. I would say that the outlook is excellent.

Our own State has of course shared in America's great prosperity. In many respects, we are actually doing far better than a great many other States.

Of course, the farm segment of Wisconsin's population has been having its difficulties, serious difficulties. I want to refer to that situation a little bit more later on.

But, in most other phases of our State's economy—in industry, especially manufacturing, in distribution, in consumption—Wisconsin has enjoyed and will continue to enjoy peak records.

Our State's population, which is now at the 3½ million mark, is headed for further increases. By 1965, there will be 4,100,000 people in Wisconsin.

In America as a whole, we are going to have 190 million citizens. That means 28 million more than we have now. That in turn means a vastly expanded market—increased demand for goods, throughout the 48 States and, in particular, in our own State.

Question. Senator, that leads us into what you propose to do for the State of Wisconsin and for our country as a whole during the next legislative year, opening in January.

What legislation, for example, will you be offering?

Completing seaway, social security, and roads

Answer. Well, it will be my purpose in this 2d session to try to secure the enactment of the numerous important bills which I introduced in the 1st session of the 84th Congress, in 1955. I will, moreover, be carrying forward overall policies for which I have been striving since I first came to the Senate in 1939—policies aimed at the goals of peace, freedom, prosperity, and cooperation.

Now, let me spell out exactly how I hope to achieve all this.

First of all, of course, it must mean passing the Wiley bill to complete the Great Lakes-St. Lawrence Seaway. This bill will authorize deepening the connecting channels west of Lake Erie. This is by far the single most important bill affecting the State of Wisconsin in this Congress.

Secondly, I will once more resume the fight to improve the Nation's social security system. That means liberalizing pension benefits, particularly for elderly women. I want them to become eligible to receive their modest old-age pensions at the age of 60, instead of waiting and waiting until the age of 65.

Thirdly, another item on my legislative program is to make sure that this time Congress definitely enacts legislation for Federal improvements of our highway system. As we all know, the Nation's roads are choked with traffic. This universal traffic jam is costing us fortunes in terms of increased costs of distribution, in terms of highway accidents, and many other direct and indirect costs.

Opposing natural-gas rate increase

Question. I know, Senator, that one of the major items on your program is to oppose one particular bill, which you feel could be very damaging to the interest of Wisconsin—the natural gas rate bill.

Answer. That is exactly right.

One of the early bills which will probably be coming up is the so-called Harris bill. This dangerous bill could result in a third of a billion dollar increase in the already high gas rates which Wisconsin and 30 million other consumers pay for the fuel which is used in homes, offices, and factories.

This gas rate increase bill would very unfairly cancel out a decision of the United States Supreme Court. The Court had rightly held that gas rates should be—I repeat—should be subject to Federal control. Naturally I oppose very strongly the bill which would decontrol rates, and thus leave the consumer helpless and defenseless.

Fifth plan: Specific planks in farm program

Question. Senator, earlier you referred to the problem of Wisconsin agriculture. Would you tell us about some of the planks in your farm program?

Answer. I am glad to. I will just list them briefly, because time unfortunately is limited. The following are planks to halt the dangerous downward spiral in United States agriculture.

First, I propose that dairying be treated as a basic commodity, alongside the six so-called other "basic commodities," like wheat, corn, tobacco, and cotton.

Second, I propose that the dairyman have a minimum floor on his prices, just as the laboring man gets a minimum wage. That means the dairyman must get his cost of production plus a reasonable profit.

Third, dairy research should be strengthened, through a bill such as the Wiley bill for establishing a dairy research laboratory at Madison. That means finding new uses for milk and milk by-products.

Fourth, we have to step up our program of constructive use of the Nation's dairy surpluses. That means using dairy products for the needy folks in America. Moreover, to the extent that the supply is available, we should use the surplus to help relieve need among the hungry and starving people abroad.

Fifth, we've got to step up the consumption of dairy products right here at home. That means increased education of the American people on the value of eating wholesome, nutritious milk, cheese, ice cream, butter, and nonfat milk solids. It means making more dairy vending machines available. It means improved advertising, public relations and food recipe programs, to spread the dairy habit.

Sixth, we have got to increase the amount of milk which is used under the Nation's school-lunch program so as to feed our children's growing bodies with more milk.

Seventh, we must strengthen the battle against livestock and other diseases, which already cost the American dairy farmer so much.

Eighth, we must make sure that acreage is not diverted from other agricultural production into dairying. Why? Because that would only complicate our existing dairy problems, and make for a still more serious surplus.

Ninth, improve soil conservation through some such proposal as the soil bank.

Tenth, strengthen dairy production and marketing cooperatives.

These, then, are 10 points in my agricultural program. But please remember, folks, they are designed not simply to help the farmers, but to help our city people as well. That means making sure that the farmers can buy what the city people want to sell. It means, moreover, healthy bodies for 165 million Americans, consuming dairy products.

THREE JUDICIARY COMMITTEE PHASES

Question. Senator WILEY, thus far, in our program, you've discussed 5 points in your plan for the 2d session of the 84th Congress, including 10 specific planks in your farm program.

In the time remaining to us, would you run down the list of the many other points which you are proposing on behalf of the people of Wisconsin and of our Nation?

Answer. Yes, indeed.

My sixth point is to strengthen the Nation's antitrust laws. Right now, those laws, which are designed to protect small enterprise—meaning 4 million small businesses—against monopoly, these laws are confusing and vague.

I personally have the privilege of serving on the Antitrust Subcommittee of the Senate Judiciary Committee. And I am hoping that we will be able to come up with many specific recommendations to improve these antitrust laws. (Right now, I might point out, we are looking at America's automobile industry which is, of course, a mainstay of our economy.)

Next, one of the most important things we in Congress can do, relates to another subcommittee of the Senate Judiciary Committee on which I serve. That is the Juvenile Delinquency Subcommittee. Thus, I want us to come up with action on the Wiley bill, or similar legislation, to help curb the widespread crime which is committed by the Nation's youngsters. We must help prevent the crime, before it occurs in the first place, and/or help to rehabilitate the youngsters if they once get into trouble.

Question. That brings us down to the eighth point in your program, Senator.

Is it another point stemming out of your service as senior Republican on the Judiciary Committee?

Answer. That's right. You know, one of the important functions which I fulfill on the Judiciary Committee relates to its work in the field of combating subversion. That means combating the Communist enemy. So, I have offered numerous bills to strengthen the Nation's antisedition laws. I am hoping that we will be able to close up some of the present loopholes in antisubversion statutes during the next session.

Question. Thus far, Senator, you have referred to the St. Lawrence Seaway, social security, roads, opposition to natural gas rate increases, antimonopoly, antijuvenile delinquency, and antisubversion.

What is next on your program?

Answer. Here are some additional points.

Veterans, schools, health, Reserve

Ninth. We should pass veterans survivors' benefits legislation, so as to improve the position of the survivors of America's veterans, especially during this period of high cost of living. A bill for that purpose has already passed the House of Representatives, and is now pending in the Senate.

Tenth. The needs of the Nation's overcrowded schools must stand high in our priority list for the next session.

Eleventh. America's hospitals, particularly in rural areas, need both improvement and expansion. In addition, there is a clear need for stepping up medical research, so as to banish the illnesses which still take such a tragic toll among our people.

Twelfth. Congress needs to take another look at the Nation's Reserve program. Last year, we enacted an important new Reserve law, but already there are serious complaints to the effect that the law is not working out nearly as well as we might have hoped. Reserve units in many instances are mere skeletons, and Reserve obligations are still falling somewhat unfairly. We Americans want to be fair, and we want to be effective in the Reserve program. That is part of our efforts for vigilance against communism.

Question. That is an even dozen recommendations, so far, Senator. How about other points in your program?

Answer. Here they are:

Outdoors, housing, distress, disaster

The Thirteenth point is to strengthen our Nation's outdoor heritage, step up the battle against water pollution, protect our national parks, forests, and monuments against danger from any quarter.

Fourteenth. Strengthen America's housing. Fortunately, 3 out of every 5 of our people already own their homes, but millions of homes are obsolete and could stand repair or replacement, if sound credit is available. We're building 1¼ million new homes this year. That is still only a drop in the bucket compared to our unfulfilled housing needs.

Fifteenth. Relieve distress in critical unemployment areas. Why? Because, in spite of widespread prosperity, there is still need in isolated "pockets" of our country, in individual communities where unemployment is high, unfortunately.

Sixteenth. Explore disaster insurance plans, so as to help reduce the cost of natural disaster—flood, hurricane, tornado—if they should happen to strike.

Shipping, anticrime, labor, tax changes

Question. Any more points, Senator, in your program?

Answer. Yes, indeed.

Seventeenth. Strengthen Great Lakes shipping, provide for restoration of package freight service on the lakes, deepen and improve Great Lakes harbors, so as to accommodate deeper draft shipping through the St. Lawrence Seaway.

Eighteenth. Pass long-pending anticrime bills, measures to combat tax evasion by gangsters, together with antigambling bills, such as were recommended by our Senate Crime Committee.

Nineteenth. Remove inequities in the Nation's labor-management laws, inequities on which labor and management, in many instances, both agree, and

Twentieth. Last but not least—revise the Nation's tax laws. Remove tax injustices. Take a new look at the nuisance excise taxes, the so-called sales taxes on individual purchases, provide additional relief for low income brackets, providing we can balance the budget.

Give the taxpayer a break, particularly by continuing the all-out battle against governmental waste and inefficiency. That's about it. Of course, if time permitted, I could add numerous other points in my proposed program for 1956.

The political situation

Question. Well, Senator WILEY. you have certainly provided a great deal of food for thought in these 20 recommendations. I know that the people of Wisconsin will be following closely your work on each of these fronts.

Now, how do you feel about the political situation as it shapes up in 1956?

Answer. Well, we of Wisconsin are of course looking forward to the April 3 date of the preferential primary for the Presidency. The closing date for filing for the primary is March 2.

It is still too early, of course, to be very sure as to what the picture will look like, in either the Republican or Democratic races. But I do want you to know this: irrespective of the April presidential primary, and the September primary for the congressional races, we in public office all have an important job to do—in every single one of the 11 months of 1956 preceding the November election.

In other words, the American people don't want men in public office to be talking and playing politics all the time. The people expect, and are entitled to, constructive action immediately—on issues like roads, social security, tax revenue, schools, health, housing, the seaway, and the various other subjects which I have mentioned.

That will certainly be my aim—to provide such constructive action.

Question. I know, Senator, that this constructive note will be well received by the people of Wisconsin.

CONCLUSION

Answer. Yes; I think we should all remember the old song about "accentuating the positive." That means emphasizing the constructive, not the negative. Why? Because there is too much of a tendency these days to talk negatively about individual personalities or to take a gloomy look about possible troubles on the national or international scene.

To the contrary, we as a people have so much to be thankful for, we have so bright a future in store for us, that we should certainly look forward to the future with faith and optimism. In that way, we will be better able to meet the problems up ahead.

Southern Forestry

EXTENSION OF REMARKS

OF

HON. SPESSARD L. HOLLAND

OF FLORIDA

IN THE SENATE OF THE UNITED STATES

Thursday, January 5, 1956

Mr. HOLLAND. Mr. President, on October 3, 1955, I had the honor of delivering the keynote address at the 80th anniversary meeting of the American Forestry Association, in Jacksonville, Fla.

I ask unanimous consent that my address be incorporated in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SOUTHERN FORESTRY: AN INDUSTRIAL REVOLUTION WITH ROOTS

(Keynote address of United States Senator SPESSARD L. HOLLAND, of Florida)

I was delighted when the American Forestry Association invited me to speak at this great convention. Naturally I have wondered just how I might contribute something to the success of this meeting. I am conscious of the fact that many of you have come here from distant States. Accordingly, every minute of your stay here should be both interesting and profitable. I am hoping that my part of the program may not be a roadblock in this connection.

First of all, as one born and bred in the Sunshine State, one of the fastest timber growing States in the Union, I welcome you to Florida and to the South—a region of fast-timber-growing States.

I think you came to the right place for this meeting. Here in Florida, the second largest State east of the Mississippi, you have all the elements to please the heart and mind of any forestry-conscious individual. Ponce de Leon, the Spaniard, aptly described this State in the year 1513, nearly 4½ centuries ago, and gave Florida her name. Here's what his ship's log, in an ancient English translation, contains by way of description:

"They steered then along ye coaste for the purpose of seekying a haven and this same nyghte they saw lande nearbye at eighte fathom water; which they supposed to be an ilande and straitwaye named it Florida, on account of the marvelous viewe which met their eyes of beautiful Orchardes, Plantes, level gardens and animal kynde; and then as Jean Ponce nowe allsoe discovered the daye to bee ('Pascua Florida,' Easter) Sunday, he determined for those twoo reasons to give this name to ye lande."

And it was here in Florida that one of our first Federal ventures into the field of forest management took place. I quote from Ovid Butler's American Conservation in Picture and in Story an item relating to the administration of President John Quincy Adams 130 years ago:

"Seapower in President Adams' day meant wooden ships and he foresaw that maintenance of a strong United States Navy depended upon a permanent supply of proper timber. One of his first acts upon becoming President was to establish a naval station in the liveoak region of Pensacola, Fla. At the same time he had a reconnaissance made of the liveoak supply along the coasts of Georgia, Florida, and North Carolina. The depleted conditions reported prompted him to initiate a project for the growing of liveoak for naval timbers. To this end he withdrew 30,000 acres on Santa Rosa Island, across the bay from the new Pensacola Naval Station, and in December 1828 work began on this, the first Federal venture into the field of forest management."

You probably are wondering why I take this time to mention this bit of the history of conservation. On the Federal Archives Building in Washington is this saying, "What is past is prolog." It is my concern and I know that it is yours, too, that we learn well from the past in order to chart a wise course for the future. Here in the South we are building in forestry, in part at least, on the basis of our knowledge of past conditions and events.

My office within the past month has received an attractive bulletin called Native Land published by the National Association of Manufacturers. I commend to you its reading. It has much in it about forestry. In addition it points out that conservation—or rather lack of conservation—influenced the course of empires long before our country was established. I quote from it as follows:

"Trace the course of civilization westward from what historians call the Cradle of Civilization—the area through which the Tigris and Euphrates Rivers flow in Asia Minor. The way is marked by the remnants of the glory that was Greece and the grandeur that was Rome and Babylon and Persia and empires that flourished long before even these.

"You come upon areas where you find olive and wine presses, wrecked by time and weather. But you search the horizon in vain for a single olive tree or vineyard. Great cisterns still collect the water that falls from the skies. Meantime, stretching out for as far as you can see, are deserts—man-made deserts—where there were once waving fields of grain.

"Where there were once thriving populations and rich cities you find shepherds tending underfed flocks that nibble at the sparse grass. Farmers work their worn-out, sunbaked fields against a background of crumbled colosseums and tottering temples. The Cradle of Civilization has also been the Graveyard of Empires."

Each of us learns most, of course, from his own personal experiences. I would like to tell you of some of the things I have seen right here in Florida. I was born at Bartow, 200 miles south of here, and my home has always remained there. In my lifetime I have seen two relatively old forest industries boom, decline and rise to expand again and I have seen a new forest industry start and grow strong.

The older industries to which I refer are, of course, naval stores and lumber. As most of you know the naval stores industry is one of the oldest industries in the South, and in the Nation too. One of the reasons for the settlement of Jamestown was the hope of England to develop a source of naval stores. As early as the turn of this century it was believed that the gum naval stores industry was doomed because the big pine trees which were needed for the crude methods of gum collection in chopped out "boxes" were becoming scarce. Through research new methods were devised; first a cup and gutter system supplanted the old chopped box, and more recently a system of bark chipping, using acid and doubleheaded nails,

has given the naval stores industry a new lease on life by making profitable use of second growth pines. Florida is now exceeded only by Georgia in our naval stores production.

The other older forestry industry to which I refer is the lumber industry. Pine lumber production reached its peak in Florida in 1909. At that time 75 large sawmills accounted for 70 percent of the production. From 1936 to 1944 Florida's lumber output dropped almost half. Today about 600 sawmills, most of them small, are cutting the lumber produced in Florida but, thanks to sounder forestry practices, lumber production has gone up again.

While our pines account for the larger part of our lumber industry, we still have substantial production of cypress, some cedar, and continuing production of various hardwoods, which our State forestry department is seeking to encourage and increase.

The forest industry which is relatively new to most parts of Florida and the South is the pulp and paper industry. In 1925 the Nation produced 5 million cords of pulpwood of which less than one-fifth came from the South. In 1954 when the Nation produced 27 million cords about two-thirds of all this came from the South. Florida alone contributed almost 2 million cords. Florida now stands third among the States in capacity of her mills to produce pulp.

While all forest industries—lumber, naval stores, poles, cooperage and pulp—have shared in the South's industrial revolution it is the pulp and paper industry that has had the most pronounced effect. It has led the way in making possible our forestry industrial revolution with roots.

The pulp and paper industry has made tremendous investments in the South. It has invested not only in multimillion-dollar mills but also in lands, operations, facilities and personnel. These big mills are not easily moved; they are permanent investments—they are here to stay.

What brought about the great movement of pulpmills into the South and their recent expansion? In addition to the excellent facilities such as workers, transportation, and steady supplies of clean water, which it offers all industry, the South has the additional wealth of fast-growing second-growth timber, and abundant land for new forests.

Most of our old growth timber has long been cut but through the benevolence of nature and the help of a few far-sighted pioneers a second growth of pine and hardwood developed throughout much of the South. At first this regrowth was considered practically worthless. Why? Simply because there was no market.

Then the pulp mills came, and now most of the South has good markets for its second-growth timber. There can be no argument as to which is more important—the timber or the markets. We must have both. One without the other is of little value. The mills are providing the markets, which make forestry profitable. But it is equally true that only through intelligent forestry will we be able to sustain in perpetuity this great industrial revolution with its roots in the renewable forest resources of the South.

Most people do not realize that more than half of the capacity of the pulp mills of this Nation is now in the South. Florida alone has 10 mills with a total 24-hour capacity of 5,415 tons which is about equal to one-half of the capacity of the mills throughout the entire northeastern region.

If I seem to emphasize too much the achievements of the pulp and paper industry and do not discuss sufficiently the accomplishments of the lumber and naval stores industries, I hope that my friends in lumber and naval stores will forgive me. Many big lumber companies and naval stores operators have been practicing good forestry for a long time. When I speak of forest industry I include all industries which provide markets for the forest growth. I like to think of industry also in its broadest sense including not only the mills but the workers, the land, and the consumers as well.

What is this great pulp and paper industry doing to assure its future? In the first place it has bought large forest holdings and is managing them intensively. Some of the finest forestry operations you'll see anywhere, and I hope you will see them while you are here, are in the Florida holdings of this industry. But most of the great quantities of wood these mills use come from noncompany lands. Consequently, it is in the interest of the mills to encourage their neighbors to practice good forestry. The millowners realize this and have started a good-neighbor policy of helping adjoining landowners practice forestry. Most of these neighbors are small landowners.

Both the problems and the opportunities of the small woodland owners have been pointed out many times since they were first emphasized by the Reappraisal Survey made by the Forest Service some 8 to 10 years ago. I fully expect that in the new study now nearing completion that has been made by the Forest Service with the help of the States, industry and others, we will find that the small woodland owner is still the key to the forestry future of the South.

One thing which the owners of small tracts urgently need is technical assistance, which is procured by large landowners from private professional foresters. I am especially proud of the accomplishments under the Cooperative Forest Management Act of 1950 whereby the State foresters in cooperation with the United States Forest Service have farm foresters working with the many small forest owners of the South. I was glad to work with Senator ELLENDER, and others on the committee which secured its passage. At this point I would like to pay a tribute to my colleague in the House of Representatives who has worked tirelessly for this act and many other pieces of forestry legislation—Congressman BOB SIKES, of West Florida.

We have made great progress in tree planting in the South. In 1954 the State of Florida produced about 75 million seedlings. The State Forestry Department produced two-thirds of them on its two great nurseries and industry nurseries produced the other third. The State is now completing a third large nursery, but I am told that even with that new production we will still not quite meet the demand which already exists. In other words our property owners are, for the most part, decidedly forestry minded.

Of course, protection of this great forest resource is basic.

You are all aware of the progress being made in our cooperative forest fire control program since its inception under the Weeks law of 1911. You know of its expansion under the Clarke-McNary law of 1924. Through this program a great deal of State and private forest and watershed lands is being protected, and many benefits accrue to us as a result. Along with other Southeastern States Florida is now completing the organization of the regional fire protection compact which was approved by Congress last year.

But, increased effort by the forestry agencies and the continued support of Congress are needed in the forest fire protection program. It was enheartening to me, and I am sure to you, to note this year that the 84th Congress is apparently more forestry conscious than its predecessors. Of special interest to us was the item of $300,000 provided for expanded research in the long-leaf slash-pine belt extending eastward from east Texas to the Atlantic. Another notable item was the increase of over a half million dollars for cooperative fire fighting.

In 1954 throughout the Nation on State and private lands, there were over 168,000 fires, burning about 9 million acres. The damage came to about $45 million, without considering the loss in wages of woods workers, loss in values of processed forest products, and the loss of many other values that mean much to our economy.

None of us should be happy to learn that 77 percent of all the fires and 80 percent of the total burn occurred in the Southern States. Here, too, is where we have 70 percent of the total forest land area that is still without organized forest-fire protection.

Even though my own State of Florida is making much progress, with protection now applying to over 14 million acres, there are still about 6 million Florida acres without organized fire protection. It was on this unprotected area that more than 3.4 million acres were burned out of a total of 3.84 million acres burned in our State in 1954. In other words more than half of the unprotected acreage was burned over in 1954 whereas, even in that severe drought year, fire damage injured only a little over 3 percent of the protected areas. It seems to me that this 1954 fire-loss experience in Florida offers conclusive proof of the value of organized fire protection.

The forest industry in Florida is exceeded only by the tourist industry and agriculture as a source of income. Our forest products were worth in 1953 $368 million with three principal divisions as follows: $247 million, pulp and paper at the mills, $62 million, lumber, and $28 million, naval stores. More than 200,000 Floridians—workers and their families—are directly dependent upon forest products for a livelihood. So we have a big stake in our forest lands—they are decidedly worth protecting.

More than that, they are worth building up to even higher levels of productivity. We must have continuing research to devise ways of growing more and better quality timber.

Our State can be proud of its leadership in forest research. The work is done mostly at the research centers of the United States Forest Service, with the strong assistance of the Florida Board of Forestry and the cooperation of forest industries.

The Lake City Research Center is a mecca for naval stores men from all over the world. New methods of turpentining developed there are making it possible to get more gum with less labor costs. Tree breeding research at Lake City is beginning to produce trees that run twice as much gum as wild trees. These trees will be available for the turpentine orchards of the near future. The pulpwood industry, with its tremendous payroll in our State, has also much to gain from slash pine timber growing research on the Olustee Experimental Forest near Lake City.

In west Florida and portions of the peninsula, the Forest Service Research men are learning how to reclaim the vast acreage of scrub-oak sandhills for pine-timber production. This research will ultimately mean millions of dollars to west Florida's economy.

Fifteen million acres of wild land plus 3 million acres of improved pasture provide grazing for nearly a million beef cattle in south Florida. What needs to be done here is to learn how to utilize the forage that is available without deteriorating the resource. Research may be able to find out how to increase the amount of land available for livestock in the future.

There are nearly 4 million acres of cutover forest land in south Florida. Some of this will go into cattle production, but a great deal of it should be reforested by planting. Unfortunately, the wet summers and dry winters in that region kill off many of the trees, but this is a problem that I'm sure research can solve if we keep at it.

I've been talking mainly about Florida because that is the State I know best. But what is going on in our State is fairly typical of what is happening all over the South. Now, in winding up, I want to emphasize that the South is intensely proud of its

forest industrial revolution. We've come a long way in a comparatively short time and the future in prospect has a rosy hue. We think that what is happening here is good and that our forest industry will continue to prosper greatly. Our progress has its roots anchored firmly in the soil. Like the tap root of a longleaf pine, these roots run deep. Our forest industry will need continuous care, of course, else the "roots" might wither and die. We shall, of course, have many problems to meet, many difficulties to overcome, but we are rapidly gaining more technical knowledge and the facilities to provide, through good forest practices, the care needed to safeguard these roots, which sustain such great values, I assure you that the South in our own interest and in the interest of the Nation will do everything within its power to husband well our expanding forest resources and to encourage even further expansion of "southern forestry, an industrial revolution with roots."

Address by Hon. Herbert H. Lehman, of New York, at Hanukkah Festival Sponsored by Israeli Bonds

EXTENSION OF REMARKS
OF
HON. HERBERT H. LEHMAN
OF NEW YORK
IN THE SENATE OF THE UNITED STATES
Thursday, January 5, 1956

Mr. LEHMAN. Mr. President, on December 15, 1955, I had the privilege of addressing the Hanukkah Festival at Madison Square Garden in New York City. I ask unanimous consent that the text of this address may be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

From a full heart, and with a deep appreciation of the historic meaning of tonight's occasion, I say to you—and to all the world—"Shalom," peace be unto you. And in this greeting, I include the Arab World. I wish to all men, everywhere, the blessings of peace.

This is an occasion not so much for words as for deep and joyous feeling. While Hanukkah is a holiday of celebration and triumph, it is also a holiday of dedication. And tonight none of us is without a somber sense of the dangers which, at this very moment, confront our co-religionists in Israel.

Our concern for them is not based entirely on the fact that they are Jews and we are Jews. First of all, we are Americans. As Americans, we must have an abiding eagerness and a deep anxiety for the preservation of peace in the Middle East. As Americans, we must zealously strive, with hand as well as heart, to preserve the beacon of freedom and democracy that shines from Israel and sheds its light throughout the Middle East.

The fact that this light still burns undimmed impresses me as almost as great a miracle as the one which our spiritual forefathers witnessed ages ago in the Temple and which we commemorate tonight.

On this night let us make clear that the people of Israel are not isolated and alone, besieged and surrounded though they may be. Here and wherever men breathe free, there is an endless host who support the resolve of the Israeli people to defend and maintain their Republic, and the cause of freedom and democracy for which it stands.

This is not a night for captious criticism, but we cannot view with easy approval the irresolute policy of our own Government—a policy of half-measures and half-answers—a policy of too little and almost too late—despite critical and growing dangers to the cause of peace and to our own vital interests in this crucial area of the earth.

Nor is this a night for intemperate anger or indignation, but still we must take note that while the voices of the Kremlin shrilly cry for peace, the hands of the Kremlin cynically feed the fires of war.

This is a night, an appropriate night, for affirmation of faith, and for prayer—faith in the power of right, and prayer for guidance and wisdom in the difficulties we face.

There are, of course, measures and actions which only our Government can take.

There are restraints and disciplines which only Israel and the Israelis can adopt.

Finally, there are actions which each of us, as individual Jews and individual citizens of America, can and must undertake.

Thus, as individuals, we can contribute to the UJA and buy bonds.

Tonight's gathering is a heartening token—indeed, a thrilling token—of the intention of Americans of Jewish faith, and of all faiths, to support this year's bond drive. As far as this activity goes, we are not going to let Israel down.

As far as our Government is concerned, the situation clearly calls for courageous and forthright action. We must assume a role of leadership that will rally the force and support of world opinion to the cause of peace and security in the Middle East.

A first order of action should be the negotiation of a security pact with Israel and any of her Arab neighbors who are willing to enter into such pacts with the United States.

Any such pact must guarantee the territorial integrity of Israel and of her Arab neighbors, too.

Our Government must press forward with its economic programs, such as the Johnson water resources development plan, giving assurance that our aims are unselfish, and that our sole interest is the welfare and security of all the peoples of this entire area.

Our Government should also give sympathetic consideration to any other proposals which might be made to alleviate tensions in this vital area. But we dare not lend support or comfort to so-called compromises which are not compromises at all, but would represent surrender of the vital interests of the State of Israel, and of the United States.

Let there be no Middle Eastern Munich.

In the meantime, in the face of the rapidly growing imbalance of military power, as a result of Soviet arms shipments to Egypt, we must supply arms to Israel. Israel must be enabled to purchase arms abroad.

But let us clearly understand that arms, and arms alone, do not furnish a satisfactory solution for the problems of Israel in her present plight.

There is only one end to an arms race—violence and disaster.

At the same time, it is true that while one side arms, the other must. There is only one thing worse than an arms race, and that is to lose one.

I believe that Israel must be kept strong, just as America must remain strong.

But armed strength alone is not even the answer for America. How can it be for Israel?

Israel must continue to represent, as she so nobly has in the past, a great moral purpose—the cause of democracy and freedom. And here I want to emphasize that in my considered opinion—and I hope Ambassador Eban will agree with me—the people of Israel must show restraint—as Jews have shown restraint for so many centuries—not only in order to endure and survive, but in order to remain true to the great moral heritage which is common to all who are of the Jewish faith. And though I drafted these remarks before the Syria incident, my remarks encompass that incident. Israel must continue, as in the past, to be the vibrant expression of a great moral idea and a great moral purpose. That idea and purpose must reflect in every act as well as word our people's traditional respect for the sanctity of each human life and of each individual human soul.

This moral purpose will give such a strength to the cause of Israel as to render impotent, in the end, all the designs of her enemies. Around this moral purpose, I am confident, the strength of the free world can be rallied.

In these ways, I believe peace will be assured in the Middle East, and Israel will be saved from the fate of Korea, or even worse.

The day must and will surely come when the present armistice lines that divide Israel from her neighbors will become permanent boundaries. These boundaries will then in turn cease to be passageways for marauders and infiltrators and become instead arteries for trade and commerce, those two historic ambassadors of peace and cooperation.

We pray that these lights, the lights of Hanukkah, will illuminate the path to such a day of peace and understanding, under the guidance of God, the Father of us all.

Your Congressman Comments

EXTENSION OF REMARKS
OF
HON. WILLIAM LANGER
OF NORTH DAKOTA
IN THE SENATE OF THE UNITED STATES
Thursday, January 5, 1956

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a press release by Representative USHER L. BURDICK, of North Dakota.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

YOUR CONGRESSMAN COMMENTS

(By USHER L. BURDICK, of North Dakota)

OUR LACK OF FOREIGN POLICY

WASHINGTON, D. C.—We have made so many blunders in our foreign policy that it is going to be difficult for the taxpayers of the United States to repair the damage. These mistakes are chargeable to Democratic and Republican administrations alike.

Making an agreement with Russia to let her enter Berlin first was a sad mistake. All the trouble we have had because the Russians were in control of a section of Berlin and East Germany could have been avoided. It will be recalled that our armies were delayed several weeks in order to let the Russian armies enter first. Another mistake was begging Russia to get into the war against Japan when we had Japan licked to a frazzle. The result of this mistake was the Korean war, and after it started we would not let our soldiers fight, and as a consequence the Korean war is not yet settled.

Another huge mistake was withdrawing our support to Chiang Kai-shek, and thus compelling him to retreat out of China. How we could possibly have done this when at Casa Blanca we gave positive assurance that we would support the Nationalist Chinese army is something that cannot be explained. The story is well known of how General Marshall withdrew arms from the Nationalists as the agent of the administration. The result was that the Communist armies overran all of China.

Another project we put forth was the forming of the North Atlantic Treaty Organization, in which many of the countries involved

did not want membership, and most of them have been like worms ever since. No country in Europe was as excited about the danger from Russia as we were. The next blunder was going down into the heart of Asia and trying to organize a number of countries to join in one central organization to defend all of Asia against communism. The result has been that Russia is now doing the same thing, and, like us, promising money, guns, and everything else if they will rely on her protection. Many countries, like England, the Netherlands, France, and Spain, for centuries have had colonial empires, where the people did not rule and were subjected to foreign dictatorship. Some of these empires have been given back to the people, but many still continue. When we woo France, for example, to join the NATO, we impliedly approve of the colonial empire of France. Immediately the Russians come in and promise the people self-government and brand us as supporters of the colonial system; and this promise, even though the Russians have no intention of granting it, is great ammunition against us. The papers report that Russia is making loans and furnishing guns to the Afghanistan Government and support of guns to those Moslem countries fighting Israel. This situation is apt to be the powder keg of a great uprising among the Mohammedans.

We have rested our security on the fact that we organized the United Nations and that through it wars could be prevented. But look at the record. The U. N. has devoted most of its time, outside of debating, to trying to establish peace among the Israelites and the Mohammedans. But what are the facts? The trouble still continues and is apt to break out into a great war at any moment. Russia backs one faction and we back the other, yet both the United States and Russia are brother members in the United Nations. We propose measures for peace, and Russia promptly vetoes our plans. But still we cling to this organization. The United States and Russia have been in a cold war ever since World War II ended, and yet we are both members of an organization dedicated to peace.

If every nation in the world were a member of the United Nations, do you think that would stop the Russian cold war? Far from it. The Russians had a lot to do about starting this organization and they have and will continue to use this forum as a propaganda base for their own intent to destroy capitalism. We have held meeting after meeting, but the disciples of Karl Marx, Lenin, and Stalin are right on the job to do what they intend to do, and that is to bring about the total destruction of capitalism.

Some people in this country are afraid that we, alone, cannot defend this country. I venture to say that with 10 percent of the money we are now showering upon every country on earth we could not only defend ourselves but be in a position to maintain at least one other country on the face of this earth where liberty and freedom is secure. If we follow that path which leads us into every squabble anywhere in the world, the time will come when there will be grave doubt of our ability to preserve this country.

Recently the papers carried the information that we are to dig up $4 billion for aid to foreign countries in the way of economic support and to supply arms. We all want to see the budget balanced, but we have about as much chance of balancing it and keeping the debt limit within the law as we have in making a successful round trip to the moon in a model T Ford.

It takes this kind of money to correct the mistakes we have made and are still making in our foreign policy. We speak of loans to this country and that country. I would rather have a page out of the harness section of a Sears, Roebuck catalog than to have a note against any nation which we are showering with money. We should not dignify these injections of money by calling them loans.

If we give foreign countries anything, let us give them the things known here as surpluses. Brother Benson just woke up to this method of cutting down surpluses, but still we are so used to voting billions of giveaway dollars that this $4-billion donation will undoubtedly be passed.

Address by Hon. William F. Knowland, of California, Before National Association of Manufacturers

EXTENSION OF REMARKS

OF

HON. WILLIAM F. KNOWLAND

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Thursday, January 5, 1956

Mr. KNOWLAND. Mr. President, I ask unanimous consent that there may be printed in the CONGRESSIONAL RECORD an address which I delivered before the National Association of Manufacturers on December 9, 1955.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Mr. Chairman, fellow Americans, in 179 years our Nation has grown from a small colony of three million people on the Atlantic seaboard to a great world power with a population of 166 million extending from the Atlantic to the Pacific.

The American competitive enterprise economic system, which is represented in part by members of your organization, has provided our people with the most productive economy and the highest standard of living the world has ever known.

This growth and this economic productivity has taken place under our American Constitution which recognized that personal rights and property rights were and are inseparable.

No system of socialism, Marxian or Fabian, could have produced such a remarkable growth and development in a country that represents but 6 percent of the world's population.

Other nations have now, or did in the past contain, larger natural resources, more population, older civilizations, and wider geographic boundaries. So these alone or in combination do not represent the priceless ingredient that has brought us to our present position as a leader of the free world.

The catalyst is the American constitutional system wherein the Federal Government was created by the people and given limited and specified powers so it might not in turn make them subservient to an all-powerful central Government.

Abroad and at home we face the challenge of those who would destroy us by Marxian brute power or by a Fabian process of sugarcoating each Socialist pill to produce a devastating narcotic effect upon once free men.

Both the external and internal threats may be camouflaged until after the American people go to the polls 11 months from now.

That is why the year 1956 may become one of the great turning points of history.

A short time ago some at home and abroad were anticipating a release of tensions by a cooling plunge into the mirage of Lake Geneva rising from the desolate trackless waste of a Communist tyranny that today enslaves almost one-half of the world.

At almost the same time Soviet First Deputy Premier Kaganovich was laying down the hard line to the party faithful at a dinner on November 6 in Moscow:

"If the 19th century was a century of capitalism, the 20th century is a century of the triumph of socialism and communism."

A short time earlier between the last two Geneva meetings, a robust and ruthless colleague in the Kremlin hierarchy, Khrushchev, said:

"Anybody who takes our smile for withdrawal from the teachings of Karl Marx or Lenin is making a mistake.

"Those who expect this will have to wait until Easter Monday falls on Tuesday."

In language devastatingly frank, these spokesmen of the Kremlin have made clear to our diplomats and our people that despite vodka toasts and Communist smiles that political conclusions should not be drawn from social favors.

Their statements mean that to cheat, lie, and murder, to violate treaties and to destroy free nations are still a part of "the end justifies the means" policy of the Soviet Union and of international communism.

In the dialectics of communism it means that the struggle will continue not by the standards of civilized nations with an obligation to God and to humanity, but by the tooth, claw, and fang standards of Marx, Lenin, and Stalin.

For the past 12 years beginning at Tehran in 1943, through Yalta and Potsdam in 1945, to the Korean war and in 10 years of United Nations deliberations we have been compromised by our entanglements with the Soviet Union through accepting their words rather than requiring deeds.

Since the rulers of the Kremlin cannot renounce the Soviets' role as a spearhead for world revolution any agreement they enter into with the free world is fraudulent.

Lenin said: "Communists will disarm only after we have completely forced down and expropriated the bourgeoisie of the whole world."

Because of the Soviet threats we face, our defense budget for the next fiscal year has been reported at $34½ billion.

This compares with the total expenditures of the Federal Government from the day George Washington was inaugurated as President until we entered World War I in April 1917, which amounted to $24 billion.

A prolonged siesta of wishful dreaming and failure to face the facts with traditional American courage and commonsense can jeopardize the preservation of our Republic and the survival of human freedom here and abroad.

We should not forget the Biblical injunctions in II Corinthians 6:14:

"Be ye not unequally yoked together with unbelievers: For what fellowship hath righteousness with unrighteousness: and what communion hath light with darkness?"

We are in a struggle for the minds and souls of men. We dare not continue to compromise our moral position if we are to win this conflict.

We must win the cold war if we are to successfully prevent world war III.

A prolonged stalemate will break us economically and ultimately undermine both our military and political position.

If America goes under in this struggle we would take the whole free world down with us. There would be no one left to bail out this Nation or our allies.

As for the neutrals, they can enjoy that luxury only so long as someone else is helping to preserve international law and order.

How long is a retreat from principle to be tolerated by the people of the free world?

Or have we become so immune that we do not want to be reminded of the facts by the press, radio, or television?

Are we or our allies to become so bewitched by the Soviet tactics that we ignore their long-term strategy?

Is the doctrine "peace at any price" to so throttle prudent warnings that men will dare

not speak out for fear their political future will be damaged if not destroyed?

"Peace at any price" means the ultimate communization of the world. It is far different than peace based on freedom and justice.

For if we accept this doctrine of "peace at any price" and they do not, it means that with their cynical and brutal measures they will pick off our allies one by one, first the smaller ones and then the larger. The neutrals will go by default.

If we dare not risk a conflict what will stop the ruthless men in the Kremlin from moving during the next 10 years, by external aggression or Soviet directed internal subversion, against Norway, Denmark, Western Germany, Italy, France, Korea, Japan, the Republic of China, the Philippines, Australia, Great Britain, or our own Territory of Alaska?

Ten years ago at the time of the Yalta Conference there were less than 200 million people behind the Communist Iron Curtain. Tonight as we meet here in New York there are over 900 million people who have lost their freedom to the most godless tyranny the world has ever known.

The world should have learned at Munich that appeasement is not the road to peace—it is only surrender on the installment plan.

Let us take just three significant examples of retreat from principle.

1. At Yalta in 1945 when Stalin demanded recognition of the Lublin Polish Communist Government, British Prime Minister Churchill declared that British recognition of the exiled free Polish Government in London was a matter of honor. Later, on the Soviet promise of free elections which they never kept and because of their adamant position the free world yielded.

2. In 1945 in the discussions leading up to the organization of the United Nations, the Soviet Union demanded membership for the Ukraine and Byelorussia. President Roosevelt protested and stated that they were no more eligible than any of our 48 States. Again the free world yielded to Soviet demands.

3. Previously on numerous occasions, the official representatives of Great Britain and the United States have declared that the Soviet attempt to force a "package deal" wherein qualified nations could hurdle a Soviet veto only by the admission of unqualified Communist ones was unadulterated "blackmail." Now in December 1955, the British and Commonwealth countries affirmatively support and we acquiesce by abstaining from voting on the issue. Again the free world has in the United Nations General Assembly yielded to an adamant Soviet position.

The shocking sequel to this shift is that at the United Nations headquarters the Representatives of the Republic of China were informed that if they used their veto right in the Security Council there would likely be a majority vote in the General Assembly to seat Communist China next year.

In any event, after the 1956 American elections the neutrals, the Soviet bloc and the British Commonwealth, other than Australia, have given strong hints that they will seat Communist China in the General Assembly.

I wish to say to you and to the American people that it is later than you think.

Communist China was an aggressor in Korea that inflicted 140,000 casualties upon us, including 35,000 dead; is now a violator of the terms of the Korean armistice, and is an extortionist that has sought to use American civilian and military personnel for bargaining purposes. I am opposed to the admission of Communist China into the United Nations.

Foreign policy is too important to be left to Government alone. It must be based on a fully informed public.

It is far more important that we save freedom for ourselves and our posterity than we save face for any United Nations member or diplomat.

As long as I have a voice and a vote in the Senate of the United States, I shall oppose diluting any of our rights under the American Constitution with any form of world government, wherein freedom is compromised with totalitarian tyranny.

A sound national economy and a solvent Federal Government are essential prerequisites for successful domestic and foreign policies.

The Eisenhower Republican administration came into office on January 20, 1953, and has now been in office only 35 months. The previous New Deal administration had been in control of the executive branch of the Government for 20 years and the legislative branch for 18 years.

Among its accomplishments in the limited period of time that this Republican administration has held office are the following:

There are 65 million people gainfully employed which is the highest record of employment in the history of the Nation.

The previous Truman New Deal budget has been reduced by over 10 billions of dollars.

The American people have been given a 7½ billion dollar tax reduction, the largest in the history of our Nation.

The stalemated war in Korea was brought to an end.

Wage and price controls have been abolished to the encouragement of our free enterprise system.

The policy of this administration is to reduce and not increase Federal governmental competition with private enterprise.

It is the policy of the Federal Government to bring businessmen and business methods into the administration of our public affairs.

Since President Eisenhower took office in January of 1953, the gross national product is up 6 percent; production in factories and mines is up 4 percent; construction is up 19 percent; business investment in plant and equipment is up 4 percent; employment is up 2 percent; personal income is up 8 percent.

In October of this year retail sales reached the highest in history for any month of any year and amounted to over $15 billion.

The state of the Nation is good. To be sure there are certain agriculture, mining, and industrial areas that have not been up to the national averages.

We will not solve our agricultural problems by reenacting the 90 percent fixed parity legislation for the basic crops under which more than $7 billion of agricultural products were accumulated.

The American farmer understands agricultural facts as does the distinguished former Democratic Secretary of Agriculture, CLINTON ANDERSON, now Senator from New Mexico. At the November Texas Farm Bureau Federation meeting in Fort Worth, Senator ANDERSON said:

"No farmer should ever forget that during all the time from 1948 through 1954, when a great gap has opened up between national income and farm income, the price support program was pegged to a rigid 90 percent standard."

The farm problem needs thoughtful light from the farmers and sound economists rather than political heat for election-year purposes.

Prudent and thoughtful people in all areas know the importance of agriculture getting its fair share of the national income.

Our support program should give encouragement to quality production of basic and nonbasic crops rather than quantity alone.

We must also be careful that supports do not price American agriculture out of the world or domestic market.

We must renew foreign aid programs whereby taxes upon the American farmer, businessman and worker go to help finance similar crops or products at lower production costs across our borders or in distant lands and foreclose agriculture, industry and labor from the advantages of our historic markets.

The challenge our generation faces is to preserve man's identity as an individual. How can he be protected in his personal, political and property rights against overpowering business, labor or governmental mechanisms which would submerge him.

Every generation of Americans has desired to improve the well being of our people and leave to their children an even better land than they themselves found.

Our challenge is—to demonstrate that this can be better done by our American system of competitive enterprise rather than by an all powerful Federal Government exercising its taxing, price and wage control powers to make the Nation into the image designed by Washington planners.

Continued deficit financing leads to inflationary pressures that would bring on Federal controls of prices, wages and allocations of materials. In peacetime such a program would strangle free enterprise and be the road to socialism.

We have made progress toward a balanced budget, but to date it is not yet an accomplished fact.

When our budget is balanced I believe that sound fiscal policy would require a start on the repayment of the national debt.

It would take 280 years to pay off the national debt at a rate of $1 billion a year.

At the lower rate of repayment of $1 million a day it would take 769 years to eliminate the debt.

Under the circumstances, Congress and the administration should show prudence in advocacy of new spending programs.

The public may surprise both ends of Pennsylvania Avenue by judging the quality rather than the quantity of legislation recommended and passed.

As the Federal administrative structure grows, it becomes cumbersome, tends to be arbitrary and can be dangerous to our system of checks and balances.

In December 1944, it reached an all time high of 3,209,000, which is more people than constituted the population of our country at the time we won our freedom.

It is now 2,397,869 which is still a top-heavy Federal structure difficult for a President to administer, for Congress to check upon, or for the courts to safeguard equity and justice for the citizen in the multiplicity of decisions handed down by anonymous parts of a huge organization.

The Hoover Commission estimated that there were a total of over 2,500 commercial and industrial-type activities with an investment of $15 billion. The Commission recommended that 1,000 of these facilities could be eliminated without injury to our national defense or any essential governmental activities.

It was Thomas Jefferson who said:

"In questions of power, let no more be said of confidence in man, but bind him down from mischief by the chains of the Constitution."

The American system of competitive enterprise is as essential to labor as it is to the investor and the general public. No segment of the national economy can ail for long without infecting the balance, to the detriment of all.

Heavy tax burdens, Federal and State, have in many cases resulted in the forced sale of successful small businesses or partnerships to their larger competitor when death suddenly brought tax obligations of a confiscatory nature.

We need to encourage the broadening of our private property economic base.

The more we can encourage widespread stock ownership among the general public and among employees, giving them all added incentive in private enterprise, the better it will be in combating those who would turn more and more to public ownership.

Early in this century, the enactment of antitrust statutes established traffic signals along the economic highway to protect the pedestrian public or the individual small economic business vehicle owner from the highpowered ones which were operated without a sense of public responsibility.

Bigness alone does not necessarily make for more efficiency or better and more thoughtful relationships with the union member, the stockholder or the general public.

No business or labor organization should have the power to strangle the economic life of 166 million Americans and by so doing endanger the whole free world of free men.

But overpowering business or labor organizations are not the only menaces to the dignity of man as an individual.

Big and overpowering Government is what our Founding Fathers sought to guard us against. We have already skipped too far down this primrose path.

The following are guide posts for the preservation of our free institutions:

1. Maintaining our constitutional system of checks and balances between the three great coordinate branches of the Federal Government.

2. The division of powers between the Federal and State Governments and limiting the Federal Government to its specified powers and preserving States' rights.

3. Keeping the military subordinate to the civil authority.

4. Maintaining control of education on the State and local level rather than in the Federal Government.

5. Balancing the Federal budget and making provision for a gradual reduction on the national debt.

6. A maintenance of the same standards of fiscal rectitude in the treatment of our social security trust funds that the Government expects of private insurance companies. It is also important to keep in mind that inflation hits the recipients of benefits in both cases.

7. Encouraging our free enterprise system so that our people will be gainfully employed and new opportunities will be constantly opened up for our increasing population.

8. The maintenance of peace with honor. We must realize it is neither necessary nor desirable to try to remake the world in our governmental, economic, or social image. Neither international nor personal friendships can be purchased.

9. In legislative programs seek to encourage a prosperous economic climate for agriculture, labor, industry, the investor, and the public by which they can provide for current needs and future normal requirements from adequate wages and earnings. This should take place under our American enterprise system rather than by political parties bidding against each other for group favor out of the Public Treasury.

10. Insist that both parties and their candidates discuss the basic issues confronting this generation. The time for the public to know where candidates stand is before their nomination and election, not afterwards. The times are too serious and the consequences too great to permit, this year or next, any waltzing around on the fundamental issues confronting us.

All Americans who believe in our political and economic system, regardless of their party affiliation, should join in the pledge of Thomas Jefferson, who said:

"I have sworn upon the altar of God eternal hostility to every form of tyranny over the mind of man."

Building a Sound Peacetime Farm Program

EXTENSION OF REMARKS
OF
HON. KATHARINE ST. GEORGE
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mrs. ST. GEORGE. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I include the address by Secretary of Agriculture Ezra Taft Benson made in Chicago on December 1, 1955.

This speech sets forward in clear, honest language the hopes and efforts of the present administration to put American agriculture back on a sound track.

We have got to have a dynamic program in the future. We cannot return to a program that proved its worthlessness and brought our farmers to their present plight.

The address follows:

BUILDING A SOUND PEACETIME FARM PROGRAM

As all of you know, the question of what this Nation's farm policy of the future shall be is very much in the news. I know that you are as determined as I am that the Republican Party shall always consistently champion the cause of a prosperous, free, and expanding agriculture.

The Republican Party has a long and illustrious record as the true friend of the American farmer. That reputation has been built in no small measure because our party has steadfastly espoused the same basic principles in which most farmers believe.

We have respected the rights of farmers as individuals. We have emphasized the need to help farmers help themselves. We have visualized the role of Government in agriculture as that of a partner—not a master.

I have been reading of late that there is no room for moderates in the Democrat Party—that there isn't even such a word in their vocabulary. To me that means there is no room for farmers in the Democrat organization—for most of the farmers I know are moderates, and rightly proud of it.

There is a farm problem—and it is a difficult one. There is this difficult problem because the same Democrats who have all of the easy answers now were never able to develop a workable, peacetime agricultural program during all their years in office.

Agriculture is a dynamic industry. It has special problems not generally encountered in other pursuits. In addition, farming in America has been going through a great technological revolution—a revolution which will bring lasting benefits to both farmers and consumers but one which poses real problems during the period of adjustment.

Agriculture has also had to face the dislocations which have always marked the changeover from war to more nearly normal markets and conditions. Difficult though this experience has been, agriculture is making the transition with less difficulty than ever before following a major war. You will recall the collapse of farm real estate valuation and the wave of mortgage foreclosures which came after World War I. In contrast, farm real estate valuations today are at the all time peak and mortgage foreclosures are near the record low.

Nevertheless, the Democrats have chosen agriculture as the major domestic battlefield for 1956. They did this through a process of selection. First there was the abortive attempt of the prophets of disaster to talk the country into a depression. Instead the general economy moved ahead at a record rate.

Then there were the minor skirmishes, such as the scurrilous assault upon the President's churchgoing activities. Of course, that backfired.

Next the Democrat leadership apparently decided it would be smart politics to capitalize upon agriculture's troubles. The same people who had shackled the farmer with price controls and regimentation—the same people who had sought to ram the Brannan plan down the throat of agriculture—suddenly began popping up all over the place with quack remedies and discarded nostrums.

Despite the basically sound health of American agriculture, I seriously doubt that it could survive the witch's brew now being stirred up in the Democrat cauldrons. I have been in this business long enough to know that there are no quick and easy answers. Even when the best possible farm program is evolved, it is unlikely to bear the imprint of such agricultural experts as Jake Arvey and Carmine DeSapio.

The efforts of Governors Harriman and Stevenson to outbid each other in this realm of what they think is agricultural planning have already reached ludicrous proportions. When Adlai Stevenson recently flip-flopped back to rigid, 90 percent price supports and then threw in his version of the Brannan plan for good measure, I watched with some interest to see if Averell Harriman could top that. He did. He even chided Adlai for being too moderate.

It might be worth noting that such a well remembered moderate of the New Deal as Henry Wallace has thrown up his hands in horror at the frantic farm proposals of the Democratic presidential hopefuls.

Even though there is nothing flexible about the price-support plans of the Democrats' spokesmen, there appears to be plenty of flexibility of conscience behind their public pronouncements. It has always seemed to me that truth has an important place, even in political argument.

Therefore, it was with some amazement that I read last week a report by the Democrat National Committee's special advisory committee on agriculture. Even allowing for the fact that this committee is comprised mainly of former political appointees of the Department of Agriculture, I had not expected to see it come forward with so many demonstrably false statements.

There was the flat statement that the Eisenhower administration "immediately upon coming into office" had "put into force the sliding scale of flexible-price program behind a smokescreen of greatly exaggerated 'surpluses.'" The fact is that flexible price supports for the basic commodities are just beginning to become operative with the 1955 harvests. The act which made this possible was not even approved by Congress until August of 1954. Flexible price supports for a variety of nonbasic commodities were flexed in both directions by the Democrats over a long period of years.

Furthermore, the two former Secretaries of Agriculture who signed this statement—Brannan and Wickard—once favored flexible price supports, as their boss, President Truman, did. In fact, flexible price supports for the basic commodities were a part of both the Republican and Democrat platforms in 1948. And the Agricultural Act of 1949, approved by a Democrat Congress, had as its very heart a system of flexible supports.

I wonder, too, how much this question of surpluses has been exaggerated. There is no exaggeration in the fact that the Federal Government today has some $7.5 billion invested in farm price support operations. The cost of storing commodities owned outright by Commodity Credit Corporation is

$1 million a day. Virtually all of this accumulation was piled up under a system which the Democrats now say is a solution to the farm problem.

A storage program is not a market—nor is a Government bin a customer. And it is markets that we need, and customers we must have.

Moreover, it needs to be emphasized again and again that it was not high price supports that resulted in high farm prices and incomes during the war and postwar years. It was war that produced them—the destruction of war, and the inflation that goes with war. No political party can or should take credit for wartime prices unless it also assumes responsibility for the war and the bloodshed.

Now I should like to discuss what kind of a farm program agriculture needs and wants. Farmers are in a cost-price squeeze. For nearly 5 years, farm prices have been declining while prices paid by farmers for goods and services have remained near their peak levels.

Some of agriculture's most perplexing questions developed because an emergency price-support program, born of wartime needs, was permitted to continue long after the emergency had ended.

From the end of World War II back in 1945, until the end of 1952, there was little real effort by the Democrats to evolve a workable, peacetime farm program. Instead, production incentives were continued in the face of dwindling demands. Even when supplies began building up to dangerous proportions, production controls provided in the law were not invoked. The throttle was kept wide open and nobody bothered about the brakes.

There were plenty of warning signals during the latter part of 1951 and throughout 1952. The parity ratio, which measures prices received by farmers against those they pay for goods and services, tumbled from 113 in February of 1951 to 94 by the time this administration took office in January of 1953. That's a decline of 19 points in less than 2 years. Ten points of that decline occurred in the last 7 months of the Truman administration.

The new administration inherited a large and fast-growing inventory of various farm commodities. We inherited the falling prices that go with accumulating surpluses. We inherited a legal situation under which production controls could not be made effective until 1954. And we also inherited a law which required us to support the six basic commodities at 90 percent of parity through 1954.

Now the same people who handed us this neat package of carefully fused bombs are blaming us for the explosions.

This administration has been kept busy for nearly 3 years putting out the fires, cleaning up the debris, and attempting to rebuild our agricultural economy upon a solid foundation. It has not been an easy job. But we are making substantial progress.

We have been recapturing lost markets abroad. United States agricultural exports during the last fiscal period were up 11 percent over the 1952–53 fiscal year. We are moving aggressively to increase these farm exports even more. For the first 3 months of the current fiscal year, exports were 20 percent higher than for a year earlier.

We have been utilizing record quantities of Government-owned surplus foods in school lunch programs and in welfare distribution at home and abroad.

This administration has acted swiftly and vigorously to provide assistance to farmers hit by such natural disasters as flood, drought and early frost.

The rural electrification and telephone programs have been aggressively pushed forward. The borrowers are in stronger financial position than ever before in the history of REA. They have already paid off nearly half a billion dollars in loans and in both programs less than 45 borrowers are behind in their payments.

We are willing and ready to do anything that is economically sound and fair to all of our people.

We moved effectively to ease the price decline brought on by heavy marketing of cattle 2 years ago through direct purchases of beef. Now we are undertaking a similar program for pork to meet a price problem stemming from unusually heavy hog marketings this fall. The Department of Agriculture is cooperating fully in a promotional campaign launched by the industry to increase consumption of pork products.

This year the average American will eat about 20 more pounds of red meat than he did 4 or 5 years ago.

We have increased expenditures for agricultural research and education. We are seeking to develop new crops which may do for the Great Plains and elsewhere what the soybean and hybrid corn have done for the Midwest.

The adjustment in dairy-price supports made early in 1954 has shown solid results. Consumption has moved steadily higher, Government purchases and inventories of dairy products are down sharply. And dairy farmers are now receiving higher prices for milk as a result in the better balance between production and consumption.

We can point to these and other important accomplishments in building toward a sound agriculture. Yet the business of meeting new challenges in a dynamic industry such as agriculture is never finished. We must constantly strive to broaden, strengthen and improve our farm policies to meet changing needs and conditions.

At a recent meeting with the President, we agreed upon a 6-point program to implement the present plan. This includes:

1. A stepped-up program of surplus disposal and expansion of exports.

2. A vigorous purchase program to remove market gluts wherever they occur and assist farmers in adjusting to market demands.

3. An enlarged program of soil conservation and incentive payments to divert cropland into grass, trees, and forage, particularly in drought areas.

4. Expansion of the rural development program for low-income farm families.

5. A stepped-up program of research, emphasizing lower costs of production, new uses for farm products, new crops, and expansion of markets.

6. A speedup in the Great Plains program in cooperation with the 10 States involved. (This is a program concentrated in the area between the Rocky Mountains and the Corn Belt—generally the Nation's grazing and wheat center—to make better use of the land and achieve a better balance of production.)

We shall make recommendations to the Congress in January along the lines of these six points. We are now putting the finishing touches on those recommendations. Obviously I cannot now discuss them in detail. But I can give you a general idea.

There will be a program which will aid farmers in shifting from harvested crops to grass. This idea, which has wide acceptance, has been called a "soil bank" by some and an "acreage reserve" by others. The scope of the program we shall recommend and the precise nature of it cannot now be reported. I can say, however, that our proposal will be geared primarily to better land use.

Its impact will be chiefly in areas where topsoil is being wasted in growing crops not needed by today's markets. It will mean better soil and water conservation; it will mean added income to agriculture and it will have the effect, at least for a time, of bringing about a reduction in the overall volume of agricultural production. This will be no nostrum, no one-shot remedy, no cure-all. It will be constructive. It will help, along with other programs, to move us in the direction we must go.

We shall also propose changes in the production control program which will give farmers more freedom. There are crops now under control where controls are not working, where controls work more hardship than benefit. For these crops we shall recommend the necessary modifications.

We shall propose vigorous programs of surplus disposal, both the strengthening of present activities and the development of new operations. This will be done in an orderly fashion without disrupting markets at home or abroad.

Since July 1, 1953—that is, in the past 28 months—we have moved out of the CCC inventory approximately 434 million bushels of wheat, 369 million bushels of corn, 2.6 billion pounds of dairy products, and more than 4 billion 400 million pounds of cottonseed products.

In February 1954 the CCC held peak stocks of 1.2 billion pounds of cottonseed oil. We have not only disposed of these stocks, we have moved an additional 250 million pounds that were acquired in the meantime. Most of these stocks were exported. They were sold mainly for dollars and at competitive prices.

We are determined to pull down the hoard of surplus built up under the old program, and to reduce our acquisitions. This surplus is the corpse of past unworkable programs. It is beginning to smell. We propose to move out this corpse so that we can deal with living things. Once this overhang is removed, prices will start working up again and farmers can look to a better day of freedom and prosperity.

These approaches to the farm problem make sense. Sensible people will recognize that fact. It will stand up well in comparison with what is offered by the opposition, now vacillating between a return to the bankrupt program of the past and a headlong plunge into the Brannan plan.

The Need for New Maturity in American Political Life

EXTENSION OF REMARKS

OF

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. THOMPSON of New Jersey. Mr. Speaker, I think there can be little question but that American political life is of vital concern to all of us in the House of Representatives. But this is a very large problem with many facets. One of the most important of these lies in the maturity, or lack of it, in that political life.

This subject was dealt with in admirable fashion by one of our colleagues, STEWART L. UDALL, of Arizona, in a recent address before the Sunday Evening Forum in Tuscon, Ariz. Mr. UDALL, after discussing the present state of our political maturity with great thoughtfulness, goes on to state that he feels optimistic about the chances to increase that maturity and he offers a program which he feels would do much to make it possible.

Because it is both thoughtful and penetrating, I should like to include the text

of the speech as a part of my remarks. The body of the address follows:

THE NEED FOR NEW MATURITY IN AMERICA POLITICAL LIFE

(By Representative STEWART L. UDALL, October 16, 1955)

I had a definite purpose this evening in choosing to discuss the quality of American political life. In the future we will, I fear, fritter away our opportunities for leadership if we are intemperate or short-sighted or narrow in our views. And on the other hand, if we fully understand and develop the attitudes and beliefs and principles that have made us a great Nation, we will be able to make the great decisions that will test our leadership in the years ahead.

Not long ago one of our eminent Washington political reporters, James Reston of the New York Times, tersely summarized our predicament in these words: "We are in more than an arms race. We are in a race with the pace of our own history, and the pace is so swift that our habits of mind and our institutions are lagging behind."

Similarly, H. G. Wells summoned his generation to battle nearly half a century ago with the utterance, "Life is a race between education and catastrophe," and that was at a time when even catastrophe, by our standards, had predicable boundaries and was not synonymous with annihilation.

Whichever description you prefer, the race is on, and it is a good bet that this generation will survive only if it learns to run and read (i. e., to educate itself) simultaneously. We in this country have learned the hard way in the past two decades that history cannot be escaped—and never stands still.

The central question now would seem to be whether we can manage to meet history halfway—whether we can acquire sufficient wisdom and adaptability to pass through the fateful years just ahead to safer ground beyond.

Like Pyrrhus in ancient Greece, many nations in this century have been the winners of military "victories" that cost them more than they gained. And now our newest weapons have left civilization a margin for error that is perilously thin. Plainly, we need a new maturity in public affairs, both here and abroad, if we are to reach accommodations which will avert catastrophe. As never before the times demand leaders who can conduct our affairs with regard for hard realities, and yet inform their actions with vision and spiritual strength.

How should this crisis of leadership be met?

And where may we look for new answers to the new problems which confront us daily?

Our leading political philosopher, Walter Lippmann, has attempted lately to suggest some answers. In his book, The Public Philosophy, he has described what he calls the "mounting disorder of western society." Events, he says, tend to outrun public opinion in the democracies, and he has no trouble in concluding that elected leaders are, for the most port, "timid, insecure men." Their political cowardice derives, he asserts, from being too fearful of a mass opinion which is often so outdated or unenlightened that it discourages creative thought and independent action.

Lippmann, it would seem, looks back with longing on the early morning of our Republic when Adams, Madison and Jefferson acted almost entirely on the promptings of acquired wisdom, and impassively awaited public response.

Pausing to look back upon the great decisions these men made, we cannot help but see some of the faults which divide our counsels and weaken our policymakers today. For example, it is anticipated in some quarters that men in politics see a mandate of the people in every opinion poll. Yet, these polls only purport to show what people are thinking at a given time, and quite often an enlightened public policy may run counter to the dominant opinion of the moment. In fact, it is quite likely that the leaders of our Government often have access to intelligence which may suggest that the long-term national interest lies in a policy or tactic which might be unpopular or misunderstood if it were forthrightly announced.

It is all too obvious, I think, that we are in need of a new public philosophy which would permit wise men to enter the seats of power and freely govern. Beset by exceedingly grave problems, we can ill afford to gamble on anything less than the highest order of leadership and intelligence.

Many political scientists (and practical politicians, too) advocate overhauling our Constitution and political system as a means of insulating public men from intolerable pressures and freeing them for high statesmanship. Here are several concrete proposals which are frequently discussed today:

1. Presidential terms might be extended to 6 or perhaps 8 years, with no right of succession. (We all have been witnesses of late to some of the unavoidable strains placed on our policymakers by the demands of an impending election.)

2. Congressmen also might be given longer tenure. (President Eisenhower, for one, has spoken up in favor of a 4-year term for Members of Congress.) A constitutional amendment along these lines should increase the chances that Members of Congress would take the long view and put first things first. During the 1954 campaign I had the feeling several times that the Eisenhower administration had not been in power long enough to formulate and try out new policies, and much of our debate was, as a consequence, unsatisfactory and highly inconclusive.

3. Our outmoded system of political campaigns, which usually paralyze our leadership for months on end could be modernized.

4. Congress could act to modify the seniority system, which ignores quality of service and rewards mere longevity to the end that the national will sometimes is thwarted.

If they could be enacted forthwith, these reforms might help transform our national life. However, short of a political miracle, it is highly unlikely that any of these changes will be brought about in time to influence the decisions our generation faces.

Clearly, then, we must somehow generate a new statesmanship from within the existing governmental framework. And if, as the President has suggested, we must contemplate a 50-year cold war, there may be time yet to create a moderate political climate in which statesmanship can flourish.

In our history as a Nation we can point both to periods characterized by national self-restraint and to eras when irresponsibility reigned. Some historians have formed a judgment that immature political conduct was the decisive factor in setting in motion the train of events which culminated in the Civil War, and the same certainly can be said of the Spanish-American War. In both instances, repressible conflicts became irrepressible, mainly because politicians willed it and fanned unreasoning popular passions to suit political purposes. Reconcilable differences could not be negotiated when inflexible attitudes were adopted, and even so great a man as Lincoln dared not swim against the tide. In the end he, too, was powerless to prevent the horrible conflict between our States. The leading historian of that sad era, James Garfield Randall, has scored its politicians, including Lincoln himself, as a "blundering generation."

We also are in danger of becoming a "blundering generation" unless we are wise enough to leave our diplomats and elected leaders freedom in which to negotiate settlements and pursue their best conceptions of the long-term national interest.

Fortunately, at least sporadically, the country has demonstrated mature self-control. The reaction of the country and the Congress to the startling inspection plan proposed at Geneva by President Eisenhower was heartening; and we stood together in the China coast crisis last winter and spring in a way which reflected confidence and national unity. Looking backward, we should be proud—and even mildly astonished—at the vision and statesmanship which enabled us to execute the Marshall plan and set up the North Atlantic Treaty Organization. This willingness to sacrifice for the general good required a broad, mature outlook by the political leaders of both parties and strong support by citizens at the grassroots level.

As a freshman Congressman, I have been deeply stirred by the role played this year in foreign affairs by Senator WALTER GEORGE, the chairman of the Senate Foreign Relations Committee. This man, in the twilight of a brilliant career as a lawmaker, has helped all of us recapture some of that breadth of spirit which is the real greatness of our country. What he has done to guide our foreign policy in recent months perhaps exceeds the great work done a few years ago by the late Senator Arthur Vandenberg.

In mid-April, at a time when the situation in the Far East seemed to hang by a thread, he delivered an impromptu address in Washington to the newspaper editors of America which may have marked a turning point in our foreign policy.

It is well to recall the circumstances at the time he spoke. Red China's Chou En-lai at the close of the Bandung Conference only a few hours before, had announced unexpectedly that he was willing to talk with the United States about relieving tensions in the Far East. The State Department had issued an immediate reply that the United States was not interested in such talks.

At this moment in history, then, Senator GEORGE spoke. He told the newspaper editors he thought we should be "big enough" to consider the Chinese offer, and when the President and Secretary of State returned to Washington the next day his advice was heeded. They countermanded the original reply, and fruitful talks subsequently were arranged.

More than anything I have read, this extraordinary speech by Senator GEORGE exemplifies the sober thought we need in these trying times. For instance, he said:

"I think it important that we know precisely the thinking * * * of our friendly nations * * * on the important problems that have arisen in the Far East and precisely what adjustments, if any, we should be willing to make to meet changing times and changing conditions.

"That is not appeasement. It never has been and never will be appeasement for any strong power to say to another power that it is willing to sit down and talk about the problems that concern you and concern the world."

Senator GEORGE also confessed that he changed his mind as events occurred, and he advocated the patient, step-by-step approach in dealing with other nations.

Something else the Senator said also foreshadowed a new public philosophy for America:

"We didn't seek world leadership. You don't get it by seeking it. World leadership comes to a nation, if it comes at all, because of the superb and supreme heroism of its people; because of their devotion to duty, private, and public, because of their tireless exertions to bring it about.

"Above everything else, it comes to a nation when it is great enough and big enough and strong enough, when mighty impulses are running through the world, to rise to the challenge of stirring times."

I would suggest to you that Senator GEORGE personifies the spirit that qualifies us for leadership among the free communities of the world. Would anyone deny that if we had a few more public men like him (men who have bold, growing minds, whether their ages are 36 or 57 or 78) our citizens would always rally behind those who govern?

What, then, is this new maturity we are talking about? Let me attempt to describe it:

1. It is an attitude which would place the national purposes first, and thereby build a broader sense of responsibility and put competing local prejudices into a proper perspective.

(It is a peculiar, but well established fact, for example, that certain Members of Congress make a career of opposing mutual security programs, even though both political parties recognize them as vital to this Nation's security. Using arguments and methods which sometimes border on the demagogic, they play upon the ignorance of the people concerning the importance of such legislation rather than seeking to educate their constituents to the value of these programs.)

2. It is the belief that national unity should be a paramount consideration, and that forces tending to divide our counsels through secondary issues should be resisted. (Our Yalta post-mortem is in point here.)

3. It is based on the conviction that any venture is a gamble and that men must have enough courage to pursue the course prompted by their best judgment and be quick to revise it later according to a better judgment. (For example, our flexible attitude in dealing with Marshal Tito's Yugoslavia has paid big dividends.)

4. It is a spirit which would decline to use vital national policies for partisan purposes. (There is still altogether too much partisan use made of foreign policy issues, particularly at present when differences between the views of the two political parties on the big issues are largely verbal.)

5. It is the principle that the interests of other nations always should be weighed in the scales, and that we should strive to understand the motives of neighbor peoples.

(At the NATO Interparliamentary Conference in Paris last July a member of the House of Commons commented to me that India's neutralism and unwillingness to see the world in terms of blacks and whites had a rather striking parallel in the outlook of our country in the years just preceding World War II.)

6. It is a frame of mind that would avoid military and political absolutes and would set up, instead, as many limited objectives as possible, directing our diplomacy to the achievement of these useful ends, however undramatic they might appear.

(We all recall the naval-blockade, China-coast-landing-party school of thought as applied to the Far Eastern crisis, and we can be thankful that more mature judgment prevailed.)

7. It is the belief that negotiation should be undertaken wherever there is a chance that it may be fruitful, and that our negotiators should be ensured enough freedom of action that wise bargains can be struck.

(In the days to come, particularly in our dealings with Russia and Communist China, our President and diplomats are going to need elbowroom in which to make concessions and negotiate settlements. Unless negotiators have something to concede there is no point in talking.)

8. It would seek out and cultivate the virtues of humility and patience in our dealings with other nations and peoples.

(Our good friend, Ambassador Carlos P. Romulo of the Philippines, is a firm believer in this principle. To illustrate this point he told recently of a visit Mrs. Eleanor Roosevelt made to India. When met by reporters as she deplaned at New Delhi she was asked for a statement but declined, saying she had come only "to learn." This, he said, increased our prestige in India immeasurably.)

9. It is the spirit which would cherish those attitudes fostering mutual regard among men, not losing sight of the inner man and his Maker.

10. And last, this new maturity would reaffirm in word and deed the worth of the enduring ideas and institutions which make democracy the hope of mankind.

(In the long run our greatest asset is the freedom we enjoy under the Constitution, just as fear, suspicion, and repression of individual freedom are the long-term liabilities that ultimately will destroy the Communist governments of the world.)

These, then, are some of the attributes of the new maturity we need in American public life. It is my faith that we can achieve most of them without benefit of superhuman effort if only we will meet the challenges that beckon to us on every side. It would be unfair to expect our politicians to pull themselves up by their bootstraps and become minor statesmen overnight. The main effort, if we are to improve the caliber of our statesmanship, must come from citizens who will not settle for timid or short-sighted leadership and will drive demagogues and irresponsible men from the temples of government.

We would do well, I think, to recall the adage of Plato's Republic that the punishment of wise men who refuse to take part in the affairs of government is to live under the government of unwise men.

We face an uncertain future, but we can prevail if we look to the future with courage and high confidence in the rightness of our cause. No generation ever has confronted problems such as we face, and ours is, therefore, a great adventure where determination and wisdom yet may carry off the long-sought prize of an enduring peace.

Let me conclude finally with the magnificent peroration that Winston Churchill uttered last March in his final speech to the Commons as Prime Minister:

"There is time and hope if we combine patience and courage. All deterrents will improve and gain authority during the next 10 years. By that time, the deterrent may well reach its acme and reap its final reward. The day may dawn when fair play, love for one's fellow men, respect for justice and freedom, will enable tormented generations to march forth serene and triumphant from the hideous epoch in which we have to dwell. Meanwhile, never flinch, never weary, never despair."

Postmaster General Summerfield Says We Can Break Even With Higher Rates

---

EXTENSION OF REMARKS

OF

HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. REES of Kansas. Mr. Speaker, under approval of the House, I am including with my remarks a statement by the Honorable Arthur E. Summerfield that appeared in the January issue of the Nation's Business. It is entitled "We Can Break Even With Higher Rates." In view of the importance of the subject matter, I believe the Members of the House will be particularly interested in reading this statement.

The statement follows:

The United States Post Office Department has a new look—and a new spirit.

The new look is dramatized by the eye-catching red, white, and blue colors which now modernize mail boxes and postal trucks.

But the improvements taking place in the postal establishment—which serves more of our citizens more intimately and more frequently than any other Government department—are far more fundamental and much more significant than this new color scheme.

Never before have the post offices of the United States handled so much mail volume, so quickly, so efficiently, so economically.

Deficits are lower. The postal deficit of $362,700,000 for the 1955 fiscal year is less than half of the all-time high reported deficit of $727 million for fiscal 1952.

When our team of executives recruited from industry assumed responsibility for the management of the Post Office Department January 20, 1953, we found:

The Post Office Department had no certified public accountants on its payroll although its financial transactions exceeded $20 billion a year.

There was no modern personnel department to meet the needs of 500,000 employees.

No training program was being used.

The salary structure contained innumerable inequities and offered no real incentives for advancement to supervisory positions.

Although the Post Office Department handled more than 50 billion pieces of mail annually, it had no materials-handling engineers.

The worst highway safety record in Government.

No public information services were being used to help the public help itself to better mail service or to provide communication channels between management and employees.

No basic review of its transportation policies and methods had been made in 25 years.

Nearly 40,000 postmasters reported directly to Washington on even the most trivial problems.

Management control tools and methods were so completely lacking that when I first called for a financial report on the previous months' operations, I was told that such data would not be available for 18 months; that such reports were considered historical documents and never intended for management control purposes.

In 3 years the Post Office Department has been overhauled and reorganization is nearly complete.

Tried and proven concepts of modern business management have been introduced and the results are becoming increasingly apparent to the public.

The faster, more efficient, and more economical mail service is due in part to these improvements.

Mailers and postal patrons benefit from more than 70 changes in procedures. Post offices in most major cities are open longer and mail is collected later. More than 5,000 city letter carrier routes are being added annually. Modern rural-delivery service is being expanded constantly. New services are being added—and others simplified. The new certified mail provides important benefits of registered mail, including proof of delivery, at lower cost. A new money order procedure eliminates forms and reduces time spent in line. New pamphlets help the public help itself to better mail service.

The internal procedures of handling money, bookkeeping, and financial reporting have been greatly streamlined. Payrolls are being handled by modern punchcard checks and equipment in 15 centralized locations. The daily task of processing and accounting

for 1,500,000 paid money order forms is centralized in the new Kansas City Money Order Center which will ultimately use the most modern electronic equipment. Simpler financial procedures generally will achieve a total reduction of 5,000 positions from the overhead. This program relieves postmasters of unnecessary paperwork, gives them modern business methods, and enables them to concentrate on the major job of moving the mail.

A nationwide safety program has already reduced motor vehicle accidents from 13 to 8 per 100,000 miles. Even better results are anticipated.

Broader and better use is being made of all types of transportation by employing the one best equipped to do the individual job speedily, efficiently, and economically. This means expanded use of trucks and tractor-trailers, bus lines, highway post offices, and air cargo carriers; using the unused space on scheduled airliners for the experimental movement of 3-cent mail; a better coordination with railroad operations; and revision of schedules to deliver the mail on the day it arrives at destination post offices.

With the opening soon of the Wichita, Kans., regional office, postal operations will be decentralized into 15 regions and 91 districts, and operated on a home-rule basis.

The first coordinated progressive personnel program in the Department's history has been established. The installation of a sound salary structure, based on position evaluation, provides 508,000 postal employees with fair wages, incentive to advance in the career service, and compensation related directly to duties performed.

The Department has leased more than 900 new postal buildings, valued at approximately $45 million, through its commercial leasing activities from January 1953 to November 15, 1955. The new lease-purchase program by which buildings are bought out of rent, includes 27 further projects approved as of November 15, 1955. This will create $14 million in new construction. Both programs use the financing and construction capacity of private industry.

Close cost control has been established over the 85,000 motor vehicles the Post Office Department uses (of which 25,000 are owned by the Government). Postmasters are charged for the use of this equipment and personnel to make them cost-conscious. A Post Office Department fleet is being developed consisting of four basic standard production-line trucks which will do the same job better than the 7 types of special-built, often hand-made vehicles formerly purchased. The estimated savings are 20 percent in purchase prices and 20 percent or more in operating cost.

Practical training programs aimed at improving personnel and mail service—involving 10 courses of instruction ranging from tying bundles of letter mail to executive development—have been launched. The suggestions and incentive awards program has been modernized, and the Department received, in 20 months ending November 15, 1955, double the number of employee suggestions offered in the previous 5 years, with savings estimated at $2,261,000. Uniforms are being redesigned, standardized, and brightened effective this month, although employees having garments of the previous design in good condition will be permitted to wear them until January 1957.

Unnecessary service units are being eliminated. Approximately 3,000 small post offices have been closed, at a saving of more than $4 million, with the patrons generally getting better service through rural delivery.

Practical experiments and research are being carried on continuously. Those now under way include: (1) a variety of motorized conveyances for city carriers; (2) an automatic mail facing machine; (3) automatic sorting by electronic scanning; (4) self-service equipment for post office lobbies; and (5) mechanical parcel post sorting.

The first nationwide effort to attract desirable new career employees into the postal service was launched in December 1955. Display posters in 10,000 post offices and on 16,000 Air Force recruitment billboards in 3,000 communities are being used for a 30-day period, outlining salaries and benefits of postal employment.

Despite the progress made in modernizing the mail service and reducing its cost, the Post Office Department faces two serious problems.

One is the inadequacy and the deterioration of its physical plant. Many post offices were built 50 or even more years ago. Far too many of our postal facilities are badly run down, outgrown, outmoded.

In some larger cities, facilities are so inadequate that mail is sorted outside post offices on the sidewalks or in the alleys, rain or shine. At numerous points, trucks cannot squeeze into the small post office loading and unloading areas. Many post offices and mail terminals are dingy, badly in need of renovation and better lighting, and completely lacking in modern equipment to speed mail distribution.

To correct these conditions will take time and money. We cannot continue to ignore these needs, particularly since they grow increasingly worse as the mail volume of this dynamic and growing country is constantly increasing. It is now 45 percent greater in volume than it was 10 years ago.

The other and more serious problem concerns the fiscal plight of the Post Office Department. The postal deficit accumulated since World War II—during a period of unprecedented prosperity—has now reached $4,600,000,000 and is costing taxpayers more than $100 million a year in interest alone.

Despite the efficiencies and economies we have been able to make, the Post Office Department now faces a yearly deficit of about $500 million. Nearly $200 million of this is the cost of the recently enacted pay raises and other employee benefits.

Basically, our failure to operate on a more nearly break-even basis is due to the fact that postage rates today are essentially the same as they were in 1932. Meanwhile, the cost of nearly everything the Department buys or uses has more than doubled, as have most household or business expenses.

That is why we are recommending moderate increases in postage rates on first-, second-, and third-class mail to Congress.

We believe Congress and the American people appreciate the need for reasonable rate increases so that their Post Office Department may improve its services and facilities and operate on a self-supporting basis as do the postal establishments of most major nations. Our neighbor, Canada, for example, has shown losses in only 3 of the past 20 years with an overall surplus for these 2 decades of $89,523,932.

Many Members of Congress have polled their constituents on this question of postage rates. So has the Post Office Department. In all parts of the country, the people queried indicated that they favor, usually by margins of at least 3 to 1, increasing postal rates to make the Post Office Department self-supporting. Public opinion here is apparently no different than in Europe where competent observers state that a postal deficit would not be tolerated.

If these rate increases are granted we can complete the job the Post Office Department set out to accomplish nearly 3 years ago: provide better service, lower costs, reduce the postal deficit, and operate on a break-even basis.

Then the Post Office Department can provide the most efficient service possible to meet the constantly expanding needs of this most prosperous Nation on earth.

Address by Hon. William F. Knowland, of California, Before the Women's National Press Club

EXTENSION OF REMARKS

OF

HON. WILLIAM F. KNOWLAND

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Thursday, January 5, 1956

Mr. KNOWLAND. Mr. President, I ask unanimous consent to have printed in the RECORD an address which I delivered before the Women's National Press Club on January 3, 1956.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Madam Chairman, Mr. Speaker, Mr. Majority Leader, my friend LYNDON JOHNSON, and fellow Americans, tonight as Americans we are thankful for the splendid recovery of President Eisenhower and Senate majority leader LYNDON JOHNSON.

We look forward to these annual gatherings with the Women's National Press Club. There is always a pleasant atmosphere. Some might say it is the calm before the storm.

At any rate we gather at this festive board before Members of Congress at the 2d session of the 84th Congress have had, at your hands, wrinkled brows from laurel wreaths piled upon them or hides so perforated by harpoons that one additional is hardly noticed.

With a free press and a women's press corps, which is second to none, there is, of course, the inference that these awards and demerits are nonpartisan in character.

Yet I would be less than frank if I did not reveal that in the inner sanctum where both Republicans and Democrats let their hair down, if they have any, there is sometimes expressed the strong belief that the Weather Bureau first got the idea for naming cyclones by latching on to one of your membership rosters.

No one has a crystal ball to predict with certainty what the future holds in store for our civilization in this atomic age, for the United States, our two great political parties or any of the individuals constituting them.

Lincoln, in his house-divided speech, said: "If we could first know where we are, and whither we are tending, we could better judge what to do, and how to do it."

As Americans, rather than as bitter partisans, we know that all the virtues are not in one party nor all the faults in the other.

Despite the claims that may be made as tensions mount when the session grows older the fact remains that neither party can, even if it would, ride roughshod over the opposition.

Any bill to become law will require a working majority which, because of defections one way or the other, will constantly change from issue to issue and time to time.

With the paper-thin Democrat majority of one in the Senate and the narrow margin in the House it is doubtful that any veto could be overridden.

It is a difficult task confronting the leadership in the White House and among the two parties in both the House and the Senate.

In 1913, 43 years ago, my father completing his 10th year of 12 years of House service helped welcome three new freshman members: SAM RAYBURN, CARL HAYDEN, and ALBEN BARKLEY.

That year the total Federal budget reached the then astronomical heights of $1,021,349,990.63. How times have changed.

He was also a good friend of both Uncle Joe Cannon and Champ Clark. I learned early in life that though the center aisle may divide parties it does not divide friendships or the respect political opponents can have one for the other. Over in the House, for example, SAM RAYBURN and JOE MARTIN have established sort of a rotating speakership.

In certain other countries of the world such a divided governmental situation might provoke paralysis if not civil war.

Here, such is the firm foundation of our constitutional system and the sense of responsibility of the leadership and Members of both bodies that I predict there will be a constructive record of accomplishment.

The President, on Thursday, will make his recommendations in the state of the Union message. In addition there will be a number of special messages.

It is then the duty and responsibility of the Congress, a coequal branch of the Government, and the constitutional respository of the legislative power to act on these and other measures before it.

No person can know for certain what the men in the Kremlin or their associates in Europe, Asia or the Middle East may be planning for this year of 1956. However, there is one thing certain, if they plan to take advantage of this year for some further adventures of aggression and are counting on our Nation being so paralzed by a great presidential election that it is unable to function to meet such a challenge they are making the mistake of their lives.

No matter how tense the campaign may become or how acrimonious the debate if our national security is challenged or human freedom in the world is endangered by overt acts of aggression, 165 million Americans will stand shoulder to shoulder in facing a common danger.

Our Nation was founded and grew to its present position of leadership based on faith and not on fear.

If we of this generation will only show the same courage and commonsense that motivated the men who sat at Philadelphia and, under what I believe was divine inspiration, gave us first our Declaration of Independence and later our Constitution of the United States there are none of our great domestic problems we cannot solve and there is no foreign foe we need ever fear.

Compliments to the Walnut Grove Products Co., of Atlantic, Iowa

EXTENSION OF REMARKS
OF
HON. BEN F. JENSEN
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. JENSEN. Mr. Speaker, the Walnut Grove Products Co., of Atlantic, Iowa, has had a long and successful career in manufacturing and distributing Walnut Grove stock feeds, which has gained great popularity all over the Middle West.

They learned long ago that there is no substitute for honest, proper advertising, to acquaint the people with the values of their products. Walnut Grove is now taking the lead to effectively publicize the food values of the best food on earth, healthful, muscle-building, tasty cornfed pork and beef, last week the board of directors of the Walnut Grove Products Co. announced their decision to set aside 50 cents from the sale of each ton of swine and beef feeds manufactured by the company.

The money to be given to a livestock organization devoted to the promotion and education of the value of meat and meat products. I have no doubt but what many, many other companies in the breadbasket of America will follow Walnut Grove's lead in their desire to induce this American people to eat more of the wonderful food and which will benefit all who eat it and produce it.

My compliments go to President A. E. Kelloway and his board, may success crown their efforts.

State of the Union Message

EXTENSION OF REMARKS
OF
HON. CHARLES A. VANIK
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. VANIK. Mr. Speaker, the President's state of the Union message today certainly provoked no surprises and very little congressional discussion. I can support most of what the President has requested in his message. However, I fear that the message is distinguished by its omissions and its inadequacies.

In his discussion of the discharge of world responsibility, very little is recommended beyond the making of long-term commitments for assistance to economic development of friendly nations abroad.

A great claim is made for the development of national fiscal integrity and a balanced budget. Very little recognition is given to the times which have changed the atmosphere of the Nation from a war economy to a peacetime economy. In the volatile Near East dispute between the Arab States and Israel, the President urges that we promote a fair solution and that both sides will make the contribution necessary to achieve that purpose. Where does leadership appear in these words?

It was, indeed, surprising to have the President tell us about his desire to continue the Federal-aid highway program. There has been very little argument on this subject for years. All reference was omitted to the conflict in financing proposals which proved to be the roadblock to the adoption of a workable highway program in the last session. The nonpartisan, noncontroversial issue of occupational safety received consideration in two separate instances in his message.

On the schools issue, Congress was deadlocked on the proposal of integration. Where does the administration stand on that issue?

In the 1st session of the 84th Congress the House of Representatives passed legislation reducing the retirement age for women to age 62 and provided for compensation benefits to the totally disabled at age 50. The House has clearly spoken on this subject. What guidance can Congress receive from these words:

In developing improvements in the system, we must give the most careful consideration to population and social trends and to fiscal requirements.

Is the President for or is he against the House bill?

On the question of civil rights, a bipartisan commission is recommended. The issues on this subject are resolved and the lines are already clearly drawn. A bipartisan commission would serve no other purpose but the occasion for delay in enacting an effective civil-rights program. Congress knows the subject matter and Congress is bipartisan. A commission would serve no useful purpose.

In his message the President said: "Change is the inexorable law of life." His message promises none. It reflects an America becalmed by Executive decree.

Additional Cotton in the "Set-Aside"

EXTENSION OF REMARKS
OF
HON. E. C. GATHINGS
OF ARKANSAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. GATHINGS. Mr. Speaker, on last Thursday, December 29, I wrote to Secretary of Agriculture Benson suggesting that he utilize the full authority of his office in placing an additional 1 million bales of cotton in the "set-aside."

Under leave to extend my remarks in the CONGRESSIONAL RECORD, I place this letter in the RECORD.

DECEMBER 29, 1955.

Hon. EZRA TAFT BENSON,
The Secretary of Agriculture,
Washington, D. C.

DEAR MR. SECRETARY: Under the "set-aside" provisions of the present agricultural laws, the Secretary of Agriculture is authorized to reserve as much as 4 million bales of cotton to insure the domestic economy and to provide an adequate supply of cotton in the event of emergency.

Having had the privilege of talking with hundreds of cotton farmers in recent weeks, I have found that they are deeply perturbed and depressed about their high-production costs. Year by year they find that they are paying more for the things they have to buy to carry on their operations, and, at the same time, they have seen a continuing decline in the price of cotton at the market place. This cost-price squeeze is driving great numbers of our people from the land and placing heavy burdens and added problems on our urban citizens.

By utilizing the full powers that Congress has placed in your hands by enactment of the Agricultural Act of 1954, this action on your part would serve to stabilize the price of cotton and would give the farmer a more equitable return for the product of his labor. It was the intention of those of us who drafted this legislation, that you be given this authority to cushion the shock of just such a situation as now exists throughout the cotton-growing areas.

For this reason, I urge you to utilize the full powers of your office in exercising the maximum set-aside for cotton prior to the announcement of price-support levels. Our American farmer should receive the maximum protection of the law and our national

security program must have the full benefits of an adequate set-aside in case of a national crisis.

Such action on the part of the Department would increase the present set-aside by 1 million bales and would benefit not only the cotton farmers but also the business economy of all areas producing cotton.

It would, in addition, increase our ability to cope with any contingency that might occur in this far from peaceful world and would take into account the increasing demands created by an expanding American economy and a growing American population.

I urge you take this action immediately.

Yours very sincerely,

E. C. GATHINGS.

Address by Hon. John W. McCormack, of Massachusetts, Before Massachusetts Chiefs of Police Association, Revere, Mass., November 30, 1955

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include remarks that I made at a luncheon of the members of the Massachusetts Chiefs of Police Association held in Revere, Mass., on November 30, 1955:

Mr. Chairman, the position and duties of a police official and police officer are of an importance that cannot be emphasized too strongly. The apprenticeship of a police official or member of a police force never stops. He must constantly be alert mentally and physically. For upon his shoulders rests primarily the responsibility of maintaining internal order. If it were not for our police forces, officials and patrolmen, standing as the guardians of the law, ever alert to maintain order and protect the law abiding, the small minority—the criminals and the reckless minded—would quickly turn any community into one of fear. The presence and the restraining influence of the police officer—and by "police officer" I mean officials of all ranks and the patrolmen—plays a most important part in maintaining law and order. As we view them as a whole, realizing that they, like everyone else, are human beings, we see that so few err or fail in performing their duties.

A member of a police force, I have said, is a guardian of the law. But he is more than that. He is a friend. He not only fearlessly protects the public against the criminal, never knowing when his life might be imperiled, but the real member of a police force is ever alert to help the sick, the afflicted, and the poor. And very few fail in this humane impulse and activity. We find him the friend and confidant of the youngster, of the aged, as well as the sick, the afflicted, and the poor. He is recognized by a uniform, but somehow or other we feel happier when we see him. But he is even more. In the first instance he is a judge.

I think one of the gravest responsibilities anyone can have is where he has to pass in judgment on other persons. When the average person thinks or talks of a judge, he thinks of a judge in a courtroom. But how many persons realize that a police officer patroling his route or beat, so to speak, is, in the first instance, a judge—that the sergeant, lieutenant, captain, police chief or commissioner must constantly, in the first instance, make judgments of great import to others. And in this respect they are judges.

As an example, how many of us can remember as youngsters when we took apples from a tree in an orchard, or stole a ride on a streetcar, or did other things prohibited by law, and we were caught—and instead of bringing us into court, with the resultant court record, the police officer took us home to our parents or warned our parents from whom we received parental punishment—instead of a court record. I could give many other illustrations of where they are judges.

Your apprenticeship days never end. There is always something new to learn in law and evidence and procedure; there is always something new to learn in human nature. Yes; there is always something new to learn in the efforts and technique of the criminal to carry out his criminal intent, and something new to learn how to prevent, or detect and apprehend them.

The efforts of the criminal in his attack on society and individuals never ends. He usually operates secretly to succeed in his crime without detection and arrest and conviction. No one knows when he is going to move. The individual who stands between him and the great majority of our people who are law abiding, is the police officer and our police forces. The "cop," and this term is not used derisively, but as a complimentary characterization, where would we be without him. I believe in giving "credit where credit is due."

When a police officer or police official does anything wrong, it usually receives wide publicity. But for every one who goes wrong, there are thousands who are courageously, and in an honorable and trustworthy manner, performing their duties. As a citizen—as a lawyer of many years and an active trial lawyer before I was elected to Congress—and as a legislator—not to flatter you but to pay you a deserved compliment—it is my opinion that there is no group of public or private officials and employees who perform their duties more honorably, more courageously, or more honestly than do the members of our various police forces.

And last but not least, their love of and loyalty to country has never been questioned. I have yet to hear of any police official or police officer who is a Communist.

In closing, I extend my congratulations to Police Chief Gillis of Beverly, Mass., in his election and his induction today as president of your splendid association. Chief Gillis will give to your association an outstanding administration. I also extend to the other officers installed today my congratulations. I know, like Chief Gillis, they will perform their duties with ability and loyalty.

Fruits of Freedom

EXTENSION OF REMARKS

OF

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. PELLY. Mr. Speaker, the President's message on the State of the Union which the House has just listened to with great interest and respect will brighten the hearts of the American people and likewise those of other freedom-loving nations. In foreign and domestic issues we have had renewed evidence of leadership dedicated to equality, individual dignity, and justice.

The President has invited a comparison of "fruits of freedom" here and elsewhere as against the record of the Communists, and he pointed up our progress in the field of civil rights. It is especially gratifying to note in his message a determination to continue this progress. In this regard I applaud his recommendation that charges of lack of voting rights and economic pressure on Negro citizens be examined by a bipartisan commission—and promptly.

Through the past 3 years, as the President pointed out with pride, our stature in the free world has increased because we have made more progress than ever before in a similar period to give all citizens equality in justice, in opportunity, and in civil rights. But the President emphasized the great need to expand this progress, and I for one look forward to the program he promised to give us to accomplish this objective.

Recently I read that our colleague the gentleman from New York [Mr. POWELL] had named me with 14 other Representatives as possible "key regional leaders" to fight for justice in civil-rights matters. When I saw this report I immediately wrote the gentleman from New York, saying he could count on me. Since then I have personally assured him of my desire to actively support a civil-rights legislative program. President Eisenhower's message points in the direction we must move, and I will be proud to continue supporting such a program.

Flood Protection, Relief, and Rehabilitation

EXTENSION OF REMARKS

OF

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. PHILBIN. Mr. Speaker, on October 24, 1955, the Subcommittee on Water Resources and Power of the House Committee on Government Operations held a hearing at Springfield, Mass. Under unanimous consent, I include in the RECORD the text of my statement to the subcommittee.

The material follows:

FLOOD PROTECTION, RELIEF, AND REHABILITATION

(Statement of Congressman PHILIP J. PHILBIN before the House Special Subcommittee on Water Resources and Power, Springfield, Mass., October 24, 1955)

Mr. Chairman and members of the committee, I heartily welcome you all to Massachusetts and express deep gratitude for the opportunity you have extended me and my colleagues in the Congress to present our views on water resources problems that have arisen in our State and area as a result of recent disastrous floods.

Let me assure you I greatly appreciate the able attention and study which my good friend from Alabama, Mr. JONES, and all the members of your committee are giving to these questions. Since there are many witnesses to be heard today I will confine my own remarks as much as possible.

Several other members of the Flood Prevention Committee of our Massachusetts congressional delegation, of which I am chairman, all distinguished colleagues of ours in the House, are here present and desirous of presenting their views.

I recognize that some of the problems connected with the flood may not in a strict sense fall under the jurisdiction of this committee. However, many of them are definitely relevant to your current studies on water resources and flood control and remedial measures which Congress may take at the next session.

I have in mind, of course, that the esteemed chairman of this committee, Mr. JONES, is also a high ranking and very valuable member of the House Committee on Public Works and, in that capacity, is fully conversant and very well informed on essential flood control projects throughout the Nation.

Now, it is hardly necessary for me to detail in extent the loss of life and damage to property caused by recent and repeated floods in our area. Great tropical storms swept over much of the Northeast last August 19, and the week before last, pouring a deluge of heavy rain over the countryside for hundreds of miles.

Rivers and their tributaries overflowed their banks, hundreds of small dams broke or overflowed, many people lost their lives, hundreds of homes were completely washed away, roads, bridges, public communications, water and sewer systems, and business establishments and industries were destroyed or damaged in varying degrees, rich farmlands were gutted and covered with silt and debris. The ensuing destruction, havoc, and distress were widespread. Our section was struck with cataclysmic force. As yet we are unable to estimate all the damage. Many communities were paralyzed and crippled, not only by the first storm, but by the second which followed just a few days ago.

I want to make it clear to the committee that all appropriate agencies of the Federal Government under the direction of our great President, who flew from Denver to Bradley Field, Conn., personally, to supervise relief and rehabilitation operations, have rendered a very great service and have extended valuable assistance. I will not take the time here to enumerate those cooperating agencies, but without exception they worked together, with the Red Cross and with State and local agencies to restore public services, to bring order out of the chaos, to help get our economy back on its feet and, above all, to relieve human misery. They did wonderful work. We are all very grateful for these efforts even as we are mindful that a great deal of work of further relief, rehabilitation, and flood control must be accomplished before many stricken areas can return to normal, and before they can be given maximum protection against loss of life and property from devastating natural disasters in the future.

Of all congressional districts in this State, I believe that the one I represent sustained the most serious damage here. Lives were lost, homes were carried away, people left homeless and industry and business sustained tremendous losses and damage. But there is hardly a section of our great State which was not affected and damaged in some way. Our neighbors to the south, the people of Rhode Island and Connecticut, suffered greatly. The same is true of Pennsylvania, New Jersey, and New York. The situation in our own State is indeed most difficult and with humility and deepest respect, I would bespeak your consideration of the following proposals.

1. Immediate appropriations by Congress of adequate funds to proceed with studies and construction of flood-control projects already authorized, and wherever necessary, in the Connecticut River Basin, the Thames River Basin, the Housatonic River Basin, the Blackstone River Basin, the Hoosic River Basin, the Neponset River Basin, the Charles River Basin, the Merrimac River Basin, and in all the tributaries and branches of these streams, including industrial and other smaller dams, which constitute so much of our water resources throughout the State of Massachusetts and New England.

It is clear that we must have Federal flood control and we must have it as soon as possible. Delay will be fraught with grave possibilities of fresh disaster. Our flood committee, of which I am chairman, is studying many specific projects. The entire situation is being reviewed by the Army engineers and we propose to press for earliest possible action by the Congress so as to secure adequate protection against future floods.

2. A second proposal which has been widely discussed and which I would like to suggest at this time is the urgent need for flood insurance and natural disaster insurance. Following the terrible Worcester tornado of 1953, I introduced in the Congress a number of bills seeking to cope, on a national basis, with great natural disasters. Among them was H. R. 6129. This bill would create a Government-owned corporation to insure against all natural disasters such as floods, tornadoes, droughts, forest fires, earthquakes, hurricanes, and all disturbances and conditions of such impact and severity that it becomes necessary for the President to declare disaster areas in any part of the Nation.

As you know, at present, flood insurance or disaster insurance cannot be procured from private insurance companies because, under normal insurance practices, its cost is prohibitive. Under the proposed bill, the Government would reinsure disaster policies designed to cover every part of the United States against the ravages of all natural disasters.

We can take notice of the fact that these natural disasters can and do strike, often like a bolt from the blue, at any time and at any place.

I believe that, when they have had the opportunity to study this proposal in its entirety, that the private companies would be willing to cooperate with the Federal Government in such an undertaking and would welcome a system whereby these heavy periodic disaster losses could be insured with Government support. This insurance would not interfere in any way with current insurance coverages because it would not go into effect in any area until the President has declared an emergency. It would constitute an additional, valuable, ready Government device for coping with great disasters. I would like to insert in the RECORD, with your permission, the text of H. R. 6129.

3. Expansion of the Weather Bureau to permit and promote greater Federal participation in weather and climatic research by the establishment of an appropriate Commission to make recommendations looking toward the accomplishment of this end.

I have prepared a tentative draft of this proposed legislation and with your permission would like to insert it in the RECORD. It contemplates a long-range program of research, coordinated with Weather Bureau activities, to speed intensive study of weather problems and to inaugurate as early as possible more effective hurricane and storm warning systems.

This is something, I think, that has been greatly needed in the Nation for a long time. As you all recall, Congress recently substantially increased the appropriations for the Weather Bureau to amplify present services. However, I think that a much broader basis is required in order to integrate the gathering and dissemination of information and forecasting of weather and climatic conditions. Such a system, if adopted, could very conceivably be used in coordination with civil defense and the armed services to warn our civilian population against approaching military attack. It would also aid our farmers, our shipping and air industries.

4. I also think that the Congress will have to strengthen and expand our machinery for disaster relief and rehabilitation. For one thing it should be more closely coordinated in the Federal Government and with the State and local communities. It should be put on a permanent basis.

Furthermore, I seriously doubt that situations of such magnitude can be satisfactorily handled by Government loans alone. Many people have lost their homes, but are still saddled with mortgage debt on nonexisting property. As a practical matter, they cannot possibly undertake further staggering debt on new homes because, even if it could be negotiated, it would snow them under financially, and it is unfair to American citizens so grievously afflicted to give them the feeling that they are objects of charity.

Many worthy businessmen employing our citizens are in the same predicament. The Small Business Administration has done a fine job under its present authority. But many businesses wracked by floods cannot survive under the burdens of heavy additional debt. Some consideration must be promptly given to the equitable and humane problems of putting these groups into the status quo ante—the position they were in before disaster struck them.

If proposals are to be adopted on a large scale, calling for huge Government funds for relocating entire communities—and such proposals are already under serious study by high-ranking Federal officials—the problems of rendering adequate financial aid to those who desire to remain in their present locations in order to save them harmless should also be carefully appraised.

These losses are far beyond the resources of individuals, or the State and local government. They will require the assistance of the Federal Government.

That will be costly. But so is foreign relief and aid; so are agricultural subsidies; so are great public projects in other sections of the Nation. The stricken people of the eastern seaboard who contribute so much in taxes to the Treasury are also entitled to the generous help and assistance of the Federal Government. I most respectfully urge that you carefully consider our plight and take every measure you can to assist us with rehabilitation and in safeguarding our area and every other area of the Nation, as well as it is possible for Congress to do, against the ravages of great natural disasters.

In conclusion, let me simply say this. Our need is very great, my friends. We have been sorely stricken, almost beyond description. Our own people have responded with extraordinary courage, resourcefulness, and compelling determination to try to reestablish their homes, their industries and their communities. But if ever we needed it, we now need the sympathetic help and assistance of the Federal Government to ward off the effects of these disastrous floods and to set up adequate safeguards against possible future visitations of great natural disasters, so unpredictable in their advent and point of attack, and so paralyzing and devastating in their consequences.

If this fine committee of the House comprised of our able, esteemed colleagues from other sections of the country working so diligently and intelligently under the leadership of our energetic, genial and capable friend, the distinguished gentleman from Alabama, can help us in any way to realize the objectives in this field which we in Massachusetts feel must be so urgently pursued, then we will indeed be very grateful.

Let me thank you all, Mr. Chairman, for bearing with me and giving your valuable time, and, most of all, for your sincere and

sympathetic consideration of our very serious problems.

And now, with your permission, I should like the honor of presenting to you our distinguished colleagues, all members of our congressional delegation flood committee, Mr. HESELTON, Mr. DONOHUE, Mr. BOLAND, and our beloved friend and colleague, Mrs. ROGERS, all of whom desire to present their views. Our distinguished colleague, Mr. WIGGLESWORTH, also a member of the committee is presently overseas on official business and will undoubtedly want to present his views to you upon his return.

Violation of the Constitutional Guaranties of Members of the Armed Forces Under the Status of Forces Agreement of the North Atlantic Treaty Organization

EXTENSION OF REMARKS
OF
HON. FRANK J. BECKER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. BECKER. Mr. Speaker, in the light of the resolutions and discussions in the last session of Congress with reference to the Status of Forces Agreement of the North Atlantic Treaty Organization, I have made a thorough investigation of the entire situation and am, herewith, citing these facts which have convinced me more than ever before of the necessity for the elimination of this constitutional violation:

VIOLATION OF THE CONSTITUTIONAL GUARANTIES OF MEMBERS OF THE ARMED FORCES UNDER THE STATUS OF FORCES AGREEMENT OF THE NORTH ATLANTIC TREATY ORGANIZATION

Up to 1951 when our military personnel were sent to any foreign country and accused of committing a crime or a violation of a local law, they were subject to trial by a court-martial of their own command and were not turned over to foreign governments to be tried in a foreign land by foreign courts. Since the signing of the Status of Forces Agreement in 1951 by the United States Government and its ratification by the United States Senate in 1953, whenever a member of the United States military personnel is accused of a crime while serving in a foreign country and that country requests the accused to be turned over to it for trial, we must abide by its request.

One must understand that before this Treaty, when a GI was accused or arrested, the United States military forces could determine, when requested by a foreign government, whether the young man should be turned over, and this would take place only where the man was accused of a very major crime and evidence against him was overwhelming. This system should be continued and the constitutional guaranties of American soldiers upheld.

In order to understand this agreement fully, I am setting forth a description of Article VII of the agreement so that one may properly understand exactly what it does and its purpose:

Article VII of the agreement prescribes the circumstances under which the sending or receiving States will have either exclusive or concurrent jurisdiction to try offenders. In those situations where both States have concurrent jurisdiction article VII prescribes which State shall have the "Primary" jurisdiction. Exclusive jurisdiction implies that only one State has the right to try an offender, as in a case for example, of security offenses which are against the laws of one country but not of another. If an offense violates the laws of both States, both States may have jurisdiction. However, the State that has the right to try the offender in the first instance, and in this sense may be said to have the prior or superior right to try the offender, is deemed to be the State having the "Primary" jurisdiction. This does not imply, however, that in the ordinary case a person may twice be in jeopardy. Paragraph 8 of Article VII expressly provides: "Where an accused has been tried in accordance with the provisions of this Article by the authorities of one Contracting Party and has been acquitted, or has been convicted and is serving, or has served his sentence or has been pardoned, he may not be tried again for the same offense within the same territory by the authorities of another Contracting Party." This section safeguards an accused against double jeopardy. This, however, is subject to what may be deemed a military exception to double jeopardy which does not prevent the military authorities of a sending State from trying a member of its force for a violation of rules of discipline arising from an act or omission which constituted an offense for which he was tried by the receiving state.

This means that military personnel are not exempt from double jeopardy because after their conviction in a foreign court, they may be tried and convicted by a court-martial held subsequent to the serving of their original sentence.

It must be further pointed out, that members of our Diplomatic Service have immunity when in foreign countries.

"Diplomatic immunity" simply means that our diplomatic officials, both of our Embassies and our consulates, are immune from prosecution by foreign countries for crimes of which they may be accused. And yet these same members of our diplomatic corps go there by choice. They do not have to go if they do not want to. But our military personnel, some of whom enlist and a great majority of whom are drafted into the service involuntarily, are sent to foreign countries, not because they want to go, but simply because once they have been sworn into the military forces and the uniform of the United States Government is placed on them, they have to do exactly as they are told. They not only must do as they are told and ordered, but in the event of war or fighting, they must die if necessary in order to carry out the order that was given to them when they became members of the military forces. Therefore, it is very difficult to understand, in the light of this comparison alone, why the military man should be excepted, and certain agreements made whereby he loses the guaranties of the very Constitution that he is supporting and willing to fight for.

After testifying before the House Foreign Affairs Committee in July on this subject, I decided that since I was going to Europe on other business, I would make arrangements to visit a number of our military personnel who had been tried in foreign courts and were serving sentences in foreign prisons.

I left New York by plane on August 5, 1955, and flew to London, England. Through the cooperation of the American Embassy and our military officials, arrangements were made for me to visit several English prisons for the purpose of interviewing our GI's personally and getting their stories and reactions.

Accompanying me was Maj. W. Charlotte from the United States Provost Marshal's department and Captain Barnes of the Judge Advocate's department, who informed me that I was the first Congressman to visit our GI's in prison.

My first visit was to the Wormwood Scrubs Prison, where, after discussing the reason for my visit with the Governor, I was permitted to interview three GI's imprisoned there. They were brought in one at a time, and a guard was stationed in the room with us.

I went over each case separately, the cause of the arrest, the trial, and the conviction, as well as the sentence. These three were serving from one to three years. Each one of them stated that he would have had a fairer trial before a United States military court-martial.

I spent another day with Major Charlotte and Captain Barnes on a visit to the Maidstone Prison in England. At this prison I interviewed four GI's imprisoned there and the story was the same. They felt that they had been "let down." It was not my thought to judge the innocence or guilt of these young men. I do feel, that so far as the English courts were concerned, they were treated fairly in accordance with their system.

I spent another day at Scotland Yard and at the Sessions Court in London where one of our GI's was up for trial. However, he pleaded guilty, and after a very good argument by his defense counsel, he was given a light sentence, a fine, which was paid.

I then went to France, and here was another highly difficult situation. In the French courts, and under French law, a man is presumed guilty and must prove his innocence. This is completely the opposite of American law.

Here again, I interviewed young GI's in prison. I traveled from Paris to Fontevrault Prison and interviewed two GI's. Their stories were pathetic. I saw them together and talked to both at the same time, as they were convicted of the same crime. Both of them stated that they did not know what was going on during their arrest and at their trial. They were assigned French counsel and an interpreter. Everything went on in French and they could not even get the drift through the interpreter. They both stated that everything was not interpreted to them and the next thing they knew they were sentenced to five years each. These two cases have had much publicity in the United States papers because of the harsh sentence. I visited another young GI at the Hotel Dieu (prison ward hospital) in Paris. He was quite satisfied and was the only one that I know of who was. He had not been brought to trial as yet, but will have been by this fall. He also intimated to me why he was satisfied to be tried by a

French court and I am not at liberty to state his reason here.

I have avoided mentioning any names, as I did not in any way want to hurt further these young Americans. The two at Fontevrault Prison also stated that they should have been tried by a court-martial and they would have known what was going on and would have felt they had a fair trial.

The Status of Forces Treaty had not been signed in Italy as yet, I was informed when I visited Rome.

After my journey abroad, I am more concerned than ever that this Treaty should be revised—for the following reasons:

1. All through American history, the American flag followed our soldiers wherever they went and was their protection.

2. There is distinct violation of the constitutional privileges and protection for our military personnel under this treaty.

3. Today, as soon as they are shipped to foreign soil, where the Treaty is in force, our soldiers no longer have the protection of the Constitution. Why? Because they cannot be tried by a jury of their peers in a foreign court. They cannot have their own American counsel defend them. There certainly is a "hostile atmosphere." By this I simply mean, without casting any reflection upon the integrity of any foreign people, that in many areas where our troops are stationed, the people do not want them there. The people do not understand why they are there, either, and I find little is done in these areas, intelligently, to inform the people why our troops are there.

4. There is an erosion of the right of appeal. While our GI's have the right of appeal, it is far different from the American judicial system and a man runs a real hazard by filing an appeal. Why? Because, if his appeal is lost, the higher court has the right to add to the sentence, and in many instances does so. For example: If a man is sentenced to one year on a charge where he could have been given up to five years, the appeals court could give him and usually does, the balance of the other four years. I understand that this is done to prevent appealing. (Even in our courts-martial system, a man has an automatic review and further appeal.)

5. There have been many citations of cases and trials of American servicemen in foreign countries. There also is the question of the penalties prescribed in certain foreign countries, either those with whom we have agreements or with whom we may sign these agreements in the future. Violations of the laws of these countries, laws that are absolutely unknown to the average American citizen, may bring penalties that are far beyond anything ever thought of in American jurisprudence.

We must remember that we have troops serving with air bases in countries such as Morocco and Pakistan and others. If we look into the history of these countries, insofar as penalties for violations of civil laws are concerned, we will find that in many, many instances people there, instead of being sent to prison, would lose a hand or a foot, an arm or a leg, or even an eye for offenses which in our country would be mere misdemeanors. Imagine what could happen if steps are taken to sign agreements such as this with these countries. We must also remember that, while this agreement ostensibly was arranged for the NATO countries and the United States, a similar agreement has also been signed and is in operation in Japan. So it is possible that agreements may be signed with these other countries. I think you will agree with me that this must be stopped and our feelings made known to the President of the United States through a resolution of the Congress.

There are many other arguments for revision of this Treaty. It must be noted that for quite a number of years we have been hearing and reading about the demands for the protection of the civil rights of the people of the United States for one cause or another. Secondly, we have been hearing and reading constantly about citizens of the United States being called either before the courts or before Congressional Committees and using the 1st, 5th, and 14th amendments in order to avoid testifying or giving information. All of these protections are parts of the Constitution of the United States. Many of the people who are on trial or being interrogated before the Congressional Committees use the Fifth Amendment to avoid giving information as to their own participation in the Communist cause to overthrow the Government of the United States by force or violence, or to avoid giving information as to whether they belong or ever did belong to any Communist front organization. All of these rights are provided for these people in our Constitution, even though many of them are working for the destruction of the very Constitution behind which they seek protection.

Justice John Marshall, the Chief Justice of the United States Supreme Court (1775–1835), in the early days of the Republic, clearly ruled and defined that:

> Service in the Armed Forces of the Republic of the United States shall not abrogate or nullify the Constitutional rights of an American citizen.

What then becomes of the Constitutional rights of hundreds and thousands of servicemen who are in foreign countries involuntarily and who are sent to jail by foreign courts for breaking some local laws? The Military Justice Committee of the New York County Lawyers' Association has been working on this matter since 1954. The Committee has been negotiating with the Defense Department following the expression of the opinion by the Association Committee that the Status of Forces Agreement with the NATO countries and Japan did not secure to Americans in the Armed Forces the same legal rights a defendant would have in the United States. It was held by the Committee that American defense personnel were not on foreign soil of their own free volition as in the case of a citizen traveling with a passport and that the Government should not sign away, even in a mutual defense pact, the rights guaranteed by the United States Constitution.

With reference to the editorial of the New York Law Journal of September 22, 1955, the Committee states:

> The Defense Department later informed the Senate Military Affairs Committee that in the first six months of 1954, only thirty-three American servicemen were sent to jail by foreign courts. In the opinion of the Lawyers' Committee, unless the thirty-three receive the same standard of protection they would receive under our Constitution, it was thirty-three too many.

That is the whole point involved in the Status of Forces Agreement. It is immaterial how many or how few are involved. The real question is the whittling away of the constitutional guaranties reserved for every American citizen whether he be in the Armed Forces on domestic or foreign soil.

I am convinced that the Status of Forces Agreement violates the ruling mentioned above of Chief Justice John Marshall, the greatest authority on the Constitution of the United States.

At the last session of Congress, that is, the first session of the Eighty-fourth Congress, resolutions were introduced calling upon the President and State Department to work with any country with whom we had signed a Status of Forces Agreement for the purpose of eliminating it and returning to the conditions that prevailed through all the years up to 1951. Congress should pass a resolution calling upon the Executive Branch of our Government to nullify this Status of Forces Agreement.

I have noted with great interest a recent report in the press that the Defense Department has directed our military commanders abroad to take all possible steps to assure fair treatment of American military personnel facing charges in foreign courts. The following story appeared in the New York Times of December 6, 1955:

> The Defense Department has laid down strict procedures to be followed by overseas commanders to protect to "the maximum extent possible" United States military personnel tried in foreign courts.
>
> A new directive to all military commands says Defense Department policy requires that all steps be taken to assure "fair trial and fair treatment" of men and women facing charges in foreign civil courts.
>
> The directive orders overseas commanders to follow the trials closely, provide free counsel if necessary, check on prison conditions and protest through diplomatic channels if they consider the trial or sentence unfair.
>
> Under so-called Status of Forces treaties, United States servicemen overseas can be tried by foreign courts for crimes committed while they are off duty. In turn, foreign troops stationed here are subject to United States laws.
>
> The new directive safeguards the interests of United States military personnel as specified by the Senate when it ratified the Status of Force Treaties in July, 1953. While most of the procedures have been specified, the directive incorporates them in one document.

I have cited heretofore the very many reasons why this agreement should be eliminated from the NATO Treaty. The very fact that the Pentagon now is taking cognizance of this situation and is belatedly taking some steps to provide some degree of protection does not, of

course, solve the problem of the violation of the constitutional rights of our servicemen.

It must also be noted that whenever I have discussed this with our State Department people, the only answer that I have been able to get from anyone, anywhere, at any time, is the fact that this agreement was brought about as a matter of necessity, and that we must realize that foreign troops serving in the United States or on United States territory may be tried in our Civil Courts for the violation of the laws of our country. The fact remains that there are practically no foreign troops serving in this country. Only a few are here, for such purposes as special training, and I feel certain that it will be in the best interest of our country to have these men tried by their own courts-martial and not by our Civil Courts. The few that are serving here certainly do not justify us in sacrificing the constitutional rights of hundreds of thousands of young Americans serving abroad.

It must be recognized that the Congress has no power to alter or change this agreement. However, I have introduced H. J. Res. 438 for the purpose of securing the support of Congress in requesting the President to bring about the elimination of this Status of Forces Agreement and trust that it will receive favorable action in this session of Congress.

Increase Rates of Education and Training Allowances for Veterans

EXTENSION OF REMARKS
OF
HON. JOHN E. FOGARTY
OF RHODE ISLAND
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. FOGARTY. Mr. Speaker, Mark Twain is credited with having referred to the weather as something that everyone talks about, but no one ever does anything about it.

I have heard, frequently, the same kind of criticism about legislative enactments by the Congress. Everyone talks about what is wrong with the law, but nobody does anything about it. I would like to claim a place in history for having inspired the 84th Congress to do something about the shortcomings of the education provisions of the Veterans Readjustment Act of 1952—that is Public Law 550 of the 82d Congress.

I am today introducing legislation which will provide a general increase in the rates of education and training allowance payable to veteran trainees enrolled under title II of the Veterans Readjustment Assistance Act of 1952.

The bill I have introduced is restricted to increases in rates of payments for education and training only and in no manner affects the eligibility requirements for those veterans who desire to qualify; also, the bill applies only to veterans of the Korean conflict. No basic change is intended or implied; all that is asked is that this session of Congress recognize some basic facts—and do something specific to help veterans meet the problem which those basic facts have created.

Basic fact No. 1 is—the Congress of the United States provided a machinery whereby the veteran of America's wars could get an education and so readjust himself to society, thus helping himself to be a better citizen and, at the same time, helping his country to make better use of the veteran as a member of society who is making the maximum contribution of which he is capable.

Basic fact No. 2 is—the veteran in school today is finding it very difficult to make ends meet; this strain jeopardizes his opportunity to be a good student, a good graduate, and hence, a good citizen who can provide his country with the maximum benefits of his talents.

My proposal asks only that we recognize these two facts and provide an increase in the allowances provided for in Public Law 550, as amended.

I would like to remind my colleagues that we live in a day when the spotlight is on the need for aid to education.

In the area of the sciences which, to our own personal knowledge, take on ever greater significance with each forward thrust of mechanical, electrical, aeronautical developments—to say nothing of developments in the atomic field—there is a woeful lack of students devoted to the subject of study and exploration. It has been my personal experience that a student worried by financial harassment is not the best possible student. A little worry may be a good thing—but if we want the young men who were foremost in our minds when we enacted the Veterans' Readjustment Act to be good students—and future good scientists, or scholars—or even mighty good citizens—we should do whatever we can to reduce this worry factor to a minimum. For this reason, I have become acutely concerned with the need for an increase in these educational payment rates.

The Congress has considered and enacted two so-called GI bills—in 1944 and 1952. To the best of my recollection when these proposals were first broached there was no suggestion of a bonus or reward or pension. There was a recognition—and I have to admit that this plea made the greatest impression on me—that because of war, a large segment of the youth of our country had been lifted from the natural stream of youth who would, in the normal course, attend college. In addition, there was a recognition of the fact that many young men and women who, under normal circumstances, would not attend college, had been made more mature by their wartime experiences and had become educable material. Unless I am gravely mistaken, this was the moving cause behind the GI bills. There was, too, the readjustment phase—during which young men and women could get themselves better prepared to assume their proper places in the democratic society which is ours—with emphasis on education constantly rising.

That was the reason for the GI bills, in their educational aspects. It has now reached the point where it is so difficult for eligible and qualified and eager young men and women to continue in school because of the increase in the cost of living and the cost of education since the basic laws were written that the very purpose of this excellent legislation is being frustrated.

The GI bills, so-called, were never intended to be a complete subsidy. However, they were intended to be a great inducement—and a substantial help—to each veteran in obtaining a good education—to the betterment of himself, his family and our society.

Statistics are, to many, a bothersome thing, and I will not annoy you with them. I know I can rely on your intimate knowledge of the fact that it costs more today to obtain a degree in an institution of higher learning that it did when the original GI bill was passed in 1944.

The increase in the rates of payment to veterans which my bill asks for are small enough. But—and I urge my colleagues to consider this well—the need for an inducement to our veterans to go to school, to stay in school, to acquire all the knowledge which a good education can provide is far greater today than it was when the original GI bill was enacted.

The whole pattern of this legislation has been one of assistance. I say again, never was it thought there would be a complete subsidy.

Times have changed—the need has changed only in the sense that it has grown greater. Costs have changed in two areas—they are greater and what is more fearful, they may become discouraging. We had faith in these veterans as defenders of our country. We should be proud of our continuing faith in them as crusaders for our country.

Help them to get the best possible education and we need have little fear for the future of their children, who, after all, see America through their father's eyes, whether it is a good and intelligent approach to Americanism or a discouraged and disillusioned portrayal of the attitude of the American Congress.

A Program for Our National Parks

EXTENSION OF REMARKS
OF
HON. CLAIR ENGLE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. ENGLE. Mr. Speaker, I am very glad to note in the President's message that he proposes to stir something up in reference to the national parks. I know that the National Parks Service has been working on a program for about a year now, called mission 66. I understand that this program is anticipating a development and management plan that will put our parks in shape. With the anticipated increase in visitors to the parks—80 million by 1966—I believe these parks are of tremendous value to the people and a great economical asset, and they have been going to pot by

overuse and lack of funds to properly develop and maintain them. I, for one, am going to do all in my power to get a good, long-range program for the national parks, so that our great national heritage in the national parks will be put in proper shape and not allowed to be further abused or rundown.

As chairman of the Interior and Insular Affairs Committee of the House of Representatives, I am going to push so that this program will be submitted to us at the earliest possible date.

Interview on WNAC–TV, Boston, Featuring Hon. John W. McCormack, Conducted by Lester Smith, Special Features Department, December 6, 1955

EXTENSION OF REMARKS
OF
HON. JOHN W. McCORMACK
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include a question and answer interview in which I participated over WNAC–TV station of Boston, Mass., on December 6, 1955. This television program interview was conducted by Lester Smith of the special features department with Les Smith of the same station the questioner.

The interview follows:

LES SMITH. Good evening, everyone, I am Lester Smith, of the WNAC–TV, Yankee Network Special Features Department.

Following the policy of the Yankee Network—to keep its viewers and listeners completely posted on affairs which affect not only our community, but our State and our Nation as well—we are again very happy to have with us tonight another of the distinguished members of the Massachusetts congressional delegation in Washington to discuss topics of importance in world affairs. We are happy to welcome the Honorable JOHN MCCORMACK, the majority leader in the House of Representatives in Washington. Congressman MCCORMACK, we are happy that you were able to join us.

Congressman MCCORMACK. Thank you, Mr. Smith. I am very happy to be with you.

LES SMITH. The events of the last few days—the last few weeks—and the last few months, Congressman, have sort of jumbled themselves together into a patchwork which has made a lot of people in this country very apprehensive and concerned over the way the turns of events are going in the world situation. To your mind, as matters stand today, how are we faring in the world as a whole?

Congressman MCCORMACK. Throughout the world, Mr. Smith, as we look it over, we have got to develop policies that will enable us to have a better—a stronger—position. You use the word "faring"—I think it is a very good word. Since last July and the so-called summit meeting, the situation throughout the world has not been favorable to us and psychologically, we are in an unfavorable situation and position. It is not too late to get back and recover and obtain our affirmativeness. But we can't—we shouldn't—delay too long. Because, the only thing the Communists respect is what they fear; and, that is military power and strength greater than they possess. They respect only firmness in the field of diplomacy; where you have definite leadership, not uncertain leadership that changes from day to day and week to week; and where that firm leadership in the field of diplomacy is supported by that which the Communists respect—namely, military power and strength.

LES SMITH. Congressman, there was a reference made, just recently to the effect that perhaps the Soviet Union prefers this so-called cold war stalemate to either full peace or a full-scale war with the United States. What do you think of that reference?

Congressman MCCORMACK. Well, in my opinion, I think that that is their probable state of mind. All we can do is weigh the probabilities; and, what the probabilities in the mind of a Communist are is rather hard to weigh. You, and I, and others—thinking the way we do—can weigh the probabilities in our minds and in others' minds; but, on this matter we are dealing with the minds of world-killers who are out to impose communism by revolution, force, or otherwise upon all of the other peoples of the world. Frankly, I do not think that they want a full-scale war, now. But, we have ever got to be on the alert with our Intelligence working every minute of the day with all the other facilities of our country and of every other free country working ever to be on the alert. And, the reason I do not think they want an all-out war is because the nuclear bomb is so destructive that if they undertook to murder, so to speak, some other country—before they did it they'd commit suicide themselves. So, I think they are using this smile, this mask of a smile to try and deceive people. And remember, behind the mask of that smile is that same cruel mind that has sent millions of persons to imprisonment and to their death. So, I think what they want is a status quo, which the so-called spirit of Geneva has developed for their benefit, while continuing their work of subversion wherever they can and taking over country after country.

LES SMITH. Congressman, the recent events in the last few days in Berlin, insofar as the actions of the Soviet Union are concerned—what are their basic significances?

Congressman MCCORMACK. It is another one of their moves. They feel that there is weakness among the countries of the Western World. They're probing. They're hoping that we will manifest uncertainty. Berlin is a symbol to countless of millions of peoples and the free world—the Western World—cannot afford to let them get by with that. The United States has got to pursue a firm policy. I admire the American High Commissioner to Germany the other day when he rode through East Germany. That is something that the Communists understand; but, if we vacillate, if we engage in uncertain actions, if they obtain their victory there—a psychological victory—it will be most harmful to the free world's cause. So, that is one place where we have got to be firm, very firm.

LES SMITH. Now, let's dwell on one other point for a moment. We, of course, realize the danger spots that exist in various sections of Europe, the Far East, the Middle East. What in your mind are the key danger spots with which we have to be concerned?

Congressman MCCORMACK. Well, there are several spots. There is Southeast Asia—all of Southeast Asia—South Vietnam. There is Formosa, the Pescadores, Matsu, Quemoy—the British have possessions like Hong Kong. And there is Malaya and Thailand—the latter is a very important country to us—and Indonesia. These are important because if they get Southeast Asia our whole Far-Eastern defenses are outflanked and we would have to come back to the continental defense—Hawaii and Alaska. Then, there is in the Near East, the Egyptian threat against Israel—Egypt trying and determined to destroy that little nation of brave people over there; and, in that area they are the only people, the only friends we have there. There's the weakening of NATO, the status quo in Europe, and behind the Iron Curtain they're saying to non-Communists that the Western World has let you down. In other countries like Italy, they are saying to non-Communists, "Why do you doubt our sincerity? Even President Eisenhower says we are sincere in our desire for peace." So, it is a worldwide pattern; and, Berlin is a more recent evidence of the hardened minds of the Communists and their determination to undermine us by every means possible short of general war. We have got to be watchful for that—it is a calculated risk, but short of general war—as I see it they plan to take over country after country and to weaken the Western cause. And, we have been weakened. But it is not too late for us to recover if we only determine to do so.

LES SMITH. Congressman, if we may, may we go back for a moment, and take up the question of the seriousness of the problem involving Israel and the Arab States? At the moment, of course, there is the tremendous problem of the Egyptian purchase of arms from Communist satellites and the question of "if" and "where" Israel is to get arms. Is there a solution there?

Congressman MCCORMACK. Well, Israel is a nation of about 8,000 square miles. It has about 1,500,000 people. It is a democracy in fact as well as in name. It is Western-minded. The people of Israel are our friends. The Egyptians—the Arabs—you never could rely upon in World War I or World War II. Egypt alone has over 40 million population. If in the course of 2 years they are able to develop their manpower, that is their military manpower, a nation like Israel could be in a very dangerous position with not more than a 250 thousand to 300 thousand maximum army. America could not and should not permit Israel to be exterminated and America should furnish arms. But that is not the solution alone. America should so inform the Kremlin firmly, because they are the ones selling the arms to Egypt and Nasser. We should tell them that not only the United States, but also Great Britain and France under no condition intend to see the free people of Israel exterminated or weakened. Furthermore, might I make this observation, Mr. Smith, that Nasser, who is the Prime Minister of Egypt, would never dare think of buying arms from any Communist nation if he had any fear of the United States. It is our weakened, uncertain leadership that has brought about that feeling of confidence on their part, where they go to a Communist nation and buy arms; and yet we are powerful America. We have got to get back to the basic policy of peace through strength and firmness, and leadership—not bullying but firm leadership on the highest governmental level and in the fields of diplomacy.

LES SMITH. Well, that brings up in some respects the question I was going to ask you, and perhaps you can elaborate a bit, that is, "In your mind, what is the most effective way to meet Russia's cold war?"

Congressman MCCORMACK. The most effective way is to have America aroused—our people informed. Our people will make every sacrifice necessary when they are given information. The American people are fighters. We fight for what we believe in—in the right of the sanctity of the home; freedom of speech; freedom of religion; freedom of the press—those great rights that are ours and are contained in the Constitution. Those are intangibles, that free men and free women, when they possess them, will fight to preserve. We have got to have a military organization that commands the respect, through fear, of the Communist leaders, because they are out to conquer the world and to subject all the peoples of the world to Communist persecution and death. So, the price we pay is the price for our

preservation and for freedom; and, it is far better to err if we are going to err, on the side of strength than on the side of weakness and that is one of the basic positions I have taken as a Member of the Congress of the United States.

LES SMITH. Well, Congressman, as the majority leader in the House of Representatives, I believe we have about a minute or so left, would you care to make some reference to the bipartisanship of our foreign policies?

Congressman MCCORMACK. Well, fortunately, we have a very strong bipartisan policy today because the Democratic Party is united on foreign affairs. The Republican Party is very badly split and divided; so, the Democratic Party is the unifying force in our bipartisanship. But, now, bipartisanship does not mean that we cannot constructively criticize; or constructively suggest; or that the right of dissent is taken away from us in America.

Henry Cabot Lodge the other night at a Republican gathering—and it was rather strange that the Ambassador should give Democrats advice in the field of foreign affairs, at the Republican gathering—said, however, that they would tell of the present administration's achievements in the field of foreign affairs and let the people judge. I am satisfied with that; but with one more addition that we should tell them of the "non-achievements" and then let the people judge. With that I will be satisfied.

LES SMITH. We are sorry that we are just about at the end of our time and again, our sincere thanks to you for joining us. It has been the pleasure of the Special Features Department of WNAC–TV and the Yankee Network to be able to talk tonight with the Honorable JOHN MCCORMACK, majority leader in the House of Representatives.

Participation of Youth

EXTENSION OF REMARKS
OF
HON. PHILIP J. PHILBIN
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. PHILBIN. Mr. Speaker, under unanimous consent to revise and extend my remarks in the RECORD, I include therein portions of a speech which I made before the Junior Chamber of Commerce at Leominster, Mass., on October 24, 1955.

The material follows:

"Young people throughout the Nation must not only interest themselves but must participate actively in public affairs, if democracy is to remain strong," said Congressman PHILIP J. PHILBIN addressing the Leominster Junior Chamber of Commerce last night.

"Our system presupposes the active participation of our citizens," said PHILBIN, "but large numbers of Americans often stay away from the polls and it is becoming more difficult every day to get qualified citizens to service their communities."

"More than ever people are completely engrossed with their own affairs and occupied by the many demands of modern day living. That is quite understandable and necessary from the individual point of view," said PHILBIN.

"But if the democratic way is to retain its vitality and achieve its maximum goals in the world and in strengthening and building this great Nation, trained young people will have to assume some of the responsibilities of the leadership which will be theirs in the future."

"And the people as a whole must ever maintain a lively interest and keep constantly on guard in order at every level to insure honest, capable government, expressive of the popular will and the American ideal of freedom."

PHILBIN declared that "your new organization of able, aspiring, young business and professional men can do much not only to promote your own group interest, but by the example of your vigorous spirit elevate the tone and level of community contributions."

PHILBIN said that business, industrial, and professional leaders were as vital as political statesmen to the proper development of the country.

"We are coming into great, revolutionary changes in business and economics stemming from continuing, astonishing advances in science."

"There are more opportunities in American business than ever before," he said, "because the national economy is moving ahead in leaps and bounds. Immediately confronting us is the greatest age of all history, if we can only preserve world peace. But in any event we will need business leaders of patriotism, marked capacity and social consciousness. They will be recruited from the ranks of your generation.

"And they will have to know, just as those charged with leadership today should know, that in a free enterprise competitive society, if it is to endure against radical panaceas, true national prosperity and opportunity must extend to all.

"If in our philosophy and practice, we maintain proper balance in our economy between legitimate self-interest and human social needs, the American people of every class is destined to move steadily in the direction of unparallelled prosperity."

Meanwhile, let us resolutely build our national strength. Tensions have eased somewhat. Smiles have replaced scowls in Soviet diplomacy. But the Marxist plot still surges toward world conquest. Neutralism impairs the unity and strength of the free world. Great problems and dangers confront us from the Communist conspiracy.

But I think that if we remain strong and powerful, militarily, economically and spiritually, we have nothing to fear.

Commenting on the current diplomatic impasse, PHILBIN said, "It is our task as well as our duty to press for peace even in the face of discouragement. In time, if we persevere in our militant devotion to freedom and properly develop our strength, God willing, there is a good prospect for world peace."

The Congressman congratulated and lauded the junior chamber for its efforts and predicted that it would enjoy great success and render distinctive service.

Our National Parks

EXTENSION OF REMARKS
OF
HON. WILLIAM S. HILL
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. HILL. Mr. Speaker, the recognition by the President, in his message to Congress, of the needs of our national parks, and indications that something will be done to overcome present inadequate conditions is most gratifying to me. A nation cannot afford to neglect a great asset of such scenic and historic areas. As population and industrial expansion continue to increase, such areas will be even more cherished. The proper provision for use of leisure time becomes even more important to our citizens. The 50 million who visited areas of the National Park System last year were disappointed in some of the things they encountered. Facilities were inadequate, and many of them over-age. Many areas were crowded. Those who had visited the same places in previous years made comparisons not flattering.

The National Park Service has been studying this matter from every angle. They anticipate visitation increasing to 80 million in the next 10 years. They expect to submit a long-range program called Mission 66 containing the answers to today's deficiencies, together with meeting the increasing demands of the future, both in the fields of development and in preserving the areas so that future Americans can also enjoy them. Such a program should meet with ready approval by the Congress. I shall lend my full support to it.

New Plants for New Jobs in Labor-Surplus Areas

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. LANE. Mr. Speaker, under leave to extend my remarks, I wish to include the following address I delivered over WMEX, Boston, Mass., on Saturday, November 19, 1955:

Let's look at the national picture first; the economic condition of the United States as a whole.

It's good—very good.

Until the complete returns for the year are tabulated, we cannot speak with certainty. With little more than a month to go, and with a big volume of Christmas trade expected, however, we can venture the prediction that this will probably be the most prosperous year in our history.

More people are working than ever before.

The largest corporation in the world, which is located in this country, will report profits of more than a billion dollars for the year 1955, which is another first in economic history.

To repeat, the overall picture is very good.

In this broadcast, however, I want to point out local trouble spots, where unemployment is heavy, and has been for several years.

In a problem as complex as this, it is impossible to weigh all the factors, within 15 minutes.

Therefore, I intend to concentrate on a major factor, and a major solution.

Even though the Nation as a whole is booming, we have scattered areas that are plagued by economic blight.

These cannot be ignored.

For, if we fail to find a cure, other areas in turn may become affected, and the problem becomes more difficult to solve.

The United States Department of Labor makes a job survey every 2 months, on both large and small areas, to determine local economic conditions.

Suppose we confine ourselves to the 149 major labor-market areas. These are the

most important production and employment centers.

In July of 1955, unemployment of 6 percent or more was reported from 31 of these 149 areas. At a time of great national prosperity, we have these pockets of unemployment in 32 of the 48 States. That is why the problem calls for some measure of attention and assistance by the Federal Government.

Moreover, 19 of these areas are listed as "chronic."

Ten of these have had substantial unemployment for more than 4 years.

What are the causes of this economic disease that has hit textile communities in New England, and coal-mining communities in Pennsylvania, among others?

Many of these depended upon one industry, and when this declined they found themselves in serious trouble.

Heroic efforts are being made on the local level to attract new replacement industries, but the going is hard.

Several years ago, when a textile mill closed down, hundreds, and sometimes thousands, of workers were dismissed from employment in the only occupation which they knew. Machinery was moved away. The empty factories were sold to dealers in second-hand industrial properties.

The outlook was bleak, for the displaced workers and the communities.

Groups of local citizens were organized to purchase the vacant mills. Chambers of commerce, or industrial development committees, worked hard to attract new industries. But recovery has been painfully slow and difficult.

Local resources, however, are limited. At times they have not been fully mobilized. The rental or reconversion of old mill plants is an emergency measure. It offers only a partial solution. The type of industries that are attracted to a community under these conditions, are usually small ones, that operate on a shoe-string basis, and barely pay the legal minimum wage.

This is a desperate compromise that does put some of the unemployed to work, but at lower pay than they once earned, and at a sacrifice in the average standard of living.

The brave fight being put up by some communities, is worthy of our admiration, but it is not enough. They need help.

The hundreds of thousands of dollars that have been raised in the larger areas to buy up old plants and lease them to other industrial tenants, is a form of treadmill progress. They seem to be making a recovery, while they are losing ground to other communities whose standards are improving, in line with the Nation's progress.

In one small Pennsylvania town, a nickel-a-week plan, with the 6,000 inhabitants contributing 5 cents each week for 5 years, to raise funds for new industries, is stark evidence of the valiant effort that some communities are making to save themselves.

But when we add up the results of all these local bootstrap operations, we find that few of them have come anywhere near the realization of their employment goals.

As I said before in this brief broadcast, there is not time to consider all factors. Businessmen, when they consider plant-location alternatives, must be satisfied as to the proximity of raw materials, markets, transportation facilities, cheap and abundant power resources, sufficient water and sewerage facilities, and whether a community is an attractive place in which to live. Plus other factors.

However, to quote one official in a labor-surplus community that was once a leading producer of textiles: "We must build new factories or die."

To my way of thinking, this comes very close to the heart of the problem.

On May 13, 1954, I introduced a bill in the United States House of Representatives known as the Industrial Development Act of 1954, to authorize Federal loans to assist local communities in building modern industrial plants in labor-surplus areas.

This would not be a handout, but an assist to local initiative, providing the final lift that would enable labor-surplus areas to get over the hump.

The legislation I seek would apply only to those communities that have had a substantial labor surplus for at least 1 year prior to the application for a Federal loan. The United States Department of Labor, from unemployment totals obtained from the United States Employment Service, and from State affiliates, would determine eligibility.

A $50 million revolving fund would be made available for capitalization. Publicly authorized, nonprofit industrial development committees, composed of representative citizens in the eligible areas, would submit plans and costs for the building of medium-sized modern plants to attract new industries. Upon approval, and on condition that local banks and citizens would provide half the cost, the Federal Government would advance a loan covering the remaining half.

Lack of sufficient capital is the one factor that presently deters local industrial development committees from proceeding with the construction of new plants that are needed to effect an economic transition.

In the preamble of the Employment Act of 1946, the Congress declared that, "It is the continuing policy and responsibility of the Federal Government * * * to coordinate and utilize all of its plans, functions, and resources for the purpose of creating and maintaining * * * maximum employment."

In March of this year the joint congressional Committee of the Economic Report unanimously declared: "We are very concerned with distressed conditions which persist in certain industries and regions even in an expanding economy * * * the Federal Government should recognize its responsibility."

In a vital economy like ours, no enterprise or community can stand still.

We are on the threshold of a second industrial revolution. Automation and atomic power are not just theories. We can see them coming around the corner. Existing machines and factories will be outmoded rapidly.

What then of plans that are ancient, even by present standards?

The textile cities of New England have 6-story factories that are 40, 50, and in some cases, many years older. Not a single new industrial plant has been built to replace the ones that are becoming more obsolete with each passing day.

These cities are in danger of becoming industrial slums unless there is a program of modernization. Because no dynamic growth industry, capable of providing steady work at good wages, is going to move into an old-fashioned high-cost plant.

In fact, one of the reasons why labor-surplus areas have lost the industries that once supported them, was because other areas offered inducements to build new plants in response to the new technology.

My bill, I believe, would encourage and assist labor-surplus communities to modernize, and become inviting to growth industries. In this connection, it is pleasing to note that the White House has taken up the suggestion.

President Eisenhower, during his convalescence, has approved a new approach to an old contradiction—the challenge of chronically depressed industrial areas in the midst of national prosperity.

In his state of the Union message to Congress, in January, he will propose a technical-assistance program to show labor-surplus communities how to help themselves, coordinating all forms of Federal assistance under a new agency to be created for that prime purpose.

Furthermore, he will recommend self-liquidating loans to help local communities in the effort to build modern industrial parks following the legislation that I introduced last year.

To become effective, this will require your support and that of the Congress.

By working together as a team we can insure the success of the Industrial Development Act in the American way through the voluntary cooperation of city, State, and Nation, with capital and labor putting their shoulders to the wheel and with every citizen taking part in the modernization of our labor-surplus areas in order to restore them to full and progressive economic activity.

"We must build new plants or die."

The Industrial Development Act shows us how we can take up the slack, and go forward again.

Granting of Amnesty to Communists

EXTENSION OF REMARKS
OF
HON. E. L. FORRESTER
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. FORRESTER. Mr. Speaker, during the Christmas holidays, the following article appeared in the Evening Independent, a daily newspaper published in St. Petersburg, Fla.:

ELEANOR JOINS PLEA FOR COMMIE AMNESTY

NEW YORK.—Forty-two persons, including Mrs. Franklin D. Roosevelt, have petitioned President Eisenhower to grant a "Christmas amnesty" to Communist Party leaders jailed under the Smith Act.

The petition stressed that the signers were "in fundamental disagreement with the philosophy of the Communist Party and with essential elements of its program." It added that the motive for their appeal was "their attachment to the democratic way of life."

The petition, made public yesterday, asked that sentences of 16 jailed Communists be commuted to time already served. They were sent to prison after being convicted of teaching or advocating forcible overthrow of the Government.

The petition said the trials "were carried through in a period of the cold war and in an atmosphere often marked by hysteria." It also sought postponement of more than 100 similar cases now pending or under appeal.

Mr. Speaker, it is shocking that the crime of advocating the forcible overthrow of our Government is regarded so lightly by those petitioners, and that the petitioners would have the President annul the Smith Act by commuting the sentences of all that have been convicted thereunder, and postponing the trials of all cases pending or under appeal. Such advocacy simply means that those petitioners do not want anyone prosecuted for the violation of that law in the future.

It is further strange that these petitioners only recommended that persons violating the Smith Act be granted amnesty. We have many 18- and 19-year-old boys that unknowingly, or certainly without design, violated some military rule while serving our country in actual combat, and have been imprisoned for some years and have many years yet to serve. It would seem that the Christmas spirit would have been directed to

this class, instead of persons advocating a theory that caused our Government to take those boys from their homes and send them into combat in defense of our form of government. Our penitentiaries are filled with American citizens who fudged a little on their income tax, or committed some other Federal offenses which were not to their credit, but none of whom would overthrow our Government by violence, but, despite their dereliction, would fight for our country and our way of life. Nevertheless, all of those persons were forgotten through the Christmas season by those petitioners, and only those who advocated the overthrowing of our Government excited their sympathies.

The assertion that the trials of those parties were in an "atmosphere marked by hysteria" is astounding. All of those defendants were accorded fair trials and given all constitutional rights, and doubtless had fairer and fuller trials than the 18- and 19-year-old boys that I have previously referred to.

Of course our President ignored the petition. The article does not say who the other petitioners were. I believe that the public would like to know.

Conference of the U. N. Food and Agriculture Organization in Rome

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. ANFUSO. Mr. Speaker, the annual conference of the United Nations Food and Agriculture Organization—FAO—took place November 4–25, 1955, in Rome, where the Organization's headquarters are located. Although this was the 8th session of the Conference, FAO celebrated the 10th anniversary of its existence. FAO was officially launched in October 1945 at a conference in Quebec.

The United States was ably represented at the Rome Conference by a delegation comprised of specialists and experts from the Department of Agriculture and the Department of State. Our distinguished colleague from Kansas, the Honorable CLIFFORD R. HOPE, and I had the great honor of being appointed by the distinguished Speaker of this House as congressional advisers to the United States delegation.

The chairman of our delegation was the Honorable Earl L. Butz, Assistant Secretary of Agriculture. I wish to take this opportunity of informing all my colleagues on both sides of the aisle that Mr. Butz was an extraordinarily able chairman. He was fair and just in all deliberations in and out of committee and made it possible for the United States delegation to present a united front before the Conference.

The purpose of FAO is "to promote the common welfare" of the nations associated with the Organization by "furthering separate and collective action" which is aimed to accomplish the following major goals: First, raise the levels of nutrition and the standards of living of the peoples under the jurisdiction of these nations; second, secure improvements in the efficiency of the production and distribution of all food and agricultural products; third, better the condition of rural populations; and fourth, contribute toward an expanding world economy.

Originally, 32 nations had joined in the formation of FAO. Now, after 10 years of successful existence, 71 nations throughout the world are participants in the work of FAO. Of noteworthy interest is the fact that none of the countries behind the Iron Curtain, neither Russia, Red China, nor any of their satellites in Europe or Asia, are members of FAO. This accounts not only for a minimum of bickering in the Organization, but also for a very high degree of harmonious cooperation between the member nations and a fine record of achievements over the past decade.

The Italian Government has erected, at its own expense, three magnificent buildings in Rome where the agency and its staff are housed. The Organization's annual budget comes to about $6 million, of which the United States contributes 31.50 percent, or less than one-third of the total. Other nations, in the order of their contributions, are: United Kingdom, 11.30 percent; France, 7.53 percent; Germany, 5.55 percent; Canada, 4.64 percent; India, 4.21 percent; Italy, 2.83 percent; Japan, 2.55 percent; Australia, 2.30 percent; Sweden, 2.03 percent. Other nations contribute sums in lesser percentages.

Our delegation was highly honored when our distinguished colleague, the gentleman from Kansas [Mr. HOPE], was asked to deliver one of the major addresses at the opening session of the Conference. Following a welcoming address by the Italian Minister of Agriculture, Emilio Colombo, the Conference heard three major addresses on the general theme "FAO in a Changing World." The Secretary for Foreign Affairs of the Philippines, Joaquin M. Elizalde, discussed the international political aspects of the theme. He was followed by the gentleman from Kansas [Mr. HOPE], who discussed the economic aspects. The third and last address was by M. Andre Mayer, one of France's leading scientists and a founder of FAO, who talked about the social and human aspects.

I trust that our colleague the gentleman from Kansas will place into the RECORD his most interesting and illuminating address so that all of us may have the opportunity to acquaint ourselves with its contents. With his kind permission, I should like to quote only one brief paragraph from his address:

> In my lifetime I have been associated with many organizations but none in which I have felt a more sincere interest or a greater appreciation of its activities than FAO. For in FAO we have an organization which deals with the very fundamentals of life and which concerns the interest and well-being of every human being. The very fact that 71 sovereign nations are now members and active participants in FAO bears this out.

The agenda of the Conference was quite long and extensive. Let me at this time merely point out that the major problems discussed were the following: A comprehensive review was made of the world food and agricultural situation since the last Conference; problems of food distribution and consumption were considered; studies were made of production trends and the adjustments to food consumption; a survey is being planned to determine the world's agricultural, fishery, and forestry resources in relation to the needs of the world's population; there was considerable discussion of the question of agricultural surpluses; and the Conference also took up the peaceful uses of atomic energy in agriculture and food production. Needless to add that there were also extensive reports on FAO's growing activities in recent years and a program of work was planned for the future, as well as various legal, procedural, and financial aspects of the Organization.

Instead of burdening my colleagues with a detailed review of the proceedings of the FAO Conference, I should like at this time to share with you some of my thoughts and findings based on what I heard at the Conference and discussions I had with members of other delegations, most of whom I found to be extremely friendly toward the United States and the American people.

We learned at the Conference that the population of the world is growing at the rate of 100,000 souls daily. In 1953 there were estimated to be more than 2½ billion people in the world. Each year we add about 30 million to the world's population. If it continues at this rate, the world will have about four and a half billion people by the end of the 20th century, and probably twice as many a hundred years from now.

The question is, now and in the future, how to produce enough food for a world population of such enormous proportions. Our colleague the gentleman from Kansas [Mr. HOPE] was absolutely correct when he stressed in his address that this is not time to talk about slowing down world agricultural production. It is perhaps not too widely known that even now, with huge agricultural surpluses in some countries, nearly two-thirds of the world's population is inadequately fed or undernourished. If this situation is not improved by wiser planning, we may all be confronted with tragic economic, political, and social consequences in the years ahead.

To be sure, some progress has been made in recent years since the end of World War II, particularly at the instigation of FAO. Progress has been recorded in research, in spreading technical knowledge and education concerning agricultural production, standards of nutrition, and the like. The great problems which still remain unsolved and with which FAO is struggling to find a satisfactory solution are better distribution of agricultural products and raising the level of consumption. We have the paradoxical situation in the world today of huge agricultural surpluses in some countries and people who are undernourished and poorly clothed in other countries. In the United States and

other countries the people produce an over-abundance of food. Other parts of the world, like Asia and Africa, cannot produce sufficient food and the peoples of these areas have to live on a subnormal or starvation diet.

Despite this tragic situation, we in the United States are not in a position to give away much of our food surpluses even if we wanted to do so. We are not the only food-producing nation in the world; consequently, we must exercise great care so as not to disturb the world markets. Nor do the peoples who are in need of these food surpluses want them for nothing. Some of them are too proud to take it for nothing. Others are jealous of their sovereignty and independence and fear that in taking this food they will become indebted to other nations.

Shortly before Christmas, you will recall, our Government announced that it will make available considerable quantities of wheat, corn, and other products to needy persons in foreign countries. These are to be distributed through church and private welfare agencies "until such time as any or all of the commodities can be disposed of in normal domestic channels or until they can be sold abroad." I consider this action by our Goverment as one of the most potent ways to fight communism in the world.

During the FAO Conference in Rome, I discussed this very suggestion with my colleague and fellow delegate [Mr. HOPE] and also with the Honorable Earl Butz. We visited private church agencies where we saw at firsthand how some of our surpluses were being distributed to the poor and needy, irrespective of their politics. Both of these gentlemen assured me that upon their return to the United States they would urge our Government to release more of our food surpluses to such private agencies. After my return from abroad, I again conferred with Mr. Butz and others in Washington concerning this matter. I was therefore very elated when I learned of the action taken by our Government, although I am not seeking any personal credit for such action.

I merely wish to state that we are not losing anything because some of these commodities have been in danger of rotting in the warehouses and ships where they are stored. By donating this food to the needy abroad we stand to gain immeasurably. We stand to win the support of much-needed friends all over the world.

Unfortunately, our position has not always been clear to the peoples of Asia. At times it was felt by some of them that we had abandoned our concepts of freedom and independence in order to support our Western allies in fostering colonialism. For example, the cry to save Indochina was: "Aid France." The Asian peoples thought it should have been: "Save the People of Indochina for Freedom." Communism, on the other hand, won victory after victory by the cry: "The land belongs to the people who work it."

Because of colonialism we have lost out in China, Indochina, and to some extent in North Korea. We have succeeded in saving South Korea, the Philippines, Japan, Burma, Thailand and others because the peoples of those countries were granted their freedom and independence. There is no escaping the fact that America is on the defensive in Asia. Unless we are willing to help the peoples of Asia and other areas of the world in safeguarding their inalienable rights to freedom and independence, we can expect that the misunderstanding about our aims will deepen and we will be in danger of completely losing their friendship and support.

How important is this? Let us face the fact that, as things stand now, the democratic forces are snowed under by Communist numbers. The Chinese and North Koreans are fighting Russia's wars in Asia, while Russia's own tremendous manpower reserve remains untouched. At the present time, all we can count on definitely in Asia are the 21 million people of the Philippines, 18 million in Thailand, and 80 million in Pakistan—119 million in all, as against about a billion people for Russia, Red China, North Korea, North Vietman, and so forth. The rest, including the vast numbers in India, are pursuing a neutral course which is bound to be detrimental to them and the whole free world.

This is far from being a very encouraging picture of the situation. But we need not become despondent. We are far from lost in Asia. If we pursued the same policy in Asia as we recently did in defeating communism in the Philippines, and if we strongly encourage an organization such as FAO, we can still hope to regain our moral and political leadership among the nations and preserve freedom and democracy in the world. If we can help to fill empty stomachs, substitute contentment for hunger and disease, and free the minds of people everywhere, then there will be no place for communism in the world.

The United Nations Food and Agriculture Organization offers a wonderful opportunity to help bring this about. While Soviet Russia seeks to promote communism and confusion by arming nations in the Far East and Middle East and is encouraging them to wage war, the FAO promotes democracy and freedom by encouraging the production of agricultural commodities and improving the distribution of food in the underdeveloped areas.

Perhaps even more important is the fact that FAO is trying to develop the purchasing power of the peoples in these underdeveloped countries. This can be accomplished in some degree through the use of our food surpluses and by helping them to exploit their natural resources and build up local industries. This will provide more employment for the people and enable them to become buyers on the world market.

By distributing some of our food surpluses we help to prevent famine and disorder, we improve our relations with countries which are given such assistance, and we help to promote peace. The facilities of FAO are at our disposal in the effort to achieve these goals.

Mr. Speaker, FAO is bent on the very laudable task of raising the status and the dignity of all human beings. It is dedicated to the cause of removing slavery and bondage in the world. It is pursuing a course which seeks to help make all peoples free and independent in the eyes of God and man. For these reasons, I shall strongly support this organization and its program. I urge you and all my colleagues to give it their support. FAO holds out a great promise to us, but also a great challenge.

In conclusion, I take this opportunity to express my sincere thanks to you for affording me the honor to represent this House on the United States delegation to the FAO Conference.

Disaster Insurance

EXTENSION OF REMARKS

OF

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. PHILBIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to include the statement I made before the United States Senate Committee on Banking and Currency at its Boston hearing on disaster insurance on November 9, 1955.

The material follows:

DISASTER INSURANCE

Mr. Chairman and members of the committee: First, Mr. Chairman, let me extend to you and your colleagues a hearty welcome to Massachusetts and express the gratitude of our delegation and people for the painstaking attention your committee is giving to the very serious problems which recent disastrous floods have created for us.

I am very thankful also for this opportunity to appear before you and present my views. My distinguished and beloved colleague, Mrs. ROGERS, a member of our delegation, and of our Flood Control Committee, is also here and I know you will be pleased to hear from her.

While some of the problems connected with the flood are not precisely under the jurisdiction of your fine committee, many of them are pertinent to your current studies and inquiries and undoubtedly present avenues for effective remedial action by the Congress.

Let me state also that I have been very much gratified by the work to date of your distinguished committee and the very able leadership of our good friend, Senator LEHMAN, one of the outstanding Members of the United States Senate, marked and distinguished for his long, valuable service as Governor of the great State of New York as well as his conspicuous service in the Senate. There are many bonds of friendship and admiration which tie him to Massachusetts people, and to our particular cause, and we appreciate more than I can say the thoughtful, forward-looking approach which he and the committee are pursuing.

The great havoc wrought by the floods in our State and area, indeed throughout much of the Northeast, hardly requires detailed description by me. It suffices for me to emphasize the fact that the ensuing destruction, havoc, and distress were widespread and that the resulting problems of relief, rehabilitation, and flood control and protection will have to be tackled vigorously on a very broad front.

Let me state further that all our people are deeply grateful for the efforts which the Federal Government has made to date. At the President's direction many Federal agencies too numerous to mention here have rendered us valuable and effective assistance and plans are in being which, if carried out by the Congress, should be of immeasurable benefit.

First, I should like to suggest the urgency of immediate appropriations by Congress of adequate funds to proceed as fast as possible with studies and construction of flood-control projects already authorized, and, wherever necessary, in the various river basins of our State and region.

Delay would be fraught with grave possibilities of fresh disaster. Our flood committee, of which I am chairman, is intensively studying many necessary, specific projects and the Army engineers are conducting exhaustive surveys. Earliest possible action is of paramount importance.

A second proposal is one which your honorable committee is intensively studying and that is the urgent need for flood insurance and disaster insurance. I am very glad that Senator LEHMAN and your committee have broadened your studies to cover complete disaster insurance, because following the terrible Worcester tornado of 1953 I introduced H. R. 6129 which would create a Government-owned corporation to insure against all natural disasters such as floods, tornadoes, droughts, forest fires, earthquakes, hurricanes, and all disturbances and conditions of such impact and severity that it becomes necessary for the President to declare disaster areas in any part of the Nation. I have previously submitted to the committee for insertion in the RECORD the text of H. R. 6129.

You all realize that it is impossible to secure flood insurance, or disaster insurance, from private insurance companies because its cost would be prohibitive. Under the proposed bill the Government would reinsure disaster policies designed to cover every part of the United States against the ravages of all natural disasters.

I am desirous, insofar as it is practicable and feasible, of having private companies cooperate with the Federal Government in this coverage because it would not interfere in any way with current private insurance coverages wherever they exist, of storm and wind damage and the like, because the proposed insurance would not go into effect in any area until the President has declared an emergency.

I note from the press, Mr. Chairman, that you are considering a measure to include damage from atomic attack and possibly other war damage, and, so far as I am concerned, I believe that this proposal is not only sound and feasible, but vitally necessary, if we are to be prepared for any great national emergency that might strike us like a bolt from the blue with devastating effects.

In this connection, it might be relevant to refer to the War Damage Corporation organized during World War II on the theory that war risk is catastrophic in nature, arising out of a single peril, and war risk losses are unpredictable, as well as impossible for private companies to undertake by themselves.

You will recall that the act of March 22, 1942 provided specifically for property loss or damage which might have occurred after Pearl Harbor to the end of the war period, and the War Damage Corporation entered into agreements with some 546 established insurance carriers to transact general war-risk insurance protection available to the public.

Under the program the companies were permitted to make a reasonable profit for their work in writing the insurance and handling claims and the like. It was not necessary for the Corporation to request or receive any direct appropriation from the Congress and it was capitalized for something like a hundred million dollars and its stock was held by the RFC.

You will recall that from December, 1941 to June, 1945 premium revenues aggregating something like $250 million were more than adequate to enable the Corporation to meet its operating expenses and pay approved claims for property loss and damage.

Actually the only funds made available to the Corporation by RFC were $1 million for the acquisition of the initial issue of 1,000 shares of capital stock.

About $372,000 was expended in approved claims for losses which occurred before inauguration of the premium insurance program.

This insurance was set up so that it could cover all the property in the United States—homes and residential, business, churches, public institutions, and the like with the assistance and participation of the private companies.

Let me repeat that I regard such a program not only to be sound and feasible, but decidedly necessary at this time, and I hope and urge that the committee will consider H. R. 6129 in connection with its study of other pending proposals you are studying.

In the third place, I have made certain efforts looking toward expansion of the Weather Bureau to speed intensive study of weather problems and to inaugurate as early as possible more effective hurricane and storm-warning systems. I think there is a real need for increased and improved research on weather and weather service and am introducing appropriate legislation when Congress reconvenes. I respectfully ask the subcommittee's permission to include in the record the text of the preliminary draft of my weather bill.

Fourthly, I also think that Congress will have to strengthen and expand our machinery for disaster relief and rehabilitation. It should be permanent, it should be more closely coordinated with the States and local communities. It should be broader and more generous in its coverage.

I seriously question that relief of disasters of such great magnitude as we are dealing with now, and will have to deal with from time to time, and which may hit anywhere in the country, can be satisfactorily handled by Government loans. The Small Business Administration, acting under its present mandate, has done splendid work and I would be the first wholeheartedly to commend this Government agency for the help it rendered to us, and is still rendering to us.

However, I believe that these relief and rehabilitation problems will have to be approached on a much broader front and that consideration must be promptly given to the equitable and humane aims of putting flood and disaster sufferers, as nearly as we can, into the status quo ante—the position they were in before disaster struck them.

It can be definitely said, I think, that many of these losses, individual and collective, human and material, are far beyond the resources of individuals, or the State and local governments, to cope with adequately. A broader measure of assistance by the Federal Government is required.

Such a program will be costly and expensive. But so is foreign relief; so are agricultural subsidies; so are great public projects in other sections of the Nation. The stricken people of the eastern seaboard who pay such heavy taxes to the Federal Treasury are also entitled to the generous help and assistance of the Federal Government in their time of terrible affliction.

In conclusion, I earnestly plead for your cooperation and assistance. We have been sorely stricken. Our own people have shown tremendous courage and resourcefulness in trying to reestablish their homes, their industries and their communities. But our need is still very great. To ward off the effects of the disastrous floods and to set up adequate safeguards against possible future visitation of great natural disasters, so unpredictable in their approach and point of attack, and so paralyzing in their consequences, we now need the sympathetic help and assistance of the Government.

If your illustrious committee comprised of great leaders of the United States Senate and great leaders of the Nation, able, esteemed and patriotic, working so diligently under the leadership of the very distinguished Senator from New York, can help us measurably in any way to realize the objectives in this field of relief, rehabilitation and protection which we in Massachusetts feel must be so urgently and vigorously pursued, then we will indeed be very grateful to you.

Please let me thank you, Mr. Chairman and members of the committee, for hearing me this morning and giving your valuable time, and most of all your sincere and sympathetic consideration of our serious flood problems. I am sure that you will do everything you can to assist us.

Thank you very much, Mr. Chairman and gentlemen.

Israel Must Have Arms

EXTENSION OF REMARKS
OF
HON. EMANUEL CELLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. CELLER. Mr. Speaker, under leave to extend my remarks, I insert herewith an address I made on January 4, 1956, in Chicago, Ill., before the Congregation Rodfei Zedek:

ISRAEL MUST HAVE ARMS

Israel must have arms. Let us remember this: Wherever you stand in Israel, you can see a border line with scarcely the twist of a neck. Thus, if there is an attack upon Israel and Israel is unprepared to meet it, Israel will be forced into the sea before any aid whatsoever can be rushed to her.

The only defense Israel can have against an attack is to be able to meet it head on. A Pearl Harbor would mean the end of Israel. There is no space for retreat.

Israel asks for arms for another reason which, above all else, most certainly should be understood by the United States. The United States has consistently pursued the policy that the most effective deterrent against war is to maintain adequate arms for herself and her allies. To that end, we have devoted the major portion of our budget, keeping strong our Armed Forces and trying to keep ahead in military developments and supplying our allies with military aid.

Is it, therefore, unreasonable—can we possibly view it as unreasonable—that Israel, small and friendless, should likewise view an adequate defense as the best deterrent against war, and as the best assurance for peace? We in the United States have sought, through a system of defense pacts—NATO, SEATO, and the encouragement of pacts like the Baghdad Pact and the Northern Tier arrangements—to promote the cause of peace in the world. Is it, therefore, unreasonable that Israel, in her isolation—the only democratic country in the world so isolated—should seek a pact with the United States, the country which once befriended her, the country which once, through legislative action and through Presidential proclamation, gave so much sympathy and understanding to the ideals of the Jewish homeland?

The situation in the Middle East has deteriorated where it now constitutes one of

our own weakest points, securitywise. Through a lack of firmness with the Western Powers, our obvious indecisiveness, so open to the Arab States that they played the East against the West, we now face Soviet penetration of the Middle East. Right now we seem to be running around in circles, crying loudly at the Communist apparition in the area, obviously distraught, now patting the Arab nations on the head, now murmuring sympathetically to Israel, promising and withdrawing, promising and withdrawing again.

Let us make no mistake about it. We have been less than forthright. The Western World has reason for its alarm.

To me it is amazing that the Western World, dedicated to the preservation and even to the expansion of democracy, should have turned its back on the one practicing democratic nation in that area of the world. The British Government is openly pro-Arab, so openly pro-Arab, so vigorously pro-Arab, that the voices of protest are heard around the land. As a result of this mounting protest, Prime Minister Anthony Eden has reluctantly consented to a decree that no license be granted for the export of materiel that could be reconditioned and re-exported for use as weapons of war "unless the government of destination is prepared to give a guaranty against that happening."

Such a decree is meaningless. It is impossible of enforcement. Inspections certainly cannot be maintained in any country where this materiel eventually lands. It is especially meaningless in view of the fact that Great Britain has been feeding the Egyptian maw great supplies of arms, including 64 Centurion tanks, scores of jets, and some 180 to 190 reconditioned British Valentine tanks.

A shipment of these arms is part and parcel of Eden's policy of Arab appeasement. Eden is like a man who keeps feeding steaks to a tiger in the hope of making him a vegetarian.

Is it that the Government of Great Britain considers Israel expendable? Can Eden on one hand deprecate an arms race in the Middle East and on the other condone the supply of arms all out of proportion to that of Israel to the country of declared and open hostility?

The situation is so fraught with danger that top priority was given a few days ago by the newly appointed British Foreign Secretary, Selwyn Lloyd, to that very situation by summoning to London eight British Envoys in Middle East countries for a 2-day conference. Among those summoned were the British Ambassadors from Israel, Egypt, Syria, Lebanon, Jordan, and Saudi Arabia.

It is also said that Great Britain may find it necessary, in view of the storm of protest, to isue a white paper explaining its policy in the Middle East.

In all this, where is United States policy? Will our leadership go by default?

We cannot, of course, conclude—since we do not know—that our Government will steer the wrong course. We do know that there has been too much reliance on wishful thinking. We do know that there has been—and still exists—a split among the State Department advisers. We do know that our diplomacy has failed in Egypt. But the course must be set and set soon—with realism, with staring of the facts straight in the face. We cannot afford any conflagration in that area in the name of our own security.

As Prime Minister David Ben-Gurion said, eloquently and with wisdom, in a recent address to the Knesset, the Israeli Parliament:

"We know that any war—one even in which we gain the upper hand—involves ruin and destruction for both parties and intensifies hatred between nations. We know that, after our victory in one war, a second round is possible, and after our victory in a second war, a third round may come, and there is no end of this business."

Recreation Facilities in National Forests

EXTENSION OF REMARKS
OF
HON. LEE METCALF
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. METCALF. Mr. Speaker, recreation facilities in our national forests have been going to pieces for many years. A continual lack of sufficient appropriations, plus a soaring increase in popular use, has led to this situation.

Time after time sincere efforts have been made to get appropriations sufficient to meet the needs. The needs never have been met. The 1956 appropriation for national forest recreation facilities was $1,670,000, a mere drop in the bucket when you realize that some 44 million persons used the national forests for recreation in 1955, an increase of 26 million persons over the number of annual visits just 9 years before.

To end this meager hand-to-mouth existence of our forest recreation facilities, I have introduced H. R. 1823. In the main it is the same solution as was proposed in the Tackett bills of the 81st and 82d Congresses and the Baker bill of the 83d Congress.

It establishes public recreation use of the national forests as a policy of Congress; no such basic policy exists.

It provides for the setting aside of 10 percent of the national forest receipts each year for development, maintenance, and operation of facilities and areas for recreation use; improvement and maintenance of wildlife habitat; and safety, sanitation, and health in connection with uses of the national forests. The amount so set aside shall not exceed $5,500,000 in any one year. None of the money shall be used for land acquisition.

It provides that in those few cases in which fees are charged for the recreational use of national forests—a charge which the Secretary of Agriculture already is authorized to make, and is making—the money collected shall be spent wholly for the above-noted recreation facilities.

There can be no argument with the first portion of the bill establishing a basic recreation policy. Among those of us who know the great need for funds there can be no argument on the second portion, providing for reinvestment of 10 percent of forest revenues for recreation facilities.

But on the last portion of the bill there has been considerable argument, based on misunderstanding. Contrary to some opposition statements based on this misunderstanding, this portion does not give any new power to the Forest Service, in fact it limits this power. It limits the Forest Service's authority to charge fees for recreation use to only those few areas in which there are specially equipped campgrounds and picnic areas; at present the Forest Service could impose such a charge at any recreation area on the forests.

An example of such a charge was that made at Pattee Canyon in Lolo National Forest some 15 miles from Missoula. This popular camping and picnicking area has a heavy use from Missoula residents, university students, and various groups. The facilities are described by the Forest Service as "one of our better areas." For a time a charge of 25 cents per car party was being made for use of the picnic or camping facilities. But, contrary to the belief of users who paid this charge, the money thus received by the Forest Service could not be used to keep up the facilities there. The money was going directly into the United States Treasury. Charges for use of Pattee Canyon were discontinued in 1955.

If my bill did not include this final portion setting aside 100 percent of these recreation receipts for maintaining the recreation facilities, only 10 percent of the receipts could go for such purposes. I feel it is fair to allocate 10 percent of the forest revenue from such sources as grazing fees and timber sales to recreation—but it is foolish to allocate less than 100 percent of the recreation fees for this purpose.

Charges are being made to users of recreation facilities only in some 49 of the larger and especially equipped campgrounds and picnic areas. The average charge is 15 cents per person per day, with children under 12 being free. The highest charge is 25 cents per person per day. Nearly all of these facilities are being operated by concessioners as the Forest Service seeks some means of solving its problem of inadequate funds. At most, the Service estimates only 200 of the 4,700 improved campground and picnic areas are large enough to be successfully operated as charge areas.

The alternatives to this bill may be a spread of the concessioner-operated facilities and perhaps even a system of personal licenses in which a charge would be made for every recreation use of the national forests. We do not want either of these alternatives.

Montana contains 9.4 percent of the acreage of the national forests, a total of 16,986,393 acres, of which more than three-quarters are in the First District. The number of visitors who used the national forests in Montana during 1954 totaled 1,311,000. Yet for all this vast acreage, and the relatively heavy usage in consideration of the population of this area, the Forest Service was able to spend only about $60,000 on Montana forest recreational facilities during the year.

Many of the recreation facilities, nationally, are worn out. Most of them date from the 1930's. Niggardly appropriations have made it impossible to maintain them properly, much less expand them to meet the soaring need. As a result, some have been closed because of their deterioration and unsanitary condition. On those public recreation facilities that remain in use the Forest Service has been able to spend only 8 cents per visit for maintenance and cleanup. And that figure does not take into account the millions of visits made to wilderness areas and other places where facilities are nil, or the millions of visits made to resorts, summer homes, and the like in the forests on which no Federal money is spent. To do what the foresters feel would be a fully adequate job they believe close to 20 cents per

visit would be needed. To keep the facilities just going along in a satisfactory manner they place the estimated cost at 14 cents per visit.

The situation has deteriorated to the point now that the Forest Service declares it needs $3,300,000 for current cleanup and maintenance alone. For capital investment to rehabilitate these facilities and to construct desperately needed new ones, the foresters advise that some $24 million is needed.

Contrast those figures with the amount budgeted for the current fiscal year and the contrast between what has been sought and what has been granted is painfully clear.

The hearings during the 83d Congress on the Baker bill brought forth from many sources the tale of deterioration of facilities.

Representative CARL ELLIOTT, of Alabama, testified:

Annual expenditures by the Forest Service for the operation and maintenance of these recreational facilities * * * in no way meets the need for adequately providing for the large number of our citizens who take advantage of these facilities each year. During the days of the Works Progress Administration and the Civilian Conservation Corps many of these recreational facilities were originally constructed. Today many of them are in a state of deterioration; forest roads and campsites are badly in need of repair; the dangers of forest fires are not always properly guarded against; public safety, sanitation and health often is not given proper attention because of the limited amount of appropriations.

Chester Wilson, conservation director of the State of Minnesota, declared:

The deteriorated conditions of the recreational facilities and wildlife habitat in the national forests was observed many years ago, and that was due to the lack of sufficient funds for taking care of those interests. * * * It is literally a case of starvation in the midst of plenty. * * * We have a great contrast right in our State of Minnesota where we have ample funds for all of our game and fish activities with an annual surplus which is available for the maintenance of recreational facilities and the development of game and fish opportunities and resources throughout the State, but by contrast in the national forests the resources are just going to seed.

In the view of Thomas Kimball, director of the Colorado Game and Fish Commission—

The recreational needs in particular have not been met; in fact, what facilities are available for the great mass of people using the national forests are in a very bad state of repair * * * the lack of adequate sanitary facilities is important. You can imagine what that does when an increase runs from 300,000 to almost 1,300,000 visitors, with no increase in facilities to take care of that load, or the increase from 60,000 fishermen to 366,000 fishermen, with no increase in sanitary facilities and no increase in the picnicking grounds or campgrounds.

Kelly E. Bennett, chairman of the North Carolina National Park, Parkway, and Forest Development Commission, testified:

Because of inadequate recreation facilities, many people tramp and picnic on unimproved areas where there is danger of polluting water used for domestic purposes and creating fire hazards when the camper builds his fire in locations which have not been provided with fireplaces and other facilities.

William Voigt, Jr., executive director of the Izaak Walton League, pointed out:

It is about all the Forest Service people can do, under existing appropriations, to play garbageman and clean up after the public has passed through * * * the eighty-odd percent of our national population that lives in cities and towns is fast running out of private land and water where it can freely find the outdoor recreation so many millions of us crave and seek. We already have learned that, generally speaking, the national forests are among the choicest recreation areas anywhere in the interior of the country. As a nation we are going to have to depend ever more upon our national forests to handle the increasing recreational load.

The tale of pennypinching went on and on.

Seth Gordon, director of the California Fish and Game Department, declared:

The recreational developments in connection with the national forests have been so badly neglected that in our State the merchants in the nearby areas are begging their customers for money to help maintain the toilet facilities and to clean up the trash.

I. T. Quinn, director, Virginia Commission of Game and Inland Fisheries:

The failure due to lack of funds to provide recreational facilities has become little less than tragic.

Harold I. Bowman, president, National Forest Recreation Association, reported:

Large numbers of campers are forced to camp in undeveloped areas, thereby increasing the fire hazard and the threat to safe water supplies and public health. This is no criticism of the Forest Service. The forest officers are doing everything possible. They are working overtime, trying desperately to take care of the public. They simply do not have the funds to do the job.

As the Baker bill, this legislation received support in the hearings from the National Wildlife Federation, National Association of Travel Organizations, Wildlife Management Institute, Outdoor Writers Association of America, Montana State Federation of Labor, Utah Wildlife Federation, Izaak Walton League, Western Montana Fish and Game Association, Ohio League of Sportsmen, Oklahoma Outdoor Council, United States Industrial Union Council of the CIO, Virginia Wildlife Federation, Appalachian Mountain Club, National Farmers Union, Billings (Mont.) Rod and Gun Club, California Alpine Club, Southeast Texas section of the American Camping Association, National Forest Recreation Association, Darrington (Wash.) Chamber of Commerce, Dude Ranchers Association, Washoe County (Nev.), Council of Social Agencies, Florida Wildlife Federation, Silver City (N. Mex.) Lions Club, the American Legion Post of Everett, Wash., Taos (N. Mex.) Chamber of Commerce, Marin Conservation League of California, West Montana Fish and Game Association, American Camping Association, Cascade County (Mont.) Wildlife Association, National Ski Association of America, Arizona Game Protective Association, Mountainburg (Ark.) Lions Club, the American Museum of Natural History, Pensacola Anglers and Hunters Club, Montana State Federation of Labor, Intermountain Ski Association, and many more.

Also lending their voices in support of the legislation were representatives of State and local government agencies, among them representatives of the North Carolina Wildlife Resources Commission; Iowa State Conservation Commission; North Carolina National Park, Parkway, and Forest Development Commission; Missouri Conservation Commission; California Fish and Game Department; Colorado Fish and Game Commission; Virginia Commission of Game and Inland Fisheries; Wisconsin Conservation Department; Minnesota Conservation Department; Snohomish County, Wash., school system; Box Elder (Utah) County Commission; Cache (Utah) County Commission; and the New Mexico Department of Fish and Game.

National forest recreation is important from the business standpoint. Many business enterprises are supported by tourist and vacation activities. National forest recreation is the economic backbone of many communities.

Frank Menke, the sports historian, in his New Encyclopedia of Sports, shows the financial impact of hunting and fishing alone:

The two armies—the anglers and the gunners—who rarely are mentioned on the sport pages—spend more money each year than would be needed to buy all the racetracks in America, all the racehorses, all the football stadia, all the baseball parks, all the professional ballplayers, all the ice rinks and hockey players, all the dog racing tracks and dogs, all the polo fields and horses, all the rodeos with their complete equipment, all the automobile speedways—and there still would be enough left to buy handsome post offices in wholesale quantities.

Menke estimates there are 25 major horse parks plus 75 minor tracks, and that approximately 17,500 thoroughbreds and trotters are campaigned annually. These properties, plus all sires and brood mares, are worth, he says, less than one-tenth of what anglers and hunters spend in every 12 months.

The startling lack of appropriations for forest recreation for the American people cannot be blamed on a lack of effort. All the dynamite that forest users could carry has been used in attempt after attempt to shatter the appropriations roadblock.

Our national forests are making money for us. Receipts in fiscal 1955 totaled $84,120,150. That same year operating expenditures and depreciation of improvements on the forests totaled $66,106,523. So $18 million went into the Treasury from operation of our national forests. We should reinvest some of this profit in the business.

Two precedents for such an allocating of revenues have been in use for more than 40 years in the national forests.

One, enacted in 1908, sets aside 25 percent of all money received from the forests to be used by the States in which the forests are located for the public roads and schools in counties in which there are national forests.

The other precedent, enacted in 1913, provides for reinvestment of 10 percent of all national forest receipts for use of the Forest Service in construction and maintenance of roads and trails within the forests.

I might note that the reinvestment for recreation of 10 percent or not more than $5,500,000 annually, as proposed in H. R. 1823, will not reduce the funds set aside in the above two acts.

Several national and regional organizations have again expressed themselves on this legislation within the past few months by specifically endorsing H. R. 1823. Their recommendations are as follows:

International Association of Game, Fish, and Conservation Commissioners:

A resolution was adopted which calls upon Congress to hasten action on H. R. 1823 and other incidental bills that set aside 10 percent, but not more than $5½ million annually, of the forest receipts from the sale of timber, grazing privileges, and other uses for recreational and sanitary purposes and the improvement of wildlife habitat within national forests.

Outdoor Writers Association of America:

Whereas some 180,000,000 acres of national forest lands form unposted hunting, fishing, and recreational areas for all Americans; and

Whereas H. R. 1823, by Representative LEE METCALF, would provide for multiple uses of these areas, and provide funds for a stepped-up program for wildlife habitat and recreation: Now, therefore, be it

Resolved, That the OWAA urges the Congress to enact legislation embodying the objectives of H. R. 1823 thus implementing public use of these lands; and be it

Resolved further, That a copy of this resolution be sent to all such Members of the United States Congress and to all such other groups and individuals as may be interested.

Western Division Outdoor Writers Association:

Whereas the recreation visits on the national forests were reported at over 40 million for 1954, an alltime high; and

Whereas this has created serious problems of fire protection, sanitation, and crowding on the limited developed national forest recreation areas; and

Whereas a program of expanded development of recreation facilities as well as an accompanying program of improvement for national forest fish and wildlife habitats is urgent: Now, therefore, be it

Resolved, That the Outdoor Writers Association of America urge Members of Congress in the respective States to support H. R. 1823 and companion bills which would set aside 10 percent of the national forest receipts each fiscal year, not to exceed $5,500,000 in any year, for recreation development and wildlife habitat improvement of the national forests.

Montana District Council, Lumber and Sawmill Workers, Local 2405, July 16–17, 1955:

Whereas Congressman LEE METCALF has introduced H. R. 1823 providing funds for maintenance of recreational facilities in the national forests by setting aside 10 percent of Forest Service revenues from timber sales, etc., for that purpose; and

Whereas the national forests should be utilized where possible for the enjoyment and recreation of all citizens of the United States that find an opportunity to visit them: Therefore be it

Resolved, That this convention of the Montana district council and all affiliated local unions go on record as endorsing and supporting passage of H. R. 1823 and commending Representative LEE METCALF for his good efforts to utilize the national forests for the benefit of all; and be it further

Resolved, That copies of this resolution be sent to the next convention of the Montana State Federation of Labor for concurrence.

The District 2 Wildlife Federation, with offices in Lewiston, Idaho, passed a resolution favoring enactment of H. R. 1823 at its last district meeting.

All these people realize that the money spent under this bill would be an investment in the future of our Nation. They realize that the annual appropriation procedure is not providing the money that is so urgently needed for this work. They have learned through bitter experience that such funds cannot be obtained by appropriation. They believe, as I believe, that the time is long past due for legislation permitting a reinvestment of national forest receipts for this major recreational purpose of our national forests.

My bill meets the need. With 10 percent of the National Forest revenues, but not more than $5,500,000 annually, the Forest Service can do a good job of bringing the forest recreation facilities up to date to handle the steadily increasing demand. And the provision that the Forest Service be limited in what it can charge for, in the way of recreation facilities, but that all such fee revenues be plowed back into the recreation facilities, just makes plain good sense. This bill, H. R. 1823, deserves the support of all persons who want our forests to remain "the people's playgrounds."

The 42d National Convention, Knights of Lithuania, Newark, N. J., August 1955

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. RODINO. Mr. Speaker, under leave to extend my remarks, I include a greeting which I addressed to the 42d national convention, Knights of Lithuania, assembled at the Hotel Robert Treat, Newark, N. J., during August 1955:

THE ANNUAL CONVENTION OF THE KNIGHTS OF LITHUANIA

MY ESTEEMED FRIENDS: I am greatly honored to address this annual convention of the Knights of Lithuania. I know that this meeting presents you with the opportunity to express your anxiety for the land of your forebears which is presently under the totalitarian oppression of the godless Soviet Union. It also offers a chance for all freedom-loving Americans to join with you assembled here in emphatically protesting against the inhuman tactics of Soviet aggression as well as transmitting a message of hope for eventual freedom of all Lithuanians from their present bondage. It is essential that we incessantly remind your Lithuanian kinsmen we have not deserted them, and try to strengthen them spiritually so that they will continue their gallant struggle against Communist tyranny despite great odds.

The premeditated plan by which the Soviets enslaved the brave Lithuanian Nation and the methods used to subjugate them profoundly shocked the American people. The unscrupulous and inhuman practice of deportation and mass exterminations, which the ruthless Communists have had to employ in their efforts to mold the social, economic, and cultural standards of Soviet Russia, is ample evidence of the indomitable determination of the Lithuanian people to resist the tyrant and to remain free. The Communists' total disregard for human rights and fundamental freedoms is a violation of the law of nations and the law of nature.

However, incredible as it may seem, despite the threat of brutal persecutions the resistance movement among Lithuanians still continues in the homeland as well as abroad. It has been estimated that over 15 underground newspapers are published in Lithuania. Moreover, in the face of constant pressure to enforce communism, it has been estimated that Lithuania has the smallest Communist Party membership of any of the satellite countries—only 0.8 percent of the entire population.

The American people have not forgotten the valiant efforts of the Lithuanian people to hold tenaciously to the last vestiges of freedom. Evidence of our concern for their plight was the formation of the House Baltic Committee to investigate the incorporation of the Baltic States into the U. S. S. R. Extensive hearings were held and the testimony given by eyewitnesses demonstrated for all the world to see the pattern of Communist aggression in the Baltic States. This thorough and well documented investigation should be a source of encouragement to these captive peoples in assuring them that we have not forgotten them and that we do not condone their captivity. These documents are available in colleges and libraries throughout the United States and are a means of informing the American people regarding the ruthless tactics employed by the Soviets in conquering free countries.

The American people have never recognized the absorption of Lithuania into the Soviet system. The Lithuanian people, conscious of their right of freedom, will never surrender and renounce their independence of soul and they will oppose the foreign aggressor. Their fight for freedom is a symbol and inspiration for oppressed nations everywhere; we are sure that such a determination for liberty will not be in vain. Secretary of State John Foster Dulles has stated that a despotism of the Soviet type cannot indefinitely perpetuate its rule over hundreds of millions of people who love God, who love country, and who have a sense of personal dignity.

It is fitting that on this occasion of the annual convention of the Knights of Lithuania that I express my sincerest hope for the liberation of the Lithuanian homeland and its restoration once more as an independent republic.

Sincerely yours,

PETER W. RODINO, Jr.,
Member of Congress.

The Cabaret Tax

EXTENSION OF REMARKS
OF
HON. THOMAS M. PELLY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. PELLY. Mr. Speaker, I have just introduced a bill to abolish the 20 percent so-called cabaret tax. That segment of the amusement industry presently laboring under this very discriminatory and wholly uneconomical tax has long been in need of this essential relief. Competent economists say that this wartime

emergency tax which has never been discontinued since the war, instead of producing income to the Government, is actually resulting in less revenue to the Treasury. Hearings on this legislation will show that if this unfair tax is repealed the Treasury will gain by at least $11 million in excess of the nearly $39 million which this tax brought in during the last fiscal year. I am satisfied such a gain in revenue would result from persons operating places of entertainment now subject to the tax, plus personal tax accruals resulting from more musicians working longer hours at these places. Furthermore, additional accruals are certain to result from the reopening of places that have been forced to close because of the tax. I should like to point out that the American Hotel Association reports that approximately two-thirds of its dining-with-entertainment rooms have been discontinued or forced to close since 1946 as a direct result of this tax. I also wish to point out the large additional revenue that would result from the employment of entertainers other than musicians, as well as supplementary service personnel, in dining-with-entertainment rooms that would be reopened as a result of the discontinuance of this tax. Statistics show that musicians alone have lost approximately 50 percent of their employment in these taxed places of entertainment since 1943. Also, for every musician so displaced there has been an equal number of jobs lost by other entertainers and substantial numbers among waiters, waitresses, culinary, and other service help. All this adds up to a loss of thousands of jobs at a time of generally high employment.

The decadence of our national cultural standards, with particular reference to musicians, is becoming daily more apparent. While mechanized music plays some small part in this recession of our cultural standards, the major basic underlying cause is, I believe, unsound economic policy as represented by this discriminatory tax. Surveys show that only 32.8 percent of the approximately 252,500 instrumentalists belonging to the musicians union can at the present time earn all or a large part of their livelihood at their profession. Conservatively, 35 percent of the membership of this union can no longer follow their profession to any marked degree. A good one-half of the musicians' union's total job potential is being destroyed by this unsound tax policy. In order to sustain our musical cultural heritage, great musicians must be developed. Generally speaking, these come only from the masses of working instrumentalists. If large reservoirs of employment are continually siphoned off as is now happening, it is indeed possible that our cultural life, from a musical standpoint, will disappear from the national scene.

For these reasons, I urge the membership of the Ways and Means Committee to give favorable consideration to repealing the 20 percent cabaret tax and hope the measure will come to the floor during this session and receive favorable action.

I Am the United States

EXTENSION OF REMARKS
OF
HON. GORDON L. McDONOUGH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. McDONOUGH. Mr. Speaker, because of the great interest that was shown by various audiences, which I had the opportunity to speak to during the recent congressional recess, in the following brief narrative history of the United States entitled "I Am the United States," it occurred to me that the people of the Nation as a whole would be equally interested. Any American can take pride in his native land when he reads this inspiring brief history of the United States.

I am, therefore, including herewith this statement which attracted so much attention and aroused so much interest that additional copies were requested whenever it was read:

I AM THE UNITED STATES

I was born on July 4, 1776, and the Declaration of Independence is my birth certificate. The bloodlines of the world run in my veins, because I offered freedom to the oppressed. I am many things, and many people. I am the United States.

I am 165 million living souls—and the ghost of millions who have lived and died for me.

I am Nathan Hale and Paul Revere. I stood at Lexington and fired the shot heard around the world. I am Washington, Jefferson, and Patrick Henry. I am John Paul Jones, the Green Mountain Boys, and Davy Crockett. I am Lee and Grant, and Abe Lincoln.

I remember the Alamo, the Maine and Pearl Harbor. When freedom called, I answered and stayed until it was over, over there. I left my heroic dead in Flanders Field, on the rock of Corregidor, and on the bleak slopes of Korea.

I am the Brooklyn Bridge, the wheatlands of Kansas, and the granite hills of Vermont. I am the coalfields of the Virginias and Pennsylvania, the fertile lands of the West, the Golden Gate, and Grand Canyon. I am Independence Hall, the *Monitor*, and the *Merrimac*.

I am big. I sprawl from the Atlantic to the Pacific, 3 million square miles throbbing with industry. I am more than 5 million farms. I am forest, field, mountain, and desert. I am quiet villages—and cities that never sleep.

You can look at me and see Ben Franklin walking down the streets of Philadelphia with his breadloaf under his arm. You can see Betsy Ross with her needle. You can see the lights of Christmas, and hear the strains of Auld Lang Syne as the calendar turns.

I am Babe Ruth and the world series. I am 169,000 schools and colleges, and 250,000 churches where my people worship God as they think best. I am a ballot dropped in a box, the roar of a crowd in a stadium, and the voice of a choir in a cathedral. I am an editorial in a newspaper, and a letter to a Congressman.

I am Eli Whitney and Stephen Foster. I am Tom Edison, Albert Einstein, and Billy Graham. I am Horace Greeley, Will Rogers, and the Wright brothers. I am George Washington Carver, Daniel Webster, and Jonas Salk.

I am Longfellow, Harriet Beecher Stowe, Walt Whitman, and Thomas Paine.

Yes, I am the United States of America, and these are the things that I am. I was conceived in freedom and, God willing, in freedom I will spend the rest of my days.

May I possess always the integrity, the courage, and the strength to keep myself unshackled, to remain a citadel of freedom and a beacon of hope to the world.

Assistance to Agriculture

EXTENSION OF REMARKS
OF
HON. BEN F. JENSEN
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. JENSEN. Mr. Speaker, every American who reads the newspapers knows of course without me talking about it that the Midwest stockraisers, and that takes in at least 95 percent of the farmers in that great area of our Nation, are in a terrific price squeeze, which as the records will show started way back in 1951.

The evil day was the day in February 1951 when Mike DiSalle, Administrator of the Office of Price Stabilization, announced he would roll back cattle prices 10 percent, just so he could approve the 9 percent wage boost which the packinghouse workers were then demanding. The "little dictator" did both with President Truman's approval. Look at the record.

Their reasoning was that to approve the 9 percent wage boost, without reducing meat prices, would raise the cost of living to the American consumer, who at that very time was spending just 24 percent of his income for food, while the rest of the peoples of the world were spending on an average of over 70 percent of their income for food. The cattle rollback took most every farm commodity down the toboggan with it. Then for several months, after the Republican Congress in the early spring of 1953 abolished the Office of Price Stabilization, all farm commodity prices leveled off until Secretary of Agriculture Benson and the farm leaders of both the Senate and the House of Representatives, of both parties, got into a squabble over 90 percent and flexible price supports for our 6 basic farm crops: corn, wheat, cotton, tobacco, rice, and peanuts. And from the very day that squabble started most all farm commodity prices again began to slip downward until at this time fat hogs and cattle are bringing the farmers an average of about 60 percent of parity and according to the last Department of Agriculture report, the American farmers' dollar is only buying 80 cents worth of manufactured and processed goods at the counter. To make matters worse, droughts, grasshoppers, and corn borers have to no small degree added greatly to the farmers' problem in many sections of the Midwest; that is especially true of most of southern Iowa, parts of Missouri, Kansas, and Nebraska, as well as other parts of the Middle West to a more or less degree. That, my colleagues, is not a con-

dition that the American economy, let alone the American farmer, can long endure.

Now, Mr. Speaker, neither your party nor my party should take all the blame for the plight of our farmers, nor does the average farmer place all the blame on us; for they know they have produced more than has been consumed for many past years, but let us not forget that they were urged to produce, produce produce all during World War II and the Korean war in order to feed and clothe, not only our military forces and civilians, but to a very great degree our allies too, both military and civilian. Farmers of all ages, old men and old women, and young teenage boys and girls rolled up their sleeves and really produced; sometimes running their tractors, plows, planters, and harvesters around the clock, while millions of the farmers' grown sons and daughters were serving their country in the Armed Forces, and in war plants, all over this wide, troubled world.

Let us never forget, but be forever grateful to the American farmer for the great and important part he has played in all our military victories. And let us also never forget the fact that the victors in every major war in recorded history, was the nation which God had blessed with the greatest supply of food, feed, and fiber. For the reasons I have just stated, I for one am willing and anxious, yes, Mr. Speaker, more than that, I plead and pray that this session of Congress disregard party lines and adopt the necessary legislation to help our farmers help themselves over the present emergency, and then adopt a farm bill providing the least possible controls and Federal domination, but plainly sufficient in its benefits to our farmers, to do a good job over the long pull. Permit me to say that I sincerely hope a repetition of the last session will not again occur during this session, wherein this House of Representatives passed a fairly good farm bill, and which I supported, but which never saw the light of day from the committee room of the other body. Hence, it would seem there might be a plague on both our houses, Democrat and Republican.

But that is water over the dam. What should we do now? There are many ways this Congress can extend a helping hand to our farmers without too great an outlay of money, and without telling the farmers when to plant and when to reap. I believe it was Thomas Jefferson who once said:

> If the time ever comes when the Federal Government tells the farmer when he shall plant and when he shall reap, we shall soon want bread.

I have seen that very thing happen to many nations around this world in my lifetime. I will have no part of it here. This is the 18th session I have had the honor of serving the people of the Seventh Iowa District in the United States Congress. My district is an agriculture district. I was born and raised on a farm, and during all my adult life I have lived and dealt with farmers. I know their problems and their heartbeats, and I know when they are in trouble, and believe me, they are really in trouble now. Especially the younger farmers, a great majority of them veterans, who have not had time to get their finances in order before this farm panic occurred.

I visited with hundreds of them last fall, and have had hundreds of letters from farmers, large and small, young and old, and businessmen since then telling me of their plight and giving me their ideas of the kind of laws Congress should pass for their immediate relief and for the long pull. I have read every word of every letter in the hope that they would be helpful to me in writing and recommending a farm bill, and they have.

Here are my recommendations to the Agricultural Committees of both Houses of Congress. Hold hearings every day for one week starting immediately, and bring a bill to the floor of both Houses the following Monday, that bill to provide emergency assistance to agriculture as follows:

If corn and wheat farmers will seed down, or fallow, part of their acreage allotments next year, then let them buy from the Government surplus stocks of corn and wheat, 50 bushels for each acre of corn, or 20 bushels for each acre of wheat seeded down or fallowed, at their own expense. This surplus to be bought for 75 cents a bushel. This would be starting a soil-bank plan immediately, and paying for it with surplus grain, instead of new tax money. Farms with less than 50 acres of allotment could select to seed down their whole allotment, and for larger farms an additional 20 percent over the first 50 acres.

This plan has been recommended to me by farmers and others. This plan would require no cash outlay, would give almost immediate aid to thousands upon thousands of distressed farmers. It would dispose of a great quantity of our surpluses, a lot of which is spoiling as time goes on. It would empty thousands upon thousands of Government-owned bins, making purchases of more new bins for next year's crop unnecessary.

For further details of this plan and in order to save time and space, I direct your attention to the extension of my remarks in this CONGRESSIONAL RECORD on another page, wherein, after receiving unanimous consent, I am having printed the recommendations of Mr. Dave Livingston, a farmer living at Washington, Iowa. Mr. Livingston, a respected farm leader, has traveled far and wide over America and the world, seeking for knowledge and speaking to farm and business meetings everywhere.

Yes, and I would go further. If I had my way I would in the same bill specifically direct the Secretary of Agriculture to support the price of cattle and hogs at a price of at least $4 per hundredweight more than the present market price on cattle and hogs, until the prices on cattle and hogs reached 90 percent of parity. I would expect the Agriculture Committee to set weights and grades. Sure, this will cost some money, but nothing compared to the loss of tax revenue to the United States Treasury by the lost revenue which will be brought about by the thousands of bankrupt farmers if immediate relief such as this is not provided. Some may accuse me of being too liberal. Yes, I will admit I have been quite liberal when any segment of people, the American people, need emergency relief as desperately as the Midwest farmer needs it right now. But look at my record; I will put my record of the past 17 sessions in Congress up against the best of them for not squandering the taxpayers' money.

I just said I would direct the Secretary of Agriculture to support the price of hogs and cattle. Now the reason I would do that is simply because, if I were Secretary of Agriculture, I would welcome such a directive from the representatives of the taxpayers of America, even though I had the authority under existing law to do it, as the Secretary of Agriculture has right now. But it is plain to see he will not exercise that authority for fear it would encourage greater production of hogs and cattle. My studied opinion is, that is a risk he is justified in taking under the circumstances, and which all fairminded, informed people know, or should know at this late date.

And in addition, I cannot recommend too strongly that we place a complete embargo on the importation of meat and live cattle from foreign countries until such time that hogs and cattle prices bring 100 percent of parity to our own producers. Here are the figures on imports and exports of beef, pork and cattle for the first 9 months of 1955, furnished me by the Department of Agriculture:

Beef and veal imports, 90,700,000 pounds.

Beef and veal exports, 34,751,000 pounds.

Pork product imports, 124,148,000 pounds.

Pork product exports, exclusive of lard, 54,144,000 pounds.

Live cattle, mostly from Mexico, 240,135 head.

Exports, 19,823 head.

My friends, that borders on criminal in the face of constantly falling prices on meats here in the U. S. A. Oh, some may say that is only a drop in the bucket compared to our total production. Well, it is a mighty big drop and simply adds that extra straw which is breaking the camel's back. And let me tell you here and now, my dear friends, there is no other Nation in this whole, wide world that hesitates one minute to impose a complete embargo on imports from us when they have a plentiful supply of their own, even though we have shoveled our taxpayers' dollars into their coffers by the millions and billions of dollars. How stupid can we be? And that silly business has been going on for the past 10 years. For all our sakes let us stop.

That, Mr. Speaker, is my recommendation for quick and I believe effective aid to help our distressed farmers over the present emergency farm price squeeze or farm panic, whatever you wish to call it.

I also know the cotton farmer is having a bad time. I will leave that problem to my colleagues from the cotton producing States, with the assurance that I shall be just as fair to the cotton producer as I am to the farmers on whom

America depends for a plentiful supply of food for our daily bread.

I am gathering facts and figures, in preparation for introduction of two bills which, after a lot of study, I have concluded should be made law to help bring about a stable prosperous farm economy over the long pull. But first and foremost in my mind now is to assist my colleagues on the Agriculture Committee in bringing out a bill at the earliest possible time which can pass both Houses of Congress quickly and be signed by the President for immediate, effective aid to a great multitude of our distressed farmers.

How To Get Rid of Our Agricultural Surpluses

EXTENSION OF REMARKS
OF
HON. BEN F. JENSEN
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. JENSEN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article:

HOW TO GET RID OF OUR AGRICULTURAL SURPLUSES

(By Dave Livingston, Washington, Iowa)

SELL THE GRAIN BACK TO THE FARMERS WHO RAISED IT, AT A CUT PRICE IN RETURN FOR ACREAGE REDUCTIONS

If corn and wheat farmers will seed down, or fallow, part of their acreage allotments next year then let them buy, from the Government surplus stocks of corn and wheat, 50 bushels for each acre of corn or 20 bushels for each acre of wheat seeded down or fallowed at their own expense. This surplus to be bought for 75 cents a bushel.

This would be starting a soil-bank plan immediately and paying for it with surplus grain instead of new tax money. Farms with less than 50 acres of allotment could elect to seed down their whole allotment and for larger farms an additional 20 percent over the first 50 acres.

For example, I have a farm with an acreage allotment of 50 acres of corn out of a total of 235 acres. Thus, under this plan, I could buy a total of 2,500 bushels during 1956, at 75 cents a bushel. In return I would seed down the whole 50 acres at my own expense. I would then buy this feed through my local ASC office, where they already have my whole allotment record. In order to spread this surplus selling so that livestock numbers would not be increased, nor the grain trade upset they could restrict my purchases to 25 percent of my allowance in any 60-day period and also begin delivery at the beginning of the crop year (July 1 on wheat and September 1 on corn).

This farm is the kind that is commonly referred to as the family-size farm. It is rough and hilly in spots. The 50-acre allotment is already so low that it is next to impossible for a man to make a living farming it because it takes as much machinery and more labor to grow this 50 acres of corn than it does to grow 100 acres or more on a better farm. On the other hand this farm lends itself to a grass-farming program and should be planted to grass. It is one of the hundreds of thousands of farms where the hilltops and pastures were plowed up, during World War II and the Korean police action, to produce the much needed extra corn and soybeans at that time. Because of the lowering of farm prices and income as well as the rise in expenses since that time it has been necessary to continue to farm these hills intensively to make a living.

The return of this farm, and others like it, to grass farming presents a much greater problem to the individual farmer than has been generally recognized.

First. A farmer of this type must have some grain to balance his grass in order to get maximum returns on his livestock program. A livestock program is inevitable on this type of land because that is the only way you can convert grass into income. This need for grain has been the main reason for the continuation of corn farming on these hill farms.

Second. When a farmer converts his land from grain to grass there will be a time lag of 1 year in his income until this new grass becomes available as livestock feed. If a soil-bank plan were developed, where the Government rented this land to get it out of grain production, it would break these farmers financially.

Let us suppose the Government paid as much as $20 per acre rental. That would be $1,000 rental on the 50 acres. Then the farmer must buy his grain. Even at $1 per bushel he can get only 1,000 bushels which is not enough. Actually he will be able to buy much less than 1,000 bushels at the current market price. Under my plan he can get 2,500 bushels, or about normal production, while he makes this conversion.

Third. Not only will the individual farmer's income be cut, during this lag time, but eventually this farmer will need a little more capital to stock this new grass properly. Through my plan he could bridge the immediate gap, without being hurt financially, and still reduce grain acreage.

I'm not enough of an expert to figure out what will be needed more than a year in advance in agriculture (and the experts are not doing so good either) but I know that if you want corn ground seeded down to grass on my farm you can get it done in 1956 by my "Grain Purchase Plan." I'll be very happy to seed down my ground at my own expense and thus take my chances on this year of lag time.

Some people will try to find fault with this idea because it will increase livestock numbers. It will be 2 years before that could start. After that cattle and sheep will gradually increase. They will have to increase for two reasons. In the first place we will need more livestock to furnish food for our increasing population. Second, from the farmers standpoint, he will have to buy livestock to eat up this new grass. If these farmers cannot increase their livestock numbers to consume this grass then they will go broke. The reason livestock will not increase immediately, and will not increase too rapidly in the future, is that livestock numbers are geared to the amount of the supply and price of grain. Under this plan the farmers would have no more grain on their farms than if they continued production. They simply buy a year's supply out of surplus instead of raising it. Who says that is not what we need in this country?

From my standpoint this plan would temporarily reduce my production costs.

From the standpoint of the Government it would get rid of the grain surpluses in return for acreage reductions. Production of wheat and corn would be reduced in direct proportion to the amount of the surpluses sold. Thus storage problem of the normal carryover would be minimized to say nothing of the future savings in storage costs and the waste through spoilage. When this surplus is once used up then the problems of agriculture are minimized no matter what kind of a farm plan we have. It would take the farm problem out of politics.

From the standpoint of the general taxpaying public it would reduce the cost of any soil-bank plan by paying for it, at least in the beginning, with money already invested in surpluses and it will get immediate action.

It can be done in 1956 with very little new legislation.

This whole plan is purely and simply an additional option under the proposed soil-bank plan. It can be offered along with the land-rental option already proposed, and endorsed, by many of the leading farm organizations.

One trouble with most farm plans up to date has been that they start with a great big overall situation and work down to the individual farm. This plan works in reverse. It begins at the proper starting point, the individual farm, and works up. As soon as the surplus is gone it is finished and it takes no new organization to make it work. It is simply an additional feature of the ASC.

It is the sum total of the production of a lot of little farmers over a period of the last 10 years, which created most of the surplus in the first place. So why not take the perfectly logical step and let these same little farmers use it up while they get their farms back into grass?

Keep one thing clearly in mind. The collective excess we have today, of both wheat and corn, has been accumulated over a period of 10 years. In fact the gross total has increased very little during the past 5 years. It makes no difference whether this accumulation took place under the Democrats or the Republicans. It makes no difference whether rigid 90-percent supports or flexible supports are to blame. It makes little difference whether the Farm Bureau, Farmers Union or the National Grange are in favor of rigid or flexible supports nor what plan they advocate in the future. The fact remains that we have about 1 billion bushels of wheat and corn as a combined accumulated surplus, over and above a normal carryover, and the big job is to get it consumed.

Why run around all over the world trying to sell wheat for export? In the first place we have very little really good wheat available for export. In the second place the State Department would probably tear their hair out if we got the job done. In the third place we already have a pretty lousy reputation for poor-grade wheat because of carelessness in shipments already made. I was in Europe, the Middle East, and Egypt last spring and almost everywhere I heard the complaint that American wheat was inferior and a poor buy.

Because of low-protein content, poor grade, contamination, and other causes most of the wheat we now have in storage is only good for livestock feed so let's quit kidding ourselves and use it up for that purpose.

Now to answer several questions involved in this plan.

Why do I propose 50 bushels of corn to the acre?

Because that is a high average yield. Remember we are trying to get rid of surpluses so that is a pretty fair deal for both the farmer and the Government. If 1 billion bushels of surplus grain were sold at that rate it would put 20 million acres out of production. This is assuming it would all be used to put corn land out of production.

Why sell 20 bushels to the acre of wheat land?

Because here also it is a fair high average yield figure. If the wheat surplus were all bought back by wheat farmers, at the rate of 20 bushels to the acre, it would put 50 million acres out of production.

As a matter of fact this plan would get rid of surpluses so fast that the amount to be liquidated in any one year would probably have to be limited to 300 million bushels or we could suddenly create famine conditions. Remember. When you sell 300 million bushels by this method you also take out of production another 300 million bushels for the

next year making a net change in position of 600 million bushels.

How can a small farmer pay for this grain?

He can buy it one truckload at a time. He will need less money at one time to do this than he would need to buy seed, fertilizer, and gasoline to plant his whole crop in the spring. If he can't do this he is "busted."

If either a wheat or corn farmer has no livestock what can he do?

He can sell it into the cash grain market. But he cannot dump a lot at one time because of the provision that he can only buy 25 percent of his allowance in any 60-day period. He simply buys it from the Government, in lieu of raising it, and then sells it in the open market. As an additional feature this would prevent the market gluts at harvest time.

Will this plan increase livestock numbers?

I partially answered this earlier. It would not do it immediately but it would as time went on. This plan, in itself, would not do it, because of the "cheap" grain, because no single farmer would get enough grain, and second, he would have his purchases spread out. Any additional grain he needed for increased livestock he would have to buy on the open market. It is reasonable to assume that the cash grain market would stabilize around the loan figure so that any livestock producer would think twice before he increased production.

Would it interfere with soil conservation?

The answer is "No." Most soil conservation practices such as contour ridges, waterways, ponds, et cetera, are carried out when the fields are in grass. It is the farms in the hill country that need these practices and these are the ones which would benefit most from this plan, therefore it would have the effect of speeding up conservation measures.

European Observations Report of Hon. Leon H. Gavin, of Pennsylvania

EXTENSION OF REMARKS

OF

HON. LEON H. GAVIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. GAVIN. Mr. Speaker, pursuant to authority granted me by the chairman of the House Armed Services Committee and invitational orders issued by the Department of the Army, I visited Germany, Austria, Italy, Spain, and France during the period September 18 through October 16, 1955. As you know, I have followed carefully since the end of World War II the industrial, economic, military and political development of the various peoples of Europe who are allied with us in the so-called Western bloc. My visit was brief; however, I met and conferred with a variety of United States officials who represent us in this important area and I was given detailed briefings covering events which occured subsequent to my last visit. More important, it was my privilege to visit our military installations and with the soldiers and officers of several of our combat units. Of the youth of America and their leaders now in Europe we can be justly proud. Accordingly, I trust that the comments which follow may be of assistance to the members of this committee who have been unable to observe our far-flung activities in Europe.

I. BERLIN

On September 19 at Berlin I conferred with Ambassador Conant. I was gratified by the calm confidence displayed by the Ambassador concerning the overall situation in Western Berlin and the Federal Government. Also I conferred with Maj. Gen. Charles H. Dasher, the United States commander, Berlin, and Brig. Gen. Francis T. Pachler, commanding general, Berlin Command. My observations concerning West Berlin are:

(a) Economic: West Berlin has continued to make strides toward full recovery. In June production reached 100 on the basis of the 1936 index. There is an air of prosperity throughout the free city. Construction of housing and business facilities is booming. Consumer goods are abundant and are being purchased. As evidence of private enterprise's confidence in the future one may observe the site cleared for construction of a Hilton Hotel in Berlin. Prior to the war Berlin was primarily a capital city and a finance and transportation center. The loss of these functions has forced Berlin to revise the basis of its economy and postwar Berlin has developed its economy along industrial lines of endeavor. Unemployment is present, principally because many "white collar" workers have not been absorbed into the industrial atmosphere now present. It is reported that the unemployed in Berlin currently numbers approximately 118,000, or approximately 12 percent of the work force. In 1950, 20 percent of the work force was unemployed. At the present time Berlin is experiencing little or no difficulty in moving manufactured orders to the West and to the free world. Even in the face of a potential blockade, orders for goods maintain a satisfactory level. Regardless, Berlin will continue to rely on the strength of the market in the West and on a high level of direct assistance from the Federal Government. I remarked previously concerning the housing construction program in Berlin. Observers estimate that 18,000 dwelling units will be completed during the year 1955, and that 20,000 units are planned for the year 1956. Further expansion of new housing is in the program for 1957. The people of West Berlin look good. They are on the move. They appear well-dressed, well-fed, and confident. This appearance of well-being is reflected everywhere—by store windows, by parks, and by the municipal facilities. In contrast the Eastern Zone of Berlin seems to be covered by a thick, murky cloud of doom. Its people move in an air of purposelessness. Building lags, streets are in need of repair, municipal transportation facilities are run down and shabby. People queue for basic necessities. No greater contrast exists which displays free enterprise at its best than that shown between Free and East Berlin.

(b) Political: Refugees from the East are still streaming into Berlin. During each of the months of June and July 1955 some 13,000 sought the haven of the West. During August 1955, 17,000 sought and found similar refuge. I could find little optimism regarding the reunification of Germany. I am told that governmental officials and the free German press continually counsel the public toward patience. Whether their patience and conditioning can withstand the onslaughts of propaganda blasts and diplomatic maneuvering emanating from the East remains to be seen.

(c) Military: There has been little change in status of the United States forces in Berlin since 1954. No evidence is in sight that Russia and its satellite have decreased their forces in the Berlin area. If the pattern in the past means anything the Reds are improving upon their military potential in all respects in this area. The 6th Infantry Regiment is the major combat-ready unit stationed in the Berlin area. This organization has a splendid and glorious combat record. A continuous combat training program is in operation for various elements which travel to the Grafenwohr-Hohenfels-Vilsek area northeast of Nuremberg for maneuvers and weapons firing. The 6th Regiment is ready; it is not an occupation-type organization.

II. GERMANY

During the period September 21 through October 2, 1955 I consulted with United States military and diplomatic officials and inspected troop units in the Federal Republic of Germany. At Heidelberg I conferred with General McAuliffe who commands the United States Army element in Europe. At Wiesbaden I had lengthy discussions with Lieutenant General Tunner and staff who lead the United States Air Forces in Europe. Included in my itinerary were visits with Lieutenant General Hodes, Commanding General, 7th United States Army; Lieutenant General Hart, Commanding General, 5th United States Corps; Lieutenant General Decker, Commanding General, 7th United States Corps, Major General Ruffner, Commanding General, 2d Armored Division; Major General Van Brunt, Commanding General 4th Infantry Division; Major General Sexton, Commanding General, 5th Infantry Division; Major General Reber, Commanding General, Western Area Command; Major General Watson, Commanding General, Southern Area Command; and Major General Bradley, Chief of European Command's Planning Group at Bonn. Apart from the 6th Infantry Regiment in Berlin I inspected training activities and facilities of the following: Headquarters, 4th Infantry Division; the 12th Infantry Regiment; the 40th Tank Battalion, the 29th Field Artillery Battalion; Headquarters 2d Armored Division, Combat Command A, 2d Armored Division; the 2d Infantry Regiment; 47th AAA Battalion, 7th Engineer Battalion, 5th Medical Battalion and 759th Tank Battalion.

(a) Economic: It is my belief that the Federal Republic of Germany has attained a satisfactory level of economic recovery. The agricultural industry has experienced a full-measure of recovery and crop and foodstuff production is well above pre-war levels. Prices and wages present a formidable problem to the Federal Government, and, as in any rapidly expanding economy, the threat

of inflation exists. In Germany there are shortages of skilled and semi-skilled laborers, particularly in the accelerated building trades. Effort has been made to import laborers from Italy in this regard. The Germans apparently have confidence in the stability of their currency as savings continue at a relatively high level from the previous year. I feel that the German economy can sustain itself at current levels provided the existing markets, domestic and foreign, can be maintained. Insofar as any further United States monetary aid to Germany is concerned I feel that we should consider only military assistance and aid in the support of the Berlin situation.

(b) Political: Since 1945 the free German has been preoccupied largely with finding enough food for bare sustenance, providing himself with shelter and clothing, and finding a means of livelihood. Now that he has attained these basic wants he may devote a part of his time to the politics of the world in which he lives. After having visited Western Germany frequently since the end of World War II, I am convinced that there is little danger of a rebirth of national socialism or a trend toward communism in the foreseeable future. At this time I believe the average German's interest in politics is not intense. It may be stated that the German can be stimulated politically when national issues become clear and contain an element of symbolism with which he may identify himself. In the younger adult generation in Western Germany there may be a certain amount of pessimism toward the political future. Unless the political leadership of the nation can create and sustain the political interest of the youth, a form of nihilism may arise. I am confident, however, that the leadership of Germany will do everything within its power to prevent the growth of such a political attitude and climate. The creation of a military force within the Federal German Government is so closely keyed to the political situation that I deem it appropriate to discuss German national defense at this point. The German Parliament has not yet scratched the surface toward the enactment of basic national defense legislation. As an example, when I was in Bonn there had been committee-type discussion and debate concerning the pay structure for future members of the German armed services. At that time the matter had not been resolved, even to the point of bringing it to a vote. External pressure from the Russians may play the larger role in delaying the development of a new Germany military force. The issue of reunification of the country is certainly a factor to be considered in the matter of developing the military and Russian diplomacy may be expected to play upon this factor in the Russian effort to block, delay, and stall the rearmament of Western Germany. Once the defense legislation is enacted fully, however, I am sure that Western Germany will proceed with great skill, energy, and intelligence to develop its military force. Concerning this, I believe that it is incumbent upon the leadership of the United States to convince the Germans that the arms they raise will be so raised to prevent world war III. Should we allow them to entertain the slightest belief that their military forces are destined for retrograde action in the event of a communistic attack, I fear that things will be slow in building. An additional political issue involves governmental expenditures toward national defense. I am told that budget estimates for rearmament of Western Germany have been geared to the gross national product. Expenditures will, of course, depend upon the sums the Parliament will ultimately approve. At any rate, I estimate that Western Germany's defense expenditures, when approved, will comprise as large a percentage of its gross national product as that allocated defensewise by many other members of NATO. I am in favor of a generous contribution to the development of a Western German defense force which can take its place in the community of free nations and become a deterrent to aggression from the East.

(c) Military: Everywhere in Germany I found a keen awareness of the situation on the part of our own military leaders and their subordinates. All echelons are on the alert, ready to move, and understand completely their missions. I repeat that I was most impressed with the appearance of our troops. They are truly representative of our great Nation. The condition of our military equipment evidences good care and economy of supply. Housing and recreational facilities for our troops and their dependents are excellent. Training of troops in Germany poses a real problem. Maneuver areas are limited. Land is so precious that there are few unproductive areas where troops may train without regard to damage to crops or timber. Large unit training is conducted in the Grafenwohr-Hohenfels-Vilsek area. Small unit training is conducted on a limited scale in home-station areas. Our heavy vehicles, particularly tracked vehicles, inflict considerable damage on roadways, rights-of-way shoulders and bridges. Regardless of painstaking care, damage ensues when field training is conducted. Military officials in Germany are confronted with a considerable problem in providing realistic training while being mindful of damage claims which may arise as well as being aware of the limitations of funds to settle legitimate claims for damages. It is my belief that we should not quibble over moneys requested by the military where appropriations for maneuver damage payments are concerned. Many Members of Congress have expressed a concern over the Status of Forces Agreement, the Forces Convention, and other matters involving civil and criminal jurisdiction of our troops in the NATO countries and Germany. During my discussions relating to these conventions, as they apply to Germany, I found no apprehension on the part of responsible officials. I gained the impressions that the Germans will be overly fair in the application of the conventions and that should military personnel become civil offenders the Germans will remand them to military custody for such remedial action necessary. Under the terms of current agreements, the Germans do not have jurisdiction where criminal violations are involved. It remains to be seen whether the Germans will insist upon claiming jurisdiction in the field of criminal violations of law in the future. Of further concern to United States Army authorities in Germany is the reduction of deutschemark financial support for operations as a result of the return of sovereignty to West Germany. In the past dollars were used in Germany only for expenses toward which deutschemarks could not be applied; for example, the pay of our own civilian employees and the procurement of subsistence. Transportation, rents and utilities, solid fuels, repair and maintenance, communications, and construction costs were paid out of deutschemark funds. Following the ratification of the Paris Accords, a reduction in deutschemark support commenced. In effect, any further loss of deutschemark support in West Germany will result in a retrenchment program and the release of German employees, a lowering of standards of maintenance, and modifying standards of living. Collaterally it may be expected that the costs of maintaining our forces in Europe will increase in the future because of the expanding German economy and the resultant spiral increases in wages and prices.

III. AUSTRIA

On October 1, 1955, I conferred with Lt. Gen. William H. Arnold at Salzburg, Austria. For all intents and purposes the mission of United States forces in Austria was complete and the last of our troops had been withdrawn. I was gratified to learn that we leave Austria with a clean bill of health. As the result of careful negotiations, General Arnold and his staff were able to conclude a series of agreements which preclude the accrual of any further claims against our Government arising from the tenancy of our forces in Austria. It was reported to me that an excellent return was realized on the disposal of surplus and salvage military equipment remaining after the termination of our activities in Austria. My visit to Austria out of necessity was brief. Therefore, I did not inquire into its economic and political situation. It appears, however, that the political climate in Austria remains favorable to the West and that the Austrians, as a whole, are oriented toward the West at this time.

IV. ITALY

During the period of October 3 through October 7, 1955, I conferred with United States military and diplomatic officials in Italy. Included were discussions with Ambassador Luce, Maj. Gen. Frank A. Allen, Jr., Chief of our military advisory group and his staff in Italy; Brig. Gen. John H. Michaelis, Commanding General, Southern Europe Task Force; and Col. Charles L. Williams, commander of support activities in Leghorn.

(a) Economic: On the surface, Italy appears to be maintaining expansion of her economy. On the whole we have granted her some $4.5 billion since the end of World War II. If this staggering sum has failed to revitalize and stabilize the economy of Italy for a long time to

come, then any future grants, I feel, would prove absolutely futile. Italy's heavy and other diversified industries are busy. New construction is gradually erasing evidences of wartime damage. Fields, once war-torn, have been completely returned to productive uses. Approximately 1.5 million acres, once part of large landed estates and, in some cases, unproductive for hundreds of years, have been purchased by the Government in connection with the land reformation program. The current land reformation program is scheduled for expansion. Legislation is now being prepared for this purpose. Foreign aid type funds provided by the United States will assist in the support of further reformation programs. Today Italy is almost self-sustaining on wheat. She has exportable quantities of fruits and vegetables. She still has a deficit in cotton, however.

(b) Political: The Christian Democratic Party continues to hold the larger number of seats in the Chamber. Insofar as internal reforms are concerned, I refer you to my remarks in the RECORD of January 22, 1951. The Italian tax system has yet to receive the overhaul I feel is due it. In 1949, a tax reform bill was placed high on the Government's legislative program. In 1951 I was informed that surely during that year the overhaul was imminent. Last year—1954—I was again told that tax reform legislation was in the offing. Some progress has been made in minor areas of the Italian tax structure, yet the sweeping reforms needed remain a vision. Tax proposals made in 1954 providing for penalties for failure to comply with the tax laws are making little headway. We in America have been generous toward Italy. Our taxpayers have tolerated deficit spending on the part of our Government by way of providing foreign aid. The Italian Government, in my opinion, fails to collect a satisfactory percentage of its potential revenues. Since this report was compiled tax reformation laws, I understand, have been enacted.

(c) Military: Our forces in Italy are commanded by General Michaelis, whose record needs no review here. These forces were recently a part of our garrison in Austria and they are readying themselves for a NATO role. I am satisfied that good progress is being made in this area and that the Italian Government will render excellent cooperation in the many problems involved. As a result of the rollup in Austria, a considerable amount of military supplies have been shipped to Leghorn for storage and/or further disposition. There are problems arising in connection with segregation and classifying various items of supply and there are labor and storage problems to be found; however, our officials are proceeding to resolve these problems as best and as rapidly as possible. It was gratifying to observe the port and depot area at Leghorn. At the time of my visit the area reflected good management and careful storage procedures, both covered and outdoor.

Italy, with our aid, is on its way toward developing an effective defense establishment. It is my opinion that the roles, missions, and objectives assigned to Italy within the NATO framework are realistic and can be met. This also applies to the amount of United States assistance programed for Italy. Progress is slow in some areas of the defense assistance program; but earnest effort is being made by United States and Italian authorities to achieve the aims of the program. The Italian air force is receiving modern United States aircraft. Our Air Force representatives are striving to insure that maximum benefits can be derived by the Italians in utilization of aircraft and in training. Difficulty may be found from time to time because of the peculiar structure of the Italian air force high command. The line of authority in the Italian air force seems to be split between the Secretary General and the chief of staff. As an example, I was informed that the air force chief of staff's authority is limited to matters of operations and training and that he is kept apart from matters such as fiscal management, logistics, and personnel. This arrangement is apparently traditional within the Italian Defense Ministry, and I am not prepared to advise whether we should press upon the sovereignty of Italy for a reform in this regard. Endeavors to develop, modernize, and integrate the Italian navy within the NATO sphere are progressing satisfactorily. The major problems lie in providing technicians to operate and maintain complex equipment to be found in a modern navy. The Italian army at the present is comprised of some 15½ divisions of various stages in strength. Prior to World War II the Italians were able to field some 30 divisions. When comparing prewar divisions with those currently active one must consider strength, firepower, and operating costs. United States military officials in Italy report that the prewar divisions had only 60 percent strengthwise of the present divisions, and had about 15 percent of the firepower potential of the present divisions. Italy now allocates 5 percent of its gross national produce to defense. The army receives approximately 48 percent of the total moneys allocated for defense. It could not be determined what percent of the prewar gross national product was devoted to Italy's military machine. Conscription in Italy is universal. The army draftee serves 18 months. I was encouraged to hear reports on the status of training and combat potential of the Italian army. An observer, whose military judgment is that in which I have the utmost confidence, told me that the Alpine troops in the Italian army are as capable as any troops anywhere.

V. SPAIN

In Spain it was my pleasure to confer with Ambassador Lodge; Mr. Richard Rubottom, Chief of the United States Operations Mission and staff; Maj. Gen. August Kissner, USAF, Chief of the Joint United States Military Group and staff; and Maj. Gen. Verdie B. Barnes, United States Army, and the Military Assistance Advisory Group staff. It was indeed encouraging to visit Spain and our authorities there. For in Spain, United States officials and their counterparts meet in an atmosphere of cooperation and on a clear quid pro quo basis. In the past Spain asked nothing from us and received nothing. Basic negotiations relating to the base construction program and the military defense assistance program in Spain are probably the best and most sound ever entered into by our Government and a foreign sovereign power. The use of counterpart of grant-defense support assistance for Spain per a 1953 agreement is as follows: 30 percent of the local currency counterpart funds generated by defense support dollar grants are for Spanish projects involving revitalization and expansion of strategic roads and railways and munitions programs; 60 percent of the local counterpart funds are being used by the United States for administrative and operating costs.

(a) Economic: United States economic experts in Spain report that Spain's situation during 1955 has been characterized by mixed trends. Developments thus far in 1955 have been reported relatively encouraging. Spain's general economic weakness, however, is reflected in her foreign trade and payments situation. Spain's foreign trade is the smallest per capita in Europe. Oil, cotton, wheat, and coal, so highly essential to her economy, for the most part, must be imported. On the other hand Spain has little to offer to foreign exchange excepting olive oil, olives, nuts, wines, and tomatoes. Production in various areas of the economy is up in comparison with levels achieved in recent years. Steel output is on the increase. The outlook for the citrus crop and citrus export in 1955–56 is that production will rise. The tourist industry has encouraging prospects. In 1954 tourism earnings amounted to the equivalent of $100 million in all currencies of which $30 million were in dollar exchange. It is difficult for me, and I rather suggest difficult for the experts, to predict any sort of a high degree of prosperity for Spain in the near future. Her per capita gross national income is roughly one-half of the average for Western Europe. The climate is the driest in Europe; the soil is poor and eroded. Basically an agricultural country, 60 percent of her people are employed in agriculture. Spain is most receptive to our technical-exchange program. Our experts are assisting her in many phases of her economy. Reforestation is under way. Some 200,000 acres of a potential 100 million acres have already been reforested. Soil and resources conservation programs have been instituted. Land reform and reclamation projects have been programed. Water-distribution problems are under scrutiny. All of these programs are long overdue and must be resolved with imagination and vigor. I feel that the motivation exists within Spain to proceed on these vitally needed projects.

(b) Military: Spain's defense establishment is currently receiving support through the means of the mutual defense assistance program. The cost of the program will be cumulative to the amount of $351.8 million as scheduled through fiscal years 1956–57. I have

long advocated recognition of Spain's military potential and strategic position. My recent visit to Spain left me with an even firmer conviction that it is in Spain where we may make wise and increasing investments in mutual defense. Currently programed support of Spain's army appears to be on a sound basis. Our authorities and their Spanish counterparts have agreed to concentrate the assistance toward equipping a fewer number of units to the maximum rather than spreading the assistance thinly over a greater number. End items of equipment are arriving in Spain on a good schedule. The Spaniard's grasp of the technicalities of operation and maintenance of our equipment is excellent. They are appreciative of the support and take superior care of the equipment furnished. On October 11, 1955, I inspected the activities of the 61st Armored Regiment of the Acorazada Division. United States Army technicians were present and assisting in maintenance instructions. I was informed that of the 68 tanks furnished this unit, only two were deadlined at the time for mechanical repairs. To me this is an amazing demonstration of equipment care in view of the fact that these tanks are in constant use for training purposes and that our tank is a relatively new item in the Spanish family of military vehicles. I also witnessed a tactical training problem involving a company of tanks in support of an infantry attack. The problem was well planned, realistically conceived and smartly executed. Col. Warren H. Hoover, United States Army, accompanied me during my visit to the 61st Regiment. Colonel Hoover was enthusiastic in his praise of this organization, and other units of the Spanish Army. Colonel Hoover is a mature and experienced officer and I have confidence in his judgment. I regret that time limitations prevented me from visiting more activities of the Spanish Army. Spanish military personnel are proud of the United States equipment furnished them and welcome the opportunity to demonstrate their ability to use it.

(c) Base construction program: The United States has embarked upon a construction program in Spain of a magnitude which is difficult for the ordinary layman to appreciate. To me the $327 million allocated for 1954 through 1957 for this construction are being wisely invested. The basic policies adopted for the construction program are: First, no crash; second, coordination and cooperation with Spain; third, utilize American prime contractors; fourth, utilize Spanish subcontractors; fifth, utilize Spanish materials and industry; sixth, utilize United States surplus equipment. The entire program has been characterized by fine working relationships between our representatives and the Spanish Government. The target date for completion of phase 1 is the fall of 1956 when construction is hoped to be far enough along to permit emergency operation of aircraft from the bases. It has been reported that there is an impatience on the part of the construction forces to get on with the work ahead. This is encouraging. At the time of my visit at Torrejon and Zaragoza it was extremely difficult to gage the degree of progress being made. Within the next 6 months, however, progress from a visual standpoint should be dramatic. In this connection it should be pointed out that one of the major tasks in the base program is the construction of concrete parking aprons. Construction of the aprons is time-consuming and presents a formidable task. At Torrejon, for example, the parking apron will measure some 7,500 feet in length and 1,100 feet in width when finally completed. The importance of the construction of port facilities at Rota should not be overlooked. Most of the emphasis on the program, however, has been given the air base phase. The port at Rota will probably be the key to the entire Spanish base complex and will become the largest construction project in the overall Spanish program. I believe that adequate progress is being made toward achieving our construction objectives in Spain. Many obstacles have been overcome through mutual understanding and an intense desire to cooperate on the part of our officials and their Spanish coworkers. No other country in Europe has offered the kind of cooperation rendered by the Spanish Government. Spain must be kept strong economically and militarily if it is to be maintained as a bastion of defense in the free world. A large measure of credit for the achievements thus far obtained must be given General Kissner and his very able Air Force and Navy associates. Credit must also be given the American construction firms who have joined together in advancing this venture.

VI. FRANCE

During my visit to France I had a most cordial and informative visit with Gen. Orval Cook, of the United States European Command, and Maj. Gen. George Honnen, Chief of Staff of the United States European Command. General Gruenther, at the time, was ill in quarters and I trust at this writing that he has recovered from his illness without complication. Also during my stay in France I visited the headquarters of our communications zone in Orleans and conferred with Maj. Gen. Phillip Gallagher, the commander of the zone activities. In addition I conferred at the United States Embassy regarding France's economic outlook. This section of my report will deal with the current French economic picture and with a few of the problems confronting United States military personnel stationed in France.

(a) Economic: France today is more prosperous than at any other time since the end of World War II. France has benefited along with the general economic progress in Europe. She has enjoyed a high level of dollar receipts this year and has experienced good crop weather. In June 1955 the industrial production index—excluding building—reached an alltime high of 175—on the index basis of 100 for the year 1938. This represented an 11-percent increase over the reading taken in June 1954 and 19 percent above that of June 1953. Construction of dwellings is expanding. The year 1955 will be another record year in crop production. There has been a certain stability in prices for the last 3½ years. Observers report this to be the longest period of price stability in France since 1914. It is reported to me further that French saving habits are returning, the capital market is reviving, and there is hope that private investment will replace public investment as the prime factor in the French economy. In consideration of France's improved position in foreign exchange it must be remembered that she received payments of a military nature amounting to $515 million in 1953 and $933 million in 1954. When our support of France's military budget is terminated a reduction in her external surplus will ensue. However, France can count on sizable dollar earnings from our troops stationed in France. The picture of France's economic situation in the future is not clear to me. The stark possibility of runaway inflation is always present. Her budget represents a weak spot. The stability of the French Cabinet is recognized as a factor influencing France's economic life. Her troubles in North Africa represent a serious drain on her economy. We have poured in some $9 billion in aid to France since 1945 and I ask the question as to how long will we continue to support her economic position in the Western World.

(b) Military: The United States has invested heavily in establishing a supply line from the ports of France to the German borders. This supply line supplants the old one which ran from Bremerhaven to our forces in Western Germany. The old line ran parallel and almost touched upon the western perimeter of the Iron Curtain. No one will disagree that it was a sound proposition in establishing United States Army Europe's communication zone as it now exists. In this regard much work lies ahead, particularly in the construction of various supply complexes. Current concepts hold that there must be a duplication of supply depots, dispersed in order to reduce the vast destructive powers of modern weapons of warfare. Our authorities in France are proceeding to develop the planned facilities as rapidly as time and the availability of funds permit. I gained the impression that many of the frustrating delays being encountered are occasioned by the necessity of coordinating nearly every phase of construction activity with French officials. I did not gain the impression that the French were uncooperative, rather that there is an extraordinary amount of red-tape—French variety—to slice in proceeding with virtually everything we do in France. It is not my desire that we infringe upon the sovereignty of France, however, I do feel that we are entitled to a greater degree of freedom in our operations there than we now have.

I am somewhat disturbed over the lack of a realistic housing program for our Army personnel in France with particular emphasis on housing suitable for personnel who have dependents. If we have any intention of maintaining an active communication zone in France for an extended period, then I feel a review of the dependent housing situation is clearly indicated. Currently programed de-

pendent housing construction will provide for only 40 percent of that actually required. More than 60 percent of our personnel with dependents in France are living in substandard accommodations.

VII. GENERAL CONCLUSIONS

My conclusions, based on my observations, are as follows:

First. The economic recovery of Germany, Italy, and France is complete insofar as the need for further United States aid is concerned.

Second. The level of the economy in Spain must be raised to the extent that our economic aid and construction programs will provide.

Third. The rearmament of the Federal Republic of Germany will require patience and understanding by all interested nations and a speedy rearmament should not be anticipated with optimism.

Fourth. The integration of Spain into the NATO family of nations should be the subject of early representations on the part of the United States.

Fifth. The dependent housing program for Army personnel in France should be made the subject of a thorough review.

A Joint Committee on United States International Exchange of Persons Programs Needed

EXTENSION OF REMARKS
OF
HON. FRANK THOMPSON, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. THOMPSON of New Jersey. Mr. Speaker, on Monday, January 16, 1956, I introduced a bill, H. R. 8497, to make the President's fund for participation in international affairs a permanent program. This step was in line with the recommendation of the Senate Appropriations Committee which last year said, in its report on the supplemental appropriations bill for 1956, H. R. 7278, that this fund should be made a part of the regular budget. I am very pleased to see that the President said in his budget message that—

> In view of the effectiveness of these activities (carried on by the President's emergency fund) legislation will be recommended to authorize them on a continuing basis.

For the past 2 years the Congress has appropriated an annual sum of $5 million to the fund, the broad purposes of which are, first, the presentation abroad of American cultural and athletic attractions by the Department of State; and second, United States participation in international trade fairs. The Department of Commerce has charge of the trade fair program. To date, the $5 million has been divided equally between these two programs. The USIA has done a first-rate job of publicizing these programs abroad.

In the 5 years prior to 1955 the Soviet bloc exhibited at 122 trade fairs at which the United States was not represented. With the help of this fund the Department of Commerce has been able to take positive steps to overcome this long head start by the Communists. On the strictly cultural side our leading artists have performed in some 220 major cities of the world and given the lie to the Communist line that we are barbarians. At least 12 athletic teams have been sent abroad and have been widely hailed.

The administration refused to finance the Russian trip of Porgy and Bess, our most successful cultural export to date. The U. S. S. R. tour of the company is being paid for by the Russian Government. The State Department, which approved the trip, said it could not afford any financial support. That the Russians, instead of our own Government, should be the sole sponsor of this trip is an outstanding example of penny-wise and pound-foolish diplomacy.

The President recommended only a modest increase in appropriations for the educational exchange programs of the Department of State which constitute a basic element of our long-term effort to attain a better mutual understanding with other peoples of the world. Certainly a much larger sum should have been recommended for these important activities.

In the President's own words he is "recommending a modest increase in appropriations for the educational exchange programs of the Department of State." Contrast this with the treatment accorded the information program. In the case of the latter the President recommended that appropriations be increased by $48 million from the level in the current fiscal year.

The vast difference between these two recommendations typifies the Madison Avenue approach to the problems of the world, which is the hallmark and the most distinguishing characteristic of the present administration.

I have introduced a joint resolution, House Joint Resolution 474, to establish a joint congressional committee to be known as the Joint Committee on United States International Exchange of Persons Programs. Such a joint committee will be able to make an important contribution to the advancement of these international exchange programs.

It gives me great pleasure to be able to say that Senator J. W. FULBRIGHT will sponsor this joint resolution in the Senate.

I am sure that other Members of the House will want to join me in sponsoring this legislation. I therefore invite and welcome their cooperation, and I would be happy to have similar measures introduced in the House by any of my colleagues.

International exchange of persons has proved a valuable means of developing closer cooperation among the nations of the free world. The need for such cooperation is every day more apparent. The United States Government is using this technique both for building better understanding of our country abroad and for technical cooperation and economic development. Large exchange programs in both fields are now operated by the Department of State. Students, teachers, prominent specialists and leaders in many fields are exchanged and outstanding cultural performers are sent abroad under the International Educational Exchange Program. The Congress authorized this program through the Smith-Mundt Act—Public Law 402, 80th Congress; the Fulbright Act—Public Law 584, 79th Congress; and several other acts. American technical experts are sent abroad and foreign nationals are brought to the United States for training under the International Cooperation Administration—formerly FOA and point 4.

The Congress receives reports from the Secretary of State on these programs and reviews their operation annually in connection with appropriations. The Smith-Mundt Act also provides for a United States Advisory Commission on Educational Exchange which reports directly to the Congress on a semiannual basis.

Each of these programs is reviewed separately, and by different committees of the Congress. Each of these programs is extremely complex both from the point of view of administration and source of funds. Each use dollars and foreign currencies and rely to a large extent on the efficient use of similar private resources in the United States.

It is, therefore, not surprising that some confusion has persisted in the Congress as to the relationships between these programs. It is imperative that this confusion be eliminated so that both of these efforts can achieve the most useful results.

No concerted or continuing review of these programs and their relationships to each other has ever been undertaken by the Congress. Such a review is of the utmost importance and would be of inestimable benefit to the Congress. It would help all of us to make a more realistic appraisal of these programs.

The Joint Committee on United States International Exchange of Persons Programs which my joint resolution would establish will provide the necessary review to insure the most effective planning, operation, and administration of these two important facets of our international relations.

I am confident that the Congress under Democratic control will take the leadership in these important matters.

Regarding my bill to make the President's emergency fund for participation in international affairs permanent it may be useful to recall that a subcommittee of the House Education and Labor Committee under Republican leadership in 1954 rejected 14 bills calling for a similar program saying: "We cannot endorse any of them. We do not believe this is a proper area for the expenditure of Federal funds." This position was taken in a report published almost 2 months after the Congress had appropriated $5 million for the activities proposed in the President's emergency fund.

The bills in the House were sponsored by Democratic Members of the Congress, which apparently made them unacceptable to the Republicans there. However, these bills were a serious attempt to develop the program which

had been recommended by the United States Advisory Commission on Educational Exchange beginning in 1951 and semiannually since in its 7th, 8th, and 9th reports to the Congress. The thoughtful recommendations of this Commission have been ignored by the present administration which should have taken positive action regarding them several years ago. With the introduction of my bill, H. R. 6874, and the hearings held on it by the Subcommittee on Distinguished Civilian Awards and Cultural Interchange and Development under the chairmanship of my distinguished colleague, Representative LEE METCALF, Democrat, of Montana, in the House Committee on Education and Labor, the administration finally has bestirred itself.

The legislation introduced in the 83d Congress by its Democratic Members for the purpose of establishing a cultural-exchange program was strongly supported by one former Republican Member of the Congress who testified in favor of it saying:

There is an enormous propaganda weapon which the Russians are using against us, with the most telling effect, all over the world. They are posing, and getting away with it, as the people of culture, as juxtaposed to us who are painted to the world as the people who don't care for culture. The Russians are doing an enormous job in that. They have sent traveling artists, violinists, pianists, whole ballet companies, theater companies, into the big world centers, and they have made a very distinct impression. Let us not kid ourselves on that. They have made a very distinct impression.

Despite this impressive warning the Republican members of the subcommittee last year recommended that none of the bills referred to in this report be passed.

The text of my joint resolution to establish a joint congressional committee to be known as the Joint Committee on United States International Exchange of Persons Programs follows:

Joint resolution to establish a joint congressional committee to be known as the Joint Committee on United States International Exchange of Persons Programs

Resolved, etc., That (a) there shall be a joint congressional committee known as the Joint Committee on United States International Exchange of Persons Programs (hereinafter in this joint resolution referred to as the "joint committee").

(b) The joint committee shall be composed of 22 members as follows:

(1) Eleven Members of the Senate, appointed by the President of the Senate, as follows:

(A) Two from each of the following committees, one from the majority and one from the minority party: The Committee on Foreign Relations, the Committee on Appropriations, the Committee on Labor and Public Welfare, and the Committee on Government Operations; and

(B) Three at large from the Senate, two from the majority and one from the minority party.

(2) Eleven Members of the House of Representatives, appointed by the Speaker of the House, as follows:

(A) Two from each of the following committees, one from the majority and one from the minority party: The Committee on Foreign Affairs, the Committee on Appropriations, the Committee on Education and Labor, and the Committee on Government Operations; and

(B) Three at large from the House of Representatives, two from the majority party and one from the minority party.

(c) No person appointed by the Speaker of the House under subsection (b) (2) (A) shall continue to serve as a member of the joint committee after he has ceased to be a member of the committee of the House of Representatives of which he was a member when appointed to the joint committee, except that a member who has been reelected to the House of Representatives may continue to serve as a member of the joint committee notwithstanding the expiration of the Congress.

(d) A vacancy in the joint committee shall not affect the power of the remaining members to execute the functions of the joint committee, and shall be filled in the same manner as in the case of the original selection.

(e) The joint committee shall elect a chairman and vice chairman from among its members, and the chairmanship and vice chairmanship shall rotate between the two Houses with each session of Congress.

(f) Subject to applicable provisions of law, the joint committee may appoint and fix the compensation of such personnel as it shall determine to be necessary to carry out the purposes of this joint resolution.

(g) The expenses of the joint committee shall be paid one-half from the contingent fund of the Senate and one-half from the contingent fund of the House of Representatives, upon vouchers signed by the chairman or vice chairman.

SEC. 2. (a) The joint committee shall—

(1) conduct public hearings on, and cause studies to be made concerning, the extent and effectiveness of all United States international exchange of persons programs, including the international educational exchange programs authorized by section 32 (b) of the Surplus Property Act of 1944 and by the United States Information and Educational Exchange Act of 1948, the interchange of persons under the technical assistance programs carried on by the International Cooperation Administration, and the cultural presentations programs of the President's Emergency Fund for Participation in International Affairs;

(2) cause studies to be made of the relationships among the various United States international exchange of persons programs, exclusive of those relating to military activities, to insure their most effective planning, operation, administration, scope, and effectiveness and to determine their relationship in these respects to private programs in the same fields; and

(3) provide a continuous, cooperative relationship between the Congress and the various United States international exchange of persons programs and similar or related programs both public and private in order to foster, encourage, promote, and otherwise assist their further growth and development.

(b) As used in this joint resolution the term "United States international exchange of persons program" means any program, operated by or financed in whole or in part by any department or agency of the Government, involving the exchange of persons between the United States and other countries for any purposes whatsoever, exclusive of military purposes.

SEC. 3. The joint committee shall report to the Congress twice annually (beginning on July 1 or January 1 next occurring after the date of the enactment of this joint resolution), and at such other times as it deems necessary, on the extent and effectiveness of the United States international exchange of persons programs; and shall recommend to the President and the Congress steps considered necessary to improve the quality of all such programs.

SEC. 4. For the purposes of this joint resolution the joint committee, or any duly authorized subcommittee thereof, is authorized to hold such hearings, to sit and act at such times and places, to require, by subpena or otherwise, the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, to procure such printing and binding, and to make such expenditures, as it deems advisable. The provisions of sections 102 to 104, inclusive, of the Revised Statutes shall apply in case of any failure of any witness to comply with a subpena or to testify when summoned under authority of this section.

The Lawyer-Accountant Controversy

EXTENSION OF REMARKS
OF
HON. GLENARD P. LIPSCOMB
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. LIPSCOMB. Mr. Speaker, I have just read in the January 1956 issue of the National Public Accountant, published by the National Society of Public Accountants, a reprint of a speech delivered by Erwin N. Griswold, dean of the Harvard Law School, at a luncheon meeting of the section of taxation of the American Bar Association, held at the Benjamin Franklin Hotel, Philadelphia, Pa., on Sunday, August 21, 1955, on the so-called lawyer-accountant controversy.

The learned dean has obviously devoted a great deal of thought to the proper place of the accountant and the lawyer in the field of taxation, and is to be commended for his efforts in seeking an answer to this problem.

He recognizes that both professions contribute much to the efficient administration of our tax laws—much to help the ordinary citizen who is so frequently left bewildered by the ever-increasing complexity of our revenue-raising techniques.

In the dean's most lucid analysis of the problem he notes that most lawyers and accountants practice together in a spirit of cooperation and harmony. The difficulties which have arisen between accountants and the organized bar have, for the most part, concerned situations arising in the gray undefined area in which the legitimate activities of the attorney and the accountant seem to overlap and intertwine.

In treating with one aspect of this problem, practice of accountants through the administrative levels of the Internal Revenue Service, Dean Griswold notes that the certified public accountant is admitted to practice, as are lawyers, on the basis of his having qualified via a recognized examination. He expresses concern, however, over the possibility that certain revisions in Treasury's regulations may be adopted with the result that persons with no professional status whatsoever could qualify for admission to practice. He cites as an example the possibility of a disbarred attorney gaining special enrollment by

passing the Treasury Department's examination. This possibility is extremely remote if, indeed, it exists at all. Any practitioner, before being granted special or general enrollment, must pass a rigid character check and satisfy the Director of Practice that he is of good character and reputation.

In this and other areas Dean Griswold alludes to the problem of distinguishing between the qualified public accountant and the unqualified practitioner. He has no difficulty with the certified public accountant, however, while he recognizes that there are many qualified public accountants who are not certified, he contends that he can find no benchmark against which to measure this group.

Mr. Speaker, I practiced as a public accountant in California prior to my election to Congress, and in my State, as in several others throughout the country, we have a statute which regulates the practice of accountancy and it covers public accountants as well as certified public accountants. In the above-mentioned jurisdictions I would suggest the licensing requirement would serve as a reliable measure for judging the qualifications of the public accountant. There also exists another valid criterion which I commend to Dean Griswold's consideration. On the national level the National Society of Public Accountants represents qualified and ethical public accountants in every State in the Union. Members of this organization—which includes both public accountants and certified public accountants—are qualified and reputable practitioners who are bound by the strictest rules of professional conduct. I consider it a privilege to claim membership in this fine accounting society and I was proud beyond measure when they honored me as their "Man of the Year" in 1955.

I believe many of the real and imagined differences between the two great professions of accountancy and law could be resolved if the American Bar Association, representing the legal profession, and the American Institute of Accountants and the National Society of Public Accountants, representing the accounting profession, would gather around the conference table and discuss their mutual problems.

As Members of the House know, I introduced legislation in the 84th Congress, 1st session, H. R. 2416, to clarify the accountants status in the matter of Treasury practice. I am convinced that this legislation is desirable; however, I also realize that the ultimate and overall solution to this so-called controversy between accountants and attorneys in tax practice must come through voluntary action of the three interested parties. As a member of the National Society of Public Accountants, I believe I can assure Dean Griswold, members of the American Institute of Accountants and the American Bar Association that the National Society of Public Accountants is ready and anxious to cooperate with our fellow professionals in working out a solution, not alone in the interest of accountants or lawyers, but in the interest of the American taxpayer and his Government.

The American Bill of Rights: A Living Force—Address by Hon. Clyde Doyle, 23d Congressional District, California, December 12, 1955, Before Members of the Press, Radio, and Television, Biltmore Hotel, Los Angeles, Calif.

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 5, 1956

Mr. DOYLE. Mr. Speaker, by reason of the approval of yourself and all the Members of this House of Representatives, I have heretofore been granted unanimous consent to insert in the CONGRESSIONAL RECORD the text of the following address given by me at a luncheon of the Bill of Rights Commemoration Committee, at the Biltmore Hotel, Los Angeles, Calif., on December 12, 1955.

It seems that this was the 15th annual such luncheon and said luncheon is held in honor of the members of the press, radio, and television. Also present were members of the board of supervisors, city council, city attorney's office, attorneys, judges, leaders of women's groups, community and civic groups—over 100 persons were present, I am informed.

Upon receiving the invitation of the commemoration committee to make this important address on such said occasion, I was interested, and pleased, to be informed that the reason I was thus invited was on account of my membership on, and work as a member of, the House Un-American Activities Committee, and that members of the press, television, and radio family in Los Angeles County had suggested to the Bill of Rights Commemoration Committee in charge that I be the guest speaker on this significant occasion.

The address follows:

THE AMERICAN BILL OF RIGHTS: A LIVING FORCE

(Address by Hon. CLYDE DOYLE, Member of Congress, 23d Congressional District, California; member of House Armed Services Committee and House Un-American Activities Committee; now serving his 5th term in Congress; address given at luncheon of Bill of Rights Commemoration Committee, December 12, 1955, Biltmore Hotel, Los Angeles; Mr. Joe Crail, chairman)

Mr. Joe Crail, chairman, and all members of the committee; honored guests; members of the press, radio, and television; friends, I most cordially compliment the Bill of Rights Committee for making this timely event possible. For many years I have observed the splendid emphasis the committee has placed upon recognition of the importance of the American Bill of Rights to the destiny of our American way of life. For certainly, what protects and defends the freedoms and the rights of individual American citizens, indelibly marks our national pattern of conduct for better or for worse. In my humble but considered judgment, the Bill of Rights is today a living force which we must not hesitate to defend and observe with our utmost diligence and vigilance.

In submitting my brief remarks for your consideration, I know you understand that I can only share out of my own personal experiences, largely gained from 30 active and pleasant years as a practicing attorney at the California bar and over 9 years, now, as a Member of our National House of Representatives, where I am privileged to serve as a member of two major committees, the House Armed Services Committee and the House Un-American Activities Committee.

My acceptance of the kind invitation extended me to be your main speaker on this very important and pleasant occasion, naturally caused me to dig deeper into the history and significance of our American Bill of Rights to all American citizens, regardless of national origin or economic station in life. So, it may well be that I today am the chief benefactor, because I am confident my restudy of our Bill of Rights has not only refreshed and strengthened my dedication to its high purposes, but, it has made me more determined to take advantage of every opportunity afforded, to be more vigilant in my protection of the freedoms and rights of all American citizens. Out of my own recent experience thus gained, I advocate that each American citizen not only read the Bill of Rights this very week we are here observing, but that each also studiously read some of the pertinent history relating to these especially cherished amendments to our Constitution.

It is well that we remember that the American colonists, beginning with early Virginia, were settled under royal charters, granted by the Kings of England. You will also recall that these charters almost always contained very strict and extremely burdensome reservations in favor of the English Crown. They did not fail to enumerate limitations and restrictions upon the exercise of civil and political liberties which must be strictly observed by these early emigrants from England. These colonists did not acquire civil and political liberties as they were then known in England. In fact, as early as 1612 the Virginia colonists protested to the English Crown, against the deprivation of these rights. So, eventually, the Revolutionary War came about.

It is well to remember that only 13 years passed between the signing of our Declaration of Independence dated in Congress at Philadelphia, July 4, 1776, and the date of the passage by Congress of these 10 amendments on September 25, 1789. Thirteen years is a very short span of time, as the history of Nations occurs. It was a very, very short period of time in our early national history. It is also well for us to remember that a total of 124 amendments to our original Constitution of 1789 were actually proposed for inclusion in the Bill of Rights, so determined were the States, that before they would finally accept the new form of Government, they must be guaranteed the civil and political liberties we are today appropriately honoring and reviewing our allegiance to. Seventeen of the 124 amendments were duly accepted by the House of Representatives and 2 of these 17 were later rejected by the Senate. That left 15 proposed amendments of the original 124; these were reduced to an even dozen before Congress approved. Then, on submission to the States, 2 of this dozen were rejected by the States, thus leaving the 10 we now revere as our Bill of Rights. Yes, it was a real living force to our forefathers. It cannot be less than a real living force to us of this generation, if we would profit by the experience of dedicated men who fought and died, that they might have individual freedom and have it more abundantly.

Each time I visit that certain historical church, St. Johns in Richmond, Va., where Patrick Henry stood at the Virginia Convention of Delegates on March 23, 1775, he having been a Delegate from Virginia to the

First Continental Congress, it gives me an actual sense of renewed and increased devotion for, on each such visit to the church pew from which he spoke, I hope you will not misunderstand me when I say, I can almost hear this great American say:

"There is a just God who presides over the destinies of nations.

"Why stand we here idle? What is it that gentlemen wish? What would they have?

"Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery? Forbid it, Almighty God. I know not what course others may take; but as for me, give me liberty, or give me death."

Granting that it is a fact that we today do not face the immediate physical dangers of which Patrick Henry spoke, am I placing it upon a level or plane too high above us this day, to urge nevertheless that we have the same attitude and spirit possessed by him?

Whenever I reflect upon the place of these 10 amendments to our Constitution as an historical fact, I also reflect upon the place of the Preamble to our Declaration of Independence, also written and declared by daring Americans devoted to the cause of individual freedom at least equal to any in our national history.

I, therefore, submit the proposition that what was then set forth in the Preamble to our Declaration of Independence, must logically have had a direct bearing upon the thoughts and attitudes of the framers of our Constitution and our Bill of Rights. To me, with only 13 years spacing these two destiny-making documents, it is crystal clear that the Bill of Rights to our Constitution was written with the awareness by the authors of each of these 10 amendments, that their predecessors in the fight to guarantee individual liberty and justice for all men, had boldly written these for the allegiance and guidance of all Americans for all time—as follows:

"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these, are Life, Liberty and the pursuit of Happiness."

Granting that these express words are not in the Bill of Rights, I respectfully submit that we cannot approach a crystal-clear appreciation of the true intent and purpose of the Bill of Rights, unless we read into them the high spiritual level declared only 13 years before in our basic Declaration of Independence.

Who is there that contends the 10 amendments are not unalienable? Who is there that contends that life, liberty, and the pursuit of happiness are freedoms for less than all Americans? Who is there that contends that all Americans are not created equal by the same Creator?

No, all the amendments known as the Bill of Rights are, by the plain fact of all American citizens having the same Creator, possessed of the same and equal unalienable rights before that Creator, and, therefore, must be in the sight of manmade laws. The fact that all men are created equal in the sight of the same Creator, is what makes the liberties and rights guaranteed in the Bill of Rights—each and every one of them—unalienable. Not to recognize this basic premise for our Bill of Rights, is to place it on such a low and material level in our thinking, that the whims of evil and designing men could change ours into a Nation governed by mere man rather than by established and revered law.

It must be self-evident, therefore, that, ours being a Government of laws and not of men, no American citizen, in or out of public office can choose to respect or enforce less than each and all of the Bill of Rights, as to all American citizens, regardless of their national origin or economic station in life. Our forefathers conceived and established the Bill of Rights as a living and necessary force for all Americans. Just to the extent to which we as a Nation practice what we preach about the Bill of Rights making all men equal in the sight of our laws, just to that extent will we deserve the blessings—the blessings of our Creator. Just to that extent, will we make for strength or weakness of the spiritual forces which also must be taken into consideration as factors which make our Nation truly a great Nation of freedom-loving men.

Let us here briefly look at the makeup of the Bill of Rights, sometimes also called a Bill of Prohibitions, sometimes called a Bill of Restraints. They make up an integrated list of "don'ts" for the United States Congress to bear in mind in their legislative processes. Without giving you the full text of each, let me enumerate briefly:

Amendment I guarantees freedom of religion; freedom of speech; freedom of the press; right of peaceable assembly.

Amendment II: Right to bear arms.

Amendment III: No quartering of soldiers in private homes in peacetimes, excepting with consent of the owner.

Amendment IV: Security of persons in their homes; against unreasonable searches.

Amendment V: No person shall be compelled to be a witness against himself in any criminal case.

Amendment VI: In all criminal prosecutions, accused shall be entitled to speedy trial; be confronted with witnesses, and have assistance of counsel.

Amendment VII: Right of trial by jury.

Amendment VIII: No excessive bail or cruel punishments.

Amendment IX: The enumeration of certain rights shall not deny others retained by the people.

Amendment X: The powers not delegated to the United States, by the Constitution, are reserved to the States, or to the people.

It having been suggested to me that some of your many members of the press, radio, and TV present would like to have me briefly discuss the work of the Un-American Activities Committee, which is one of my two major committee assignments, I will gladly do so. Whatever I say will necessarily be my own opinion.

This committee was made a permanent House committee at its creation in the 79th (1946) Congress; it has only 9 members and all are lawyers excepting 1. It operates under Public Law 601 which, by its express terms charges the committee "to investigate and report to the House the extent, character, and objects of un-American propaganda activities in the United States, and the diffusion within the United States of subversive propaganda within the United States, whether this is instigated from foreign countries or of domestic origin and which attacks the form of government guaranteed by our Constitution, and all other questions in relation thereto, which would aid Congress in any remedial legislation."

As time does not permit of more than just a few comments, I will say that I believe this committee does a very necessary, but a very trying and difficult duty. Considering the nature of its task and the types of people it very frequently has to deal with, it is entitled to your commendation for its betterment in procedures, especially as relates to the rights of witnesses.

The House of Representatives itself, last April, adopted the Doyle resolution, House Resolution 151, unanimously. This resolution, amongst other things, eliminates one-man investigations in all House committees. It does not apply to Senate committee investigations.

When I was again yesterday asked how far I went in recognizing the right of a person, under the Bill of Rights, to dissent from my views, I again replied that I would fight for a man's right to say and print and preach whatever he wished, provided he did it within the four corners of the United States Constitution as set out by established law.

The right to patriotically disagree is inherent with American citizenship and the right to be wrong, if not a violation of established law, is another right, guaranteed by the Bill of Rights.

Men who find it a burden to think frequently and clearly on the subject of civil rights for all American citizens, are not contributing toward making our beloved Nation a living force for civil rights as guaranteed by the Bill of Rights.

I again restate, as I have many times, that I do not criticize a witness before our committee for standing on his constitutional rights as provided in the fifth amendment in the Bill of Rights, if that witness is in good faith with his oath, himself, and the Congress. But, it is disgusting to have a witness raise it when the known facts frequently show that he is merely following the known Communist line of cheating on the committee, even though there is no good faith, honesty, or integrity present in his claim of the constitutional privilege.

Unless President Eisenhower was in error in his state of the Union message of 1954, the objects of the Congress, under Public Law 601, are necessary and of vital importance. The President said:

"The subversive character of the Communist Party in the United States has been clearly demonstrated in many ways, including court proceedings. When a citizen knowingly participates in the Communist conspiracy, he no longer holds allegiance to the United States."

The President's reference to court proceedings causes me to say that I am always pleased when a high court clearly states the law, as applied to any of our committee hearings, for much clear statement by the court is needed in this regard.

In Public Law 831 of the 81st Congress in the Subversive Activities Control Act of 1950, Congress declared as follows: section 2—

"As a result of evidence adduced before various committees of the Senate and House of Representatives, there exists a world Communist movement, which, in its origin, its development, and its present practices, is a worldwide revolutionary movement whose purpose it is, by treachery, deceit, infiltration into other groups (governmental and otherwise), espionage, sabotage, terrorism, and any other means deemed necessary to establish a Communist totalitarian dictatorship in the countries throughout the world, through the medium of a worldwide Communist organization."

The Second World Congress of the Communist International, Moscow, July 17–August 7, 1920, adopted resolutions spelling out denial of the right of free speech and of the press when it said—

"Communism repudiates parliamentarianism as the forum of the future—it repudiates the possibility of winning over parliaments; its aim is to destroy parliaments. The work within the parliaments consists chiefly in making revolutionary propaganda from the parliamentary platform."

Who is there who fails to recognize that the resolution adopted in 1920 is still in active force and effect in 1955?

When I was in China, Japan, Italy, England, Spain, and other foreign countries, last, I asked certain intelligence officials whether or not the activities of the Communists in their country were part of well-defined world plans. Their unanimous answer was in the affirmative.

But, in meeting this subversive conspiracy, we must not throw the Bill of Rights out

the window. There is no need of doing so. To imitate or copy totalitarian security procedures would be totally disastrous to our American way of life. It would make of the Bill of Rights a corpse instead of keeping it a living force. We must continuously be on the alert lest those who are careless in differentiating between our security needs and our freedoms, under the Bill of Rights, take the easiest path, which does not necessitate noninterference with guaranteed rights. Due process of law must hold preeminence if individual rights and liberties are to be truly preserved as intended by our Bill of Rights. This is essential to make it a living force.

In closing, may I invite you to share with me the proposition that the perpetuity of the Bill of Rights deserves the best of whatever we are in individual patriotic vigilance, vigor, valiant protection of the rights and freedoms of all men, and that by our dedicated lives we increasingly help make our Bill of Rights a greater living force; that this Nation, under God, shall continue to be even a richer blessing to all Americans, everywhere, and in perpetuity.

Pan American Airways

EXTENSION OF REMARKS
OF
HON. JOHN V. BEAMER
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, January 5, 1956

Mr. BEAMER. Mr. Speaker, today's Washington Daily News carried the information that President Eisenhower has instructed the Civil Aeronautics Board to reconsider, in the light of new developments, its decision to keep Pan American Airways off the Great Circle Route to the Orient in competition with Northwest Airlines.

Inasmuch as the Committee on Interstate and Foreign Commerce is concerned with the stability and progress of our civil air transport system, this is a most gratifying development.

We all know of the pioneering work Pan American did in spanning the Pacific 20 years ago and it seemed inconceivable to us that one carrier should enjoy exclusive privileges in flying the shortest route to the Orient. Ironically, until the President's action, Pan American, which first surveyed the Great Circle Route, was forced to use the old island-hopping route to Tokyo and beyond, a distance some 1,200 miles longer than the route now flown by Northwest.

Certainly a restudy by the CAB of this situation is necessary. A prompt decision, in line with the President's recommendations, should make for keener United States flag line competition in an area which has opened up an entirely new trade route for our large and growing cities in California, Portland, and Washington.

President Eisenhower is to be congratulated for his understanding action.

SENATE

MONDAY, JANUARY 9, 1956

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Our Father God, with our burdened lives tense and strained in a world so agitated and divided, we would seek that peace which is the gift of Thy grace to all those who with true purpose of heart turn unto Thee.

At the beginning of a new week with human problems pressing for solution we humbly bow at this wayside shrine our fathers fashioned, praying that to Thy servants here in the high functions of governance there may be given open ears that they may hear voices calling to high endeavor, open minds ready to receive and welcome new light of knowledge and truth as it is revealed to them, open eyes quick to discover Thine indwelling in all this wondrous world which Thou hast made, open hands ready to share, holding all good things in trust for Thee and Thy other children.

We ask it in the name of that Holy One who came not to be ministered unto but to minister. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, January 5, 1956, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, announced that the House had agreed to a concurrent resolution (H. Con. Res. 199) extending the felicitations of the Congress to those participating in the celebration of the 250th anniversary of the birth of Benjamin Franklin, in which it requested the concurrence of the Senate.

HOUSE CONCURRENT RESOLUTION REFERRED

The concurrent resolution (H. Con. Res. 199) extending the felicitations of the Congress to those participating in the celebration of the 250th anniversary of the birth of Benjamin Franklin was referred to the Committee on the Judiciary, as follows:

Whereas January 17, 1956, marks the 250th anniversary of the birth of Benjamin Franklin in Boston, Mass.; and

Whereas Benjamin Franklin, because of his dedication to the welfare of human society and the influence which he has exerted upon our material and spiritual development through his great and varied achievements as a statesman, diplomat, journalist, scientist, and philosopher, is universally recognized as one of the truly monumental figures of mankind; and

Whereas the contributions of Benjamin Franklin to the achievement of independence for the United States of America, to the formulation of our Constitution and the formation of the Government under which we live, and to our progress as a Nation over the years are unsurpassed by any individual in our history; and

Whereas Federal, State, and local officials of the Commonwealth of Massachusetts and the Commonwealth of Pennsylvania, respectively, will join with the Greater Boston Chamber of Commerce and the Franklin Foundation in commemorative ceremonies to be held in Boston in connection with such anniversary and also with the Franklin Institute of Philadelphia and cooperating organizations and the University of Pennsylvania to be held in Philadelphia; and

Whereas it is fitting that the Congress, as a mark of recognition and respect on behalf of all of the people of the United States, add its voice to the voices of those who are participating in these ceremonies: Therefore be it

Resolved by the House of Representatives (the Senate concurring), That the Congress extends its greetings and felicitations to all those who are participating in the commemorative ceremonies being held in Boston, Mass., and in Philadelphia, Pa., on the occasion of the 250th anniversary of the birth of Benjamin Franklin. The Congress joins with them and with all the people of the United States in expressing its appreciation of the great and indispensable part which Benjamin Franklin played, through his great and varied accomplishments in many fields, in the founding of our Nation and the establishment of a sound basis for the progress and development which our Nation has enjoyed over the years.

FORTY-THIRD BIRTHDAY ANNIVERSARY OF THE VICE PRESIDENT

Mr. KNOWLAND. Mr. President, I would not want this occasion to pass unnoticed, while the distinguished President of the Senate is in the chair. I am sure that I speak on behalf of the entire Senate and Members on both sides of the aisle when I wish him a very happy birthday. [Applause.]

Today is the Vice President's 43d birthday. He was born on January 9, 1913, in Yorba Linda, Calif. He has had a distinguished career both as a Member of the House of Representatives and of the Senate, where he served as our colleague for 2 years and as Vice President of the United States. We wish him many more birthday anniversaries in the future.

Mr. JOHNSON of Texas. Mr. President, I wish to join my colleague in wishing for the Vice President many happy returns of the day, and expressing our deep appreciation of the fairness with

which he presides over this body. He always is courteous. He always is fair. I hope he will have as many more birthdays in the future as he has had in the past.

Mr. WILEY. Mr. Vice President, I desire to agree with all the nice things which have been said about you. I also wish for you many more years of happiness and service to your country.

Mr. KUCHEL. Mr. President, I desire to join in the sentiments which have been expressed by my colleague from California, the distinguished minority leader [Mr. KNOWLAND], and my colleague from Texas, the distinguished majority leader [Mr. JOHNSON] in felicitating the Vice President of the United States on the occasion of the anniversary of his birth.

I am delighted to join with his friends in the Senate, his family, and his many friends in California in saying, "Many happy returns of the day."

The VICE PRESIDENT. The Chair thanks the Senator from California [Mr. KUCHEL], the minority leader, the majority leader, and the Senator from Wisconsin [Mr. WILEY] for their kind remarks.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that statements made during the morning hour be limited to the usual 2 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT ON OPERATIONS UNDER SOIL CONSERVATION AND DOMESTIC ALLOTMENT ACT

A letter from the Assistant Secretary of Agriculture, transmitting, pursuant to law, a report of operations, expenditures and obligations under the Soil Conservation and Domestic Allotment Act, including a report on the operations under the emergency wind erosion control program, for the fiscal year ended June 30, 1955 (with accompanying papers); to the Committee on Agriculture and Forestry.

REPORT ON ARMY AVIATION PERSONNEL

A letter from the Secretary of the Army, transmitting, pursuant to law, a report on Army officers entitled to flight pay, for the 6-month period ended December 31, 1955 (with an accompanying report); to the Committee on Armed Services.

REQUIREMENT FOR MEMBERS OF ARMED FORCES TO MAKE UP TIME LOST DURING ENLISTMENTS

A letter from the Acting Secretary of the Navy, transmitting a draft of proposed legislation to require enlisted members of the Armed Forces to make up time lost during enlistments (with an accompanying paper); to the Committee on Armed Services.

AMENDMENT OF WOMEN'S ARMED SERVICE INTEGRATION ACT, RELATING TO FLEXIBILITY IN DISTRIBUTION OF WOMEN OFFICERS IN CERTAIN GRADES

A letter from the Acting Secretary of the Navy, transmitting a draft of proposed legislation to amend title II of the Women's Armed Services Integration Act of 1948, by providing flexibility in the distribution of women officers in the grades of commander and lieutenant commander, and for other purposes (with accompanying papers); to the Committee on Armed Services.

APPOINTMENT AND PROMOTION OF DIRECTOR AND ASSISTANT DIRECTORS OF MARINE BAND

A letter from the Assistant Secretary of the Navy (Personnel and Reserve Forces), transmitting a draft of proposed legislation to provide for the appointment and promotion of the director and assistant directors of the band of the United States Marine Corps, and for other purposes (with accompanying papers); to the Committee on Armed Services.

FINANCIAL AND TECHNICAL ASSISTANCE TO CERTAIN AREAS

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes (with an accompanying paper); to the Committee on Banking and Currency.

REPORT OF BOARD OF COMMISSIONERS OF THE DISTRICT OF COLUMBIA

A letter from the President, Board of Commissioners of the District of Columbia, transmitting, pursuant to law, a report of that Board on the operations of the government of the District of Columbia, for the fiscal year 1955 (with an accompanying report); to the Committee on the District of Columbia.

REPORT ON PREVENTION, DETECTION, AND PUNISHMENT OF CRIME IN THE DISTRICT OF COLUMBIA

A letter from the Chairman, Council on Law Enforcement in the District of Columbia, transmitting, pursuant to law, a report on effective prevention, detection, and punishment of crime in the District of Columbia, for the period January 1, 1955, to December 31, 1955 (with accompanying papers); to the Committee on the District of Columbia.

REPORT OF CHESAPEAKE & POTOMAC TELEPHONE CO.

A letter from the vice president, the Chesapeake & Potomac Telephone Co., Washington, D. C., transmitting, pursuant to law, a report of that company for the year 1955 (with an accompanying report); to the Committee on the District of Columbia.

REPORT OF UNITED STATES TARIFF COMMISSION

A letter from the Chairman, United States Tariff Commission, transmitting, pursuant to law, the 39th report of that Commission, for the period October 1, 1954, through September 30, 1955 (with an accompanying report); to the Committee on Finance.

TRANSFER OF CERTAIN RESPONSIBILITIES BY SECRETARY OF THE INTERIOR

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to transfer certain responsibilities of the Secretary of the Interior to the Public Housing Commissioner and the Secretary of Agriculture, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

AMENDMENT OF TITLE 18, UNITED STATES CODE, TO PROHIBIT INTRUSION UPON THE PRIVACY OF FEDERAL JURIES

A letter from the Attorney General, transmitting a draft of proposed legislation to amend title 18, United States Code, so as to prohibit intrusion upon the privacy of Federal juries (with an accompanying paper); to the Committee on the Judiciary.

PAYMENT OF CERTAIN CLAIMS BY SECRETARIES OF MILITARY DEPARTMENTS

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to authorize partial payment of certain claims which are certified for consideration of the Congress by the Secretaries of the Military Departments (with an accompanying paper); to the Committee on the Judiciary.

TABLES OF BANKRUPTCY STATISTICS

A letter from the Director, Administrative Office of the United States Courts, Washington, D. C., transmitting, pursuant to law, tables of bankruptcy statistics, with reference to bankruptcy cases commenced and terminated in the United States District Courts, for the fiscal year ended June 30, 1955 (with an accompanying document); to the Committee on the Judiciary.

AMENDMENT OF CODE RELATING TO APPEALS FROM INTERLOCUTORY ORDERS OF UNITED STATES DISTRICT COURTS

A letter from the Director, Administrative Office of the United States Courts, Washington, D. C., transmitting a draft of proposed legislation to amend section 1292 of title 28 of the United States Code relating to appeals from interlocutory orders (with accompanying papers); to the Committee on the Judiciary.

REPORT OF RESERVE OFFICERS ASSOCIATION OF THE UNITED STATES, INC.

A letter from the Executive Director, Reserve Officers Association of the United States, Inc., Washington, D. C., transmitting, pursuant to law, a report of that Association, dated March 31, 1955 (with an accompanying report); to the Committee on the Judiciary.

AMENDMENT OF SECTION 345 OF THE PUBLIC HEALTH SERVICE ACT

A letter from the president, Board of Commissioners of the District of Columbia, transmitting a draft of proposed legislation to amend section 345 of the Public Health Service Act (with an accompanying paper); to the Committee on Labor and Public Welfare.

REPORT OF BOARD OF DIRECTORS OF TENNESSEE VALLEY AUTHORITY

A letter from the Chairman and Members of the Board of Directors, Tennessee Valley Authority, Wilson Dam, Ala., transmitting, pursuant to law, a report of that board for the fiscal year ended June 30, 1955 (with an accompanying report); to the Committee on Public Works.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A resolution adopted by the mayor and board of supervisors of the city and county of Honolulu, Hawaii, favoring the enactment of legislation to enable the Territory of Hawaii to authorize that board to issue general obligation bonds; to the Committee on Interior and Insular Affairs.

A letter from the Deputy Director, Civil Defense Corps, State of Ohio, Adjutant General's Department, Fort Hayes, Columbus, Ohio, transmitting a copy of an interstate civil defense and mutual aid compact entered into by the States of New York and Ohio, together with an amendment to the original compact between the States of Oregon and Ohio (with accompanying papers); to the Committee on Armed Services.

By Mr. GREEN (for himself and Mr. PASTORE):

A resolution of the Legislature of the State of Rhode Island; to the Committee on Public Works:

"Resolution respecting the Woonsocket Channel improvement project, and the Pawtucket flood wall project, integral parts of the flood control plan for the Blackstone River Basin authorized by the Flood Control Act, approved on December 22, 1944, Public Law No. 534, 78th Congress

"Whereas by Resolution 170, passed at the January session, 1953, the general assembly

gave assurances to the Corps of Engineers of the United States Army of the State's willingness to participate in the Woonsocket channel improvement project authorized by the Flood Control Act, which project was approved on December 22, 1944 (Public Law 534, 78th Congress); and

"Whereas the floods of August 8, 1955, have shown the need for greatly expanding the planned capacity of the channel of the Blackstone River, materially raising the overall cost of the project; and

"Whereas local interests are required to (1) provide without cost to the United States all lands, easements, and rights-of-way necessary for the construction of the projects; (2) hold and save the United States free from damages due to the construction works; (3) maintain and operate all the works after completion in accordance with regulations prescribed by the Secretary of the Army; and (4) in the case of the Woonsocket channel improvement project, alter highway and foot bridges; and

"Whereas the city of Woonsocket, having a vital interest in protective measures to alleviate the recurring and economic losses repeatedly experienced in the past through the flooding of the Blackstone River within its boundaries, has evinced an interest in and given firm intention to share in the local contribution required of it; and

"Whereas the State of Rhode Island has a continuing economic interest in flood control of the Blackstone river and a substantial permanent financial investment to protect by reason of the installation of a system of sewage collection and treatment facilities, State highways, bridge structures and a State pier serving the communities bordering the Blackstone River within the State of Rhode Island: Now, therefore, be it

"*Resolved*, That the general assembly hereby concurs in the findings and recommendations of the Corps of Engineers of the United States Army as to both the Woonsocket channel improvement project and the Pawtucket flood wall project; approves the efforts of the citizens and authorities of the city of Woonsocket to participate financially in this undertaking; and finds it prudent and essential to safeguard the health, safety, and welfare of the citizens of the communities in the Blackstone Valley and all of the citizens of the State otherwise, and to protect the financial investment and services of vital concern within that area; and the general assembly hereby gives assurance of the willingness of the State of Rhode Island to participate in the Woonsocket channel improvement project to an extent equal to 50 percent of the 'local share' required, which 50 percent is estimated at this time to be $600,000; provided the city of Woonsocket participates to an equal extent; and be it further

"*Resolved*, that the secretary of state is hereby authorized and directed to transmit duly certified copies of this resolution to the Corps of Engineers of the United States Army, the Honorable Secretary of the Army, and the Senators and Representatives from Rhode Island in the Congress of the United States."

RESOLUTIONS OF MINNESOTA ASSOCIATION OF COOPERATIVES

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the body of the RECORD, and appropriately referred, the various resolutions adopted by the Minnesota Association of Cooperatives at its annual meeting on October 31 and November 1, 1955.

There being no objection, the resolutions were referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

RESOLUTION 13

Whereas the American farmer is presently in a serious economic position due to disparity of income as compared to other segments of the national economy: Be it

Resolved, That the Congress take action that will alleviate the immediate problem of inadequate farm income by whatever means that may be required to save our farmers from insolvency; be it further

Resolved, That we pledge our resources and experience toward the development of a more complete production, processing and marketing system, based on cooperative principles and effort, that will assure producers and consumers alike of fair and equitable treatment in the procurement of the necessities of life; and be it further

Resolved, That a copy of this resolution be sent to each member of the congressional delegation and Senators, and a copy be sent to the White House.

RESOLUTION 14

Whereas due to the efforts of enemies of the cooperative movement, misconception of the basic principles of income taxation as it applies to nonprofit corporations has been widely fostered in the public mind; and

Whereas the Congress had declared that the present method of income taxation as applied to nonprofit corporations is just: Be it

Resolved, That we urge cooperative organizations everywhere to unite in a movement to inform the public of the true situation that exists insofar as income taxation of nonprofit corporations in general is concerned.

RESOLUTION 15

Whereas the Secretary of the Treasury has recommended that a withholdings tax be imposed on the patronage net margins that accrue through cooperative marketing and purchasing: Be it

Resolved, That MAC hereby go on record as being opposed to such withholdings unless the same principle of collecting income taxes be applied to all forms of business.

RESOLUTION 18

Whereas agriculture is beset with a problem of surplus commodities; and

Whereas large quantities of these surplus items are consumed in the school-lunch program to the benefit of the students and staff of the participating schools; and

Whereas only a portion of our schools are participating in the lunch program at the present time: Be it

Resolved, That we urge the expansion of the school-lunch program for the benefit of added numbers of individuals and the further aid in reduction of surplus agricultural commodities, including milk.

ACQUISITION OF SURPLUS FEDERAL PROPERTY BY STATE AND LOCAL GOVERNMENTS—RESOLUTION

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the body of the RECORD, and appropriately referred, a resolution adopted by the National Institute of Governmental Purchasing at their 10th annual conference on October 19, 1955. Their resolution supports and endorses my bill, S. 1799, which will enable State and local governments to acquire Federal surplus property at negotiated or fixed prices.

There being no objection, the resolution was referred to the Committee on Government Operations and ordered to be printed in the RECORD, as follows:

NATIONAL INSTITUTE OF GOVERNMENTAL PURCHASING, INC.,
Washington, D. C., November 18, 1955.

Senator HUBERT H. HUMPHREY,
Senate Office Building,
Washington, D. C.

MY DEAR SENATOR HUMPHREY: The National Institute of Governmental Purchasing held its 10th annual conference and products exhibit in Washington at the Hotel Shoreham on October 16–19, 1955, with a total attendance of more than twelve hundred.

At our concluding session on Wednesday, October 19, our members passed unanimously the following resolution:

"NIGP reaffirms its deep interest in the subject of the acquisition of surplus Federal property by State and local governments. The institute urges it members and the public purchasing profession generally to support actively the measure introduced in the last session of the Congress by Senator HUBERT H. HUMPHREY, of Minnesota, which will enable State and local governments to acquire Federal surplus property at negotiated or fixed prices."

I felt that you would wish to know of this evidence of interest in your measure, and I want to assure you that at the next session of the Congress we shall give you every support in your efforts to see to it that State and local governments are given an opportunity to acquire their fair share of Federal surplus property.

Our officers and directors are deeply appreciative of your active and effective help in this matter.

Sincerely,

ALBERT H. HALL,
Executive Vice President.

EXPANSION OF BRUCELLOSIS PROGRAM AND REGULATORY LABORATORY FACILITIES — RESOLUTIONS

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD, and appropriately referred, two resolutions adopted by the United States Livestock Sanitary Association at their annual meeting in New Orleans in November 1955. The Minnesota State Live Stock Sanitary Board is in full accord with the two resolutions calling for an expanded brucellosis program, and for the Department of Agriculture to furnish research and regulatory laboratory services that are essential to the livestock industry.

There being no objection, the resolutions were referred to the Committee on Agriculture, and ordered to be printed in the RECORD, as follows:

RESOLUTIONS OF THE UNITED STATES LIVESTOCK SANITARY ASSOCIATION AT THEIR MEETING NOVEMBER 16, 17, AND 18, JUNG HOTEL, NEW ORLEANS, LA.

RESOLUTION PERTAINING TO EXPANDED BRUCELLOSIS PROGRAM

Whereas the expanded and accelerated brucellosis eradication program inaugurated by the Agricultural Research Service in the fall of 1954, has received widespread acceptance and support; and

Whereas the funds authorized by the Congress to finance this program fall short of the sum needed annually to maintain this program at a level consistent with the State goal of eradication of brucellosis: Be it therefore

Resolved, That the United States Livestock Sanitary Association hereby endorses and recommends to the Secretary of Agriculture,

Director of the Bureau of the Budget, Members of the Senate and House Committees on Agriculture and Appropriations of the Congress that additional funds not to exceed $10 million be authorized for this work for the remainder of the current fiscal year and that funds not to exceed $30 million annually be authorized and provided for the 2 fiscal years following; and be it further

Resolved, That this association recommends that each State increase its financial support for brucellosis eradication consistent with the increased Federal support; and be it further

Resolved, That the United States Livestock Sanitary Association herewith pledges its full support to accomplish this purpose and recommends a similar course of action to all national livestock and veterinary organizations.

RESOLUTION PERTAINING TO REGULATORY LABORATORY FACILITIES

Whereas throughout the years the United States Department of Agriculture has furnished certain research and regulatory laboratory services that are essential to the livestock industry; and

Whereas certain laboratories have been closed and abandoned and the activities of other laboratories have been curtailed because these laboratories conduct work with organisms pathologic to man and thus these activities of the laboratories in the present locations are considered hazardous; and

Whereas this has resulted in the interruption of essential activities formerly carried out in these laboratories: Therefore be it

Resolved, That the Secretary of Agriculture, Director of the Bureau of the Budget, and Members of the Senate and House Committees on Agriculture and Appropriations be urged to provide the funds necessary to construct, staff, and maintain new laboratory facilities adequate for performing the essential research, regulatory, and diagnostic laboratory services which have been disrupted by closing the laboratory in the city of Washington, D. C., and curtailment of activities of laboratories in Denver, Colo., and Auburn, Ala.; and be it further

Resolved, That each State livestock sanitary official be urged to inform his congressional delegates of this acute need and solicit their support for the necessary appropriation.

WATER POLLUTION CONTROL—RESOLUTION

Mr. LANGER. Mr. President, I present, for appropriate reference, and ask unanimous consent to have printed in the RECORD, a letter from the Missouri River States Committee, signed by Curtis Olson, secretary-treasurer, enclosing a resolution adopted by that committee relating to water pollution control.

There being no objection, the letter and resolution were ordered to lie on the table and to be printed in the RECORD, as follows:

NORTH DAKOTA STATE WATER CONSERVATION COMMISSION,
Bismarck, N. Dak., January 3, 1956.

Hon. WILLIAM LANGER,
United States Senate,
Washington, D. C.

DEAR SENATOR LANGER: At a meeting of the Missouri River States Committee at Sioux City, Iowa, on December 14, the committee adopted a resolution endorsing Senate bill 890 as passed by the Senate of the 84th Congress. A copy of this resolution is enclosed for your information.

In another action the committee unanimously adopted a motion requesting the congressional representatives of the Missouri River Basin States to support legislation that would provide the Corps of Engineers with sufficient planning funds to complete their study of the Big Bend Dam in South Dakota.

Your favorable consideration of these two matters is sincerely requested in the forthcoming session of the Congress of the United States.

Yours very truly.

CURTIS OLSON,
Secretary-Treasurer, Missouri River States Committee.

RESOLUTION—APPROVAL OF SENATE BILL 890 ADOPTED BY MISSOURI RIVER STATES COMMITTEE, SIOUX CITY, IOWA, DECEMBER 14, 1955

Whereas water pollution control is an important part of water resource development; and

Whereas Senate bill 890 as passed by the Senate, 84th Congress, 1st Session, strengthens and continues the present temporary Federal law and increases emphasis on research and on grants to State water pollution control agencies; and

Whereas Senate bill 890 has already been endorsed by each of the 10 State health departments in the Missouri Basin: Now, therefore be it

Resolved, That the Missouri River States Committee endorse Senate bill 890 as passed by the Senate and recommend its favorable consideration by the House of Representatives; and be it further

Resolved, That a copy of this resolution be forwarded to the chairman, House Public Works Committee, and to each congressional representative from the Missouri Basin States.

FLEXIBLE FARM PRICE SUPPORTS

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD the GTA Daily Roundup for December 28, 1955, discussing agricultural problems.

There being no objection, the Roundup was ordered to be printed in the RECORD, as follows:

One of the very first things President Eisenhower did when he took office early in 1953 was to appoint a new Secretary of Agriculture, Ezra Taft Benson, a native of Utah and a leader in the Mormon Church. And, in turn, one of the very first things Mr. Benson did in his new job was to come to St. Paul, Minn., to make a speech. There he told farmers to "raise their sights above the dollar sign." And how well that has been accomplished.

Benson hinted then that he would go all-out for flexible price supports. And that he has done, as every farmer can see by his pocketbook. Flexible price supports, Benson said, will bring the supply of farm products into balance with demand. As supplies grow larger, he said, we'll lower the price support. That will discourage farmers from raising the crops that are in surplus. Supply will be brought into balance with demand.

But many farm leaders and agricultural experts, including M. W. Thatcher, GTA's general manager, warned the administration that farmers wouldn't react the way Benson said they would. As their prices are flexed downward, these people warned the President that farmers will produce more in an effort to keep their incomes up. And that is just what farmers have done. After 3 years under Secretary Benson, farm price supports are down almost to disaster levels. Farmers are busily planting every last corner of their fields, and filling pens with hogs and cattle, trying to take in enough money at these low prices to realize a decent net income.

Are they succeeding? Let's look at the record for 1955. In Minnesota farmers were blessed with fine crops. Field crop production set an all-time record. A bonanza, you would think. But, no, not under price flexing. Minnesota record crop production this year is actually worth some $35 million less than the smaller crop of 1954. Lower farm prices, aided by price flexing from Washington, more than wiped out any gain farmers might have made by growing and selling more. And that is the failure of the administration's flexible farm price policy. By cutting prices, it cuts the incomes of farm families, but it does not lower production.

A new program is needed—a bold new effort that will raise farm prices and boost the incomes of farm families. It is up to Congress to lay out that program. It will begin work next week. And to help them the Senators and Representatives will have the five-State GTA family farm economic survey. The findings of that survey are going to be printed in book form, and each Congressman will get a copy.

We'll be telling you more about the findings of this survey later. It's part of GTA's program of working for farmers wherever and whenever it can—GTA, the co-op way.

INTERNATIONAL TRADE POLICY

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter I have received from Catherine Baldwin enclosing a news item entitled "Briton Blasts United States Delays on Trade Policy."

There being no objection, the letter and article were ordered to be printed in the RECORD, as follows:

NEW YORK, *January 6, 1956.*

DEAR SENATOR LANGER: As you are back in the traces, I note that Eisenhower wants more foreign aid and a reduction of taxes—he calls it a tax amendment—to stimulate foreign investment. That means that we, the American people, are to pay increased taxes to back these foreign investments with an army. Oil in the Middle East is one, and Mr. Eden is coming here to suggest that we have a united program with England. Would it not be appropriate to have Congress press for the payment by these big corporations of the taxes that they already owe the Government from tax exemptions and take the burden off the backs of the people? There is much grumbling over taxes to develop our waterpower for the people here, but we keep on shoveling it out for foreign countries. Next week I am sending you a chart framed that may intrigue you. I doubt if some of your colleagues will appreciate it; and since—

Some commentator said on the radio Sunday morning last that we are giving $200 million to England so as to reduce their taxes that Anthony Eden might maintain his post, or maybe that comes under the category of foreign aid.

And, too, we find that all the old histories have been bought up and we will have nothing but what the internationalists want our children to know. If ever there was a betrayal of a country, we are witnessing it now, when I read in the press, and I presume you know it even better than I, that in another year we will not export any cotton because these foreign lands where American dollars have been sent to develop these countries are growing their own. Next they will tell us that the tariff is off and we will be offered the foreign cotton at lower prices because of the lower labor costs. This also applies to oil; we are producing less. Will you please tell me how these men sleep nights?

Rather than pass a bill authorizing this country to be a member of the Organization for Trade Cooperation we had better pass a bill getting us out of the United Nations and its sinister undermining of our country.

If we have to wait for tax reduction until they balance the budget, we will have to wait a long time, for another war will but increase the debt.

By the way, Colonel Rich asked me to write you again for the record of your exposure of Churchill on the Senate floor; he is still going after the SAR for making Churchill an honorary member.

I hope all is well with you and that you have your fighting armor by your side; we will need it; the farmers are not going to get anything any more than they did before.

Sincerely always,

CATHERINE D. BALDWIN.

BRITON BLASTS UNITED STATES DELAYS ON TRADE POLICY

ISTANBUL, September 14.—British treasury chief, R. A. Butler, accused the United States of "backpedaling" on free trade policies today before a world economic conference here.

In a speech to the 10th annual meeting of the International Monetary Fund, Butler said world conditions were still largely dominated by the economy of the United States, and recalled his plea for "Trade, not aid," as the way in which the world dollar problems will have to be solved.

FINDS SLOW PROGRESS

Butler called also for an increase in the dollar price of gold. This would have the effect of devaluing the dollar in international exchange dealings.

He acknowledged President Eisenhower's move to promote more liberal trade policies, but added: "Nevertheless, progress in United States good creditor policies has been slow.

"In recent weeks there have been a number of signs of backpedaling. Further sliding backward can lead only to agonized reappraisals."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KILGORE, from the Committee on the Judiciary, without amendment:

S. 31. A bill for the relief of Shih Ming Wang (Rept. No. 1314);

S. 83. A bill for the relief of Ottilie Hitzlberger Lachelt (Rept. No. 1315);

S. 133. A bill for the relief of Mrs. Maria Michela Federico (Rept. No. 1316);

S. 267. A bill for the relief of Ellen Kjosnes and Unni Kjosnes (Rept. No. 1317);

S. 277. A bill for the relief of Jean Pfeifer (Rept. No. 1318);

S. 318. A bill for the relief of Chih Shing Hwa (Rept. No. 1319);

S. 499. A bill for the relief of Giuseppe Airo-Farulla and Joseph Antoine Airo-Farulla (Rept. No. 1320);

S. 508. A bill for the relief of Victoriana Areitio Berincua (Rept. No. 1321);

S. 551. A bill for the relief of Anthony Agustino Scrivanich (Rept. No. 1322);

S. 897. A bill for the relief of Erich Anton Helfert (Rept. No. 1323);

S. 993. A bill for the relief of Eugene Alexander Figueiredo (Rept. No. 1324);

S. 1009. A bill for the relief of Kathleen Schrater (Rept. No. 1325);

S. 1055. A bill for the relief of Domenico Leonardi and his wife, Clara Corradi Leonardi (Rept. No. 1327);

S. 1193. A bill for the relief of Moosa Ebrahimian (Rept. No. 1328);

S. 1375. A bill for the relief of Pingfong Ngo Chung and Pearl Wah Chung (Rept. No. 1329);

S. 1629. A bill for the relief of Peter B. Vardy and his wife, Lillian M. Vardy (Rept. No. 1331);

S. 1651. A bill for the relief of Felisa Ho (nee Chang-Kuon) (Rept. No. 1332);

S. 1672. A bill for the relief of Bruno Romeo (Rept. No. 1333);

S. 1686. A bill for the relief of Mohammed Akbar Ashraf (Rept. No. 1334);

S. 1793. A bill for the relief of Balbino Acusin Ariasa (Rept. No. 1335);

S. 1827. A bill for the relief of Adel Kamal (Rept. No. 1336);

S. 2020. A bill for the relief of Carmen Aguado (Rept. No. 1337);

H. R. 938. A bill for the relief of Mrs. Elena Apostolescu Bustiuc (Rept. No. 1338);

H. R. 1015. A bill for the relief of Mr. and Mrs. Derfery William Wright (Rept. No. 1339);

H. R. 1022. A bill for the relief of Antonio Andrea Chitato (Rept. No. 1340);

H. R. 1145. A bill for the relief of Ora L. Powers (Rept. No. 1341);

H. R. 1183. A bill for the relief of Baldomero R. Garcia, Teresa Garcia y Braganza, Francisco Garcia, Teresita Garcia, and Eduardo Garcia (Rept. No. 1342);

H. R. 1219. A bill for the relief of the estate of Mrs. Margaret A. Swift (Rept. No. 1343);

H. R. 1667. A bill for the relief of Lieselotte Boehme (Rept. No. 1344);
